It is a wondrous advantage to a man in every pursuit or vocation to secure an adviser in a sensible woman. In woman there is at once a subtle delicacy of tact and a plain soundness of judgment which are rarely combined to an equal degree in man. A woman, if she be really your friend, will have a sensitive regard for your character, honor and repute. She will seldom counsel you to do a shabby thing, for a woman-friend always desires to be proud of you. At the same time, her constitutional timidity makes her more cautious than your male friend. She, therefore, seldom counsels you to do an imprudent thing. By female friendships I mean pure friendships—those in which there is no admixture of the passion of love, except in the married state. A man's best female friend is a wife of good sense and good heart, whom he loves and who loves him. If he have that he need not seek elsewhere. But supposing the man to be without such a helpmate, female friendships he must still have, or his intellect will be without a garden, and there will be many an unheeded gap even in its strongest sense. Better and safer, of course, such friendships where disparities of years or circumstances put the idea of love out of question. Middle life has rarely this advantage; youth and old age have. We may have female friendships with those much older and those much younger than ourselves. Moliere's old housekeeper was a great help to his genius; and Montaigne's philosophy takes both a gentler and loftier character of wisdom from the date in which he finds, in Marie de Gournay, an adopted daughter, "certainly beloved by me," says the Horace of essayists, "with more than paternal love, and involved in my solitude and retirement, as one of the best parts of my being." Female friendship, indeed, is to man "*præsidium et dulce decus*"—bulwark, sweetener, ornament of his exisience. To his mental culture it is invaluable; without it all his knowledge of books will never give him knowledge of the world.—*Bulwer.*

A Turkish Lady at Home.—When a Turk has disposed of his visitors he goes into his haremlik to dine or breakfast, first removing his babouches. This custom of removing one's shoes before entering a room is not a religious superstition, but comes of the necessity for keeping carpets clean, being that they fulfill the purpose of chairs, tables and sofas in other countries. The ladies' room may be furnished like Parisian boudoirs; but custom is stronger than fashion, and the Turks of both sexes like to recline or sit cross-legged on the floor. Their carpets are curiously soft and thick, and the carpets over the doors shut out all drafts and noises. Through the open windows that look out on the garden comes a scent of roses and the hum of bees, mingled with the laughter of children, who are playing on a well-trimmed lawn, under the eyes of the dark-eyed Circassian nurses. The mistress of the harem—the Buiuk-Hanum (great lady), to give her her full title—dresses much like an English lady nowadays, reads French novels, and plays the piano, though she dons upon state occasions, such as the chalvas, when she entertains other ladies. Chalva means a cake, but has come to designate a party at which that dainty is eaten, just as we say tea for tea party in England. When a Turkish lady gives a chalva her husband is excluded while the strange women are in the house. These guests begin to arrive toward six, accompanied by their maid servants and negroes carrying lanterns and bringing their children with them. Closely muffled, they divest themselves of their burnouses and babouches in an ante-room, and put on delicate slippers, which they have brought with them in bags. The reception rooms are brilliantly lighted up with pink, wax candles, and scented with fragrant pastilles. There is no kissing or hand-shaking between the hostess and her guests; but each lady, as she comes in, lifts her hand gracefully to her heart, her lips and her brow, which means, "I am devoted to you with heart, mouth and mind." This mode of salutation, when smilingly performed, is very pretty. The greetings being ended, the company seat themselves on chairs if there be any Frank ladies present; if not, they betake themselves to the divans and carpets, and the cake-eating begins.

A Word of Advice.—Why are girls so injudicious in their toleration of dissipated young men? It is very often the case that a thoroughly good girl will deliberately marry a man who makes no secret of his bad habits. What can she expect but misery to ensue? A life partnership should not be entered into without at least as much caution as men display in making business combinations for limited periods. No man selects his business partner from among men who drink much liquor or have other bad habits. As for mere manners and the ability to make one's self agrecable, they have not themselves influence enough among men to secure a dollar's worth of credit or to justify any one in believing their possessor on oath. A girl who is not old enough or shrewd enough to have learned what are the standards by which men are tested would be far surer of a happy life if she were to let her parents select a husband in the prosiest manner imaginable, than if she were to make her own selection in the manner peculiar to girls. A life partnership it not easily dissolved.

Pity the sorrows of a bald-headed man—in fly time.

For our Boys and Girls.

Our Puzzle Box.

Numerical Enigma.

I am composed of 38 letters.
My 14, 38, 21, 4 is a garden vegetable.
My 8, 25, 37, 5 names an ancient empire.
My 11, 36, 20, 9, 7 is a valuable domestic animal.
My 1, 12, 4, 17 is a large cask.
My 2, 28, 8 is an organ of the animal body.
My 3, 15, 27 is sick.
My 6, 16, 30, 8 is to change one's course.
My 13, 10, 8, 34 is a greater quantity.
My 18, 32, 31, 27 is an elevation of land.
My 19, 28, 23, 4 is a point of the compass.
My 22, 24, 28 is a place of public entertainment
My 26, 2, 27, 29, 35 is a delicious fruit.
My 33 is in all knotty problems.
My whole is a familiar assertion, which travel and wandering but verify.

OLD JOE

Problem.

The sum of three numbers is forty-eight. The smallest number is equal to one-third of the second, and the sum of the two smallest numbers is equal to one-third of the largest. What are the numbers? CEPHA.

Cross-Word Enigma.

My first is in man but not in beast;
My second is in most, but not in least;
My third is in use, but not in make;
My fourth is in bun, but not in cake;
My fifth is in try, but not in do;
My sixth is in false, but not in true;
My seventh is in life, but not in death;
My eighth is in lungs, but not in breath;
My whole is a natural land formation.

JENNIE.

Riddle.

My first and last are just alike, upon my soul!
But who my middle reads?—my middle is my whole.

Names of Authors.

1. To purchase and to proceed rapidly.
2. To tremble and a weapon of "ye olden time."
3. A manufactory and a heavy weight.
4. A feminine name and a male relative.
5. A trifle and an expression of grief.
6. A greater quantity.
7. A domestic animal and a noise of animals of the feline genus.
8. An important organ of the body.
9. To peruse.

Kissing.

Some Varieties of the Article.

To steal a kiss, that's fair.
To buy a kiss, that's stupidity.
Two girls kissing, that's waste.
To kiss not at all, that's bad taste.
To kiss another man, that's nasty.
To kiss your sister, that's necessity.
To kiss your wife, that's punishment.
To get caught kissing, that's dreadful.
To kiss the baby, that's unsatisfactory.
To kiss an ugly woman, that's courage.
To kiss the chambermaid, that's dangerous.
To kiss your mother, that's the purest kiss of all.
To kiss the girl you're engaged to, that's expected.
To kiss a rich old maiden aunt, that's hypocrisy.
To kiss a blooming girl, that's peaches and cream.
To kiss another man's pretty wife, that's nice but naughty.

TWO BRAVE LITTLE GIRLS.—A long time ago, in the Indian country, two little girls slipped away from the fort, and went down into a hollow to pick berries. It was Emmy, a girl of seven years, and Bessie, her sister, not yet six. All at once, the sun flashed on something bright, and Emmy knew that the pretty painted things she had seen crawling among the bushes must be hostile Indians, with gleaming weapons in their hands. She did not cry out, nor in any way let them know that she had seen them. But she looked all about, saw that some of the creeping Indians already were between her and the fort, and—went on picking berries, as before. Soon, she called to Bessie, with a steady voice, "Don't you think it's going to rain?" So they both turned and walked toward the fort. They reached the tall grass, and, suddenly, Emmy dropped to the ground, pulling down Bessie, too. "What are you looking for?" asked the little sister in surprise. Then Emmy whispered to Bessie, and both of them stole silently and quickly on hands and knees through the long grass, until they came to the road, when they started up, ran swiftly to the fort, dashed through the entrance, and had the gate safely closed behind them. Those girls are quite old now, but they remember very well the day they saved themselves, the fort which their father commanded, and the soldiers and other people in it, besides.

"Now," said the Professor, addressing the class, "give me your definition of light." "The sovereign I changed for you this morning, sir," replied one of the pupils promptly.

"What is the greatest change on record?" asked the Professor of history. And the absent-minded student answered, "Seventeen dollars for hack hire for self and girl, for two hours.

Humorous.

Chips.

WE know a man who is constantly tired. He says he has a thousand things to do, and one of them is to rest, "and I rest first," says he.

A BLANK DAY.—Old Gent (greeting friend): "Hello, Jorkins! Been fishing? What did you catch?" Jorkins (gloomily): "Ha' past six train home."

AN Iowa cow succeeded recently in killing an elephant, a lion and a camel. Brave cow? She did it by getting under the train bearing these creatures, and ditching it.

"DON'T show my letters," wrote a young man to a young lady whom he adored. "Don't be afraid," was the reply, "I am just as much ashamed of them as you are."

The Keokuk Constitution man says he takes his boots off to hear his corns-talk. This is because his corn field's bad. But that is too much trouble; plant your corn in the ear.

"This is a sad commentary on our boasted civilization," a tramp despondingly observed, when he discovered that the ham he had taken from the front of a shop was a wooden one.

First doctor to second doctor—"Ah, I hear you've a famous cure for rheumatism? I'm subject to rheumatic attacks myself; next time I have one of them I must ask you to let me try your cure on one of my patients."

THE DEAN.—"Well, I'm glad you're getting on well in your new place, Jemima. When I'm in London I will call and see you." Jemima—"Oh, sir, missus don't allow no followers!"

IT may interest smokers to know that a New York judge has just decided that a man has a right to punch a smoker in the ribs with the end of his umbrella if he "puffs the smoke of a bad cigar in his face, even if it is a smoking-car." The smoker who sued, had to pay costs. We shall carry an umbrella in any weather.

"No man shall kiss me except my future husband," she said, as he was about leaving her at the gate. "Suppose I agree to be your future—" "Why, then, I'll kiss you," she replied, eagerly; and she did. Her mother was informed that he had proposed, and the old lady called around next day to fasten matters, and before he knew it he was eternally booked. It was a mean advantage, but a bird in the hand is worth two on the front gate.

Household Hints.

BOILED SALAD DRESSING.—To make boiled salad dressing, put one tablespoonful of oil, one of salt, one of mustard and one of sugar into a bowl, stir until perfectly smooth, then add three eggs, and beat well; add one teacup of vinegar, then one of milk; place the bowl in a basin of boiling water, and stir until it thickens like soft custard. The time of cooking depends upon the thickness of the bowl. If it is a common white bowl and the water is boiling when it is placed in it and kept boiling all the time it will take from eight to ten minutes, but if, the bowl be very thick it will take from twelve to fifteen minutes. This will keep two weeks if bottled tight and kept in a cool place.

STRAWBERRY CUSTARD.—Make a boiled custard of a quart of milk and the yolks of four eggs, properly sweetened. Boil it in a double kettle till it thickens to the right consistency. Take a gill of sugar and a pint of ripe berries; crush them together and pass through a fine strainer. Take the whites of the eggs, and while beating them to a stiff froth add a gill of sugar, a little at a time. To the sugar and egg add the sweetened strawberry juice, beating all the time to keep it stiff. This makes a handsome pink float, which is to be placed on the top of the custard.

ANDALUSIAN SALAD.—To make it, fine cucumbers, ripe tomatoes, with solid, rosy flesh, and Spanish onions large and succulent, are required. The onions and cucumbers are peeled and minced, and the tomatoes peeled and sliced; the vegetables are arranged in layers, lightly sprinkled with fresh bread crumbs, and dressed with salt, pepper, oil and vinegar. The salad thus prepared is kept in a very cold place for an hour before using.

SPONGE CAKE.—Two eggs, whites and yolks beaten separately, one cup powdered sugar, one cup flour with one teaspoon baking powder sifted with it, flavoring, lastly a scant half cup boiling water stirred in. Bake slowly in tins four by eight inches and two inches high. Frost when done. Cut off into squares, stick the half of an English walnut on each block, and you have a pretty basket of cake.

COCOANUT CAKES.—Take half a cup of butter a cup of sugar, two eggs, half a cup of milk, half a teaspoonful of soda, one of cream of tartar, two scanty cups of flour. Bake in three jelly cake tins. Ice the cakes, and while the icing is still soft, cover thickly with grated cocoanut.

POTATOES WITH WHITE SAUCE.—Slice some cold boiled potatoes, put them in a saucepan with a piece of butter, add a little hot water, pepper and salt and minced parsley. As soon as they are quite hot stir in, off the fire, the yolk of an egg beaten up with the juice of a lemon and strained.

Health Column.

The Liver.

In the opinion of the ancients the liver was the seat of the affections and of the passions. Modern research, however, has shown this to be an error, and hence less attention and care have been bestowed on this organ than in the early days when it was supposed to play so important a part in making war and cajoling love. Undoubtedly the discovery of the fact that the liver is not the seat of the affections and of the passions, has led the people, as is natural, to neglect what formerly was an object of great solicitude; but the truth still remains that though it may not be the special seat of love and passion, it is, after all, of the greatest importance in physical health.

The structure of the liver is delicate and yet simple. It is composed of two lobes, which lie directly under the right lung, and is of a spongy character. When the venous blood is circulating from the various parts of the body to the lungs, it passes through this organ, and is there relieved of its rank poisons, part of which are used for digestion and part for a cathartic of the waste materials of the food we eat. If the organ is at all diseased *these poisons remain in it*, instead of being used as nature designed, and with every coursing of the blood through the lobes of the liver the nature of the disease is intensified, and hence a neglect of any disorder in this organ is almost certain to bring on chronic liver disease, so terrible to contemplate.

NATURAL DEATH is to die sweetly without a sob, a struggle, or a sigh. It is the result of a long life of *"temperance in all things,"* and such a death should be one of the ends and aims of every human being, so that we may not only live long, but in that long life be able to do much for man, and much for God. The love of life is a universal instinct; life is a duty, its peril or neglect a crime. We are placed on earth for a purpose, that purpose can be none other than to give us an opportunity of doing good to ourselves and to others, and to be anxious to be *"off duty"* sooner than God wills, is no indication of true piety. The good man has one ruling, ever present desire, and that is to live as long on the earth as his Maker pleases, and while living to do the utmost he can to benefit and bless mankind, and to accomplish a long and active, and useful life, the study how to preserve and promote a high degree of bodily health is indispensable. And it seems to have been ordained by a Providence both kind and wise, as a reward of a temperate life, that such a life should be largely extended, and that its decline should be as calm as a summer's evening, as gentle as the babe sleeps itself away on its mother's bosom.—*Herald of Health.*

SALICYLIC ACID FOR BEE STINGS.—Although salicylic acid, from having been too highly extolled, has fallen somewhat into disfavor, there can be no doubt that it is useful in the case of bee stings. An Austrian paper recommends the following treatment: First, to remove the sting as quickly as possible with a forceps or by scratching with a finger, but never between the thumb and forefinger, because this squeezes more of the poison into the wound. Next, squeeze the wound until a drop of blood comes out, and rub the place as large as a dollar with an aqueous or dilute alcoholic solution of salicylic acid. The effect is still better by injecting the salicylic acid into the wound with the hypodermic syringe. After this the spot is painted with collodion to keep out the air. A sting treated thus causes little or no pain, slight inflammation and swelling, and is not followed by nettle-fever or lameness in the most sensitive and nervous individuals.—*Scientific News.*

FATAL PLAYTHING.—A Baltimore paper of July 11th says: A number of children have died here during the past few days from lock-jaw, superinduced by slight burns received in the hands from the exploding of paper caps in toy pistols on the Fourth of July. In every instance where these accidents have occurred the dread disease has followed like a strange fatality. The physicians are unable to account for the singular appearance of the disease. The injuries have been so slight in some cases that only the skin of the hand was slightly burned. It is thought the caps contain a poison never before used in their manufacture, and the health authorities are about to investigate the matter. Eight deaths have been reported within the past twenty-four hours, and a number of new cases have been reported to-night. The sufferings of those afflicted have been terrible and beyond all medical assistance.

DIRECTIONS FOR PREVENTING SUDDEN DEATH. An exchange offers the following as the best known means of preventing sudden death: 1. Keep the head cool by taking the world easy. 2. Keep the lungs breathing deeply and fully about 17 times a minute, by cultivating alacrity in all the bodily movements. 3. Keep the heart beating about 68 times a minute (that is, let the pulse beat four times while the lungs breathe once) by eating temperately, sleeping fully and soundly, exercising moderately, and avoiding all temporary excitants, mental or liquid.

Worth Knowing.

Cultivating the White Water Lily.

Many of our readers, especially those from New England, will ever hold in remembrance the sweet fragrance of the white water-lily, so common in that part of the Union. If they only knew how easily it could be cultivated, we believe that very many of them would prepare and be quite as proud of their lily gardens as of any other of their floral premises. The roots may be easily sent from the East by mail, packed in damp moss. The roots should be kept constantly moist, until planted.

To do that take an old tub or barrel sawed in two, that will hold water, set it either on top or in the ground, one-third filled with a mixture of garden soil, sand and well-rotted manure. The roots should be set in this mixture, and water added in small quantities, so as not to disturb the earth until the tub is filled. Very soon the handsome round leaves, four or five inches in diameter will make their appearance and fill the tub. The loss of water by evaporation should be made good from time to time, and ere long the blossoms will appear, and delight everyone with their beauty and fragrance. Care should be taken not to allow the annual increase to crowd the vessel, or the floral display will be diminished. The pure white flowers will be as perfect and beautiful and fragrant as the camellia, closing at night and opening in the morning. The bloom of lilies thus transplanted are generally a little smaller than in their native ponds at the East.

There are several parties in this city now successfully cultivating lilies in this manner. A flourishing colony of these fragrant flowers may also be seen in the conservatory at the Park.

ELECTRIFIED CLOTH.—In a wax-cloth manufactory at Griesheim, near Frankfort, the finished pieces of wax-cloth are hung up to dry in an artificially-heated room, being supported in successive folds on wooden bars placed across near the roof, and the lower parts being about a yard above the floor. The air is kept about a day at the temperature of 40° to 60° C. by means of the furnace gasses passing through earthenware pipes in the ground, but also and especially, an air-current heated by these. On opening the place, (the heat having been shut off for a short interval), the wax-cloth is found strongly electric. The boys go under to have their hair set on end, and a distinct shock is received on touching the cloth, more or less strong according to the size of the piece. The explanation, as Herr Krebs says, is doubtless to be sought in friction by the hot air on the wax-cloth in its rapid passage through the room. This is the more probable, since it has been noticed by the work-people that the electric shocks are more violent when the drying occurs in calm weather, which favors the passage of the air-current through the room.—*Ex.*

MOTH PREVENTIVE.—A correspondent of the *Furniture Gazette* recommends the following remedy for exterminating moths in carpets and furniture: After some years of experience with the troublesome pests, says the writer, I found a sure preventive of moths in pitch paper, the same as roofers use. The moth will live and grow on cayenne pepper and tobacco, while I never could see that the use of these articles kept the moth miller out. The plan is to cut the paper in slips and place about the room under and behind sofas, chairs, etc. This should be done as early as the middle of April, and in warm climates earlier. To make parlor seats moth-proof, place on the inside of backs of chairs and seats small strips of pitch paper and rest assured the miller will not select these places to deposit eggs. It is the miller that is the foundation of all the mischief.

CLEANING BRASS.—Make a mixture of one part common nitric acid and one-half part sulphuric acid in a stone jar; then place ready a pail of fresh water and a box of sawdust. Dip the articles to be cleaned in the acid, then remove them into the water, after which rub them with sawdust. This immediately changes them to a brilliant color. If the brass is greasy it must be first dipped in a strong solution of potash and soda in warm water. This cuts the grease so that the acid has the power to act. This is a government recipe used in the arsenals.

TO KEEP MACHINERY FROM RUSTING.—Take one-half ounce of camphor, dissolve in one pound of melted lard; take off the scum and mix in as much fine black lead as will give it an iron color. Clean the machinery and smear with this mixture. After 24 hours, rub clean with a soft linen cloth. It will keep clean for months under ordinary circumstances.

CASTING BELLS.—All bells, says *Iron*, are cast with their notes sharp, and the flattening of the note is then accomplished by turning away more or less of the inner surface of the lip. To sharpen a bell's note there must be a slicing away from the lip, and this cannot be done to any extent.

FRATERNAL RECORD.

Officers and members of all associations in this Department are invited to send us regularly all news of interest

MASONIC.

Officers of the Grand Lodge.—SAMUEL CRAWFORD DENSON, G. M., Sacramento; CLAY W. TAYLOR, D. G. M., Shasta; MOSES HELLER, G. Treas., S. F.; ALEX. G. ABELL, G. Sec'y, S. F.

THERE is a general desire among the Masons of the world for a more closer union and fellowship than is now enjoyed by the Brotherhood. In the clash of conflicting systems and incongruous work, with differing methods of recognition and widely diverged methods of work, the Order as a universal Brotherhood loses much of its efficiency. It is proposed to hold an international Masonic re-union at Rome, to include all the Grand Lodges in the world, and the preliminary conference is to be held at Milan during the coming Italian National exhibition. A large number of Masonic Grand bodies have intimated their intention of participating. It is to be hoped that the United States will be represented by able and wise brethren. Masonic work in this country greatly lacks uniformity in the several jurisdictions, and the experience of the American Masons will be valuable, as showing the great benefit to be derived from world-wide uniformity in Masonic work.

JEWEL.—A magnificent jewel is to be presented to Sir Vincent L. Hurlbut, Past Grand Master of Knights Templars of the United States. This beautiful jewel is four and a half inches in length; the aureole, or blazing sun ray, three and one-fourth inches long, surmounted by the triple cross in the most exquisite red enamel, so clear and transparent as to show the fine gold carpet-cut figure upon the background, the cross nearly one-quarter of an inch in thickness. At the junction of the cross angles are three diamonds of fine water. These, with the chiseled lace work on the borders of the cross, make a brilliant showing. Between the cross and aureole and branching from the cross angles are the sword and scepter of Knights Templarism, and these two are magnificently enameled into colors—with black and red—with platinum visor to hemlet sword hilt. All of these are artistically carved. The jewel is suspended by massive rings and small cross and crown trimmings to a sweep suspension of elaborately carved lace work, and the whole made of finest gold.

THE late Thad. Stevens, when aping the role of grand inquisitor at Harrisburg, in the legislative investigation of Freemasonry during the anti-Masonic era in Pennsylvania, met his superior in a certain supposed Master of a Lodge, whom he had under interrogation. Thad. asked: "What is the initial proceeding in a Lodge?" Reply: "The Lodge is opened with prayer." Question: "State the proceedings at the initiation of a candidate." Reply: "Mr. Stevens, if, on the ——— day of ——— A. D. 18—, you had been found worthy, you would have become a member of ——— Lodge in ———, and would have been initiated in all the secrets and mysteries connected with the fraternity, and then possessed a knowledge that, except one becomes an initiate, no man will ever possess." The witness then sat down. Stevens was thrown completely back upon his haunches by this unexpected thunderbolt coming from a serene sky, and paralyzed from the effects of the blow, he ignominiously wilted. The fact was he had some years previously been proposed in one of the Lodges in Pennsylvania, but was rejected, which "little circumstance" he had supposed forgotten. But it wasn't, and his usefulness as an anti-Masonic inquisitor was ended.

OREGON—DEATH OF GEN. BROWN.—Gen. Mart V. Brown died at 15 minutes past one o'clock on Wednesday, Aug. 3d, 1881, at Lower Soda Springs in Linn county, Oregon, where he had gone several weeks previous in search of health. Though still quite a young man, being only 38 years old, Gen. Brown had been for a long time one of the most prominent public men of the State. He was State Printer for four years, and for over 15 years was editor of the *State Rights Democrat*, in which position he acquired considerable journalistic reputation. He was a soldier in the late war of the rebellion, having answered President Lincoln's first call for volunteers. He was buried at Albany on Friday, the 5th, at 3 P. M. The funeral services being conducted by the Masonic fraternity, of which he was a member, R. P. Earhart, P. G. M., officiating. The A. O. U. W., and the Albany fire department, of which he was a member, were in the procession in full regalia, as well as a deputation from the Capital Guards at Salem.

JOSIAH H. DRUMMOND'S statistics reported to the Grand Lodge of Maine for 1881, show that 54 Grand Lodges in the United States and Canada have 567,128 members against 573,317 in 1880. There are 21,885 candidates against 19,685; 18,746 affiliations against 17,523; 17,362 dismissions against 17,102; 808 expulsions against 929; 257 suspensions against 464; 19,250 suspended from membership against 23,210; 6,899 deaths against 7,113; 3,434 rejections against 3,615. Although there are 6,189 less members, the suspensions from membership being 4,000 less, indicates a healthy gain, and we may soon look for an advance again.

MASONRY IN CHICAGO.—It is claimed by fanatics of the Blanchard type that Chicago is a hot bed of Masonry, and recent reports published, go far to show that the Order is in a most flourishing condition in the Garden City. Thirty-eight Blue Lodges of Masons are working actively with full rolls of members, and plenty of work before them. There are 12 chapters of the Royal Arch, seven Commanderies of the Knights Templar, and six bodies of the Ancient and Accepted Scottish Rite.

WE are in receipt of a full and very interesting account of an installation ceremony at Ottawa, Canada, Aug. 2d, wherein several prominent Masons from abroad are mentioned as being present, and receiving the honors due their respective stations. Among the number we notice our well known and much respected Bro., William Boyd Barker, of Red Bluff, Past Senior Grand Warden of the Grand Lodge of California.

THE new portraits soon to be placed in the Grand Lodge gallery of Past Grand Master William W. Traylor and Grand Secretary Alex. G. Abell are both fine works of art. That of the latter is almost life size, representing the Grand Secretary seated at his desk, as he has been accustomed to be for the last 25 years.

THE corner-stone of the new Court House at Denver, Col., was laid on St. John's Day, June 24, 1881, by Bro. Lawrence N. Greenleaf, Grand Master of Colorado, assisted by the officers of the Grand Lodge, in the presence of over 5,000 persons. Able addresses were made by Grand Master Greenleaf, and His Excellency, Gov. Pitkin.

THE proposition to reduce the minimum fees for degrees from $50 to $30 has gained many supporters within the last year, and it is generally believed that the amendment will be adopted. It was introduced at the last session of the Grand Lodge by Bro. Francis E. Baker, of Woodland, and received a majority vote, and comes before the next session, when, if it receives a two-thirds majority, it will become the law.

GOLDEN GATE LODGE, No. 30, of this city, has had three funerals within the last three weeks, and the membership are entitled to great credit for their prompt and full attendance. Few Lodges show a better record for their attention to that part of their Masonic duty than Golden Gate.

LODGES in this jurisdiction have all had a large amount of work before them this year. Pacific, No. 136, and King Solomon's, No. 260, of this city, have hardly missed a weekly meeting during the term of their present officers.

SEVEN Templar bodies existed in England as early as 1796. The Grand body numbered in England and Wales at last return 116 Commanderies. In the United States there are 600 Commanderies and 50,000 Knights Templars.

KING SOLOMON LODGE No. 260 had a raising and a banquet on Monday evening, Aug. 29th, which was largely attended.

GRAND SECRETARY, Thomas H. Caswell, took a 10-days' vacation, returning to his office a few days since.

THE net proceeds of the fair for the Masonic Board of Relief reached nearly $2,000.

THE various Masonic bodies at Red Bluff are building a hall.

Order Eastern Star.

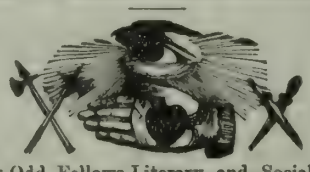
Officers Grand Chapter.—JEROME BANES, Gr. Patron, Red Bluff; MRS. S. JENNIE MANN, Gr. Matron, S. F.; MRS. ABBIE E. WOOD, Gr. Sec'y, S. F.

FRIDAY EVENING, August 12th, Mrs. S. Jennie Mann, assisted by members of the Order from this city and Vallejo, instituted a new Chapter at Napa. At the conclusion of the ceremonies of initiation, which were feelingly and imposingly conducted, the W. G. Matron proceeded to appoint the following officers, who were installed: Mrs. E. Haun, W. Matron; Dr. F. M. Hackett, W. Patron; Mrs. F. M. Hacket, A. Matron. The W. M. then filled the following offices by appointment: Dr. M. B. Pond, Secretary; Mrs. E. Kimball Treasurer; Mrs. Sol. Haas, Conductress; Mrs. M. Dresser, Assistant Conductress; Mrs. D. B. Parker, Adah; Mrs. P. Plass, Ruth; Mrs. T. H. Parks, Esther; Mrs. Capt. Howland, Martha; Mrs. Thos. Derry, Electa; T. R. Parker, Warder; Capt. Howland, Sentinel.

PAST PATRON John N. Young, with other members of Naomi Chapter, No. 36 of Sacramento, assisted the Grand Matron in instituting a new Chapter at Woodland on Saturday evening, Aug. 20th. The following were named as their principal officers: Rebecca G. Frost, Worthy Matron; Wm. H. Martin, Worthy Patron; and Harriet Wyckoff, Associate Matron. The petition for dispensation contained 21 signatures, among whom we noticed those of Francis E. Baker, Worshipful Master of Woodland Lodge, No. 156, and Humphrey Hicks, High Priest of Woodland Chapter, No. 46.

MRS. S. JENNIE MANN, Grand Matron, made an official visit to Golden Gate Chapter, No. 1, on Monday evening, August 22d. The work of the Chapter, including an initiation, was highly satisfactory. Refreshments and a grand good time followed.

ANTAK-HOMA (Red Sisters') Chapter, No. 2, was organized at McAlester, Choctaw Nation, Indian Territory, on June 14th, by A. Frank Ross, as Special Deputy of the Most Worthy Grand Patron. O-ho-yo-ho-ma (Red Woman's) Chapter, No. 1, at Atoka, is in its third year and flourishing.



THE Order in Santa Cruz and adjoining counties had a grand time on the 30th, celebrating the anniversary of the birthday of Robert Mowry, founder of the Order.

THE Grand Matron and Grand Secretary expect to start for Los Angeles about the first of September, to visit Chapters and to institute one or more new ones.

PAST Grand Patron, Jerome Spaulding, is preparing an elaborate report on foreign correspondence, to be submitted to the next Grand Chapter.

I. O. O. F.

Grand Officers.—DAVIS LOUDERBACK, G. M., San Francisco; LEON D. FREER, D. G. M., Oroville; D. M. BURNS, G. W., Sacramento; W. B. LYON, G. Sec'y, San Francisco; H. B. BROOKS, G. Treasurer, San Francisco.

THE Odd Fellows Literary and Social Club gave an invitation party—their third quarterly social—at Ixora hall, Wednesday evening, Aug. 24th. It was numerously attended by a very select company who all reported an enjoyable occasion. This club always makes a good showing, whatever they undertake they do well. President Lyon has placed the Order at large under obligations to him for his unceasing labors in connection with the club. The following programme was given: Introductory remarks, E. R. Stevens, Esq. Banjo Duet, Wm. West and G. F. Winterburn. Recitation, James G. Maguire, Esq. Quartette, Benj. Leonard, Mrs. Anderson, Prof. Anderson, Mrs. Cutler. Comicalities, Jabez Swan, Esq. Piano duet, Miss Emma Winter, Miss Mamie Winterburn. Ballad, Mrs. Walter Malloy. Recitation, James C. Pennie, Jr., Esq. The credit of this very enjoyable occasion is due to the following committees: Executive Committee, E. R. Stevens, W. C. Johnson, B. Leonard, W. F. Norcross, Thomas Howell, John Edwards, W. B. Lyon. Reception Committee, D. C. Fox, Fred. Fillmore, C. H. Davies, F. W. Hamilton, E. F. Hartshorn, Thomas Stewart, J. C. Beatty, W. J. Gorman. Floor Committee, George A. Case, manager, G. W. Timmerman, W. J. McLaren, J. W. Russell, E. H. Black, W. T. Galloway, E. W. Blaney, E. W. Nohl, B. F. Wellington.

THE following, from an exchange, may be a little sarcastic, but contains much that is sensible: "If a P. G. has been once to the Grand Lodge as representative, never send him again; he may become useful in that body, and represent your Lodge intelligently. Spend the money on some Junior P. G. who has never been there, though of course it is a waste of funds, but it shows your disapproval of monopoly. The young P. G. will have a good time; the session, no doubt, he will avoid, finding it very dull, very hot, and far too uninteresting for his attention; he can get all the materials he wants for a report from the O. F. papers; what's the use of his bothering and sweltering in the G. L. room? It is far more pleasant to go round and see the sights."

THE I. O. O. F. now has four Supreme Grand Lodges, viz.: In the United States, the German Empire, Australia and New Zealand. It has 48 subordinate Grand Lodges in the United States and four in the German Empire; 39 Grand Encampments in the United States and one in Australia. In the United States, in 1878, there were 5,734 subordinate Lodges; in the German Empire, 41; in Australia, 63; in New Zealand, 20, making a total of 6,859. There are also 880 Rebekah Degree Lodges, composed of members of the third degree and their wives. In 1878 there there were 40,568 initiations, and the sum of $1,702,774.82 had been spent for the relief of members. The total revenue for the year was $4,516,660.63. From 1830 to December 31, 1877, the following aggregates are pertinent: Initiations, 1,064,928; members relieved, 887,882; widowed families relieved, 108,385; members buried, 74,226. The whole amount of relief was $69,235,989.42, and the total membership is 465,466.—*Guide.*

THE following are the concluding sentences of the polished address delivered by Hon. Will Cumback at the laying last month of the corner-stone of the new Court House at Marion, Ohio: The laying of this corner-stone, and the erection of temples of justice, will be a vain work unless we have in our hearts a reverence for law and order and a controlling disposition to do justice. It is equally senseless and vain for us, my brethren of the benevolent Orders, to put on our regalia and appear in public as the special advocates of fraternity, unless it is prompted by a sincere regard for our fellow men. The world is tired and disgusted with the sounding brass and tinkling cymbal of mere empty profession. In this practical age, profession counts for nothing if not sustained by corresponding action. Whenever an organization begins to live by the fraud of false profession, it begins to die. Never in the history of the world has the severe rule, "By their fruits ye shall know them," been more rigidly enforced.

Let us live for those who love us,
For those who know us true,
For the heaven that smiles above us,
And awaits our spirits, too;
For the cause that lacks assistance,
For the wrong that needs resistance,
For the justice in the distance,
And the good that we can do.

WE are pained to record the death of P. G. M. Charles Thomas, of Cincinnati, Ohio, which occurred July 25th, in the eightieth year of his age. He was the third Grand Master of Ohio, having served in that office in 1841. He represented the Grand Lodge of Ohio in the Grand Lodge, United States, at the sessions of 1842 and 1846. He was a member of the Ohio Legislature for several years, as also Treasurer of Hamilton county. At the time of his death he was President of the Board of Managers of the House of Refuge, and was on an official visit at that institution when stricken with apoplexy, which resulted in his death. Brother Thomas was one of the charter members of Ohio Lodge, No. 1.

GRAND Secretary, Wm. White, of Kentucky, was knocked down and injured by a runaway horse, June 24th, during the tournament of the Knights Templar. He has since been in a critical condition. His little son was injured at the same time, though not seriously.

WORK of the Degree Lodge is now most excellently rendered. The new Master is a great improvement on his predecessor, the work is now given carefully, correctly and intelligently. He is a graduate of the O. F. L. and S. Club and ought to perform good work.

THE last report of the Sovereign Grand Lodge of American Odd Fellowship, and counting those under the jurisdiction of the German Empire, Australia and New Zealand, January 1, 1880, gives the membership as 465,466.

SEVERAL jurisdictions made gains last year, evidencing renewed interest in the Order. Among those were Ohio, net gain, 2,507; Missouri, 1,109; Massachusetts, 400. Nearly every jurisdiction gained more or less during 1880.

W. H. BARNES, Secretary of the Odd Fellows' Veteran Association, writes President Lyon, of the O. F. L. & S. Club, that the Veterans propose visiting them on Saturday evening, Sept. 3rd.

THE representatives from the Grand Lodge of California to the Sovereign Grand Lodge of the United States, Messrs. Grove L. Johnson and W. W. Morrow, leave soon for Cincinnati, Ohio, to attend the session of that body.

THE Grand Lodge of Ohio instructed its representatives to the Sovereign Grand Lodge to advocate the transaction of business in the subordinate Lodges to be done in the third degree.

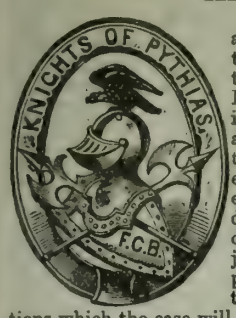
IN the United States there are 7,067 subordinate Lodges, 58 Grand Lodges, 856 Rebekah Degree Lodges, and 1,842 Encampments. The total revenue of all amounts to $4,391,215.35.

THE second anniversary entertainment and supper given by Western Addition Lodge, No. 285, of this city, was well attended and very much enjoyed on Saturday evening, August 20th.

THE new portrait of Past Grand Master Ezra Pearson, of Sacramento, recently placed in the Grand Lodge gallery, is a very fine work of art, a most natural picture.

THE Merchants' Association of Milwaukee, Wis., furnished 100 carriages at $5 each, to the members of the Grand Lodge while there, for a drive over the city.

THE pavilion was crowded again last Thursday evening, Aug. 25th, it being the occasion of a benefit for the General Relief Committe, I. O. O. F., of San Francisco.



ISABELLA Rebekah Degree Lodge of Santa Cruz had a very choice entertainment and a fine supper Thursday evening, August 25th.

THE Grand Lodge of Iowa is arranging for a grand excursion from that State to Cincinnati, at the session of the Sovereign Grand Lodge.

Knights of Pythias.

Grand Officers.—S. L. Terry, P. G. C., Stockton; John H. Harney, G. C., S. F.; George Cantus, G. Treas., S. F.; A. G. Booth, Grand K. of R. & S., S. F.

Charity.

This virtue being akin to friendship, and the second example taught in the Order of Knights of Pythias, is, in part, a liberality in all our dealings toward the brotherhood; a liberality in judging of each other's actions; a disposition which inclines men to think and judge favorably, and to put the best construction on words and actions which the case will admit. Are we charitable enough to put these rules into practice? Let us personally ask the question, do we—if through a lack of caution, a brother unwittingly makes a mistake—what should be our conduct toward him? To wound his feelings by uncharitable remarks or ungentlemanly innuendos toward him? Not so; but by our kindness and forbearance, teach him the fundamental principles of our Order—friendship, charity and benevolence.

Charity is a virtue of the heart, not of the hands. Gifts and alms are the expressions, not the essence of this virtue. A man may bestow great alms on the poor and indigent without being charitable, and may be charitable when he is not able to bestow anything.

In my last I made allusion to the influence that might be exerted in this respect by our lady friends in the dissemination of these great and noble virtues. Take, for example, that good and whole-souled woman, Theona, the wife of Pythagoras, the founder of that school of eternal principles, friendship, charity and benevolence, wherein our noble prototype, St. Pythias became an earnest student, who, after her husband's death, taught his philosophy even in public schools frequented by numberless disciples of different countries.

Would that our lady friends might study up and practice those principles, thereby influencing their husbands and families to emulate them, which, if they were well observed in every household, would quickly put an end to that universal depravation of manners by which the present age is so much distinguished and is more easy to lament than reform.

Yet we have much reason to congratulate ourselves upon the amount of good that is being accomplished by our exertions, not only in relieving the sick and distressed, burying the dead, caring for the widow and orphan, seeking employment for the unemployed, in trying to develop and elevate the minds of our members and their families by furnishing them with excellent reading matter from our library, but rendering them and their friends much enjoyment, in a social capacity, by our frequent entertainments.

And this leads me to notice the entertainment given on Monday evening, the 22d inst., by Metropolitan Lodge, No. 24; and be it known that this Lodge is noted for its excellent entertainments. The committee on arrangements spared no pains in transforming Calantha hall into a perfect amateur theater, for the occasion. The music and rehearsals were very select and their rendering good; that by Bro. Moscript was amusing and edifying. The three boys who performed such an excellent trio on their mouth organs, was a pleasing feature in the programme. But the closing farce, entitled "Box and Cox," rendered by Messrs. N. L. Chace, J. L. Merguire and Miss Wise, warrants us in congratulating them on their literary and dramatic attainments. These entertainments and the success of Metropolitan Lodge is, in a great measure, due to the interest taken in our Order by the Merguires, and they are numerous. We noticed, on the occasion, the presence of our Assistant Grand Masters-at-Arms, as blooming and fresh as a full-blown lily—the emblem of our rank. Long may she wave. Respectfully, J. P.

Grand Lodge of Nevada.

The Grand Lodge of Nevada convened in ninth annual session in Virginia City Aug. 8th, Grand Chancellor J. J. Cooper presiding.

The following Lodges were represented: Nevada, No. 1; Damon, No. 2; Carson, No. 4; Lincoln, No. 6; Beatific, No. 7; Amity, No. 8; Toiyabe, No. 9; Triumph, No. 11; Lyon, No. 12.

The reports of the Grand Officers were submitted, which showed that the Order had made considerable progress during the past year.

The present membership is 544—an increase of 107. There are 10 subordinate Lodges, with cash on hand of $9,438.83. The Grand Lodge has $752.84. The relief disbursement of subordinate Lodges foots up $1,876.40, while the current expenses were $4,328.88. After miscellaneous business the Lodge adjourned for the day. In the evening a grand reception was given to visiting members and invited guests at National Guard hall.

Three long tables occupied the length of the hall, and a fourth ran across the east end or head of the hall. Covers were laid for 250 guests, and that number of gentlemen sat down to the feast. The bill of fare included such delicacies as *pate de foi gras*, shrimp salad, fowls and roast meats arranged in artistic styles; jellies, with fruits of various kinds hidden in them; cakes, confectionary, claret, champagne and cigars. The tables were very handsomely arranged and decorated, and showed by their admirable lay-out that a culinary Napoleon had marshalled them to a Pythian Waterloo. Pierre Carrere was the caterer for the occasion, aided by E. Chaumond. Both of these skilled restaurateurs deserve decided credit for their efforts on this occasion which proved them to be worthy descendents of Soyer, Bechamel and other famous *chefe de cuisine*.

George H. Morrison, P. G. C., made the address of welcome in an eloquent manner, and was loudly applauded. J. J. Cooper, G. C., responded. After the delicate edibles had been discussed, at the call of the Chairman, William Sutherland, the following toasts were presented:

"Grand Lodge of Nevada;" responded to by J. J. Cooper, G. C.

"Supreme Lodge of the World;" responded to by P. H. Mulcahy, S. R.

"Subordinate Lodges;" responded to by F. M. Huffaker, P. C.

"Knighthood—Ancient and Modern;" responded to by R. B. Mitchell, P. C.

"The Endowment Rank;" responded to by Dr. M. Holmes, P. C.

"Our Sister Societies;" responded to by J. E. Coulter, C. C.

"Our Visiting Brethren;" responded to by George H. Morrison, P. G. C.

"Our Absent Brethren;" responded to by Dr. H. Bergstein, C.

"Our Honored Dead;" drank in silence.

"The Press;" responded to by C. C. Powing, of Reno, P. G. C.

"The Ladies;" responded to by Hon. Wal. J. Tuska.

After the regular toasts had been responded to a number of speeches and songs were given and a general sociable time enjoyed. During the evening Cara's brass band furnished appropriate music and added much to the enjoyment of the occasion.

The following were elected Grand officers for the ensuing year: Geo. H. Morrison, G. C.; J. T. Davis, G. V. C.; Geo. J. D. King, G. P.; J. M. Flannagan, G. M. of E.; W. M. N. Johnson, G. M. at A.; H. M. Monk, G. I. G.; Wm. Collamore, G. O. G.; C. C. Powning, Sup. Rep. Grand Trustees—H. C. Hendricks, A. Leport and M. Holmes. The Grand Lodge will next meet at Carson on the second Monday in August, 1882.

From the semi-annual reports, as rendered to A. G. Booth, Esq., Grand Keeper of Records and Seals, we find the standing of the several Lodges in this jurisdiction to be as follows: No. 1, 152 members; No. 2, 163; No. 3, 129; No. 4, 164; No. 5, 121; No. 7, 13; No. 8, 126; No. 9, 143; No. 11, 75; No. 12, 152; No. 15, 104; No. 16, 126; No. 17, 91; No. 20, 100; No. 23, 61; No. 24, 132; No. 25, 45; No. 27, 48; No. 28, 26; No. 29, 47; No. 30, 101; No. 31, 31; No. 32, 89; No. 34, 55; No. 35, 72; No. 37, 39; No. 38, 98; No. 39, 46; No. 40, 51; No. 41, 50; No. 42, 153; No. 44, 32; No. 45, 64; No. 46, 65; No. 48, 74; No. 49, 67; No. 50, 28; No. 51, 53; No. 52, 33; No. 53, 100; No. 54, 61; No. 55, 71; No. 57, 48; No. 58, 79; No. 59, 56; No. 60, 83; No. 61, 36; No. 62, 30; No. 63, 62. Nos. 4, 5, 8, 9, 12, 15, 17, 20, 23, 25, 27, 29, 30, 32, 34, 35, 37, 38, 39, 40, 42, 45, 46, 48, 49, 50, 52, 55, 58 and 59 have made gains during the last term. Nos. 7, 31 and 57 remain the same nominally as they did last January. Nos. 1, 2, 3, 11, 16, 24, 28, 41, 44, 51, 52, 53 and 54 show a slight decrease in membership. Nos. 60, 61, 62 and 63 are new Lodges, having been instituted within the term.

The Knights of California Lodge, No. 1, and Pythian Division of the Uniform Rank of San Francisco, together with those of Brooklyn Lodge No. 3, and Live Oak Lodge of Oakland, visited Liberty Lodge of West Oakland on the evening of August 18th. Grand Chancellor Harney addressed the assembled Knights on the progress of the Order, and the living principles of Pythianism. Speeches were made by Grand Master at Arms Merguire, and the Grand Prelate. Short remarks were also made by other Knights. The programme was interspersed with songs, recitations, etc. The cigars were freely passed and "inner man" was not forgotton. It was one of the most enjoyable and pleasant re-union of Knights that has assembled for some time, and the gracious hospitality of the brethren of Liberty will long be remembered.

Grand Chancellor John H. Harney will start for San Diego about the middle of September, to visit Loges in the southern portion of his jurisdiction, and we also mistrust he has his plans made to institute one or more new Lodges while sojourning there. His year has been a most successful one, and we feel confident that those of his friends who supported him so generously for the high office he holds, will never regret their action. A few years' work like this will be would soon put the Order among the largest on the coast.

The all-absorbing topics now among the boys has been the picnic of Pythian Division No. 2, of the Uniform Rank, given at Shell Mound park, Berkeley, on Tuesday, the 30th. The lateness of the date prevents our giving the full particulars in this number. From the elaborate preparations made we are confident it must have been a grand success.

Knights of Honor.

Grand Officers.—David McClure, P. G. D., San Francisco; Chas. E. Travers, G. D., San Francisco, R. H. Warfield, G. Treas., San Francisco; W. H. Mahoney, G. Reporter, office St. Ann's building, cor. Powell and Eddy.

We had intended replying at length to the article in the *Knights of Honor Reporter*, and also the correspondent to the Watchman in our last number, referring to the matter of separate jurisdictions for disbursing their beneficiary fund as well as for collecting the same. Our space will not permit us to do the subject justice this issue. If these gentlemen think we overdrew the facts when we stated that there was a large element in favor of the change, let them call on Oriental Lodge, No. 2163, when they are again reinstated. The suspension of that Lodge under the circumstances was a very serious matter and one that never should occur again. The facts were these: Oriental Lodge was suspended and the certificates of all their members rendered void, reason given failure to remit W. & O. B. F. The facts were that the remittance was made regularly and on time, and was delayed in the mails by the great wash-outs in Arizona, and thus failed to reach the office of the Supreme officer in season. Had a death occurred during such a suspension, we believe the persons to whom a certificate might be made payable, could have collected. We will not say anything further on the subject of separate beneficiary jurisdictions in this number, as we believe this actual case will be a volume of itself.

Card from the Grand Reporter.

Editors Watchman:—Having noticed in your issue of the Watchman, dated August 15th, an article signed "Justice," in which an attempt was made by the writer to explain the cause of the supposed delays in the payment of death losses in the Knights of Honor, and in which it was alleged that some of these delays could be attributed to the failure of the Grand Reporter to perform his duty; and, believing that the writer had unintentionally done me an injury which he would willingly repair, if convinced of his mistake, I wrote you on the 22d inst., asking you to give me the name of your correspondent, stating that I desired to have an opportunity of vindicating myself and convincing him of his error. In your answer to this request, dated August 25th, you declined to furnish me with the name of this person, stating as a reason for witholding it, that he does not wish to engage in any personal controversy. There is nothing in my letter of the 22d to lead any one to suppose that I desired a personal controversy with this writer or any one else, or that the giving of his name would lead to such a result; but, on the contrary, it shows a desire on my part (had the person proven to be a Knight of Honor), to convince him personally of the falsity of the position he had assumed, believing that by so doing I would be accorded that which his name would imply. This opportunity having been denied to me, I decline to furnish you the facts and dates of deaths, as you suggest in your letter, or to make any other explanation to an anonymous correspondent; but take this opportunity of pronouncing the accusation false in every particular, evidently written for the purpose of injuring me, and that the writer of the same was not actuated by that spirit which the name he has chosen indicates.

Those who are members of the Knights of Honor, and intimate with the business of the Order, and my office, know that through my personal instrumentality, an arrangement has been made in this city which greatly facilitates the collection of these death payments, and that without cost or trouble to the beneficiaries; and that under this arrangement made by me, and which has not yet been adopted by any other jurisdiction in the United States, the death benefits of members are placed in the hands of those for whom they are intended fully three weeks sooner than they would be were this system not availed of.

W. H. Mahony,
Grand Reporter K. of H.

The following official decisions have been promulgated:

Ques. Can the office of medical examiner and Dictator be held by one and the same person?

Ans. No.

Q. Are not Supreme representatives entitled to vote, and to all the privileges of the floor in their Grand Lodges, the same as other officers of such Lodges?

A. Yes. They are *ex-officio* members of the Grand Lodges and entitled to all the privileges of membership.

Q. When do by-laws for subordinate or Grand Lodges become operative, before or after their approval by the higher power?

A. They are operative from the time of their adoption, and until disapproved by the higher power.

The Grand Dictator will feel obliged to abandon the idea of placing a Grand Lecturer or Organizing Deputy in the field as proposed in his circular to the various Lodges, as the endorsement given this same by subordinates does not warrant him in proceeding. About twenty Lodges have approved of the suggestion and fourteen have discouraged it. The majority is too small to justify the experiment. He now makes an earnest appeal to all of his deputies to make extra efforts during the few remaining months of his administration, to use their best efforts to extend the Order in their districts.

Five hundred dollars is offered by the Supreme Lodge for the best ritual of the Order presented at its next session. We trust some of our enterprising brethren will contest for this prize. There certainly is great opportunity for improvement in the present ritual. A simple, plain, intelligent presentation of the objects and aims of the Order, with just enough of ceremony to relieve the monotony of a lecture, is all that is required. No funny business needed.

The Supreme Lodge has decided that a Lodge cannot, by vote at a regular meeting, call a special meeting, but that the latter, to be legal, must be called by the Dictator, on the written request of seven members.

Assessment No. 84 was delinquent August 19th, and No. 85 will be delinquent September 10th. The total death claims to date of No. 85 is 2,218, suggesting a payment of $4,436,000 to families of deceased brethren.

The members of Anchor Lodge, No. 2366, are well pleased with their selection of Dictator. Bro. L. E. Pratt makes a most excellent presiding officer.

ROYGBIV Chosen Friends

Grand Officers.—Chas. W. Bryant, G. C., San Francisco; James M. Baird, G. A. C., San Francisco; John W. Shaffer, G. Treas., S. F.; S. Danielewicz, G. Rdr. office 601 California street, S. F.

The following has been received from the Supreme Treasurer:

Office of Supreme Treasurer
Sup. Council Order of Chosen Friends,
Indianapolis, Indiana, July 30, 1881.

Statement of Relief Fund June 30, to July 30, 1881, calling to the Supreme Treasury Assessment No. 10, and the holder of this notice to pay No. 11, as described on face of notice:

Cash Receipts.

Balance cash on hand June 30	$ 762.46
Received on Assessment No. 3	1.49
" " " " 4	5.49
" " " " 5	1.80
" " " " 6	272.54
" " " " 7	726.38
" " " " 8	9,002.25
" " " " 9	1,919.91
Total receipts, including balance on hand	$12,592.32

Deduct from cash on hand July 30, 1881:

Death No. 18—George Conn, Fidelity Council, No. 2, Bay City, Michigan	$2.000.00
Death No. 20—James Detrich, Keystone Council No. 1, Blairsville, Pa.	2,000.00
Death No. 21—James E. Repine Keystone Council No. 1, Blairsville, Pa.	3,000.00
Death No. 22—W. P. Powell, Carolina Council No. 1, Cheraw, South Carolina	3,000.00
Deduct from cash received	$10,000.00
Leaving a balance on hand of	$2,692.32

Which will be applied on the next deaths in regular rotation, as they have occurred, as soon as enough money is received to pay one in full. This leaves deaths Nos. 23, 24 and 25, as appears on call of Supreme Recorder, dated August 9th; also two deaths in Social Council, No. 9, Brazil, Indiana—both ladies. Total liabilities, $14,000, which will all be canceled within the next 30 days.

A full list of Council has been published in No. 10 of *The Banner of Chosen Friends*, of Indianapolis, Indiana, giving the amount paid on each assessment, from No. 1 to No. 9, both inclusive.

The time for the payment of assessment No. 8 to the Supreme Treasury by the Councils expires August 15, at which time all Councils that have not the Supreme Treasurer's receipt, attested by the Supreme Recorder, should notify me at once. The expiration of Nos. 9 and 10 occurs August 29th. Financiers and Treasurers should take notice. Respectfully submitted in F. A. P., Emi Kennedy, Supreme Treasurer.

A new paper is to be issued Sept. 1st, in the interest of this Order. It is to be conducted by an association of Past Chief Councillors, and from what we can learn not particularly friendly to the present administration or the now recognized organ of the Order. We predict as a result two failures, the new and the old must succumb, as the Order cannot sustain two papers.

The citizens at the North Beach of this city are moving in the matter of organizing a new council in that section of our city. From present appearances we would not be surprised if the charter list contained upwards of 100 members.

A new Council was instituted at Petaluma on Tuesday, Aug. 30th, by Dr. L. J. Henry, G. Deputy.

A new Council was instituted at Vacaville on the 20th.

Past Chief Councillor David Sternberg, withdrew from Phœnix Council on Monday evening, Aug. 15th. He intends removing to Utah to organize the Order there.

DO NOT DELAY.—Send us your subscriptions promptly Don't let any break occur in your subscriptions to the WATCHMAN. Every live Workman needs every number of the paper, and we need his assistance to print as valuable a journal as we strive to for the special benefit of its patrons and the general good of the Fraternity. Send the cash direct, or, if more convenient, hand it in with your dues to the Financier and we will allow him for trouble and expense of remitting.

"A. O. U. W. Diplomas."

EVERY MEMBER CAN HAVE ONE.

Each and every member of the A. O. U. W., who wishes a really artistic Certificate of Membership, should not fail to procure, without delay, one of "Adler's Diplomas," lithographed in five colors; size, 19x24 inches, with space for photograph of the holder. It is a fine ornamental picture, and distinguishes you as a member. Any Brother desirous of obtaining a perfect copy of the best issue can do so by applying to the WATCHMAN PUBLISHING CO., No. 202 Sansome St., S. F. P. O. Box 2361. Price, postpaid, $1, in cash or postage stamps.

☞ It is an ornament for your room, as well as expressive and pleasing to yourself and friends.

OFFICERS and members of the A. O. U. W. receiving a complimentary number of the WATCHMAN with this notice marked are invited to examine its merits for their support, as we expect our agent to call and present personally further information concerning our enterprise for the future. Should our agent fail to call soon in some instances, we shall be glad to have our friends favor the office directly with their response. Persons receiving duplicate copies are requested to circulate them to the advantage of our cause and the publishers.

CHEAPEST PLACE to buy NEW and SECOND HAND MACHINES. All kinds rented, $2.50 per month. Repairing done. Satisfaction guaranteed. All kinds of Needles 25 cents per dozen. P. MCCANN, No. 27 Sixth Street, (Singer Office) San Francisco.

BY TELEPHONE.—Subscribers, advertisers and other patrons of this office can address orders, or make appointments with the proprietors or agents by telephone, as we are connected with the central system in San Francisco.

BRO. JOSEPH GIUSTI'S OYSTER, CHOP, AND CHOWDER HOUSE, 105 California Market, for ladies and gentlemen, is the place to get an oyster cocktail, or a meal fit for

Good and Bad Water.

We notice that an effort is apparently being made in some quarters to prove that the Oakland city water is relatively good, that it is not so bad as it might be. This seems rather a feeble defense of it, but we suppose it is the best which can be set up. Like the chap in the play who had received a fatal wound and cried: "'Tis not so deep as a well: nor so wide as a barn door, but 'tis enough"—so this water is not so fragrant as an overstocked duck pond, but it is bad enough. To show that there is a worse fluid in existence may be news to some Oakland people, no doubt, but it is true. The water might be worse.

We notice that there seems to be a desire to cast reproach upon artesian water by reason of the evil quality of some water drawn from surface wells. Thus a paragraph is printed purporting to be an extract from a report of the city health officer, referring to samples of well water taken for examination, as follows:

The purest water came from the corner of Twelfth and Washington streets. The sanitary appointments here and in the neighborhood were apparently good. This well is 56 ft. deep and is well bricked and cemented to a depth of 45 ft, but its water, though not sufficiently impure to be particularly hurtful, showed evidences of slight organic pollution—evidences that surface filth had permeated the ground outside to a depth of 45 ft. Hence, it is obvious that the purity of our artesian well water—about which we hear so much—should not be taken for granted. From our observations we are convinced that the feeling of security entertained by those who use artesian well water is unfounded, and, in this connection, we refer to the report of Prof. Lattimore on the water supply of the City of Rochester (1878), in which, among other matters bearing upon this subject, it is clearly shown that water at the bottom of a tube well, in "solid rock," is liable to become polluted by surface drainage.

There is an inference that *artesian* well water is dangerous because there was bad water found in a well, bricked up and cemented to a depth of 45 ft. The inference is unfair, because such a well is *not an artesian well at all.* It is merely a well-made surface well, and surface wells are of course dangerous in a thickly-settled district, no matter how well made. The quotation from Prof. Lattimore, of Rochester, merely shows that the tubing of the well he examined was defective, and that is, of course, a point to be guarded against, and it is well to have attention called to this danger. But the evident intent to throw suspicion upon true artesian water which flows from below impervious strata, and which, if well piped, cannot yield anything but pure water, is a point in favor of the water company, but not in the popular interest.

This water question is a far-reaching one and should be thoroughly discussed both by country and city people, for often in the country fatal diseases spring from contaminated water supply, and all the fresh air of the country cannot save the victims of bad water. The smaller cities of the State are always more or less vexed by the quality of the water supply. Petaluma seems now to be as badly affected as Oakland, and the people are proportionately excited. Let the commotion continue—still people will get stagnant water.

If a man only saw himself occasionally as others see him, he would cut his own acquaintance on the spot.

Rustic Home Decoration.

How many of your farmers' wives and girls know anything about rustic home decoration as a fine art, or, indeed, believe it easy to accomplish in their out-of-the-way farmhouses or mountain cabins? And yet the woods are filled with the most exquisite mosses, ferns and trailing vines, while the fields wave with lovely dry grasses and everlasting plants which, gathered and put in a wall basket, makes the sitting-room look more cheery; while the hanging up of branches of moss-covered boughs over pictures or doorways is a pleasant way of bringing the woods into our homes, and making us acquainted with the beauties of nature. Not until we begin to seek new varieties of mosses and lichens for home decoration, do we fully appreciate their great variety and truly exquisite growth. This season we have found two new varieties, one of which seems to be a fretted silver lace work, that covers the dead fir branches until they form a coronet to lay across a picture frame, in workmanship not possible to imitate. A lichen which grows like leather rosettes of all shades of wood-brown, is quite wonderful to contemplate, and grows upon our mountain oaks. Then the trailing dry mosses of pale green are in plenty, while the brilliant yellow color so abundant in the high Sierras, we find traces of here. My "gude mon" made some cornices for the lace curtains, of the madrone tree limbs—a pleasing orange color at this season—cut in the proper shape, and a few stray branches left sticking out, upon which he hung trailing moss, to hide the ropes which held them to the wall; very pretty they are, too. Then some pictures that had no frames (and everybody has some) he tacked to the wall and made frames of different varieties of lichens and moss about them, and all admit that no black walnut or gilt frame can compare with them. A pair of deer antlers surmount the clock, with branches of oak over them entirely covered with mosses and lichens of five or more kinds.

Then there is such a variety of brilliant butterflies that are easily preserved to pin up among among your grasses and mosses, which add much to the decorations. A little later we will find charming bright sprays of poison oak, or ivy and many-tinted blackberry vines and grape vine, also, of brilliant hue, which, if dipped in melted white wax, will retain their shape and color for months, and keep one's rooms gay all winter. Pressed ferns, too, are a modest decoration. Two, of different colors, laid across one another upon a white wall, is very effective as a relief between pictures and brackets. The cost of these decorations is only a little time and labor, which would be a pleasure if all helped, and the "men folk" would find it quite as pleasant a task as the "women folk," and all would enjoy the pretty appearance of the rooms when done—more if each had contributed a share in the gathering and putting in place. More effort is needed in the cultivation of the esthetic nature of our farmers' boys and girls. So much rough work, and so continual, is very apt to dissatisfy those of finer natures with farm life, and make still coarser those who care little for beauty of surroundings. So it becomes a positive duty for the home makers to surround their growing sons and daughters with refining influences, and so teach an ardent love of the beautiful both in nature and art, always encouraging the little wee ones even to bring home every pretty flower, twig, moss or butterfly to pin or tack up.

Choose such pictures as are of real merit to hang before their eyes, a simple wood engraving, cut from an illustrated paper, often being more worthy a place on your wall than many a highly-colored chromo of bad proportion or too gaudy in color, thus educating a critical eye while young.—*Jewell.*

Scene in the Orient.

The engraving on this page gives a view in a city of the Chinese Empire, where European civilization has gained a foothold and introduced its architecture. It is well known that Hong Kong, in China, is a British city, having been ceded to Great Britain in 1842. The city stretches along the bay shore for three miles, from the foot of the hills to the water, and contains several fine thoroughfares, with large and elegant houses of brick and stone, surrounded by beautiful gardens, belonging to the merchants, and with a number of stately buildings. Beautiful public gardens have been laid out and other notable improvements carried out. The engraving gives a view of some of the buildings and a glimpse of one of the garhas come. The Boston *Traveler* says that since the New York belles have taken to wearing five-cent bunches of daisies in their belts the windows of our Boston florists are filled with this flower. Had this craze started 30 years ago, it would have been greatly to the benefit of our farmers, who would now almost be willing to pay five cents a bunch to get rid of this pest, albeit there is no prettier flower that grows. The traditional history of this flower in this country is that it was brought over from England during the reign of Queen Elizabeth, and was regarded at that time as a rare and beautiful exotic.

COURT YARD SCENE IN HONG KONG—A BRITISH CITY ON CHINESE SOIL.

All for Science.—A dangerous experiment was recently undertaken, in which Prof. White, a champion swimmer and inventor of the theory of resuscitation, consented a short time ago to drown himself, that it might be tested for the benefit of the London Humane Society, who were present to witness the experiment. He plunged into the water, and, after remaining some time, was taken out in an apparently lifeless condition. His body was then put through the course of treatment laid down, and he revived in a short time, without apparent unpleasant consequences.

"Papa," said an inquisitive boy, "this morning the dominie prayed for more rain, and this afternoon Deacon Bixby prayed for dry weather to get his hay in. Now if the Lord loves the deacon and the dominie just the same, what do you suppose He'll do about it?" "My son," answered the old gentleman sternly, "whenever you want to ask foolish questions, go to mother; don't come to me."

Fighting Adulterations.

The Empire State is taking the lead in efforts to stamp out the adulteration of foods, drugs, etc., and we trust the measures now adopted will prove adequate. Other States as well as New York have begun to do something to bring the anti-adulteration laws into force, and the outlook is hopeful for a commotion at least. Adulteration laws are harmless after they have been carefully embalmed in the statute books, with no especial inducement for anyone to prosecute under them, unless he is a pure philanthropist who enjoys pursuing evil on his own account, and at his own expense. In New York the matter has been placed in charge of the State Board of Health. Inspectors have been appointed to collect and analyze samples of butter, beer, baking powders, bakers' chemicals, cocoa, cordials, canned food, confections, cereals, cheese, meat extracts, fish and fish extracts, fruit essences, ether, gelatine, honey, ice cream, milk, molasses, lard oil, olive oil, quinine, sugar, syrups, soda water, spices, spirits, tea, wine, and also all pharmaceutical preparations. The object of this analysis is to carry into execution the law enacted by the Legislature at its last session, to prevent the adulteration of food and drugs. Judging from similar investigations already made in New York and other States, startling results can be looked for from these examinations. When this evidence has been gained, it is to be hoped that the pursuit of the adulterators will be unyielding.

Didn't Make Much Difference.

He walked into the office this morning looking like a man pretty well satisfied with general results, and said:

"Can I see the editor?"

He was shown that eminently useful adjunct to a newspaper at once.

"Good morning, sir," he cheerily began.

"'Mornin," said the editor.

"I came in," he proceeded, "to tell you of a misprint in the paper.

"Yes? What is it?"

"Well, you see, I sent a notice around yesterday that Mr. Smith had just been married, and your compositor, I see, has got, 'Mr. Smith has just been martyred,' but I guess it don't hardly make enough difference to change."

The editor scratched his head a minute and thought of house cleaning and other female eccentricities, and told the visitor, of course it didn't, and he went away whistling, "Why should the spirit of mortal be proud."

Large Steam Engines.—Monster steam engines seem to be one of the features of the day. The Centennial engine, in Machinery hall, Philadelphia, was considered a monster in size and power. It is rated at 500-horse power. They are now putting up a 2,000-horse power engine for the Providence Water Works. These are very large for stationary engines. But engines of much larger power have long been in use in ocean steamers. There are now several trans-Atlantic steamers which develop from 4,000 to 5,000-horse power; but the Mail Cunard steamer service will develop 10,000-horse power.

PACIFIC STATES WATCHMAN.

FRATERNAL RECORD EDITION.

Issued on the 1st and 15th of each month.

AT NO. 202 SANSOME STREET, SAN FRANCISCO, CAL.

Subscription (in Advance), $2 a Year.

Favorable to Advertisers.

By consolidating the large subscription lists of the *Pacific Workman* and *Fraternal Record* with the PACIFIC STATES WATCHMAN our advertisers gain an unusually great advantage. We doubt if any one weekly newspaper has ever been circulated to as many different readers on this coast, as have been served heretofore by the *Workman*, *Record* and WATCHMAN together. It is certain that no other periodical is now patronized by a better class of industrial, professional and business men. In fact, our subscription list embraces many of the foremost business and representative men throughout the towns and cities of the coast.

We have pride in making our paper "clean and handsome," and first class in all respects—to the benefit of both our readers and advertisers.

ADVERTISING RATES.

One Square (½ inch), per issue	$ .75
One Square per month	1.25
Two Squares, per issue	1.50
Two Squares per month	2.50
Obituary notices and resolutions (with 25 copies post-paid for friends of deceased) per sq. (½ inch)	50

☞For reading notices, extraordinary display, special advertising and choice places permanently, extra rates will be charged. Reasonable reduction will be made for large and long-continued advertisements. No extra rates for the space occupied by engravings.

OFFICIAL RECOMMENDATION.

[*Resolutions adopted by Grand Lodge of Cal., Feb. 3, 1881*]

WHEREAS, the PACIFIC STATES WATCHMAN, the pioneer A. O. U. W. advocate on this coast, without official aid, has long rendered able and valuable services for the good of our glorious organization, we earnestly recommend that our Lodges and the brethren individually patronize the WATCHMAN as liberally as circumstances will justify.

Entered at San Francisco P. O. as second-class matter.

San Francisco, - September 1, 1881.

Our "Fraternal Record" Edition.

With this number of the WATCHMAN, we inaugurate a new plan which we hope will be of benefit to all concerned. Our readers will see that we have extended the "Fraternal Record" department of the paper by the addition of several columns. This "Fraternal Record" edition will be separate and distinct from the regular edition of the WATCHMAN. Advertisers, however, will receive the benefit of the large circulation of both papers. We are prompted to do this from a desire on the part of many readers who would like to see the Societies of which they are members receive more space than we could allow them under the old plan, hence we issue two editions of the paper.

Both editions will issue on the same date. Subscribers to the regular edition will receive a sheet made up essentially the same as heretofore. Those of the fraternal edition a sheet containing the less replete matters relating to the A. O. U. W., and more extended reports than heretofore given of the various other fraternal Orders. The subscription price will remain as before,—$2 a year, for either edition. Subscribers receiving one edition who may at any time wish to change for the other, can do so freely, by sending written notice to this office.

Now if the officers and members of these societies will only second our efforts by furnishing news, and also the "solid" material, we are convinced they will be materially strengthened in their work.

Medical Advice.

The St. Louis *Globe-Democrat* happily hits off "the suggestions of the doctors" as to the best means of avoiding sunstroke:

AS TO DRINKING.

Dr. Smith's Advice.	*Dr. Brown's Advice.*
Stick to cold drinks; they keep the skin moist	Avoid cold drinks; they suppress perspiration.
Iced tea is especially wholesome.	Iced tea is dangerous.
Milk is heating.	Milk is a delightful summer drink.
Beer is a natural summer laxative.	Beer is bad in summer.
The light wines are heating.	The light wines are cooling.

AS TO EATING.

Dr. Smith's Advice.	*Dr. Brown's Advice.*
Eat all the meat you can.	Avoid meats.
Eat all the vegetables you can.	Vegetables are dangerous.
Avoid pastry as you would death.	Pastry is good summer food.

AS TO WEARING.

Dr. Bliss' View.	*Dr. Barnes' Assurance.*
Stick to your flannels.	The wearing of flannels is a fatal delusion.
Woolen clothing should be worn in sufficient quantities to keep a uniform temperature.	Wear only linen and light fabrics.

THE HEAT.

Dr. Hammond's Advice.	*Dr. Baird's Injunctio*
Never mind the sun while you have a wet cabbage leaf in your hat.	Keep out of the sun; otherwise you will encounter great danger.

Washington Territory.

All along the southern bank of the Columbia river is a region of sand, which stretches away to Wallula. Here the soil is arid and full of alkali, the scenery desolate, and the most of life confined to lizards and reptiles. The drifting sand gathers upon the track and a force of men is kept constantly at work clearing a passage for the train. All this can be spanned very comfortably, however, as, for a consideration of $2, one can get a first-class berth in the Pullman palace sleeping car which accompanies each train. About daylight, which occurs very early now in this latitude, the State boundary line is crossed, and one finds himself in Washington.

At Wallula junction a change is made, and the passenger is whirled back 12 miles toward the river, until on its banks he comes to a station which some disgusted traveler has dubbed "Hades," and which sulphurous title has so recommended itself to railroad employees and the traveling public in general, as appropriate, that it is accepted and promises to stick. A ferriage is here effected, and one finds himself in the new railroad town of Ainsworth, located at the fork of the Columbia and Snake rivers. Ainsworth is a mush-room growth, roughly and irregularly built town of about 30 houses, and is the present terminus of the branch of the Northern Pacific railroad, which is expected to connect with the road now building from Portland to The Dalles. Stopping there long enough to get a 7 o'clock breakfast, we board the train, having for its destination Spokane Falls, 150 miles distant—fare nine dollars. This makes a total of $42, expended for boat and railroad fare in the ride of over 1,000 miles from San Francisco, exclusive of board and lodging. If the traveler relies upon what he sees from the windows of the immense box on wheels (dubbed by courtesy a passenger coach) for his impressions of eastern Washington in to-day's travel, as he is trundled along at a 15-mile-an-hour gait, he will certainly have very

Gloomy Impressions.

Soon after leaving the sage brush and sand of Ainsworth the train plunges into the Providence Coulee, an ancient river bed, whose course is followed up for over 30 miles. In this portion of the ride, hemmed in on each side by high banks, there is little or nothing to be seen of the outlying country, and the interest centers in occasional patches of curious geological formation projecting from the banks. The occasional spots of alluvial deposit in the river bed support rank growths of wild rye and bunch grass. Before noon the train emerges on an arid undulating plain whose predominating characteristics are alkali and sage brush, without a tree in sight to relieve the monotony or alleviate the heat. A fellow passenger seemed to echo the sentiments of those present when he remarked: "I don't see what the North Pacific company were thinking about, to build a railroad through this god-forsaken country." But as the day wore on, it became evident that the company knew what they were about, and did not intend to lose any money by the operation, either.

At 3 P. M. we reached Sprague—another new town, about 110 miles from Ainsworth. From here, the face of the country begins to improve, the land being better, trees more plentiful, and occasional springs of water are seen. Twenty miles more brings us to Cheney, the county-seat of the newly-made county of Spokane. This, like the other towns, is a product of the railroad, and bears evidence of its youth in the glaring newness of the white pine-boards of which all its buildings are constructed. Many predict quite a future for Cheney, but the cursory impression received by your correspondent was, that if it did grow much, it would have to rely upon something more than its natural advantages. From here on to the end of the trip the country improved right along. The line of the road was blotted with thrifty farms, an occasional pretty little lake is seen, and, as the train rushes through a range of hills, pine timber becomes plentiful. Tired and dusty as after a long stage ride (for the road is rough and new, and has but recently been completed to this point), in time for dinner we arrived at

The Lively Town of Spokane Falls.

A stay of several days here enabled me to become quite familiar with the town and its surroundings. Young as it is, it is plain to see that this town is designed by nature and location to be an important city, if not the metropolis of the northwest. At present it contains about 600 inhabitants, active, energetic and alive to the interests of the town. The population has doubled in less than a year, and will repeat the operation the coming year. Located on the banks of the Spokane river, on a level, gravelly prairie, surrounded by scattering forest trees, it forms a charming picture. There are seven general merchandise stores, two hardware stores, saw and grist mills, four hotels, three church organizations, two newspapers, and other accompaniments of civilization in proportion. Of the newspapers, the *Times*, published by F. H. Cook, is daily and weekly. The *Chronicle*, a hebdomadal recently established by C. B. Carlisle, an experienced journalist and ready writer, already has a fast hold on popular favor. The U. S. Signal Service has a station here, and a Government telegraph line. Before this writing, the Western Union will have had its lines completed this far also. The railroad company has valuable interests in and about Spokane Falls, and as the location is an available one, it is expected that they will establish their machine shops here. The industries tributary to the town are farming, mining, lumbering and stock raising, aside from those already noted. It is the basis of supplies for three military posts within 60 miles.

Railway Projects.

From recent developments it looks as though the Oregon Rail and Navigation Co. intended making a junction with the Northern Pacific at this place, and then push on through the Fort Colville country to the upper Columbia, where there are 300 miles of navigable waters which reach far enough north to tap the Canada Pacific. The Northern Pacific is being rapidly pushed from this point to Pend d'Oreille lake in Idaho, the present terminus of this division, and in less than three months it is expected that the remainder of the line to Bismarck, in Dakota, will be finished. The modern railway builder is simply irresistible. The spirit of enterprise that is accomplishing the wonderful feat of placing a network of steel throughout the great basin of the Columbia, that has overcome countless difficulties and expended millions of dollars in reaching a country which cannot for years yield the returns flowing into the coffers of the Central or Union Pacific, is marvelous, even in this age of railway building. It is now only a question of time, and not a long time at that, before the other fork of the Northern Pacific will be completed across the Cascade mountains to Puget Sound, the natural *entrepot* of this country. W. B. TURNER.

Preparing and Mounting Seaweeds.

Our sea-shore readers will find the following from the *Articians Hand-book* of assistance to them in the pleasant work with the sea growths:

Seaweeds rank among the most beautiful natural objects, while the work of collection and mounting is delightful occupation for the leisure hour. The best time to collect is when the tide has just commenced to flow, after the lowest ebb, as the seaweeds are then floated in in good condition. All specimens should be either red, green, purple, black or olive; no others are worsh preservation. Mounting is done by immersing a piece of paper just below the surface of the water, and supporting it by the left hand; the algæ is then placed on the paper and kept in its place by the left thumb, while the right hand is employed in spreading out the branches with a bone knitting needle or a camel-hair pencil. If the branches are too numerous, which will be readily ascertained by lifting the specimen out of the water for a moment, pruning should be freely resorted to, as much of its beauty will depend upon the distinctness of the branching. Pruning is best performed by cutting off erect and alternate branches, by means of a sharp-pointed pair of scissors, close to their junction with the main stem. When the specimen is laid out, the paper should be raised gradually in a slightly sloping direction, care being taken to prevent the branches from running together. The delicate species are much improved in appearance by re-immersing their extremities before entirely withdrawing them from the water. The papers should then be laid flat upon coarse bibulous paper, only long enough to absorb superfluous moisture. If placed in an oblique direction, the branches are liable to run together. They should then be removed and placed upon a sheet of thick white blotting paper, and a piece of washed and pressed calico placed over each specimen, and then another layer of thin blotting paper above the calico. Several of these layers are pressed in the ordinary way, light pressure only being used at first. The papers, but not the calico, may be removed in six hours, and afterward changed every 24 hours until dry. If the calico be not washed, it frequently adheres to the algæ, and if the calico be wrinkled it produces corresponding marks on the paper. The most convenient sizes of paper to use are those made by cutting a sheet of paper, of demy size, into 16, 12, or 4 equal pieces. Ordinary drawing paper answers the purpose very well. For the herbarium, each species should be mounted on a separate sheet of demy or cartridge size. Toned paper shows off the specimens well, a neutral tint answering best for the olive, pink for the red, and green for the green series.

A NEW RAILROAD LINE.—The local road soon to be built by the Central Pacific in Oakland will leave the station at 16th street and strike diagonally across the marshes to 20th street. Thence it will follow Peralta street to its junction with San Pablo avenue, from which point it will pass eastward through the Evoy tract and the property of Mr. Bon and along Moss avenue to Howe, where it reaches Broadway. Howe is one block west of Webster avenue, the thoroughfare which leads to Mountain View. The line will follow Howe to the cemetery, where it will be the terminus, convenient to Piedmont, and very near to the fine estates that lie along Broadway extension beyond the Theological seminary. The company asks a franchise from Oakland to the city line at 32nd street, whence it will obtain the right of way by the ordinary process of condemning the property needed. It is expected that the cars will be running to Mountain View cemetery before the 1st of next January.

DR. X., who has been in the habit of visiting Mme. A. three times a week as medical adviser, was rather taken aback the other day by the servant who answered the bell, saying: Mme. will be unable to see you to-day, Doctor, because she is sick.

Visiting the House of Sickness.

Not long since I went to spend the day with a friend whose aged mother was lying very ill. As a matter of course I wore a calico dress, intending to make myself useful in any way that should offer. I had been in the house but a short time when two granddaughters of the old lady drove up to the door, bringing with them two children, one about four years old, and the other an infant in arms. They had come to "see Grandma," and show their sympathy. Both were dressed in "Sunday-go-to-meeting" clothes, and they sat down, each with a child in her lap, and held their hands, while the already overworked and wearied daughter prepared dinner; and not until she was asked did one of them even so much as take up the fan to keep the flies from the feeble invalid.

Now, would it not have been much better and kinder to stay at home, unless the little children, whose presence was simply annoyance, could have been left behind? If one cannot be of some use where there is sickness, is it not better to avoid making more work and giving more trouble? I would, by no means, undervalue the blessing of sympathy, which is precious when the shadow of death rests upon some loved one. Do not hold aloof at such a time; go and speak some kind and tender word if you can do no more; give some practical proof of your interest in your friend, and then come away. Do not sit idly in a house where you are doing no good and simply adding to the weight of work and care.

I have been led to say this because I think people in the country often make this mistake through mere thoughtlessness. They mean to be kind, and so they drive many miles to visit their friend whose home is invaded by sickness. There are children too small to be left, and the mother takes them. Arrived at the house the horses must rest, and a long stay is made; common hospitality must offer refreshment to friends who have made such an effort to show their sympathy, and the result is that the good intention is productive of the worst results.

A little child in our neighborhood was lying for some weeks almost at the point of death. She was an only daughter, and everyone felt for the parents in their great anxiety and sorrow. Kind friends gave every assistance in nursing the little sufferer night and day, and in addition there was a constant inroad of visitors from far and near. I have seen a party of six or eight sitting at dinner prepared for them by the distressed family, and a mother, with an infant in her arms and another small child to watch, spending the day there in proof of her kindly interest and affection!

Set down in black and white such things seem almost incredible, yet I speak merely of what I have seen and known. The exercise of a little common sense will enable anyone to avoid coldness of heart and manner on the one side, and troublesome intrusiveness on the other. But two rules are always safe. Don't take your baby when you go to the house of sickness; and come away whenever you are conscious that you are not needed.—*I. H.*

Night in the Moon.

At last night sets in. Gratefully it feels after the sun has gathered up his smiting rays and gone down to his rest. All at once we are plunged in comparative obscurity, for again there is no twilight to stay the steps of departing day. At one stride comes the dark. But, looking up into the sky, we behold a vast orb which pours down a milder and more beneficent splendor than the great lord of the system. It is such a moon as we terrestrials cannot boast; for it is not less than 13 times as large and luminous as our own. There it hangs in the firmanent without apparent change of place, as if "fixed in its ever lasting seat." But not without change of surface. For this great globe is a painted panorama, and turning majestically on its axis, presents its oceans, and continents in grand succession. As Europe and Africa, locking the Mediterranean in their embrace, roll away to the right, the stormy Atlantic offers its waters to view, then the two Americas, with their huge forests and vast prairies, pass under inspection. Then the grand basin of the Pacific, lit up with island fires, meets the gazer's eye, and as this glides over the scene, the eastern rim of Asia, the upper portion of Australia sail into sight. The Indian ocean, and afterward the Arabian sea, spread themselves out in their subdued splendor, and thus in four-and-twenty hours "the great rotundity we tread" turns its pictured countenance to the moon, and grandly repays the listening lunaries by repeating, to the best of its ability, the story of its birth. Nor is the sky less marvelous in another respect. For the absence of any atmospheric diffusion of light permits the constellations to shine out with a distinctness which is never paralleled on earth. They glitter like diamond points set in a firmament of ebony. Stars and clusters which we never see by the naked eye flock into view and crown the heavens.—*British Quarterly.*

CANNIBALISM in London: In the pages of the *Daily Chronicle*—a great medium for pratical advertisers who generally mean what they say—the following advertisement has lately appeared: "Ham and Beef—Wanted—A boy 14 for the above." This is surely an announcement more fitted for the Sandwich Islands than for London.

FRATERNAL RECORD.

Ancient Order United Workmen.

The Work of the Grand Master.

The brother who is elected to the office of Grand Master Workman of the A. O. U. W. and performs its functions, has no sinecure position. The Order is so large and the interests so varied, that the duties attaching to the Grand head must of necessity tax the energies of any brother who is elected thereto to the utmost. To show our readers with what enthusiasm Grand Master Barnes has entered upon the task assigned him, we have procured some figures, giving the amount of work performed since he was elected last February. The number of miles traveled in the service of the Order has been 6,006. Public addresses delivered, 27. He has visited 88 Lodges. Of these, he has met 67 in their own places of meeting, the remaining 21 being represented by delegations; that is, he has visited the Lodge most centrally located, and the other Lodges in the district have been represented. The correspondence of his office has also assumed large proportions, as the number of personal letters written since February 9th amount to 665. The Grand Master has personally instituted one subordinate Lodge and four Degree of Honor Lodges. The deputies have instituted eight subordinate Lodges and one Degree of Honor Lodge. The average increase of membership has been about ten per day.

From this brief enumeration it will be seen that there is not a fraternal society in California which exacts more varied duties from its official head than does the A. O. U. W.; and also, that there is no Grand officer who has performed more work than the Grand Master of the A. O. U. W. Take the number of miles traveled—6,006—and any brother can judge for himself how wearisome it must be to cover the distance. Then look at the public addresses delivered—27. There can be no question that the enthusiasm manifested throughout the Order and the average increase in membership has been largely due to his efforts. For these public addresses, together with the happy manner in which the Grand Master clothes his language when he speaks before an assemblage, stir to action those who otherwise, perhaps, would not become members. Besides, it infuses new life into the subordinate Lodges visited, and creates in them a desire to emulate the example of their enthusiastic Grand Master.

Another item is the great number of letters written—665. These personal epistles require many hours of time. They are of every conceivable character appertaining to the Order's interests, and must meet with a prompt and ready reply.

It affords the WATCHMAN great pleasure to place on record these notes of progress. We are confident we but echo the sentiment of the Workmen of California when we say that Grand Master Barnes is held in their first love and esteem for his noble work. There is not a Workman but who is a partaker of the good results which follow from his earnest, honorable course. Every beneficiary certificate is made surer of payment. The object for which we are associated—the protection of the widow and orphan—is strengthened, and happiness and content rule the Order.

There is an important fact in this connection to which we wish to call the attention of those who are not members of the A. O. U. W., and that is, why it is enabled to carry a $2,000 certificate for less than one-half the cost which obtains in corporate companies. If the President of an insurance institution had to perform the work of the Grand Master of the A. O. U. W. of California, he would not consider himself paid for his services under a less figure than $20,000 a year. He would, also, have under him secretaries and soliciting agents who would swell the aggregate to double or treble the cost, and all would have to be paid by the insured. In the case of the A. O. U. W. the head of the Order receives no salary whatever, but superintends this vast business which, at this date, in this State, is guaranteeing to its membership $25,200,000, free of any cost, excepting the amount of $650 which is appropriated toward defraying actual traveling expenses, and every member of the Order acts as an agent, without pecuniary reward or the hope thereof. There are also a great many incidental expenses which add to the cost in a merely business corporate organization, and which find no place in the A. O. U. W., such as rents for fine offices, elegant printing and many other things which serve to attract the public eye, not to say anything of a high-salaried attorney, whose duty it is to resist payment of death losses on technical grounds.

We hope our presentation of these facts in connection with the office of Grand Master will not serve to deter other brothers from the ambition to fill the position. Although a vast amount of work has to be performed, still, there is no position in the State more honorable or more worthy to be held than that of Grand Master Workman of the A. O. U. W.

An Important Matter.

The following note from Bro. L. L. Dunbar explains itself. If any brothers have amendments which they desire incorporated in the Constitution, they should send them to the chairman of the committee mentioned. Bro. Dunbar writes: "It may be important to the membership at large to know that at the last meeting of the Grand Lodge, Grand Master Barnes appointed a "Standing Committee on Amendments," for the ensuing year, in order to give the members of the Order an opportunity of submitting desired amendments to our Grand Lodge Constitution without waiting for the next session, and then crowding a volume of such work into three or four days, without the possibility of being able to do justice to all. Important legislation may, and I have no doubt has been overlooked by want of time in the past to properly consider these matters during the session of the Grand Lodge, and under the press of other matters. The Committee was appointed to obviate the difficulty and to facilitate business at the next session, as well as to give *modest* brethren with good suggestions a chance to be fairly heard. In your Grand Lodge Directory, I see that no mention is made of this matter nor is the Committee named, which probably accounts for the fact that thus far the Committee have had no amendments to report upon, and unless something is done, the purpose for which they were appointed will not be accomplished, and Representatives to the next Grand Lodge will be on hand with the usual batch of amendments that will have to be hastily decided. Bro. C. H. Dunton, of W. W. Montague & Co., Oakland, is the Chairman, to whom desired amendments should be sent."

THERE are three Grand Lodges with a membership less than 1,000, as follows: Maryland, 870; Georgia, 675, and Nevada 416. New Jersey having been added to Maryland the field is sufficiently large for a rapid increase in membership, and we expect soon to see the combined States having the requisite 2,000 members, and be set apart as a separate jurisdiction. Nevada, also, ought to show to the front as a separate jurisdiction, now that Idaho, Montana and Utah have been added to her. Good hearty work by efficient deputies and proper encouragement by the Grand officers will place our sister State on the high road to prosperity.

THERE are three Grand Lodge jurisdictions with less than 2,000 members, viz: Kentucky, 1,537; Texas, 1,323, and Massachusetts, 1,150. There are six that have between 2,000 and 3,000 members: Ohio, 2,897; Oregon and Washington, 2,600; Kansas, 2,311; Indiana, 2,188; Tennessee, 2,007, and Minnesota, 2,100. Two between 3,000 and 4,000: Wisconsin, 3,818, and Ontario, 3,702. Iowa has 10,035, Illinois, 9,001, and Missouri 6,732 members.

Occidental Lodge, No. 6.

EDITORS WATCHMAN:—As No. 6 has not been put before the brothers, in type, as much as some other of our Lodges, I deem it proper to say a few words in our own behalf. I believe we are one of the few Lodges that pay weekly sick benefits of $10 per week, and we are proud of it, and fully convinced that we can do so on $1 per month dues. If some of the brothers who oppose paying sick benefits, and put our Order on a purely business basis, would call around with our Master Workman, Bro. J. J. Schutz, when he carries to the brothers their weekly benefits, they would be convinced that some of our Lodges try to relieve a brother when he most needs it, without being thrown on the charity of the Lodge. We are four and a half years old, and have a bank account of $540, and we add something to it every month, and by carefully guarding it, can maintain our rate of benefits. Two weeks ago Past Masters Woelffel and Pirrie surprised the Lodge by presenting to the Master Workman, Foreman and Overseer badges of their office to be the property of the Lodge, and in return, on our last meeting night, under the head of Good of the Order, Past Master J. F. Carothers, in his usual eloquent and effective manner, presented Bro. Woelffel, sitting Past Master, with a very handsome Past Master Jewel appropriately engraved. Past Master Woelffel responded in a few suitable remarks, being too much embarrassed to say much. We have work most every Friday evening, and would be glad to see any of the brothers that choose to call on us, and we will guarantee a good time.—COR.

Main Top, 156.

EDITORS WATCHMAN:—Last Monday evening Main Top Lodge, No. 156, Michigan Bluff, held a very pleasant meeting. In fact all its meetings partake largely of social and pleasant greetings, it being remarked by all who have ever improved the opportunity of witnessing and participating therein. Among its items of business we noticed the reading of two applications for membership, sent in by two very worthy members of the community. No member of this Lodge has ever been suspended or expelled, each seeming to vie with the other in endeavoring to make the fraternal ties as important and prominent as the beneficiary relations. A spirit that we are glad to praise and commend, for with such true philanthropy discouragement, discontent or neglect can never find an abiding place. The Master Workman, Bro. Edmund Thompson, though a young man, is deserving in more ways than one, having thoroughly committed to mind his charges and the unwritten work. He speaks highly of the WATCHMAN, and recommends it to his brethren. Bro. Charles Campbell, the worthy District Deputy of this portion of the county, though being almost an invalid from recent and severe attacks of inflammatory rheumatism, is a zealous and untiring worker for the cause, and Good of the Order, and also takes a deep interest in the Workmen Guarantee Fund Association. Bros. P. McHale, E. Polifka, M. Feidler and others are ever alert and doing good for the Order where ever an opportunity is offered.—COR.

California Lodge, 1.

EDITORS WATCHMAN:—It being a long time since I noticed anything in your valuable paper from the mother Lodge of the Order in this State, I concluded to let the brothers know that old California No. 1 still lives, and is in a very healthy condition, considering that she is the parent of over 200 children. We have at present a membership of 116 Master Workmen, all first class men, who pay promptly, and attend the meetings pretty regularly. In fact, our last meeting was one of the most pleasant we have had for a long time, and which will long be remembered by those who had the good fortune to be present. Under the usual head, our young, but very efficient Foreman, Bro. Geo. Berdan, on behalf of the officers and members of the Lodge, presented to our Junior Past Master, Bro. Chas. R. Taylor, a beautiful Past Master's jewel, and in language that would have done credit to many more experienced in oratory than he. It was such a complete surprise to Bro. Taylor, that he could hardly find words to express himself. However, it took but a short time for the brother to recover from his surprise, and in his usual happy and eloquent style, thanked the members for their beautiful present. The old veteran of the Order in this State (Grand Recorder, Bro. Pratt), who, by the way, is also a member of this Lodge, was present, and entertained the brothers with a few happy remarks and good advice. No doubt you have heard of our intention to give a grand entertainment and social dance, in conjunction with Porter and Harbor Lodge of Odd Fellows and Occidental Lodge of Workmen, for the benefit of one of our worthy brothers who needs assistance. It is sufficient to say that it will take place at Hansen hall, on Thursday evening, Sept. 1st. Tickets for adults, 50 cents, children half price. With such names on the committee as Bro. W. M. Brown, of Porter Lodge; Englebright, Jr., of Harbor Lodge; Schutz, of Occidental Lodge, and Rogers, of old No. 1, it cannot fail but be a success in every sense of the word—particularly when we have our worthy Grand Master of the State as master of ceremonies. We hope to see a good representation of the Order and their friends from the other side of the bay. We promise all who may come a pleasant evening's amusement.—W. H. W., of No. 1, West Oakland.

American Legion of Honor.

Officers of Grand Council.—OSGOOD C. WHEELER, Grand Commander, Oakland; MRS. ABBIE E. WOOD, G. Sec'y., office room 1, Shiels' building, 32 O'Farrell St.; J. N. BESSE, G. Treas., Watsonville.

THE following decisions have been recently promulgated:

Ques. 1. What is the minimum and maximum number of members necessary to start a Council?

Ans. Not less than five; as many more as possible.

Ques. 2. How must the $100 for charter be be raised? Must it be raised by the charter members?

Ans. It should be, as the $100 must be paid by the Deputy for the charter.

Ques. 3. What is the lowest fee for which charter members may be admitted. If, say we have 100, can they pay $1 each?

Ans. Yes; any amount agreed upon, provided they pay for the charter.

Ques. 4. Must all examinations be approved by the Medical Examiner-in-Chief before institution of the Council.

Ans. No; yet they should be if at all convenient, as much dissatisfaction may arise if they are rejected after admission to the Order, in which case they are compelled to take honorary membership.

Ques. 5. Does the appointment as Deputy Supreme Commander confer the rank of Past Commander?

Ans. No.

Ques. 6. Is the work of the Council done in any one degree?

Ans. There are no degrees of work. There are degrees of benefit only.

Ques. 7. Is it necessary that Councils hold meetings twice each month?

Ans. Yes.

Ques. 8. Do any of the subordinate officers receive pay, and how much?

Ans. Subordinate Councils do as they please in regard to this matter.

Ques. 9. Do the supplies furnished for $100 include the working material for the degrees?

Ans. Yes; all that any Council is *compelled* to use in the initiation of candidates.

THE Finance Committee of the Grand Council organized by the election of Oscar J. Shuck, as Chairman, and J. W. Kinsley, as Secretary. Hereafter, regular monthly meetings of the committee will be held on the first Monday of each month, at which times all bills against the Grand Council must be presented.

THE Order has been very fortunate in having a low death rate. The last assessment was levied July 5th, being No. 14, and at present writing, a period of over 50 days, notice of No. 15 has not been received. This is a very satisfactory showing on a membership of about 30,000.

GENERAL ORDER No. 3 has been abrogated by the Supreme Council. This is the very unpopular order referring to certificates issued to persons living in yellow fever districts.

THE Supreme Councillor has decided, and the Grand Commander concurs, that a Vice Commander may lawfully call a special meeting when the Commander refuses to do so, upon proper petition from a lawful number of signers.

THE office of Companion Abbie E. Wood, Grand Secretary, at No. 32 O'Farrell street, is the finest furnished Grand Secretary's office in this State.

PAST COMMANDER James L. Fields has been ppointed a Deputy Grand Commander, with authority to organize Councils.

THE bonds of the Grand officers have been filed and approved by those authorized to pass upon them.

Order American Union.

This new beneficial Order is of California birth and commends itself especially to the people of this coast. It will be soon introduced into the East, but the yellow fever districts will be carefully avoided. The first assembly of the Order (Washington), has initiated new members every meeting since its institution. Jefferson Assembly, No. 2, will be instituted in a few days. Assemblies are being organized in Stockton, Petaluma and Shasta. The members of this Order secure to their families either $1,000, $3,000 or $5,000, according to the class which they select. Aliens are not admitted. The new Order, being American and California an, yet not proscriptive in religion nor politics, and confining its membership to the best elements of our population, cannot fail. Indeed, its success is already assured. Its principles and aims are noble and its very name is a passport to prosperity.—COR.

[CONTINUED ON PAGE 292.]

A Tunnel Through Mount Blanc.

The French government has for some time past been contemplating the construction of a great railway tunnel which should bring Paris and the northern parts of France into more direct communication with Italy than is afforded by the existing tunnel through Mt. Cenis. The projects proposed include a tunnel through Mt. Blanc, and another through the Simplon or the Great St. Bernard. The last of the three has found very few friends, but it appears likely that both the former projects will be carried out. The projected Simplon tunnel is 60,719 ft. in length, while that through Mt. Blanc is 44,292 ft.

Comparing these with the other Alpine tunnels, we find that the Mt. Cenis is 40,093 ft., and the St. Gothard 48,952 ft. long. The Simplon would, therefore, be the longest of all.

Since the execution of the Mt. Cenis tunnel, the piercing of the Alps or of any other range has become simply a question of time and money. M. Chandon, in his pamphlet, "Le Percement du Mont Blanc," underestimated the difficulties of the work. But in M. Berand's *brochure*, "Mont Blanc et le Simplon consideres comme Voles internationales," the estimate of the magnitude and cost of these undertakings was sufficiently correct, and he showed that France could not afford long to do without this contemplated improvement.

DISTILLING ALCOHOL BY ICE.—Raoul Pictet, of Geneva, so well known for his discoveries relating to the liquefaction of gases, announces the discovery of a method of distilling alcohol by ice. Two kilograms of ice are needed for the production of a liter of alcohol; that is, for the distillation of 110 gallons of alcohol, a little less than a ton of ice will be required. The cost of production will include only coal for working the steam engine which drives the air-pump, and the sulphuric acid, the evaporation of which produces the ice. M. Pictet declares that this will notably diminish the expense of distillation, and suggests that the excise on alcohol should be proportionally increased.

Organized Arizonians.

Several meetings of former Arizonians and those now residents of that Territory, but sojourning in this city, have recently been held at the Palace hotel, which finally resulted, on Monday evening last, in a permanent organization on a business and social plane as "The Mining Bureau of the Territory of Arizona," with the following officers: President, J. F. Knapp, of Yuma; Corresponding Secretary, David Rich, of San Francisco; Executive committee, W. A. Rowe, of Yavapai county, W. A. Caldwell, of Mohave, G. C. York, of Apache, L. C. Hughes, of Pima, Donald Robb, of Gila, R. Cohen, of Cochise, J. W. Dorrington, of Yuma, J. W. Stevenson, of Graham, J. W. Anderson, of Pinal, and Joseph A. Drew, of Maricopa.

Arrangements are being made with Prof. H. G. Hanks, of the State Mining Bureau, for a proper display of all mineral specimens which may be forwarded to him. It was stated at one of the meetings, that at all times of the year, there are from 200 to 300 Arizonians in this city, and any organization which will bring them together will be of advantage in both a social and commercial point of view. Greater interest and a more close union would also be thus kept up between the people of Arizona and the merchants of this city.

The office of the association has been located for the present at 212 Sutter street. It will be under the immediate charge of Mr. Hanks.

PEANUT stand.—Small boy: "Is them all yer give fer a cent? Why, I ynster get twice that many." Vender: "Yes, but all the fruit crops failed this year, and peanuts and peaches is uncommon slow comin' in." Small boy: "Then give me a cent's worth of ice cream; them isn't failed, is it?"

We offer to the Public a Large and Elegant Assortment of every description of Furniture, at prices lower than any other house in this city. Our factory is situated in the heart of the Walnut country of the great West, where labor is cheap. We own our own mills, buy our material for cash, manufacture our own goods. We are practical workmen, attend to our own business—no useless employees—our rents are nominal, and we stand ready to convince buyers that 25 per cent can be saved on their purchases if they examine our Goods and Prices and compare them with others.

Workmen Guarantee Fund Association.

Additional $1,000!

Additional $1,000!

Additional $1,000!

FOR MEMBERS of the A. O. U. W. ONLY.

ADMISSION FEE, $3.00; ANNUAL DUES, $2.00.

Probable Cost to Each Member, about $8 a Year.

The object of this Association is to afford an additional protection of $1,000 to families of deceased members of the Ancient Order of United Workmen.

To become a member the applicant must be a Master Workman in good standing in his Lodge, under 50 years of age, and in sound bodily health. No re-medical examination is demanded, though the Association reserves that right, and when necessary, the applicant must pay the Examiner's fee.

There are no Lodge meetings to attend or Lodge dues to pay. There is no sinking fund, consequently the members have the benefit of every dollar received.

No Director receives any remuneration for services rendered.

The admission fee includes the first assessment of $1, which assessment is levied, and made payable on the death of a member, and disbursed on the same principle as the Beneficiary Fund of the Ancient Order of United Workmen.

The Association is governed by a Board of Directors, elected annually by the members. It is endorsed by Hon. Roderick Rose, Past Supreme Master of the Order in the United States, also, by W. H. Jordan, M. T. Brewer and C. W. Taylor, Past Grand Masters of California, H. G. Pratt, Grand Recorder, C. H. Haile, Grand Receiver, C. C. Terrill, P. Peck and E. H. Morgan, Finance Committee of the Grand Lodge, all of whom are members, and cordially recommend the Association to the support of the Brothers throughout the State.

The average cost of this additional $1,000 to the $2,000 already pledged by the Order, will be about $8 per year, or less than 20 cents a week.

FRATERNAL RECORD.

Grand Army of the Republic.

Officers of the Department of California.—C. MASON KINNE, Com., San Francisco; W. F. ELLIS, S. V. C., San Jose; J. M. DAVIS, J. V. C., Oakland; W. A. ROBINSON, A. A. Gen., San Francisco; O. B. CULVER, A. Q. M. Gen., San Francisco; J. W. STAPLES, Inspector, San Francisco.

THE following circular has been issued by the Secretary of the Veterans' Home Association: Comrade: On the 17th of last month, a consolidated roster of members of the G. A. R. in this city, and a blank to be filled up with the name of veterans not appearing thereon was mailed to you. In order to effectually carry out the objects of the Association, it is very necessary that the names, etc., of all veterans of the war with Mexico and of the Rebellion, residing in this city, be reported to the Secretary, P. O. box 1,386, within 10 days after the receipt of the circular. The efforts of the officers are entirely gratuitous, and in this matter, in which all veterans should be deeply interested, it is believed that each will take pleasure in securing and sending in the information requested.—J. J. LYON, Secretary.

LINCOLN Post No. 1, by a committee, has issued the following which should meet with a hearty response from every comrade: SAN FRANCISCO, Aug. 8th, 1881, Comrade:—We, the undersigned, a Committee, appointed by Lincoln Post No. 1, G. A. R., having engaged in a work of great magnitude, namely the replenishing of our exhausted Relief Fund, so as to be able to relieve the necessities of widows and orphans of comrades (who died in the service of their country), and who, now, in their hour of need, naturally turn to the Grand Army of the Republic for assistance, which Lincoln Post No. 1, G. A. R., has never yet refused, but the state of the Relief Fund, at present, has made it an imperative necessity to request your earnest and very valuable assistance, to make our work a success. Which in order to accomplish, we have decided to give an entertainment and ball, at Dashaway Hall, on Tuesday evening, August 30th, 1881. Tickets can be obtained of the committee, and at Lincoln Post, also at the door. Very respectfuly, your obedient servants, H. T. HOBBERT, W. IRELAN, A. D'ELOM, F. D. SWEETSER, J. B. CASEBOLT, Committee.

THE preliminary meeting for the organization of a Post of the Grand Army of the Republic, a society composed of veteran soldiers and sailors of the United States, was held in McPherson's hall, Santa Cruz, Thursday evening, the 11th. About 25 were present. Remarks were made by several present, and the following resolution introduced by Thos. Amner was adopted: *Resolved*, That we, as Union soldiers in the late war of the Rebellion, are desirous that a Post of the Grand Army of the Republic be organized in Santa Cruz, and in order to ascertain the desires of our fellow-soldiers as to the organization of such Post, we respectfully request all Union soldiers and sailors in Santa Cruz county to meet at McPherson's hall, on Friday evening next, at 8 o'clock, for the purpose of consultation and taking the necessary steps looking to such organization. The Secretary was requested to furnish each newspaper of this city with a copy of the proceedings, and request the publication of the same.

GENERAL LANDER Post, 5, of Lynne, has prepared a very elaborate altar for presentation to Post 5, of Philadelphia, in acknowledgement of the handsome manner in which the Lynn Comrades were entertained at Philadelphia last year. The altar has the form of an octagonal-shaped fort, being five ft. six inches across the widest part, and having a hight of three ft. six inches. There are very appropriate figures and inscriptions, and the material used was costly.

CAPTAIN STEVE FINNELL has been elected Post Commander of Farragut Post, G. A. R., at Vallejo. The meeting place of the Post was changed to Red Men's Hall, where they will meet next Thursday.

DEPARTMENT COMMANDER KINNE has just returned from another extended trip through the State, and has strewn good seed everywhere, and we shall expect to hear good accounts therefrom.

Druids.

THE *Erz-Druide* has the following: "Among Druids indifference to the duties and efforts of the grand institution to which they have sworn to lend their aid is worse than a grave error; it is a desertion in the very face of the enemy—a true act of treason. Devoted to the inquiry after truth and the conquest of justice, Druidism, in spite of the violent and gross enmity of which it has been the object, is ever struggling with energy against error, prejudices and superstition, against oppression and deceit. In such a work it has a right to look for support to all who seek an asylum at its heart and are anxious for enlightenment from its teaching. But this assistance, in order to be useful and efficatious, must be active and thorough. No softheartedness is possible; no lukewarmness tolerable. Eager and earnest permissible hearts can alone be really serviceable to our grand and fraternal association."

True, every word of it. Drones in any hive not only live by the efforts of others, but actually curse the institution by their connection with it. Any Order is far better off without such.

TWELVE deaths have been reported to the Endowment Secretary since the formation of the fund. Ten assessments only have been levied. Their numbers have reached about 800. The sum paid at each death is $500.

THE visit of the Grand officers to Agassiz Grove, No. 33, of Oakland, last week, was a very pleasant one. Remarks were made by Bros. Maginnis, Chase, Rohrbacker, Castello, and others.

Native Sons Golden West.

Grand Officers—FRANK J. HIGGINS, D. G. Pres., San Francisco; H. CLAY CHIPMAN, G. P., Sacramento; GEORGE B. BALDWIN, D. G. P., Marysville; HENRY LUNSTEDT, G. Sec'y, San Francisco.

THE following is the programme of exercises for the grand celebration at Marysville, on Admission Day, Sept. 9th, under the auspices of Marysville Parlor, No. 6: General decoration of the city. Salute. Arrival of excursion trains from Sacramento and Oroville, with delegations from Sacramento, Oroville, Stockton, Oakland, San Francisco, Placerville, and other excursionists. Parade, headed by First Artillery band, of Sacramento. C. H. Bushnell, Grand Marshall. H. Clay Chipman, of Sacramento, President of the Day. Literary exercises at the theater. Music by the band and Sacramento Glee club. Oration by Major A. F. Jones of Oroville, Grand Lecturer of N. S. G. W., concluding with grand tableaux. Open air concert by the First Artillery band, of Sacramento. Banquet for Native Sons and specially invited guests. Balloon ascension by Prof. F. F. Martin, of San Francisco, at about four o'clock P. M., from Cortez square, in a mammoth gas balloon, being the first gas balloon ascension ever made in that city; capacity, 25,000 cubic feet. The Professor will ascend over one mile in hight, and soar away for miles. Display of Fire Department. Grand ball at Turner hall in the evening. This programme will be added to and no effort will be spared that will add to the attractions of the day. The Marysville theater will be thrown open from 9 AM. to 10 P. M., where visitors will find a resting place.

WE are in receipt of the proceedings of the fourth annual session of the Grand Parlor of California. We are glad to observe the very large gains in membership reported, which we conceive to be but a fair index of the future of this live, bright California Order. The vote of thanks to the "Fraternal Record," we take now unto ourselves, and promise the boys a good show in the WATCHMAN. The next Grand Parlor will be held at Sacramento on the first Tuesday in June, 1882.

THE boys all over the Order are enthusiastic over the celebration of the 9th at Marysville. Oakland will send a delegation of about 20 members.

JOHN H. GRADY, the W. P. C. and Democratic nominee for Tax Collector, is a Past President of California Parlor.

THE irrepressible H. W. Taylor is wrestling with the natives at Woodland for a new Parlor there.

SECRETARY BROCK of Argonaut Parlor reports his Parlor in a very prosperous condition.

CALIFORNIA PARLOR will celebrate Admission Day by a party at Ixora hall.

THERE is talk of instituting a new Parlor at Vallejo very soon.

Ancient Order of Foresters.

A Court of this Order was instituted at Murphy's hall, on Saturday evening, Aug. 20th, under the name of Pride of Grass Valley, No. 6803, by Frederic C. Hensley, District Court Ranger, of San Francisco, with the following officers: John Palamountain, Chief Ranger, John C. Phillips, Sub. Chief Ranger; Wm. Rogers, Secretary; T. J. Benny, Assistant Sec'y; George Vincent, Treas.; J. H. Harris, Senior Woodward; Josiah Rogers, Junior Woodward; John Tyrell, Senior Beadle; Henry Carter, Junior Beadle, and John Carter, Sr., Wm. Body, Wm. Hooper, Trustees. The Court organized with 104 members, 98 of whom were initiated on that evening. This is said to be the largest number of charter members ever initiated at the organization of a Court in the United States, and having started under such favorable auspices its membership is expected to make rapid progress.

At the conclusion of the installation of officers and the initiatory ceremonies, the Foresters adjourned to the banquet room of the Masonic hall, where they set down to a sumptuous collation spread by Wm. H. Mitchell, proprietor of the Wisconsin hotel. The exercises at the banquet were conducted in the following order:

Opening address by Chief Ranger Palamountain.

Toast—"Subsidiary High Court of the United States," drank standing, and responded to by Frederick C. Hensley, District Court Ranger.

Music—by Pride of Grass Valley Quartette Glee Club, Messrs. Richard, John and Wm. Richards and J. H. Hampton.

Toast—by J. C. Phillip, Sub. Chief Ranger, "District Court of California," drank standing, and responded to by E. C. Thatcher, District Court Treasurer, of San Francisco.

Music—by the band.

Toast—"Pride of Grass Valley Court, No. 6803," drank standing, and responded to by John Palamountain, Chief Ranger.

Recitation—by Joseph Bennalleck.

Music—by the band.

Toast—"Sister Courts," by George Vincent, drank standing, and responded to by James Healing, P. C. R.

Solo—concertina—John Palamountain, which was received with an encore.

Recitation—"The Minatrel's Curse," by John Tyrrell.

Solo and chorus—by J. H. Hampton. Encore.

Toast—"Capital Court of California," by J. Palmountain, drank standing, and responded to by H. S. Lougton, P. C. R., of Sacramento.

Cornet solo—by John Jenkins.

Toast—"The Press," by Wm. Johns, drank standing, and responded to by H. S. Spalding, of the *Free Lance*.

Toast—"Sister Courts of Canada," by John Palmountain, drank standing, and responded to by E. Mill, P. C. R., of Toronto, Canada.

Address—by J. McGinnis, Post Chief Ranger.

The interesting and agreeable entertainment was concluded with singing "Auld Lang Syne," by the whole company. The best of fellowship prevailed, and what with good edibles, a generous flow of champagne, music and speeches the evening was most delightfully passed by all present.

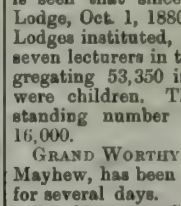
Improved Order of Red Men.

Officers of the Great Council.—J. A. FILCHER, Great Sachem, Auburn; J. F. PINKHAM, Great Senior Sagamore, Oakland; C. E. Spencer, Great Junior Sagamore, Sacramento; EUGENE LEHE, Great Prophet, Stockton; H. S. WINN, Great Chief of Records, S. F.; ADAM SMITH, Great Keeper of Wampum, S. F.

THE new organ of the Red Men, the *Wampum Belt*, is a neatly-printed eight-page paper, printed at Salem, Mass. As a journal of news, it cannot be of great value to the Injuns of this coast, as an item must of necessity become quite old before it can be sent to Massachusetts and returned in print, yet we welcome the *Belt* to the field of society journalism. Concerning the Order, it says: "Unlike many of the secret societies now in vogue, the Improved Order of Red Men does not rely for its strength so much upon its financial benefit which may accrue from the connection of it as upon the subtle influences of love and fraternity with which it fills the heart of him who understands the principles, and who thoroughly comprehends the mysteries which it exemplifies. To him who loves his fellow man, and whose heart is attuned to that sensitive degree that he can feel keenly with the joys or sorrows of those with whom he may come in contact, our Order has peculiar attractions."

THE library and reading-room in this city have been very much improved of late, and it is now really a credit to the Order. The returns for the present six months will show a great increase in the number of frequenters, as well as the number of volumes read.

GREAT SACHEM, John A. Filcher, of Auburn, Placer county, intends devoting considerable time to the interests of the Order during his term. In this he is quite correct. The present is a propitious time for advancing the interests of all fraternities, and efforts in the right direction by the head of the Order will, no doubt, have a very beneficial result. On the contrary, if the present opportunity is not improved, and some advantage taken of the general improvement in all Orders now going on, the result will be a gradual falling off. The public will associate themselves only with live institutions.



REPRESENTATIVES Grove L. Johnson and Henry A. Chase expect to leave this week for Annapolis, Maryland, to attend the Great Council of the United States to which they are representatives from the Great Council of California.

REDMANSHIP is very lively in Philadelphia just now.

LOUISIANA is soon to have a Great Council.

Patriotic Sons of America.

GRAND OFFICERS.—C. L. WELLER, State President, S. F.; A. K. HOLLIS, State Sec'y, S. F.; DR. E. L. WILLARD Asst. State Sec'y, S. F.

STATE PRESIDENT WELLER has returned from his visit East. He attended the National Camp session held at Portland, Maine, and was elected Vice-President of that body. The burial place of Washington—Mt. Vernon—was visited by him. He obtained from the superintendent of the grounds a beautiful white flower, which he has had pressed, put under glass and elegantly framed. It will be hung in the camp-room of No. 4, Washington Hall, No. 35 Eddy street, to serve as a reminder to the Patriotic Sons of the greatness and goodness of the Father of his Country.

FOR the purpose of affording the lady relatives of the members of this Order an opportunity of participating in its enjoyments, Martha Washington Circle, No. 1, Daughters of Liberty, will be organized September 1st. This branch of the Order is founded upon a somewhat similar principle, and bears the same relation to its parent as the Eastern Star to Masonry and Rebekah to Odd Fellowship.

A FEATURE of this Order is the interest which members take in advancing the material interests of each other. At the rooms of the Order on Eddy street, a bulletin board is placed, where the cards of the members doing business are posted, and the brothers are encouraged to patronize each other.

THE Order is about being introduced into Oregon; O. F. Sites being at present engaged in prospecting for a camp at Portland.

Good Templars

Officers of the Grand Lodge.—ROBERT THOMPSON, San Francisco, G. W. Chief Templar; MRS. H. A. MAYHEW, Red Bluff, G. W. Vice Templar; DR. I. S. HALSEY, Vallejo, G. Treas.; GEORGE B. KATZENSTEIN, Sacramento, G. Sec'y.

A VISIT to Crystal Water Lodge No. 133, is a real luxury, that but few persons (compared to the whole population) ever have an opportunity to enjoy. In this Lodge as in but few others, is the true spirit of harmony and kindness made manifest in every thought, word and deed. At a recent meeting the painful duty of upbraiding three of its members, for being unfaithful to the sacred trusts committed to their charge, was performed. A detailed history of this Lodge could only tend to strengthen this and kindred Orders in their noble labor of man's redemption, and stimulate them to still greater exertions.—COR.

ACCORDING to the basis on which delegates to the Grand Lodge, I. O. G. T., which meets at Vallejo, Oct. 4th, are to be elected—allowing one delegate for each 20 members, and one additional for each charter—the number will approximate 1,100, enough to astonish the natives. It has not yet been decided in what hall the delegates will meet.

GEORGE B KATZENSTEIN, Grand Secretary, in his quarterly report to the Executive Committee, gives some interesting statistics, from which it is seen that since the meeting of the Grand Lodge, Oct. 1, 1880, there have been 103 new Lodges instituted, 410 addresses made by the seven lecturers in the field, before audiences aggregating 53,350 in number, 6,610 of whom were children. The Lodges reported in good standing number 333, with a membership of 16,000.

GRAND WORTHY VICE TEMPLAR Mrs. H. A. Mayhew, has been visiting friends in this city for several days.

DR. MERRICK, Grand Lecturer of the Order, delivered three very interesting lectures at Rio Vista, on the 28th, 29th and 30th.

Miscellaneous

The Masonic Board of Relief.

The Masters of the various Masonic Lodges of the city constitute this Board, and elect its own officers each year, which consist of Chairman, Secretary and Treasurer. At the present writing the Board is composed as follows: J. Luchsinger, of Fidelity, No. 120, Chairman; Harrison Jones, Secretary of Occidental, No. 22, Secretary; G. H. Thompson, of Oriental, No. 144, Treasurer; A. Halsey, California, No. 1; Emanuel Raas, Parf. Union, 17; C. L. Haskell, Occidental, 22; Robt. Bright, Golden Gate, 30; M. D. Boruck, Mt. Moriah, 45; C. E. Kohte, Hermann, 127; R. S. Corning, Pacific, 136; Sam'l Simmons, Crockett, 139; J. C. Hall, Excelsior, 166; M. V. B. Taylor, Mission, 169; Elias Hare, South San Francisco, 212; J. M. Merrill, Doric, 216; C. Salla, P. M. of Speranza Italiana, 219; A. H. Wands, King Solomon, 260.

The object of the institution is the assisting of needy and unfortunate brethren who may not be members of any local Lodge—strangers within our gates. It was organized in 1856, through the efforts of Alex. G. Abell and his compeers of that day. While the Lodges of the city exercised a full and benevolent care over the sick and distressed among their own members, the calls for assistance became so frequent from the many brethren passing through this great center of travel, or sent here for medical aid from outside Lodges, that the need of some society was sorely felt by the few public men among the fraternity at that early day. Through it by organized effort funds could be raised, and needy brethren assisted in a more fraternal way than by appeals to the charity of individual members, while imposture could be better guarded against. During the 24 years of its existence up to the last annual report in September, 1880, $167,838.03 has been expended in this work, of which only $29,784.61 has been used for the benefit of brethren of our own State, and $16,024,15 for their widows and orphans, and $9,305.81 for incidental expenses. During the year 19 brethren have been buried with Masonic honors, and $10,320.17 expended for the relief of the sick and distressed, 131 cases having been reported and assisted; and for incidental expenses, $980.70. The receipts were $12,800.11, leaving an unexpended balance to commence the year of $1,499.24. Counted as receipts is the sum of $3,635.57, refunded to the society by the respective Lodges of which the assisted were members in various parts of the world, even to Prince Edward's Island and New South Wales.

The incalculable amount of good done by this truly Samaritan institution cannot be measured by the dollars and cents it has expended. In nothing so much as charity does the aphorism of "a stitch in time saves nine" become a great truth. Timely assistance often prevents great suffering, and even crime and death. Destitution is one of the doors through which come desperation and despair, and the public can never know what might have been the ultimate fate of the unfortunates cared for by this society, had its helping arm not been stretched out to save. We bespeak for it the kind considerations and practical aid of all brethren able to assist in the good work. The generosity of

The I. O. O. F. Relief Committee.

The Independent Order of Odd Fellows was organized in 1819, at Baltimore, Md., at the Seven Stars Tavern, and from an humble beginning has assumed colossal proportions, and is destined to increase "until time shall be no more." Below will be found some statements in connection with the work of this great and benificent order. There are now under the jurisdiction of the Sovereign Grand Lodge of the United States 74 Grand Lodges and Encampment, 7067 Subordinate Lodges, with a membership of 440,783, besides those in Australia and Germany. The relief of the distressed, burial of the dead, and the education of the orphans, in 1830 was about $5,000; in 1879, about $2,538,685. For weekly benefits there has been expended from 1830 to 1879 the sum of $30,000,000, and for extraordinary contributions, covering the same period, about $27,456,315; aggregating a total expenditure of over $60,000,000. The total receipts during this period was $77,984,179.72. The Order was instituted in this State in 1849, and since its institution it has disbursed for relief and charity over $3,500,000. The value of the property in this State in round numbers is $2,000,000.

The Relief Committee of this city is formed for the purpose of caring for visiting brethren from the interior of the State, and other jurisdictions, whether sick or in distress, and requiring care, to obtain employment, and, in fact, to show a fraternal interest to those who come here strangers in a strange land, thus carrying out the broad principles of the Order, viz.: "To visit the sick, relieve the distressed, bury the dead, and educate the orphan."

The Committee was formed in 1852, and since that time has disbursed for benefits and charity about $175,000. The distributions have not been confined to brethren alone, but the widowed and fatherless have been recipients of a large share of this sum.

Its meetings are held each Sunday morning at ten o'clock, in the Relief Hall, Odd Fellows' Building, 325 Montgomery street. The officers for the present term are: President, James B. Leaman; Vice-President, W. A. Robertson; Secretary, William E. Lutz; Treasurer, Gustavus L. Spear; Home Correspondent, J. Saulmann; Foreign Correspondent, B. Pendleton.

Something New.—A recent German patent employs two boilers, one of which uses steam at a much higher pressure than the other. High pressure steam is used in connection with the injector to carry a portion of the exhaust steam from the engine into the low pressure boiler. To the above a contemporary says: "It would seem to be a peculiar combination and much like a man's lifting himself over a fence by taking hold of his boot straps."

Deaths from Opposite Causes.—A French newspaper relates that a millionaire lost his entire fortune, except about 100,000 francs, and died of grief within the 24 hours. His brother, who was his sole heir, had long struggled in poverty, and now, on the sudden receipt of what he regarded as a large fortune, has just died of joy.

Tell the Story!

Yes, tell the story, and show the devil, thought we, as we read the latest of rum's doings in "our own" city:

"Sure, she hasn't as much clothes to her back, the dear lady, as I'd take to lift a hot saucepan from the fire." This distressing condition of affairs was yesterday related to a *Call* reporter of the widow of Capt. James Jules Sanderson Jewsbury, niece of the late Sir William Hamilton, of H. B. M. Consulate service. Mrs. Ann McManus, of No. 27 Minna street, the reporter's informant and landlady of the scantily-clothed widow of a British officer, made this statement, and without waiting for the reporter to recover, supplemented it with the further announcement: "Yes, and she hasn't even that, for she can't leave her bed for the want of a gown, at all." Mrs. Jewsbury, the reporter learned, had another reason for not leaving her bed, and that reason will continue sufficient to keep her there until she has recovered from the effects of a severe beating said to have been administered to her by her brother, James Leslie, about a week ago.

If any considerable number of people have the same kind of an opinion regarding Leslie that Mrs. McManus has, he is indeed an unfortunate man.

"The big brute," remarked Mrs. McManus, in one of her calmer moments, "for him to strike and beat the poor lady, and she his own sister, just because she wanted him to pay me part of their and his children's board bill owing me, and me a lone woman. 'Give Mr. Mac some of the money, won't you, James?' she says so gentle and ladylike. 'I'll break your face in,' he answered, and with that he hit her across the face, and made it as black as your hat.

He took the Money

And got drunk with it, as he always does, and the money belongs to her. It comes every month—$75—to her from her agent, and Leslie makes her sign the money over to him, and he spends it. Not a cent does she get, and he'd kill her if she didn't sign the paper over to him. They have been with me four months, and she a prisoner all the time, because she hasn't a dress to put on and go out with. She had a lot of beautiful dresses, but he drank them all up, and her jewelry, too. He has three children by a wife who committed suicide two years ago, and no wonder she did, poor soul. One of the children is in the country, and two of them here. The four of them stay in one room; he and a child in one bed, and she and a child in another bed. He has been treating her shameful ever since she came to him to take care of his children, but the last month it got too bad for anyone to stand. He'd knock her down and take hold of her ankles with both hands, and twist them. Oh! but he's a brute! So at last me and Bridget Whalen, another roomer in the house, complained, and the British Consul told the police officers, and now he is arrested and there is a chance for the poor lady to be protected. Won't you come up and see her?"

The reporter accepted the invitation, and found Mrs. Jewsbury in one of two single beds in a scantily furnished front room. The landlady assumed a bustling, good-natured authority that gave the invalid no opportunity to ask for explanation or the reporter to offer excuses. When Leslie's name was mentioned, his sister said, "Oh, I am sorry this disgrace has come upon him. I am afraid that when he has been given the first shove he will go down hill very fast. I was just thinking of writing him a note and telling him not to be despondent. He never meant to do me any harm, I am sure. He is only hasty."

This speech seemed to give Mrs. McManus the keenest anguish, and it was plainly by a great effort alone that she kept from interrupting with various objections. At its conclusion she eyed the speaker hopelessly for a while, and then appealing to the reporter, said: "Now, look at that, will you! Just hear her talk! He's hasty, is he? And he ain't down to the bottom of the hill yet, eh? Look here, will you," and, notwithstanding a feeble resistance, the landlady had the sister's left arm bared and tenderly held it up for inspection. The arm was shockingly bruised and discolored from the shoulder to the wrist.

"That's only where he twisted her arm when she dared to say something about his doing something for his children," said Mrs. McManus, evidently greatly relieved that she had shown the reporter what brother James' thoughtless haste resulted in.

Mrs. Jewsbury is a woman less than 30 years of age, and was undoubtedly a very beautiful woman before she endured the suffering she brought upon herself when, with intended kindness, she came to her widowed brother to take care of his children. She speaks like a woman of refinement and culture, but appears to be

Utterly Broken in Spirit

By her disheartening situation. She was born in Scotland, she says, married an officer in the British army, and as a young widow went to live with her uncle, Sir William Hamilton, British Consul at Boulogne-sur-Mer, France. "Mamma," she said, "wanted me to be with her brother, dear Uncle William, in his old age. I was with him only six months, the first time, when I was recalled to Scotland by a cablegram, and went home to see my mother and sister die. Six months after I returned to Uncle William he died, on his 88th birthday. Seven of my family and my husband's family died within two years, and so I came to James here. I found him very much changed, though. I expect some money in addition to my annuity, with which he promised to go into business. He is hasty, that is all, and changed some, but he never meant me any harm."

"No harrum, except to drive you to Lone Mountain, poor dear," said Mrs. McManus quickly, to drown the sound of the excuses for brother James.

James Leslie was visited in the City Prison, and found to be, like most prisoners, tearfully unable to understand why he should be arrested, of all people. "I chiefly regret my confinement here because my sister is in very poor health and requires constant attention. I have not been in business lately, owing to my anxiety for her health, which has kept me close by her side. She is expecting from her husband's estate £375 sterling, with which I intended to go into business. Her income from investments left to her by her husband is £15 a month.

Leslie is a plain, rather pleasant-looking, middle-aged man, whose wife, a few months before his sister's arrival, was found hanging lifeless to a gas fixture in her room on Mission street. He is a nephew of Sir William Pemberton. He was found guilty of two charges of assault and battery, on one of which he was fined $5, and on the other was sent to the House of Correction for three months.

A Curious Gas-producing Substance.—The gas-producing substance—a kind of sun-baked clay, of a light brown color—recently found in Mexico exhibits, on analysis, the following chemical composition: Moisture, 2.71; hydrocarbons, volatile at a red heat, 71.00; fixed organic carbon, 8.99; ash, 17.30. The ash is constituted mostly of grains of quartz, and the hydrecarbons—much larger in quantity than is afforded by the best bituminous coals—gave, when burned, a clear, luminous flame, apparently free from sulphur vapors. Distillation affords a red oily substance, of nearly the consistency of butter and having a very offensive odor, which, however, is not perceived when burned. The origin of this mineral is not clear, but is thought to be due, probably, to causes similar to those which originated the oil-bearing strata of Pennsylvania. It is assumed that, in such instances, gaseous hydrocarbons are formed from the decomposition of organic remains, which become liquid under pressure, and the liquid is readily absorbed by disintegrated rock or quartzose sand. The structure of this substance is said to show lamination—proving that it has been under great pressure.

Morse, who invented the telegraph, and Bell, the inventor of the telephone, both had deaf-mute wives. Little comment is necessary, but just see what a man can accomplish when everything is quiet.

Æsthetic Dresses.

People on this side of the Atlantic do not understand exactly what it is that the English æsthetics affect. A London letter describes an æsthetic ball, and gives a very good idea of the general appearance of that class of people on such occasions. Burne Jones, the artist, the Postlethwaite of *Punch*, who revels in depicting lanky white maidens on canvass, was there, looking long and solemn, like one of his own paintings; but Oscar Wilde, the poet, the Maudle of the English paragraphers, was absent. The ladies had their hair cut short and pulled out in wisps, like the characters of midiæval illuminations. The favorite colors in dress were a dull shade of peacock blue, sage green, terra cotta red, and bright saffron. The materials employed were principally crape, cashmere, and thin China silk. The attitudes affected were something remarkable, but all on the floppy style, as if to give evidence of the possession of the backbone were a sin. So they lolled an flopped about in the most boneless manner, leaning against door-posts and furniture, limp and lifeless. There is said to be more than a suggestion of picturesqueness in this craze, and if it were properly carried out it would be rather nice than otherwise. It has the advantage of economy. An æsthetic ball dress need cost but few more shillings than a Paris one does pounds. But the dresses themselves are hideous and badly made, sometimes not entirely clean, and the cropped heads are unpleasant. But, for all that, they say that a pretty girl will continue to look pretty in the fashion and a plain one succeeds in attracting by it a degree of attention that she would otherwise not command.—*Boston Budget.*

Paper Blankets.—By a recent invention the domain in which paper plays its part in the general economy of things has been materially widened. To a Manchester firm of the name of Henry & Leigh Slater, says the *British Trade Journal*, belongs the credit of utilizing paper in this especially serviceable direction. At once cheap, cleanly, warm, light and easily manipulated, paper seems expressly designed for the purpose to which it is now for the first time successfully applied. Of late years various attempts have been made to turn it to account in the manner described; but, owing to the crackling nature of the paper and the impossibility of securing free ventilation beneath paper coverings, the idea was abandoned again and again. In the production of the "Chartaline" blanket, as the new invention is called, these defects have been overcome in a most satisfactory manner. Ventilation is obtained as full, free and perfect as takes place beneath an ordinary woolen blanket. The new bed covering is made of two sheets of paper, between which a layer of wadding, chemically prepared, is inserted in such a way that it cannot gather together in lumps. The edges are strongly whipped, so that there is no possibility of a separation of the two pieces taking place. The paper is manufactured from the strongest fibre known, which, being softened by a special process, is free from the objectionable crackling and rustling sound that, as a rule, accompanies the manipulation of paper. It is true there is a slight crisp feeling when new, but this soon wears off and the coverlet becomes soft and limp. At the same time, the strength of the "Chartaline" blanket is much greater than might be imagined, having regard to the character of the material from which it is manufactured. As far as looks go, the new blanket has all the appearance of a woolen one, while the warmth it affords exceeds that of its predecessor when the size and weight of the two are brought into comparison. The trifling cost at which these seviceable articles may be obtained constitutes, however, when all is told, the chief advantage of the invention.

To Patrons and Business Men.

In the consolidation of the *Fraternal Record* with the Pacific States Watchman we have added to our large list of subscribers those of the *Fraternal Record*, which will make the Pacific States Watchman one of the most desirable papers for advertisers published in this State. Our circulation is general throughout the Pacific coast, a small circulation in many of the Eastern States and among all fraternal and beneficiary societies. As a family and fraternal paper, patronized by a select class of citizens, we offer a portion of our columns to the public, with our increased circulation, without any advance in rates.

Our Agents.

Our Friends can do much in aid of our paper and the cause of practical knowledge and science, by assisting Agents in their labors of canvassing, by lending their influence and encouraging favors. We intend to send none but worthy men.

J. F. Osborne—San Francisco.
G. W. McGrew—Santa Clara county.
M. P. Owen—Santa Cruz county.
J. W. A. Wright—Merced, Tulare and Kern counties.
Jarrd C. Hoag—California.

Spontaneous Combustion.

A. Renouard, of Rouen, France, has lately experimented with greasy rags to ascertain the degree of their inflammability under certain conditions. He took for this purpose a quantity of cotton rags, saturated them with boiled linseed oil, wrung them out and placed them, together with dry cotton, in a box about eighteen inches long, eight inches wide and two feet high, in which he put a thermometer in order to watch the increase of temperature. The room in which the experiment was made was kept under a temperature of 170° F. The mercury soon began to rise, and showed, within one hour and a quarter, 340° F. Smoke commenced to come through the fissures, and as soon as air was let in the flames burst out.

In another experiment, made under the same temperature, cotton, saturated with crude linseed oil, ignited within five or six hours. Rapeseed oil caused ignition after ten hours. In another room, where the temperature was left at 120 F., cotton, mixed with a little olive oil and put in a paper, burnt after six hours. Castor oil required more than twenty-four hours; whale oil, only four hours; and fish oil, two hours. Spermaceti oil, free of glycerine, did not ignite at all; neither did heavy tar, coal tar, or slate oils.

The above experiments show very clearly the necessity for a scrupulous watching of oily rags, which are often too carelessly handled in our cotton and woolen mills. Even a collecting of the rags every night before the closing of the mill is not a sure preventive against the danger of fire. There should be in every department of the mill where rags are used for cleaning machinery, an iron box, which can be closed very tight, and every hour or two a man should go around, collect the rags and place them in this box, from which they can be taken every night, and disposed of in some safe manner. Too much care cannot be taken with these substances, and it is better to look out in time than after the accident has happened.—*Textile Colorist.*

SCIENCE IN CHINA.—The interest which the Chinese are taking in modern science and culture is not confined to the fact that they are sending great numbers of their young men to this and other countries for a liberal education, for they are also establishing schools of science and literature in their own midst, modeled after those of foreign nations and partly under the conduct of foreigners. They are not only apt as scholars—as imitators—but they are also beginning to strike out as original thinkers. As a case in point, a Chinese physicist, as reported in *Nature*, has recently asserted that "the law, which is commonly accepted, and which states that the octave of any note may be produced by doubling the length of a musical cord or tube, is strictly true only for cords. He says that experiments with tubes of different lengths and diameters have led him to the conclusion that the ratio of length is as 4 to 9, instead of 1 to 2." Several English and American scientific treatises have already been translated and published in the Chinese language, and it is probable that the time is not far distant when we may find valuable original publications in the same language.

THE French Senate has passed a bill granting liberty of the press. The Paris editor will now be able to enjoy the supreme delight of calling a government official, a "vile serpent reeking with corruption" without being fined 5,000 francs and immured nine months in a bastile. If he is not, their boasted freedom of the press is a hollow mockery.

Work on the Lick Observatory.

A reporter of the San Jose *Herald* lately visited Mt. Hamilton to see the progress of work in preparation for the construction of the Lick observatory. Upon the summit he found a level tract of about 10 acres, which had been cut down for the erection of the observatory and additional buildings. In some places the top had been cut down as much as 50 ft. Most of this work was done by the strongest blasting, as the summit is almost solid rock. The debris from the blasting was rolled over and graded up to extend the limits of the summit. When some of these large rocks would be loosened, they would roll down the side of the mountain, sometimes for a mile, cutting brush, trees and everything else in their path. The observatory and all the main buildings are to be built of brick. The brick is now being burned near the summit. Those supervising this matter have been very fortunate in finding the finest and best kind of clay for this purpose.

The water supply is from a natural spring about a mile north of the summit. The place is higher than the site of the observatory. The water is forced out by engines with great power and sent in great supplies to the place of work. It is pumped into four large tanks.

The buildings will be commenced early in September, and the work pushed forward as rapidly as possible until their completion. Prof. Burnham, the celebrated Eastern astronomer, who was here about a year ago, will return this fall, and study the heavenly bodies from Mt. Hamilton, as he says it is about the most favorable locality in the United States.

THE Carson Mint will not start before the 1st of October. They are busy building the new refinery.

What Becomes of Condemned Boilers.

If the secrets which are locked in the breasts of the junk dealers of Philadelphia could be revealed, a startling tale might be told. In different parts of the city there are sidewalks and yards which are occupied from January to December with boilers which have been placed under the ban. As fast as one disappears another takes its place. Sometimes thirty, forty, or even fifty, may be counted in a single yard. A few months later another lot have taken their places. Where have they gone? Some up through the State, some to Jersey, some to Maryland; but the majority might be found in use right in Philadelphia. It is a notorious fact, freely admitted by every man in the junk trade, that a boiler may be condemned, perhaps purely on account of a little capriciousness on the part of the inspector, removed to a junk shop, painted up, perhaps a soft patch or two put on some place, then resold, built in position, and passed at a pressure which, if allowed in the first place, would have saved the original owner the necessity of replacing it. As a matter of fact, there is absolutely no method by which an inspector can identify a boiler a second time. Very few condemned boilers are broken up for scrap. When the condition of one is so utterly bad that even a junk man is afraid to recommend it to a city user, he generally finds no difficulty in finding a purchaser in some other part. Old boilers which would not pass muster at any pressure within city jurisdiction are regularly shipped across to Jersey, down to Maryland, or up the State.—*Philadelphia Record.*

ABOVE 10,000 troops have signified their intention to be present at the Yorktown celebration. It is believed that the militia alone to take part in the celebration will exceed 30,000. Many States will send full regiments.

COMPOUND OXYGEN — NOT A DRUG

A NEW TREATMENT for Consumption, Asthma, Bronchitis, Catarrh, Dyspepsia, Headache, Debility, Neuralgia, Rheumatism, *and all Chronic and Nervous Disorders.*

ACTS DIRECTLY upon the great nervous and organic centres, and *cures by a natural process of revitalization.*

HAS EFFECTED REMARKABLE CURES, which are attracting wide attention.

HAS BEEN USED BY Rt. Rev. John J. Keane, Bishop of Richmond, Va., Hon. Wm. D. Kelley, T. S. Arthur, and others, who have been largely benefited, and to whom we refer *by permission.*

IS STRONGLY ENDORSED: "We have the most unequivocal testimony to its curative power from many persons of high character and intelligence."—*Lutheran Observer.* "The cures which have been obtained by this new treatment seem more like miracles than cases of natural healing."—*Arthur's Home Magazine.* "There is no doubt as to the genuineness and positive results of this treatment."—*Boston Journal of Commerce.*

THE OXYGEN HOME TREATMENT contains two months' supply, with inhaling apparatus and full directions for use.

SENT FREE: a Treatise on Compound Oxygen, giving the history of this new discovery and a large record of most remarkable cures. Write for it. Address

Drs. STARKEY & PALEN,

ADMINISTERED BY INHALATION. 1109 and 1111 Girard St., Philadelphia, Pa.

Depository on Pacific Coast.

WE HAVE ESTABLISHED A DEPOSITORY OF OUR COMPOUND OXYGEN HOME TREATMENT at San Francisco, Cal. This will enable patients on the Pacific Coast to obtain it without the heavy express charges which accrue on packages sent from Eastern States.

All orders directed to H. E. MATHEWS, 606 Montgomery street, San Francisco, Cal., will be filled on the same terms on which we fill orders sent directly to our office in Philadelphia.

Patients ordering from our depository in San Francisco, should, at the same time, write to us, and give a statement of their case, in order than we may send such advice and direction in the use of the Treatment as their special disease may seem to require.

DRS. STARKEY & PALEN, Nos. 1109 and 1111 Girard Street, Philadelphia, Pa.

A Suggestive Eastern Scene.

The engraving on this page represents a scene characteristic of many of the rural districts of the Eastern States. Even the lifeless picture is particularly suggestive of reminiscences of a serious, contemplative character, and life among such scenes, with the utmost familiarity with their details and surroundings, does not detract from their impressiveness. But it is on a return to such spots after a long absence passed in more stirring, changing scenes, that they most seriously impress the mind and heart. It requires only a slight loosening of the reins of fancy to suppose that the old man sitting under the shade of that grand old tree in the left of the picture, is such a visitor. Or, we may imagine that he is one of those almost sacred living relics found on so many of our New England and other Eastern farms. After having spent the best of their days — physically speaking — in enriching and beautifying that particular locality, their sphere of usefulness is restricted to the social circle; and while thus passing this calm and quiet period of their lives, they have many opportunities for retiring to the scenes of their former labors, to behold manhood in its youth and prime enjoy their sports or perform their labors, and there indulge in the peaceful and quiet reminiscence of old age.

YOUTH AND OLD AGE—AN OLD MAN'S REMINISCENCE.

If your dues are but $1 per quarter, you cannot pay more than $3 per week sick benefit, nor even that for more than 13 weeks in a term. If your dues are $6 per year, and your expenses for hall, salaries and incidentals light, you may possibly be able to pay $5 per week for 13 weeks in each term, but not more than that. Above all things don't promise too much and demand too little. Systematic and sure relief requires funds.

School Discipline.

There can be no question but that some of the boys of this city and Oakland are hard customers, and tax the patience and forbearance of their teachers to the utmost. But it is also a question if the vigorous treatment which it is reported has been meted out to some of them can cure the evil. The whole tendency of modern school-room discipline is to banish the use of ferrules, sticks, and other means of inflicting punishment, and substitute in place milder forms of correction. There are teachers who can govern the most unruly boys simply by the force of their own character. We have known a small delicate lady who held a crowd of overgrown boys in the school-room in complete subjection simply by the sweetness of her disposition and the firm though gentle manner in which she exercised control. They would feel pained and humiliated by the thought of doing anything which would cause her uneasiness.

Perhaps in some cases there may be boys whose moral natures are so blunted, the result of home training and inherited tendencies, that the use of corporal punishment cannot well be avoided, but in such a case there is no reason why the teacher should lower himself to the position of a slave-driver, and use his instrument of chastisement with as little feeling as was formerly done by the overseer of a cotton plantation. When it is shown that such a man has allowed his brutal instincts to usurp his reason, he should be allowed to choose some other vocation in life. It is an evident truth that as a school teacher he has not, nor will not, ever prove a success. His moral nature is so obtuse and the animal part of his being so little under subjection, that when children who are under his care are wild and unruly, he loses complete control of himself and resorts to measures which brutalize both child and himself.

The Event and Its Influences.

The incidents of the President's illness will not be forgotten during the present generation. Never before has the public mind dwelt upon the significance of symptoms and been led to study the relations between pulse, respiration and temperature. Never has the danger and distress of a gun-shot wound been so widely appreciated, and if the thought on this subject should lead to more restricted use of weapons in low as well as in high places, it would be a public benefit.

There has been running through the accounts of the President's sufferings which have come to the daily papers, veins of sickly sentimentalism as well as lofty heroism. The abundance of gush is, however, to be attributed to the reporters, who have free use of the wires, and it is hardly worth while to get excited about it, as some of our exchanges have been disposed to do. The debris of sentimentality may be overlooked, as the case has given the country some gleams of true sentiment, courage and bravery, which it will benefit all who contemplate them. The bravery of Mrs. Garfield, when the doctors were disposed to lose all confidence and hope, will pass into history. It appears that the surgeons, after learning the symptoms of the morning, decided that it was useless longer to continue the struggle, and two of their number were selected to wait upon Mrs. Garfield and inform her that medical science could do no more, and she must prepare for the worst. The interview which occurred between these surgeons and Mrs. Garfield will, if reports be true, be regarded as one of the most dramatic incidents in this extraordinary case. Captain Henry, Marshal of the District, and a friend of the President and his family, says that Mrs. Garfield heard the news, and smothering her emotion, arose and said:

"Gentlemen, you shall not give him up. He is not going to die. He is going to live. I feel, I know it. Go back to your post, and leave it not until every remedy is exhausted, and until death itself has set its seal upon him, for I will not believe that he is dying. Go back, and do what you can; you cannot do more; but don't give up. I am his wife, and I say we will not give him up until the end itself is upon us."

Mrs. Garfield has never surrendered more than a moment or two at a time to her grief, and then she has retired to her room, and, after a brief absence, returned to her post of duty at the President's bedside. The conduct of Mrs. Garfield is calculated to endear her to the hearts of the American people, for the love and respect for a brave spirit is irresistible. The fact that other women are just as brave and heroic in their obscure places as she has been in the face of the world does not detract from her glory, nor does her fame take from their nobility. Rather should she be gladly accepted as the exponent of the courage and devotion and trust which are characteristics of noble women everywhere, and all the praise which she receives should be taken as a tribute to all true womanhood and wifehood.

The President has suffered severely, but not in vain. The stroke at his life was the death blow of political policies which were gaining alarming prevalence, but are now abhorrent and everywhere denounced. Should he rise, as we trust he may, his opportunity for reforms will be immeasurable, for the people will be beside him in every true action and interested opponents will fly through alarm at their own weakness. Even should he die, his long weeks of torture will not have been endured in vain, for any change in administration will now be less dangerous than would have been an immediate transfer of power. We count it sure that the sentiment of the American people is much higher and the determination for a pure and disinterested admisistration of public affairs much stronger than it was three months ago.

Home Miscellany.

Los Gatos.

[Written by G. W. McGREW, Local Correspondent of the PACIFIC RURAL PRESS, Los Gatos, Santa Clara Co., Cal

There's a cozy little village,
Half hidden in the woods,
Where the murmuring Los Gatos
Pours down its crystal floods
Through the wild and rocky canyon
That cleaves the mountain high
That bounds the fairest valley
Beneath our western sky.

This lovely little village
Hath charms beyond compare,
Of wild romantic beauty,
And cultured gardens fair;
For here the wooded mountains
The valley orchards meet,
And the oak tree and the orange
Shake hands across the street.

There's an air of careless beauty
That runs through all the town;
The streets go rambling where they please,
The side-walks up and down;
Some homes have found a level spot
To put on city airs,
While others peep from shady hights
Above a flight of stairs.

There are views of matchless beauty
From every cottage door;
The mountains! O, the mountains!
And the valley's painted floor,
Bedecked with homes and hamlets,
As it northward fades away,
Till its wheat fields, groves and gardens,
Kiss the waters of the Bay.

Far up across the canyon,
O'er the summit bold and high,
There's a fringe of noble redwoods
Against the western sky;
While eastward, o'er the valley,
Mt. Hamilton is seen,
With the Garden City nestling
In the lovely vale between.

But for scenes of rarest beauty
You need not look away,
To the distant chain of mountains
That circles half the bay;
Nor yet to the lofty summit
That overlooks the sea,
That casts its evening shadow
Across our little lea.

Nor yet to the quiet valley
That lies beneath your feet,
With its fruitful groves and gardens,
And fields of golden wheat;
There are gems of rural beauty
Just round about the town,
So pretty, that you think each one
The loveliest you have found.

You see them as you walk the street,
You see them from the hill,
You see them as you cross the bridge
Above the old stone mill;
You see them morning, noon and eve,—
In every changing light,
But Oh! how picturesquely!
When Luna crowns the night.

But this modest little village
By the babbling water's brink,
Is not so dull and idle
As a passer-by might think;
There's quite a stir of business,
In the narrow, crooked street,
Where the traffic of the mountains
And the valley traders meet.

Huge loads of wood and lumber
Come lumbering down the grade;
While the flying train goes flashing
Through the sunshine and the shade
A hum of wheels in motion
Comes up from the old Stone mill,
All hoary with age and flour,
As it grinds and grinds on still

That burst of merry voices
That rings out on the breeze,
Comes out from the village school-house,
Hid somewhere 'mong the trees;
Six days the anvil chorus
Rings out upon the air;
On Sabbath morn one single bell
Calls sweetly out to prayer.

Of all religions it is said,
I only mention what I read)
That the altar and the temple
Do shadow forth the creed;
But the people of this village,
(To lay aside all jokes,)
Are not a set of Druids,
Though they worship under oaks.

O, lovely rustic beauty!
With all thy simple ways,
Let not the tyrant fashion
Cut short thy happy days;
Preserve with stern devotion
The beauty God has given,
'Twill help to sweeten earthly toil
And point the road to heaven.

WOMEN'S TREATMENT OF WOMEN.—There is a general sentiment that women do not stand by each other, as men do by men; that we are envious, narrow and small, where our sex is concerned; that the greatest obstacles professional women have to overcome are the prejudices of women themselves; that if a woman commits a fault, nobody is so quick and ready to heap opprobrium upon her as another woman. All this is to a certain extent, unhappily true; but it is by no means generally true. The fashion of women sneering at women is passing into disrepute; so that nowadays, no woman who expects to pass as a well-bred lady, is guilty of the bad taste of speaking disparagingly or slightingly of her own sex. Now and then one does it, thinking, thereby, that she wins the esteem of men by so doing. She can make no greater mistake. Men admire large-mindedness and large-heartedness in women, quite as much as women admire these qualities in men. The more strongly and loyally women stand by one another, the more respectfully they treat and speak of one another; the more women honor women, have faith in women, the better for us. We cannot expect men to honor and revere us, unless we ourselves honor and revere our own sex.—*Mary A. E. Wager-Fisher.*

A Little Unpleasantness.

When Helen Castell had made up her mind to marry a certain young man named Cameron, her friends looked at each other with prophetic glances—George Cameron being noted for his strength of purpose—that is, his intense stubbornness—and Helen, the worst little case of capriciousness and self will they had ever known. Had her mother lived to rear her, she would have received better discipline, for Mrs. Castell had a gift that way; in fact—but let us forbear. Helen's father, though having had ample opportunity to learn his wife's method, had not profited by it; he was not a disciplinarian; indeed, the Castells, as a family, had "no government," and Mrs. Thoroughgood, his sister, who, with her son Jack came into the family at the time of Mrs. Castell's death, was as gentle and yielding as himself. Jack Thoroughgood, on the contrary, had no idea of being led around by the nose; yet, having a very ingenious way of influencing his pretty cousin without seeming to do so, there was never any open warfare between them, and they were as fond of each other as brother and sister. After all, Helen was not altogether spoiled, for, having a fine nature, and a warm, true heart, she was really a most lovable girl. George Cameron thought so, and did not hesitate to undertake the responsibility of marrying her.

Mr. Castell shook his head and sighed, Mrs. Thoroughgood did the same, and Jack smiled, remarking that the sauciest, most obstreperous maidens usually made the meekest maidens, and *vice versa*.

In course of time they were married and commenced housekeeping in a handsome villa near Oakland. What beginning could be nearer perfect—youth, health, wealth and love, and always in sight of those purple hills and the broad, beautiful bay? Between Helen and the untamable sea was a bond of sympathy. She loved to watch the changing hues, the sparkle and the flash of the restless, beautiful waves, the circling flight of the seagulls, with their graceful wings and gleaming backs, and the white sails moving to and fro, touched with the red mists of morning, gleaming in the golden mid-day sun, or rich with sunset hues. Like their calm sailing passed the first few months of Helen's married life. She was so much in love with her husband that she forgot herself. But one day, when she had become pretty well acquainted with him, and had lost somewhat of the awe with which she had at first regarded him, it was suggested to her—by one of those rapacious spirits that wander about seeking whose happiness they may devour—that she was not having her own way very much.

"But oh, dear!" said Miss Itoldyouso, in a tone that aroused the very spirit she was in search of, "we all knew how it would turn out. Some said you were more than a match for George Cameron, and would always keep your independence, but I knew you'd be just like the rest of 'em; little by little you'd give in, till you wouldn't dare to say your soul was your own, unless you'd heard him say so first."

"Nasty meddling thing!" commented Helen, when the door had closed upon her; but although she despised her, she could not help feeling uncomfortable at the thought that she was being ridiculed by her friends. From that moment the trouble began. George was disposed to yield to anything reasonable, but the tests she imposed upon him were too severe. Slight skirmishes arose, followed by regular battles, in which Helen was invariably defeated, and became, in consequence, bitter and defiant. Of course they were both wrong, but upon the whole George behaved wisely, and said but little; the storming was mostly on Helen's side. She concluded, at last, that it was too much for her to endure.

"I am going home," she declared.

"Going home?"

"Yes, home—to papa, and aunt Emily, and dear old Jack; I will not submit to such tyranny—no, not for another day."

"You need not go to your father to escape me," answered George, calmly enough, although he grew rather pale and his hand shook a little. "I am going away, myself, and leave you here, perfectly free and independent."

"No, I won't stay here, I hate the place and all about it. I am going back to my own dear old home!"

"Very well, go where you please; you shall be provided for, and shall not be troubled by me. But, Helen, mark my words: your father's house does not contain your happiness. It will not seem to you as it used to; you have entered upon a new life, and you cannot retrace your steps. You were entirely happy with me until your vanity and self-will were aroused, and you determined to make my will subservient to yours. Were I meekly to submit to you, it would not make you happy. I should only become the despised slave of your caprices. Between husband and wife, it seems to me, there should be no thought of self, but each should look to the other's happiness. We shall never be happy apart; but go, you will have leisure to think of it undisturbed. You will learn the truth of what I say in homesick weeping."

"Weeping!" cried Helen, passionately; "as if I had not already shed tears enough to flood this—*home!*" with scornful emphasis upon the word.

"And yet," said her husband, "you do not know the meaning of homesick weeping. But I am going away now. I will not intrude upon you again. Good bye, Helen." Here his voice trembled a little. "When you are ready to return, you will find me here, unchanged. Good bye."

He was gone. At his first "good bye" Helen felt an awful clutching sensation at her heart. I think she would suddenly have yielded but for the unfortunate ending of his speech—"unchanged." That meant that she was to creep humbly back to her uncompromising lord and master—never!

Yet she was obliged to keep her rebellious thoughts pretty well exercised during her brief preparation; the house seemed filled with objects that appealed to her heart, and awakened the full tenderness of her love. She turned from them desperately and fled down the garden walk—where, again, her flowers seemed imploring her to stay—down the avenue of stately eucalyptus trees that sighed above her drooping head. She turned at the gate for one last look at the place she "hated." Oh! if there were but one tender look, or even gentle word of command, she thought, all should be forgiven. But no, she was free at last. There was not a shadow of restraint upon her. Ah, Helen, what tyrant so cruel as self-will! She entered the carriage, and, bitterly weeping, was driven away.

At her father's she was made fondly welcome. Her father, although deeply regretting her step, and grieved at the unhappy result of what he felt must be her own bad management, still followed his old fashion of soothing and caressing her, instead of giving her a good, healthy chiding.

"She ought to be *chastised* and sent right back again," said a friend of the family who happened to be visiting them.

"It's all simple enough," said Jack. "She has come home to have her own way; let her have it until she is tired of it, that will happen sooner than you think. It's only a lover's quarrel, but she ought to suffer long enough to prevent her from repeating it, and, unless I'm much mistaken, George will give her plenty of time for repentance."

"I suppose, then," said Mr. Castell, with an approving twinkle in his pale blue eyes, "it is our policy to be as subservient as possible."

"Exactly," answered Jack; "get right down and let her walk over us."

At first Helen was quite touched by their extreme anxiety to serve her; but in a little while she wearied of it. Their "fussiness," as she termed it, annoyed her; their indulgence seemed disgraceful weakness; she contrasted it with the fine dignity of her husband, his tender courtesy toward her, his thoughtful attention that never became obtrusive. The more she reflected upon his character, the more she admired the very firmness against which she had rebelled. She blushed for her own silly behavior, but she was yet too stubborn to acknowledge it to him. "If he wants me to come back," she said to herself, "let him ask." But alas, he never asked! Months passed, and not a word came to break the silence between them. Oh, how keenly she suffered! How she longed to fly to him and be forgiven. Nothing seemed quite the same to her at the old home. But the change was in herself, as George had said. She realized now how truly her life was bound to his. There was no other home for her but where he was. The homesick tears he had predicted came, night after night, until she was worn and pale, with "eyes like moons," as Jack observed.

"Helen," he said, one day, "I believe you are secretly pining for the old man. Strange how a woman will stick to her husband in spite of everything! Now, I thought you had more spirit than to hanker after such a scoundrel."

It had been part of Jack's plan to speak disrespectfully of George. Helen always winced under it, to Jack's secret delight, and replied by speaking of him with an almost exaggerated respect. Upon this occasion her eyes flashed.

"Jack! how dare you speak of my husband in such terms? You are not worthy to—fasten his shoes."

"No, nor to pull on his boots; but I'll be hanged if I'll speak respectfully of a man that abuses his wife until she can't remain under the same roof with him, and has to come home to her father for protection."

"Protection!" cried Helen. "Perhaps you think he beat me! You know that George Cameron is too much of a gentleman to treat any lady with disrespect. If he did not weakly yield to my foolish whims and unreasonable demands, it was because he was too wise—too truly tender. I behaved very foolishly, and I was the only one to blame. I see it all now; and in spite of all your kindness to me, I have been so unhappy here. Oh Jack, I'm so miserable—I want to go home!" She sobbed hysterically.

Jack was sure, now, that the trouble was ended. How he laughed! And since Helen's pride had yielded, she would not stop there any longer. She was impatient to begin her journey. She would not even stop to write. "I shall reach home as soon as a letter," she said.

"Well, cousin," said Jack at parting, "we have had a delightful visit, do come again?"

"Not till George can come with me," said Helen, smiling brightly.

"Oh, hang George!" cried Jack, turning away in apparent disgust.

But Helen only smiled again, she was going *home*—she cared for nothing else; oh how her spirit flew on in advance, and hovered about the loved place, till at last she feasted her eyes on the familiar landscape, till wearied with excess of gladness she leaned back in the carriage and closed her eyes. So near home at last! The carriage stopped, and springing out she went with flying feet up the great avenue to the open space in front of the house; but oh, what sight was there—the house in ruins! Broken and charred by fire it stood a great black skeleton of a home, stretching out weird arms to the departing sunshine; the dismantled rooms seemed full of ghastly spirits that mocked at her consternation; the yard was strewn with fragments of furniture; bits of choice pictures and *bric-a-brac* stared at her from the debris; the trees were scorched and blackened, the roses bloomed, half withered, by the garden walls; all about the house the once luxurious vines and flowers lay crushed and—bleeding it almost seemed to her excited fancy. Under the window of her sitting-room some pansies lifted their little scarred faces and seemed to gaze at her reproachfully, here and there a pale daisy looked out, frightened, from the ruins. Alas, alas, her home—ruined and silent! The withered branches of the trees made shadows on the broken windows, waving her a last farewell. She felt as if it must be a dream—but no, there were the people hurrying up and down the road, there were the sunset tints just creeping up the sky, the sound of the wind in the trees, the sea-gulls hovering above the bay, the green waves curving and curling toward the shore, and far out a white sail, going almost out of sight as she watched it in a dull despairing way. There were no tears now, the shock was too great. Faint and sick, she made her way to the carriage and sent the driver to make inquiries at the nearest house.

"Wall," said he on his return, "as near's I can find out, the gentleman's wife left him quite a spell back, then the house burnt, and she kind o' give up. She says he's gone to his folks to New York, and the place is fur sale."

Gone to New York—to his brother's of course—and thither she would follow him. She found some comfort in thought that she was his wife and had the right to follow him, if need be, around the world. People no longer talk of going to the end of the world—the jumping off place. The next day she was on her way East. There was plenty of time for reflection during the long, lonely journey, and Helen's heart was filled with remorse. By the time she arrived in New York she was abject enough in look and manner to appeal to the hardest heart.

Trembling with fatigue and excitement, she was ushered into the presence of her sister-in-law.

"I am Helen, George's wife," she said, in a gasping, hysterical way.

"George's wife!"

"Yes. I came here to find him."

"Poor child," said Mrs. Cameron, gently. "You are so tired; sit down here and let me take off your bonnet."

"But where is George? I want to see George," she insisted nervously, feeling sure, from her sister's looks, that some fresh calamity awaited her.

"Poor child, George is not here; he left this morning for England. But don't fret about it, dear; we will telegraph him and have him back in a few weeks—by the time you are rested. Now cheer up."

But, instead of cheering up, Helen had fainted "dead away."

"When things are at their worst they mend." Things must have been at their worst with Helen, for when she unclosed her eyes again she fancied herself in the other world—the old world—there, bending anxiously over her, was George.

"Missed the steamer, and spent the morning with some friends," was his laconic explanation to his sister-in-law.

* * * * * * *

"Helen," said Jack, when he visited them in their new house—which was, in the broadest sense of the word, a new house built upon the ruins of the old one—"I am glad to see that you and George have outlived that little unpleasantness. Who is commander-in-chief now?"

"Well," said Helen, after a moment's consideration, and holding aloft the chubby young Cameron, "I haven't given the subject much thought, lately, but it must be baby."—*Julia H. S. Bugeia.*

HOW TO DRESS WITH TASTE.—The art of dress comprises color, texture, form and ornamentation. The first consideration should be directed to color. The accepting of fashionable shades, without any regard to the claims of complexion, is a great error, and the result is rarely correct. By chance one may sometimes make a good hit in such matters, although by accident some of the best things in existence have come to light. Red, this season, is quite a favorite, and can be worn by the blonde and the brunette, but the former must exercise a little discretion in adopting to any profusion this telling dye. The blonde who can befittingly adorn herself in scarlet trimmings, and especially where the hue is in close proximity to the complexion, should be very fair; a clear white skin will beautifully reflect the brightness of the scarlet; whereas, a face that has a yellowish hue, or a rather florid aspect should never appear to favor scarlet; if this color is worn at all by such, let it be far away from the face, except when arranged in an evening toilet. A brunette cannot wear pale green, which is most becoming to the fair beauty. Orange is the brunette's own color, but if the dark belle has blue eyes this dazzling shade will not enhance her appearance. The color of the toilet should be of that nature to impart a healthy tone to the complexion. This idea, when effectually produced, has a very satisfactory result. Avoid wearing those colors that highten or destroy either red, yellow, or white in the natural flesh tints.

For our Boys and Girls.

Our Puzzle Box.

Numerical Enigma.

I am composed of 56 letters.
My 12, 42, 35, 24 52 is a journal.
My 26, 2, 36, 46, 10, 48 is to waver.
My 1, 44, 56, 17, 39, 16, 19 is a town in Maine.
My 5, 50, 13, 40, 43 is to insult.
My 38 11, 39, 9, 55 is a labled being.
My 53 28, 47, 33, 25 is a garment.
My 18, 54, 20, 4, 34, 31, 48, 51 is a bush.
My 49, 27, 32, 22, 30 is a part of the head.
My 3, 7, 8, 42, 36 is a prophetess.
My 45, 21, 39, 29, 6 is confidence.
My 14, 23, 41, 48, 15 is a Spanish name.
My 37, 27 is a preposition.
My whole is good advice. CEPHA.

Cross-word Enigma.

My first is in west but not in east;
My second is in lion, but not in beast;
My third is in low but not in high;
My fourth is in live, but not in die;
My fifth is in lie, but not in truth;
My sixth is in Jane, but not in Ruth;
My seventh is in much, also in many;
My eighth is in some, but not in any;
My ninth is in have, but not in will;
My tenth is in farm, but not in till;
My eleventh is in king, but not in queen;
My twelfth is in scarlet, but not in green;
My thirteenth is in pen, but not in ink;
My fourteenth is in red, but not in pink;
My fifteenth is in bay, but not in bight;
My sixteenth is in dark, but not in light;
My seventeenth is in cent, also, in dime;
My whole was a well-known bard of olden time.
MELANCTHON.

Curtailments.

1. Curtail an outbuilding and leave a personal pronoun.
2. Curtail a place where hay is kept and leave a tribunal.
3. Curtail to moisten and leave a plural pronoun.
4. Curtail to ask earnestly and leave to perceive.
5. Curtail benevolent and leave relatives.

AUNT SARAH.

Charade.

A pronoun always meaning me;
A verb that signifies to sever;
Another verb who's meaning is
To join or link, or bring together;
These words together rightly placed
Will form a widly-famous river.

A farmer bought a drove of cattle for $180. After giving away two of them, he sold the rest for the same amount — $180. He now finds his gain on each to be one-third more per cent. than the cost price of each. How many did he buy? UNCLE JAMES.

NUMERICAL ENIGMA.—"Be it ever so humble there is no place like home."

PROBLEM.—3, 9 and 36.

CROSS-WORD ENIGMA.—Mountain.

RIDDLE.—New, full and old moon.

NAMES OF AUTHORS.—1. Byron (buy-run). 2 Shakespeare (shake spear). 3 Milton (mill-ton). 4. Emerson (emma-son). 5. Whittier (whit-tear). 6. Moore (more). 7. Cowper (cow-per). 8. Hart (heart). 9. Read(e).

A Good Name.

Human experience in every age has given abundant proof of the inestimable value of a good name.

Even the little boy realizes it daily in the family circle, in the school-room and at play; he well knows that if he has a bad reputation many offences are imputed to him of which he is guiltless.

The man in business is hourly reminded of it; if a merchant acquires a reputation for integrity, people manifest their confidence in him by bestowing upon him their custom.

The lawyer and the doctor must possess the confidence of the public if they succeed in their profession. Even the politician must secure the respect of those with whom he is associated ere he can hope for success in his vocation. He may make addresses without number, and by his eloquence entrance his audience, yet this will avail nothing if he possess a bad reputation.

Though a sermon be most eloquent and logical, yet if we have no confidence in the piety of the minister from whose lips it falls, it is but a stumbling block to us.

All men desire the respect and love of their fellow-men, and all seek in some way to obtain it. Some pursuade themselves that the possession of great wealth will procure it, and spend their lives in the pursuit of wealth, hoping to purchase with gold this most precious of earthly possessions. Others imagine that by the possession of earthly love alone, they can gain the coveted prize; and many strive by stimulating good to gain it. While it is true that a good reputation is often thus unjustly gained; when that is the case it is as fleeting as the rainbow's purple light. If it be a badness of character it must fade. To secure the lasting respect of our companions, we must live upright, honorable lives, thinking not alone of our own welfare. This requires constant sacrifice, but this, the gem is richly worth.

Our acts form the base of our reputation, and they live after we have passed away. It is impossible for us to live and act without forming a good or a bad character, that will live on, and aid others in climbing to the fair hights of Beautitude, or in sinking far below.

How very careful we should be to make all of our acts worthy of the commendation of the good, to deserve and retain a good reputation. Then seek this gem with greater zeal than the diamond hunter of Brazil formerly sought that precious stone, when success secured to him something dearer than life—his liberty. —*Julia M. Goodlett.*

Humorous.

Chips.

Now is the time to buy a row-boat, paint it green and name it after your girl.

WIFE—"Oh, dear; if he dies I shall go wild." Friend—"After whom?"

WHEN the time arrives for the baby to eat bread, you should break it to him gently.

"EMBROIDERED crash is much used for piano covers," says a fashion exchange. That makes a terrible sameness about the instrument.

PASSING around the hat, says the New Orleans *Picayune*, is an old and excellent method of getting at the cents of the meeting.

A POLITICIAN in Kentucky recently attempted to shoot an editor who accused him of "being in the habit of imparting an unhealthy swelling to the truth."

SCENE at the college.—Prep: (to servant at the door)—"Miss———?" Servant: "She's engaged." Prep: "I know it; I'm what she's engaged to."

YOUNG clergyman at a church meeting: "I merely throw out the idea." Old minister: "Well, I think that is the best thing you can do with it."

"DID you find Mr. Spriggins, Patrick?" "I did, surr." "What did he say?" "Never a worrud, surr." "Why not, Patrick?" "Because he was out, surr." "Out! I thought you said you found him." "I did, surr; I found him out."

A YOUNG man who went to Woodward's, and stepped too near the monkeys' cage had his arm seized and savagely jerked by one of the monkeys. He would have escaped safely, had he not said "it was only a monkey wrench;" but when they heard that, the infuriated crowd threw him into the lions' cage.

THEY have found the mummyfied body of Thutmus, who set up the obelisk on the bank of the Thames, and of Ramses, whose titles and honors are inscribed on that monument. Even the flowers and garlands placed in the coffins and encircling the naked faces of the dead, just as they were left by the mourners, 3 000 years ago. Now we want those who set up our Central Park obelisk.—*Oakland Tribune.* Are you willing to wait 3,000 years for them?

Household Hints.

CREAM OF RICE.—Beat the yolks of two eggs with three quarters of a cup of sugar and a pinch of salt. Dissolve a tablespoonful of corn starch in half a cup of cold milk, mix it with the beaten yolks and sugar, and stir in gradually two cups and a half of scalding hot milk. Cook this custard in a double boiler stirring constantly until it thickens, adding meanwhile a cupful of hot rice cooked in the following manner. Wash the rice through three waters, then boil it for fifteen minutes in salted water after which drain and set on the back of the stove to steam until done which will be in fifteen minutes longer. Use a cupful of rice, measured after cooking. Flavor with lemon or vanilla, turn into a pudding dish and set in the oven to slightly brown the top. Cover with a meringue made with the whites of the two eggs and two tablespoonfuls of sugar beaten stiff. Color a delicate brown and serve cold.

A RICH LIGHT OMELET.—I have discovered what may be a new way to make a rich and very light omelet. For a family of three, we heat the yolks of five eggs, adding a good teaspoonful of chopped parsley and five even tablespoonfuls of thick sour cream, with a very little soda in it. If the least too much soda the omelet will not be good. I put about the sixth of an even teaspoon of soda, and perhaps even less might do. When that is all stirred together, add the whites of the eggs, beaten to a froth and pour into the pan, which I put on the stove in advance with a lump of butter in it; put it back so that the butter will only become a very light brown. I cover the omelet and fold it over and dish it. It will be very light, and I think very good. I forgot to mention the small pinch of salt to the mixture.—*Cor. Germantown Telegraph.*

APPLE MERINGUE.—To a quart of sifted apple-sauce add the yolks of three eggs, butter the size of a small egg, a little nutmeg, a pinch of salt and sugar to taste. Put the mixture into a neat baking dish and cook until a light brown on top. Cover with a meringue made with the three whites of the eggs beaten with three tablespoonfuls of powdered sugar and a little lemon juice until stiff. Soft powdered sugar over the top, return to the oven long enough to color delicately and serve cold with sweetened and flavored cream.

POTATO PUFFS.—This receipt sounds good and I want to try it soon. Boil the potatoes in salted water, then drain and dry them a few minutes and mash them perfectly smooth. To a pint of mashed potatoes put two tablespoonfuls of melted butter and beat with a fork until the whole is light and creamy. Add the yolks of two eggs, a cupful of rich milk and lastly the whites of the two eggs beaten to a froth. Beat each ingredient in before adding the next. Put in a little salt if needed and pour the whole mixture into a buttered baking-dish. Bake in a quick oven until the surface is nicely browned. The success of this dish depends on the faithfulness with which it is beaten.

Health Column.

Treatment of the Ear.

Delicate and highly nervous persons who are liable to suffer from shocks and are inclined to affections of the hearing, should live apart from the loud noises of railroads, factories, iron mills, etc. They should avoid with great care exposure to cold and damp, and especially should not wear thin shoes in walking on damp ground or saturated brick pavements. Children ought never to be struck on the ear with the palm of the hand, even in sport. Sudden deafness results sometimes from boxing the ears, as well as the rupture of the tympanum. Often the sudden jar or shock with the concussion of air on the ear drives in the stapes or inner bone, destroying its function and diminishing the sensibility of the nerves.

Teachers should try a child's hearing before blaming it for stupidity or inattention, as in not a few cases the fault results from imperfect hearing. Cold being one of the chief causes of deafness, care should be taken to fortify the system against it. Especially is it necessary to guard against the liability to take cold, and this is best done by being much in the open air when it is clear and dry, and by the judicious use of cold or tepid water for bathing. In case of sensitive persons, water should never enter the ears under any other condition than warm or hot, to wash out some injurious substance.

Introducing into the ear the twisted corner of a towel, as some persons do, is particularly hurtful, tending to compress the wax upon the tympanum. Delicate persons should avoid draughts on the ears, sitting in wet clothes, sudden changes from the heated atmosphere of crowded rooms to cold winds, and other similar exposures. Tobacco smoke is injurious to sensitive nerves, and sometimes produces a peculiar diseased condition of the eustachion tube. Smoking in the open air should be especially avoided by persons whose hearing is impaired, as it injures the throat, and the opening between the throat and ear. No cotton or wool should be worn in the ears unless there is a perforation of the membrane of the drum. If there is itching of the ears, a little vaseline or cosmoline may be introduced on the end of the little finger, but never poured in.

No instrument of any kind, steel pens, ear picks, pins, sharpened sticks, should be put in the ear; they irritate the delicate lining membrane, and in some instances pierce it. Sea bathing should be indulged in only with great care as to the temperature and the avoidance of water in the ears. If the person is not robust, the head should be protected in cold water bathing and diving by an oilcloth cap or other covering, or by a pledget of wool. If the ears are sensitive, they should be protected, if possible, by the natural covering of the head, the hair being allowed to grow moderately long. Frequent cutting of the hair very close is one of the causes of catarrhal inflammation of the ear. The feminine fashion of wearing the hair and hat on the back part of the head tends to neuralgia and disease of the ear, and should not be followed in cold weather.—*Dr. Turnbull.*

A NEW EXHILARATING SUBSTANCE.—Dr. Luton, of Rheims, calls attention in a French medical paper to the exhilarating properties of the tincture of ergot of rye when associated with phosphate of soda. The circumstances of the discovery were as follow: A woman of 62, at the infirmray of the *Maison de Retraite*, in Rheims, was receiving tincture of ergot of rye for disease in the knee. Fearing an unfavorable turn, the doctor thought to strengthen the action of that medicament with phosphate of soda, and accordingly combined a little of the two substances in a quarter of a glass of sweetened water. The patient, about three-quarters of an hour after taking this, surprised the inmates by bursting into loud laughter, without obvious reason, and this continued for more than an hour, with brief intervals. The laughter seemed to be associated with merry ideas, and to indicate a kind of intoxication. For some time after it died down the woman was in great spirits and good humor. Dr. Luton had not witnessed the scene, but the consequences to the patient being good, he administered the substance again, and a third time, observing the same effect. The experiments were further repeated on seven or eight women and girls with like results. In the case of men the action of the substance is less marked; it appears only in coloring of the face giddiness and slight headache. The effects in question have probably a common origin, it is thought, with those from eating rye bread when, in rainy years, the cereal contains as much as 5% of ergot. A sort of intoxication is produced which the consumers by no means despise.

SPREADING DIPHTHERIA.—It is not alone by the breathing of infected air that diphtheria may be communicated from child to child at school. Indeed, those who deny that the air is often or ever a medium of communication of the disease, and who are at all familiar with the thoughtless ways of little children at school, must yet recognize that the possible means of communication by almost direct contact are many. Who has not seen a schoolboy with his mouth full of marbles taken from a mate? Children often borrow lead pencils, which by instinct they wet in their mouth; they borrow sponges from one another to wipe their slates, which they moisten with saliva,

Worth Knowing.

THE SAND BLAST.—Among the wonderful and useful inventions of the times is the common sand blast. Suppose you desire a piece of marble for a gravestone, you cover the stone with a sheet of wax no thicker than a wafer; then you cut in the wax the name, date, etc., leaving the marble exposed. Now pass it under the blast, and the sand will cut it away. Remove the wax and you have the cut letters. Taking a piece of French plate glass, say two by six ft., cover it with fine lace and pass it under the blast, and not a thread of the lace will be injured, but the sand will cut deep into the glass wherever it is not covered by the lace. Now remove the lace and you have a delicate and beautiful figure raised upon the glass. In this way beautiful figures of all kinds are cut in glass, and at small expense. The workmen can hold their hands under the blast without harm, even when it is rapidly cutting away the hardest glass, iron or stone, but they must look out for finger nails, for they will be whittled off right hastily. If they put on steel thimbles to protect the nails, it will do little good, for the sand will soon whittle them away; but if they wrap a piece of soft cotton around them they are safe. You will at once see the philosophy of it. The sand whittles away and destroys any hard substance, even glass, but does not effect substances that are soft and yielding, like wax, cotton or fine lace, or even the human hand.

THE USE OF LEMONS.—I do not think there is an hundreth part of lemon-juice used generally as its valuable qualities would seem to commend. I know of nothing better as a stomachic corrective as well as a strengthener of the nervous system. We all know that it is used for rheumatism, and I have no doubt is also good for gout, if taken regularly three times a day and at least half a gill at a time. It can be taken in much or little water or no water at all. It is not unpleasant, one soon becoming accustomed to it, and would rather drink it than pure water. For headaches it is the best cure I have ever used. It will relieve it in from 10 to 15 minutes by a single dose. I would not advise less than half a gill at a time. I know of people who take it three times a day as a preventive of disease, and as a refreshener in hot weather. It quenches thirst also better than anything else. No sugar.

A GOOD AQUARIUM CEMENT may be made as follows: Take 3 oz. of linseed oil, 4 oz. of tar, and 1 lb. of resin. These are allowed to melt together over a gentle fire. If too much oil is used, the cement will run down the angles of the aquarium; to obviate this, it should be tested before using by allowing a small quantity to cool under cold water, and if not found sufficiently firm, allowing to simmer longer, or have more tar and resin added. The cement should be poured in the angles of the aquarium while in a liquid state, but not when boiling, or it would most assuredly crack the glass. The cement will become firm in a few minutes, and the aquarium may then be tilted up in a different position while a second angle is treated likewise. This composition adheres firmly to the glass, is so pliant that it may be pressed into any shape by the fingers, and it does not communicate any poisonous quality to the water.

HOW TO CAPTURE HORNETS.—Mr. James T. Bell's account, in the Canadian *Entomologist*, of the easy capture of hornets may possibly serve as a useful hint to some agricultural reader in an emergency. The nest was unexpectedly found in a stump during a walk in the Belleville forest: "A few days after, taking advantage of a cool morning, I sent my two boys to the woods with a small bottle of chloroform and a hard rubber syringe. According to directions, they injected about a drachm of the liquid into the hole, and threw a handkerchief over the entrance. In about five minutes they opened up the nest, when they found the inmates in a perfect state of slumber, and transferred them without trouble to their cyanide bottles. In about an hour they returned, bringing me 48 specimens of the insect."

WATER GLASS is used for a large number of purposes in the arts, but it might find many every-day uses if better known. Mixed with chalk, it forms on drying a compact marble-like stone; bone ash, zinc white, and magnesia with water glass form similar stones. Ransome's artificial stone is prepared by mixing sand with water glass solution to form a plastic mass which is pressed into the required shapes, then placed in solution of chloride of calcium; silicate of calcium is formed and cements the grains together, the chloride of sodium formed at the same time being removed by washing with water. With clay, lime, sand, cement, etc., soluble glass enters largely into the composition of many of the patented artificial stones, plastic tiles, slates, etc. The detergent properties of water glass make it an excellent scouring material.

POTATO FLOUR, or the dried pulp of the potato, is attaining great importance in the arts. It is stated that in Lancashire, England, 20,000 tons of it are sold annually, and it brings at present in Liverpool about double as much in the market as wheat flour. It is used for sizing and other manufacturing purposes, and when precipitated with acid is turned into starch. When calcined it is employed as a dressing for silk.

FRATERNAL RECORD.

Officers and members of all associations in this Department are invited to send us regularly all news of interest

MASONIC.

Officers of the Grand Lodge. SAMUEL CRAWFORD DENSON, G. M., Sacramento; CLAY W. TAYLOR, D. G. M., Shasta, MOSES HELLER, G. Treas., S. F.; ALEX. G. ABELL, G. Sec'y, S. F.

TUESDAY, October 11th, the Grand Lodge of California will meet to hold its 32d annual communication. It will be one of the most important sessions ever held in this jurisdiction, as there are two very important matters coming before it for action. Upon the success of one will greatly depend the welfare and prosperity of the Order in this jurisdiction, and upon the other will be demonstrated whether the craft are ready to make a more positive and permanent provision for the wards that have been left to their care by their deceased brethren.

The first and most important question to be settled is the matter of reducing the minimum fees for dues from the present figure $50, to that proposed, $30. Fifty dollars was fixed as the minimum fee for the three degrees of Masonry many years ago, when a man could earn $50 quicker and easier than he can now earn $20. Again, at the time that figure was adopted, there were but a few societies for a young man to join, and as most young men desire some connection of a fraternal nature, they were naturally drawn to Masonry. Now, there are scores of Orders that are attracting the young, and this fact, coupled with the unquestioned fact that we have not as many men now-a-days who can afford to spend $50 for a luxury as we had when that law was passed, is a true and perfect explanation of why our Order is either at a standstill or likely to show a slight decrease in membership. There must be a gradual building-up or the institution will finally become non-supporting. The old members are dying off, the poor are becoming suspended for non-payment of dues, and it requires numerous additions to keep even, to say nothing of increasing.

The second important measure to be considered will be the recommendation of the Grand Master touching the matter of establishing a home for widows and orphans of Masons. This is a subject that has been long neglected, and it is quite time something was done in the matter. Last Grand Lodge the present Grand Master, then Deputy Grand Master, introduced a resolution that a committee be appointed to consider and report a feasible plan for carrying out the plan. Gov. George C. Perkins, N. G. Curtis and Wm. H. Hill were appointed as the Committee. It is hoped that they will present a report that will result in immediate action.

There will be but one more stated meeting of the subordinate Lodges before the Grand Lodge meets, and every Lodge should take action in these two matters in order that their representatives may vote and act intelligently upon them, and not subject either of these questions to further delay upon the usual plea that the Lodges have not had an opportunity to fully consider them.

KING SOLOMON'S LODGE, No. 260, had a most interesting meeting on Monday evening, August 29th. The third degree was conferred. Soon after the Lodge was opened, P. G. M. Jonathan D. Stevenson was announced as in waiting. He was received with due honors, and warmly welcomed by W. M. Alex. H. Wands. After the Lodge work was performed the brethren returned to the banquet hall, where a bountiful collation had been prepared by the three youngest M. M.'s of the Lodge. The usual oratorical feast followed. P. G. M. Stevenson being first called upon, gave some very interesting extracts from his early Masonic career, which had reached the period of 60 years, he having, as stated, received his degrees Sept. 3d, 1821, in Phœnix Lodge, New York City, of which Lodge he was Master for several years after. Col. Stevenson was followed by P. M.'s Franklin H. Day, of California Lodge, No. 1; W. M. Richard S. Corning, and P. M. Charles G. Ewing and John F. Kennedy, of Pacific Lodge, No. 136; Bro. Geo. W. Hoag, of Laurel Lodge, No. 245, Willows, Colusa Co.; W. M. M. V. Taylor, of Mission Lodge, No. 169; W. M. A. H. Wands, of King Solomon's Lodge, No. 260; P. M. John E. Purdy, of Occidental Lodge, No. 22; Samuel Simmons, of Crockett Lodge, No. 139; Charles H. Bryan, of Excelsior Lodge, No. 166; and others. Among other visitors not above mentioned we observed P. M.'s E. Rodecker and Joseph McMath, of Mission No. 169; Harrison Jones, of Occidental No. 22; George W. Davis, of Marin No. 191, of San Rafael, nd S. S. Amheim, of Doric No. 216.

MAKING GOOD USE OF THE LAMBSKIN.—In the By-laws of the Grand Lodge of Iowa is to be found the following: "Every Lodge under this jurisdiction shall provide a lambskin, or white leathern apron, to present to the candidate on his initiation. The lambskin, when thus presented, should become the property of the initiated, on which can be written the date of his initiation, passing and raising, and thus become a souvenir to be treasured by the recipient, and remain as an heir-loom in his family." Similar action to the above, on the part of the Grand Lodge of California, would suit our worshipful brother, John W. Shaeffer, who has been preaching and urging this matter for many years.

ANTHONY BUCHLEY, Past Grand Treasurer of the Grand Lodge of the district of Columbia, died recently leaving quite a handsome fortune. Among his donations we find the following: To his Lodge of Masons—Federal, No. 1, he gave $10,000. The money due from his Masonic Mutual Relief Association, $1,800, he gave to a benevolent Masonic society—the "St. John's Mite Association"—an example worthy of all emulation. We have many rich Masons die on this coast, who might perpetuate their names with an honorable and praiseworthy work, if they would remember their Masonic connection in their wills.

GRAND LECTURER and Grand Secretary, Thos. H. Caswell has just returned from Dixon, Solano county, where he has been spending a week or more in instructing the officers of Dixon Chapter, No. 48, in the work of the Chapter degrees. Bro. Caswell is a competent, thorough and able instructor, and we feel confident it will not be his fault if Dixon Chapter is not A1.

NEW YORK is also apparently feeling the effects of the introduction of other fraternal societies, or at least the following would seem to suggest it. From the latest reports of the Grand Lodge we find the following record of Lodges and membership:

1870.....	650 Lodges.	Membership.	75,262
1871	656 "	"	77,079
1873.....	683 "	"	 79,849
1874.....	698 "	"	81,893
1875.....	704 "	"	80,701
1876.....	715 "	"	83,594
1877.....	718 "	"	81,296
1878.....	718 "	"	78,050
1879.....	717 "	"	75,086
1880.....	715 "	"	72,867

THE first Supreme Council, A. A. S. Rite, established in the world was at Charleston, South Carolina, U. S., on the 31st of May, 1801, by John Mitchell and Rev. Frederic Dalcho, Sov. G. Inspectors-General of the Thirty-third Degree, the first becoming the Sov. G. Commander, and the second his Lieutenant. They proclaimed the new order of things, and until that year we find no trace in America, or in the West Indies, of any higher degree than the Twenty-fifth, or S. P. of the Royal Secret. John Mitchell was a colonel in the American army, and Frederic Dalcho was educated a physician, but preferred the ministry, and remained for 30 years in charge of St. Michael's Episcopal Church in Maryland.

AT a meeting of the Lodge at Alexandria, Va., recently, a resolution was adopted tendering Bro. Peyton S. Cole, Grand Master of the fraternity in Virginia, to be used by him at the Yorktown Centennial, the apron and sash worn by Bro. General Washington during his service as Master of Lodge No. 22. The apron and sash, the handiwork of Mrs. Gen. Lafayette, were presented to Bro. Gen. Washington by Bro. Gen. Lafayette during his visit to Mount Vernon in 1784, and on the 3d of June, 1812, Bro. Major Lawrence Lewis presented them to Alexandria Washington Lodge, No. 22, together with the box made in France, which contained them. The apron and sash were worn by Washington at the laying of the corner-stone of the United States capitol in 1793.

Order Eastern Star.

Officers Grand Chapter.—JEROME BANES, Gr. Patron, Red Bluff; MRS. S. JENNIE MANN, Gr. Matron, S. F.; MRS. ABBIE E. WOOD, Gr. Sec'y, S. F.

THE birthday of Mr. Robert Morris, founder of the Order Eastern Star, was generally observed by the several subordinate chapters in this State, on the 30th inst. The chapters in this city held a very interesting meeting in Shiels' Building, in which the three chapters joined. The chapters in Santa Cruz, San Benito and Monterey counties joined in a grand basket picnic at Watsonville. Other observances are known to have occurred. This was a very proper recognition of the services of him who originated, and gave the first light to this branch of the order, which has now extended from Maine to Oregon.

THE following new Chapters have been organized this year:

Placer Chapter, Dutch Flat. Matron, Jennie Martin; Patron, J. J. Harris; A. M., Sarah B. Harriman. Instituted by J. J. Rolfe March 24, 1881.

Wheatland Chapter (18 charter members). Patron, J. M. C. Jasper; Matron, Linnie Keyes; A. M., Lillie G. Jasper. Instituted by Jerome Banks March 23d.

Homo Chapter, Stockton (22 charter members). Matron, Hannah J. Thresher; Patron, F. M. West; A. M., Fran. Kinsley. Instituted by Jerome Banks May 21st.

Alturas Chapter (21 charter members). Matron, Mary Estes; Patron, Gamaliel T. Harris; A. M., Cynthia A. Spicer. Instituted by Max Posner June 3d.

Quincy Chapter (28 charter members). Matron, Carrie L. Variel; Patron, Geo. E. Houghton; A. M., Kittie A. Myers. Instituted by Mrs. Banks June 21st.

Sincerity Chapter, Taylorville, (42 charter members). Matron, Martha A. Gentry; Patron, Geo. W. Boyden; A. M., Arabelle Young. Instituted by Mrs. Banks June 24th.

THE chapters of this city and Oakland met at the chapter room of Golden Gate Chapter, Order Eastern Star, August 31st, for the purpose of paying their respects to the labors and virtues of their brother, Robert Morris, the founder of the Order. The main feature of the evening was an address from Bro. Chas. L. Thomas, recounting the standing, herculean labors and merits of Bro. Morris as a Mason. This address was followed by music, speeches and recitations, the banquet and dancing. The presiding officer was Worthy Grand Matron, Sister J. S. Mann. A large deputation from Oak Leaf Chapter in Oakland participated in the exercises. Sister chapters in the city were well represented by their officers and members. The frequent social reunions and fraternal gatherings of this Order, together with its rapid increase in numbers, shows that there is a very prosperous future for it.

California, No. 4.

September 8th, the meeting of California, No. 4, O. E. S., was more than ordinarily interesting. Their hall had been elaborately trimmed with evergreens and flowers. The Grand Matron, Mrs. Jennie S. Mann, together with a delegation from several city Lodges, were in attendance. The degrees were conferred on three candidates, after which Mrs. E. W. Nohl sang a solo that received merited applause; reading, G. R. Rockwood. An adjournment was had to the banquet room, and justice done to a fine collation. After the supper a short programme was rendered. Piano solo and operatic song, Miss Amelia Altschuler; solo and encore, Miss Linda Hoag, Mrs. M. E. Hoag accompanying on the piano; instrumental duett and solo, piano and violin, Mrs. A. W. Baldwin singing a sweet sentimental piece that was heartily encored. A few interesting and appropriate remarks from W. Robertson, Worthy Patron of Golden Gate, and W. A. Phillips, of California, No. 4, followed by a comic recitation from Mrs. Susy Neal, Past Worthy Matron of California, No. 4, closed a very enjoyable evening.

GRAND SECRETARY Abbie E. Wood is having lively work with some of the returns from subordinate chapters. They are coming in, in a condition that will probably bring forth another uncomplimentary report from the Committee on Credentials and Returns.

IVY CHAPTER, No. 27, of this city, will lead the list of chapters in this jurisdiction, in new additions for the past year.

THE next Grand Matron will not be able to visit all the chapters in the State, unless she devotes her entire time to it, as the number and territory now covered is so large.

I. O. O. F.

Grand Officers. DAVIS LOUDERBACK, G. M., San Francisco; LEON D. FREER, D. G. M., Oroville; D. M. BURNS, G. W., Sacramento; W. B. LYON, G. Sec'y, San Francisco; H. B. BROOKS, G. Treasurer, San Francisco.

GRAND PATRIARCH Wm. T. Galloway and Grand Scribe, Walter B. Lyon, are busy preparing their reports for the next session of the Grand Encampment that meets in this city Tuesday, Oct. 18th. The Order is to be congratulated upon the work of these officers during the year about drawing to a close. Bro. Galloway has made a most excellent officer, he has visited nearly if not quite all the Subordinate Encampments and has in every instance left a favorable impression upon the membership and his year's work cannot but result in good to the Order. As to Grand Scribe Lyon, his reputation as an officer and as an Odd Fellow is too well established to need any word of comment from us. His work is always done well and promptly done, and we pay him no extravagant compliment when we say we believe him to be the best Grand Recording officer in this jurisdiction.

WE are in receipt of the proceedings of the fifteenth annual session of the Grand Lodge of Nevada, held recently at Eureka. Grand Master Hennings address is an able document, giving substantial evidence of great labor and strict attention to his duties. We copy his decisions, as there are several matters of general importance contained therein:

Can a Lodge, by resolution, declare a member expelled from the Order who is in State prison for the crime of embezzlement, he having acknowledged his guilt as charged?

Answer—No. By referring to Article 7, Section 4, of the Constitution, and page 43 of Code of Precedure, you will find that charges must be preferred.

That no one is eligible to membership in a Rebekah Degree Lodge (nor can make application for membership), until he or she has first received the Degree of Rebekah.

That no wife, sister or daughter of any Scarlet Degree member can receive the degree of Rebekah, unless such member shall have first applied for it, and received the consent of the subordinate Lodge of which he is a member.

That the first resolution on page 8,089 and 8,176, Sovereign Grand Lodge, 1879, empowers subordinate Lodges, as well as Rebekah Degree Lodges, to confer the Rebekah Degree on any unmarried sister or daughter over 18 years of age, of any Scarlet Degree member in good standing, who makes application for such, as well as on his wife.

Question—Is the sister of a Scarlet Degree member in good standing, who at the time of application is a divorced woman, entitled to receive the Degree of Rebekah?

Answer—Yes. [See proceedings of Sovereign Grand Lodge, page 8,211, Session of 1880.]

That D. D. Grand Masters were *not* entitled to the honors of the Order when visiting a Lodge in an official capacity as D. D. Grand Masters.

That the R. W. Deputy Grand Master, or any other elective officer of the Grand Lodge, is entitled to the honors of the Order when he announces himself officially for the purpose of introducing a visiting brother.

A Lodge elected a brother as V. G. who had been appointed to a subordinate office the preceding term, but had not been present at the meetings of the Lodge a majority of the nights of the term; a member of the Lodge protested against the election as illegal, the brother not having served in a subordinate position the number of nights required by law. The N. G. decided the protest not well taken, and the Lodge, on appeal, sustained the N. G. An appeal was taken to the D. D. G. M., who reversed the decision of the Lodge and declared the brother ineligible as V. G., and from this decision of the D. D. G. M. an appeal is taken on the following grounds, to wit:

"That the brother was duly appointed L. S. of the N. G. on the first night of the term, and held the office until the end of the term, and while the brother was not present the majority of the nights of the term, for the nights of absence he was in the course of their occurrence excused by the Lodge, and not having been deposed from his office, as provided by Section 7, Article 4, of the Constitution of Subordinates, he had, in fact, complied with the law, and was therefore eligible to the Office of V. G."

If the absence of the brother had been caused by sickness, and he had been excused from attendance by the Lodge, then he would have been eligible to the chair of the V. G. [Digest, 451], but in this case sickness is not alleged as a reason for absence, but business engagements.

Section 3, Article 4, of the Constitution of Subordinates provides "that no member shall be installed as V. G. unless he has served 26 nights in an inferior office, which I hold, means *actual*, not *constructive* service. The fact that the Lodge from time to time excused the brother for non-attendance, did not absolve him from the requirements of the law governing the qualification of officers.

The power of the Lodge can only extend to the remission of such penalties as may be imposed by its By-laws on its members for non-performance of their duties. To admit that this power could be extended so as to modify in the slightest degree the qualification necessary for eligibility to office, would be to give to subordinates the power to annul by indirection a law enacted by the Sovereign Grand Lodge. Therefore, the decision.

THE Odd Fellows of Virginia are going to celebrate on the Plains of Yorktown during the centennial anniversary, which occurs on the 19th of October, 1881.

FROM the five men who gathered at the Seven Stars Inn, at Baltimore, Md., on the 26th of April, 1819, has sprung a membership which now numbers 450,000 men. The single Lodge then instituted (Washington, No. 1) stands today at the head of 7,100 similar bodies, governed by 50 Grand Lodges, which in turn acknowledge fealty to a Sovereign Grand Lodge. The revenue, from a few cents per night, has reached $4,500,000 annually, and the relief dispensed touches the grand sum of $2,000,000 per year. Since 1830, 1,250,000 men have been initiated, 86,000 of whom have been buried by kindly hands; 121,000 widowed families and 903,000 brethren have been relieved, at an ex-

penditure of over $30,000,000. The total receipts for 50 years have been $78,000,000, and after deducting relief and expenses, the Order has now in the neighborhood of $30,000,000 assets. Its system of sick benefits has proven a feasible and successful one, and its death rate and the average age of its membership remains the same, viz.: The death rate is about one per cent., and the average age of its members is about 40 years.

THE visit of the Veteran Odd Fellows to the Odd Fellows Literary and Social Club, Saturday evening, Sept. 3d, was a most pleasant one. The work of the third degree was exemplified, and five addresses were made by prominent members of both associations.

THE Grand Lodge of New York has just closed its annual session, and from reports of its officers we learn that all the Lodges are in good condition. On Jan. 1, 1881, the date of the official reports, the condition of the Order was as follows, there being 486 Lodges then in existence, as against 481 on Jan. 1, 1880.

	1880.	1879.
Initiated during the year	3,544	3,009
Admitted by card	345	370
Reinstated	494	460
Rejected	170	182
Withdrawn voluntarily	494	605
Suspended for non-payment of dues	2,758	2,958
Death	489	489
Expelled	46	56

The total membership on Jan. 1, 1881, was 38,328, as against 37,891 on Jan. 1, 1880. In 1880 there were relieved 1,802 brothers as against 2,920 in 1879, and 481 widows, as against 435 in 1879. The amount paid by the Lodges for the relief of brothers was, in 1880, $96,258.24, as against $97,973.06 in 1879; for the relief of widows and orphans, $16,986.57 was paid, as against $18,161.16 in 1879; for the burial of the dead in 1880, $39,622.52 was disbursed, as against $37,743.04 in 1879. The total revenue of the lodges from all sources was, in 1880, $322,976.69, as against $318,148.72 in 1879.

UKIAH is to have a new Odd Fellows hall. Proposals are solicited for building it, and ere long we shall hear of the dedication of one of the finest halls in the State.

Knights of Pythias.

Grand Officers.—S. L. TERRY, P. G. C., Stockton JOHN H. HARNEY, G. C., S. F.; GEORGE CANTUS, G. Treas. S. F.; A. G. BOOTH, Grand K. of R. & S., S. F.

WE take great pleasure in heading our Pythian column with the following letters from John H. Harney, Grand Chancellor, and A. G. Booth, Grand Keeper of Records and Seal, suggesting as they do the kindly interest manifested by these gentlemen in the WATCHMAN, and assuring us and our readers that the "Fraternal Record Columns" will in future, as we have endeavored in the past, prove the best channel of communication to the Order of any paper published on this coast.

OFFICE OF GRAND CHANCELLOR, GRAND LODGE, KNIGHTS OF PYTHIAS, OF CAL., PYTHIAN CASTLE, 913 MARKET ST., S. F., AUG. 27, 1881. PYTHIAN PERIOD, XVIII.

A. G. BOOTH, ESQ., GRAND K. OF R. & S., K. OF P.—*Dear Sir and Brother:*—Believing that it will be beneficial to our Order to recognize some paper as a channel of communication and for promulgating matters of interest to our members, I respectfully request you to furnish the "Fraternal Record Department" of the PACIFIC STATES WATCHMAN any items of news or of interest to our brethren for publication therein, their past record indicating that they will in future do all in their power to promote our interests.

Knowing that you will concur in the above opinion and will cheerfully comply with the request, I am Fraternally yours,

JOHN H. HARNEY, G. C.

OFFICE OF THE GRAND KEEPER OF RECORDS AND SEAL, GRAND LODGE OF KNIGHTS OF PYTHIAS OF CAL., 325 MONTGOMERY ST., ODD FELLOWS' HALL, S. F., SEPT. 6, 1881, PYTHIAN PERIOD, XVIII.

EDITORS PACIFIC STATES WATCHMAN.—*Gents:* am in receipt of Grand Chancellor Harney's tter with request that I furnish you with items lating to our Order, suitable for publication nd such as may be of interest to our members. t will afford me pleasure to comply with the equest, and assist you in advancing the inter- ts of the Knights of Pythias.

Yours Respectfully,

A. G. BOOTH, G. K. of R. & S.

THE great event of the last few weeks was he grand picnic of the Uniform Division, at ell Mound Park, Tuesday, Aug. 30th. This dy made a fine appearance as they marched wn Market street to the music of the Second egiment Band. Arriving at the park they had a dress parade in the pavilion and were dismissed for the day. Every arrangement was complete. The day was most delightful, and all enjoyed themselves to their heart's content. The Committee on Games had arranged a fine programme and they were closely contested, with the following result: No. 1—Footrace for Past Chancellors, four prizes, won by John Huber, L. Holldorff, C. W. Davis and J. Patterson. No. 2—Footrace for members' wives, four prizes, won by Mesdames Ulman, Huber, Memers and Fleming. No. 3—Footrace for men, free for all, three prizes, won by Messrs. Shelly, Gauzert and Fowler. No. 4—Footrace for girls under 16 years of age, three prizes, won by Maggie Henderson, Maggie Foley and Maggie Forrest. No. 5—Footrace for members of Pythian Division, four prizes, won by Messrs. Scumacher, Gauzert, Elkington and Anderson. No. 6—Three-legged race for boys, two double prizes, won by Gauzert, Lewill, Moses and Lundholm. No. 7—Three standing jumps, free to all, three prizes, won by Messrs. Lyons, Male and Slattery. No. 8—Egg and ladle race for married ladies, four prizes, won by Mesdames Lebrecht, Buddle, Lindsey and Smith. No. 9—Fat men's race, free for all over 200 pounds, three prizes, won by Messrs. Fichthaler, Blake and Yates. No. 10—Bell hunt for ladies, free for all, four prizes, won by Misses Annie McLaughlin, Fannie Clark, Lizzie Smith and May Martinez. No. 11—Sack race, free to all, three prizes, won by Messrs. Handlos, Saylor and Grandlove. No. 12—Old men's race; did not fill. No. 13—Footrace for boys under 10 years, three prizes, won by J. Sullivan, William Patton and Albert Simmons. No. 14—Footrace for girls under 10 years, four prizes, won by Misses Edith Moses, Augusta Huber, Lizzie Henderson and Ida Leland. No. 15—Half-mile running race for members of division, four prizes, won by Messrs. Fleming, Handberger, Sanford and Beaver. No. 16—One-mile walking match for members of the Order, four prizes, won by Messrs. Meiners, Dohrang, Bradbrook and Walterspeil. No. 17—Hurdle race, three prizes, won by Messrs. McGerry, Henning and Lebrechel. No. 18—Hurdle race for ladies, five prizes, won by Mesdames A. McGowan, A. Teague, M. Newton, M. Hamburger and R. Armstrong. No. 19—One-legged race for young men, three prizes, won by F. Marston, L. Strasser and E. Walker. At the bowling alley the following were winners by the scores named: Four balls, Messrs. Hearts, 38; Florence, 37; King, 35; May, 35; Lewin, 35; and Blake, 35. The prizes were distributed at a grand ball given on Monday evening, September 5th, at Ixora hall, Mission street, on which occasion another most enjoyable time was had, and the judgment of all concerned is, that when the boys of the Pythian division start in for a good time, they have one, and no half doing any part of it. The credit for the success of this whole enjoyable affair is due largely to the following committee of arrangements: John Huber, President; S. B. May, Secretary; George W. Peckham, Treasurer; and Knights R. Meiners, J. L. Lyons, N. L. Chase, N. J. Rogers and Henry McLaughlin.

THE general picnic committee has presented a report of the financial transactions of the picnic held at Belmont, May 9th, and subsequent division of surplus, as follows:

California Lodge, No. 1	$ 132 00
Damon Lodge, No. 2	113 25
Golden Gate Lodge, No. 3	49 00
Laurel Lodge, No. 4	78 25
Ivanhoe Lodge, No. 5	122 00
Almania Lodge, No. 8	77 25
Eureka Lodge, No. 9	97 75
Excelsior Lodge, No. 12	157 50
Harmony Lodge, No. 15	41 75
Myrtle Lodge, No. 16	42 50
Metropolitan Lodge, No. 24	112 25
Liberty Lodge, No. 35	11 25
South San Francisco Lodge, No. 45	32 00
Alameda Lodge, No. 49	1 50
Bayard Lodge, No. 53	40 75
Syracuse Lodge, No. 58	59 25
Sales at Depots	94 00
Target practice	80 00
Bonus from Park	75 00
Eight adult tickets, @ .36 at cost to Park Prop.	2 90
	$1,417 15

Transportation, S. P. R. R.	$ 608 60
Music, 2d Regiment Band	92 50
Printing and bill posting	99 50
Advertising, Call	17 25
" Chronicle	16 75
" Examiner	15 25
Tarket Practice, Markers	8 20
" Ammunition	3 85
" Prizes	50 00
Toys and prize	25 75
Banner and repairs	5 00
Badges for committees	22 25
Express charges	3 25
Hall rent	5 00
Secretary's salary	20 00
Three ticket salesmen at depots	6 00
W. J. Johnson, sundries	3 00
H. Schaffner, postage and traveling expenses	3 75
J. H. Gyselaar, tickets	5 00
Balance cash on hand, *surplus*	406 25
	$1,417 25

The surplus of $406.25 has been divided, *pro rata*, among the Lodges participating, as above named, making the dividend to each Lodge $25.51, with the exception of Harmony Lodge, No. 15, which Lodge, being still indebted to the Secretary and Treasurer of this committee (these officers having been vested with all the authority of the General Committee in making final settlement with the Lodges), has not received its *pro rata*. All of which is respectfully submmitted, H. SCHAFFNER, Sec'y; J. H. GYSELAAR, Treas.

JAMES E. JOHNSON who was shot by one J. D. Sullivan, at the saloon of the latter, No. 657 Washington street, died at the St. Mary's Hospital, Monday, September 4th. He was a member of California Lodge, No. 1, which Lodge turned out in large numbers at his funeral Sunday, September 10th.

WE learn from the reports filed with the Supreme Keeper of Records and Seal, that the following jurisdictions added to their membership as indicated:

Missouri	634
New York	615
Kansas	593
Indiana	583
Mississippi	564
Ohio	549
Iowa	497
Pennsylvania	461
Illinois	429
New Jersey	396
California	341
Virginia	261
Tennessee	254
Massachusetts	237
Louisiana	151
Maine	138
Nevada	127
Connecticut	123
Kentucky	104
Minnesota	101
Nebraska	90
Georgia	84
Michigan	82
Maryland	81
Rhode Island	67
Delaware	62
West Virginia	35

A. D. SEFTON, one of the proprietors of the *Dispatch*, and an old Knight at Ukiah, is moving in the matter of forming a new Lodge at that place. If this gentleman really goes to work in dead earnest, it will not be long before we may hear of another accession to the list of new Lodges for 1881.

GRAND LODGE OF PENNSYLVANIA.—At the meeting of the Grand Lodge held at Reading, the following officers were installed for the ensuing year by Judge George W. Lindsay, Supreme Chancellor of the World: Grand Chancellor, Smith D. Cozzens, Philadelphia; Grand Vice Chancellor, A. O. Kline, Bedford; Grand Prelate, Austin Long, Philadelphia; Grand Outer Guard, E. B. Emory, Spring City, Chester county; Representatives to Supreme Lodge for four years, Thos. G. Sample, Allegheny City; for two years, George Hawkes, Philadelphia; Grand Trustee, John W. Beeb, Philadelphia; Grand Keeper of Records and Seal, Geo. Hawkes, Philadelphia; Grand Master of Exchequer, Julius Mountney Philadelphia.

GRAND KEEPER of Records and Seal Booth is in receipt of a communication from Messrs. C. H. E. Hardin and A. D. Laughlin, of Santa Rosa, requesting information, papers and directions relative to forming a Lodge of the Order there. It was gladly furnished, and we trust soon to be able to record still another new Lodge for 1881.

SEVERAL Knights and their friends in Oakland have been talking for quite a while about starting another new Lodge in that city. Past Chancellor, D. S. Hirshberg, of Live Oak, No. 17, is said to favor the idea, and will probably become a member of the new Lodge. The Grand Chancellor has been somewhat in doubt as to the propriety of the action, but has now, we learn, finally decided that it will be for the general good of the Order to grant the dispensation. So the boys may go ahead as fast as they please; they can have their papers as soon as wanted.

Knights of Honor.

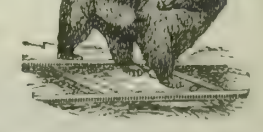
Grand Officers.—DAVID MCCLURE, P. G. D., San Francisco; CHAS. E. TRAVERS, G. D., San Francisco, R. H. WARFIELD, G. Treas., San Francisco; W. H. MAHONEY, G. Reporter, office St. Ann's building, cor. Powell and Eddy.

SINCE our last issue we have been advised of another Lodge suspension under most aggravating circumstances, all of which go to confirm our opinion expressed some time since that the only safe and feasible manner of conducting the affairs of an Order so large and with such vital interests at stake, is by separate beneficiary jurisdictions. The case referred to is that of San Francisco Lodge, No. 1922, one of the promptest, most particular, and really one of the best Lodges in this State. The facts are as follows: The assessment notice was read in the Lodge on its receipt, and *at once* a draft was ordered and *sent*. The same difficulty that befel the money order of Oriental Lodge, happened to their draft. The railroads were delayed and the mails did not go forward in time. This suspension is one quite aggravating, as the Lodge suspended is one of the most prompt and straightforward Lodges in this city and they would have no difficulty in advancing a sum equal to several assessments any time rather than be behind a moment. If the brethren who have taken exceptions to our views on separate beneficiary jurisdictions, still think there are no sympathizers, let them happen into San Francisco Lodge after they are restored again.

THE Grand Dictator has been led to reconsider his decision to entirely abandon the idea of yet having a Grand Lecturer, or a grand organizing officer, as the latest returns from subordinate Lodges have placed the majority in favor of it at a very respectable proportion. The vote now stands 24 Lodges in favor of the plan and 14 opposed, with 10 Lodges yet to hear from. If those yet to report should all or a large portion of them come in favorably to the project, or if any of those who have voted nay could be induced to change their votes to aye, he would then feel warranted in making the venture. We hope the Lodges will favorably consider this matter, and give this enterprising officer a chance at least to try the experiment.

GARDEN CITY LODGE, No. 1745.—On the evening of 18th ult. was held the second anniversary of Garden City Lodge of the Knights of Honor, No. 1745, at Odd Fellows' Hall, Alameda, and was one of the best entertainments of the kind ever given in Alameda. The Dictator, Mr. S. Haglitt, as Master of Ceremonies, conducted the exercises, which were as follows: An organ solo, "Forsake Me Not" (Spohr), by A. S. Flack; remarks, Bro. R. Wheeler; piano duet (selection), Miss Maud Herbert and Mrs. Wm. Adams; vocal solo, "Deprovenza" (Traviata), J. A. Forbes, Jr.; recitation, "The Baron Rudiger," Bro. D. N. Coey, who, in response to an encore, recited "Schneider's Party;" piano solo, "Alice" (Asher), Mrs. F. Varden; address, Grand Master C. E. Richards; organ solo, "Pilgrims' Chorus" (Wagner), A. S. Flack; vocal solo, "The Goat Bells" (Allen), Mrs. H. W. Arthur Nahl, who also sang "Mary of Argyle" (H. R. Wheaton); piano duet, "O Dolce Concerto" (Latour), Mrs. W. H. Loomis and Miss Ayres; "Love and Asthma," Prof. Bogle; cornet solo, "Pearl of Enghein" (Damare), Master Bertie Daggett; vocal duet, "I Would that My Love" (Mendelsohn), E. T. Barnes and Bro. R. Frank Clark; "Eccentricity in a Photographic Studio," Bro. D. B. Taylor, C. Y. Lamb and A. G. Host.

THE Knights of Honor *Standard* has the following on the vexed question of payment of death losses, which has caused considerable feeling in this State: The delay in the payment of death benefits is causing general dissatisfaction among members of the Order. The cause has been the failure of the Supreme Dictator to suspend and the Supreme Reporter to report delinquent Lodges in arrears for assessments. The fact that we are nearly 100 days behind in the settlement of these claims, and the statement of the Supreme Dictator in his official circular, No. 1, that a number of Lodges are in arrears for from one to three assessments, is not a good showing for the Knights of Honor. This is not as it should be, and we are glad to learn that the Supreme Dictator intends to turn over a new leaf at last, and suspend those Lodges immediately that fail to pay their assessments within time specified by law. Leniency toward delinquent Lodges is injustice to those Lodges that pay their assessments promptly, and should never have been tolerated in a single instance. Already our Order has begun to feel the effects of its tardy policy in the payment of death benefits, and with so many other endowment or mutual aid societies like our own in the field we cannot longer afford to be so indifferent as to the time we take to discharge our liabilities. Two assessments a month should be issued until all claims are settled up to within 30 days of date of assessment notice, after which they should be called as rapidly as the state of the treasury require them.



ASSESSMENT No. 87 is levied delinquent Oct. 1st; whole number of deaths to date, 2,278; disbursements of widows' and orphans' benefit fund, $4,556,000.

ANCHOR LODGE, No. 2366, passed a vote at its last meeting relieving its members of one quarter's dues.

ALEX. P. MURGOTTEN, of San Jose, has received from W. B. Hoke, Supreme Dictator of the Knights of Honor, a commission as Deputy Supreme Dictator of the States of Oregon, Colorado and Nevada, and Territories of Arizona, Utah, Idaho, Washington, New Mexico, Dakota, Wyoming and Montana.

Native Sons Golden West.

Grand Officers.—FRANK J. HIGGINS, D. G. Pres.; San Francisco; H. CLAY CHIPMAN, G. P., Sacramento., GEORGE B. BALDWIN, D. G. P., Marysville; HENRY LUNSTEDT, G. Sec'y, San Francisco.

PAST PRESIDENT John H. Grady was successful in the election run; he was elected Tax-Collector for the City and County of San Francisco.

WE expect in our next to have a full account of the celebration at Marysville under the auspices of the Sons. Past President Taylor, of Sacramento, will be there, and he always keeps his eye open tight, and will report to us the particulars of that grand affair.

THE boys in this city had a fine time with their native sisters and sweethearts at their grand ball at Ixora Hall, Friday evening, Sept. 9th. Like their former parties it was a grand success.

AFTER the fine appearance and good record made by the boys on Admission Day, we hope to hear of new parlors springing up everywhere. Brace up, boys of Woodland, Vallejo and all around.

THE Henry Clay Chip-man at the head of the Grand Parlor officers is like a chip of the old block—the right man in the right place. This year will be a big success.

(CONTINUED ON PAGE 305.)

A. O. U. W. Directory.

Cards inserted in this list at the rate of 25 cents per month payable semi-annually in advance. If errors or omissions are noticed, please write the office direct.

"A. O. U. W. Diploma."

EVERY MEMBER CAN HAVE ONE.

Each and every member of the A. O. U. W., who wishes a really artistic Certificate of Membership, should not fail to procure, without delay, one of "Adler's Diplomas," lithographed in five colors; size, 10x24 inches, with space for photograph of the holder. It is a fine ornamental picture, and distinguishes you as a member. Any Brother desirous of obtaining a perfect copy of the best issue can do so by applying to the Watchman Publishing Co., No. 202 Sansome St., S. F. P. O. Box 2361. Price, postpaid, $1, in cash or postage stamps.

☞ It is an ornament for your room, as well as expressive and pleasing to yourself and friends.

Officers and members of the A. O. U. W. receiving a complimentary number of the Watchman with this notice marked are invited to examine its merits for their support, as we expect our agent to call and present personally further information concerning our enterprise for the future. Should our agent fail to call soon in some instances, we shall be glad to have our friends favor the office directly with their response. Persons receiving duplicate copies are requested to circulate them to the advantage of our cause and the publishers.

CHEAPEST PLACE to buy NEW and SECOND HAND MACHINES. All kinds rented, $2.50 per month. Repairing done. Satisfaction guaranteed. All kinds of Needles 25 cents per dozen. P. McCANN, No. 27 Sixth Street, (Singer Office) San Francisco.

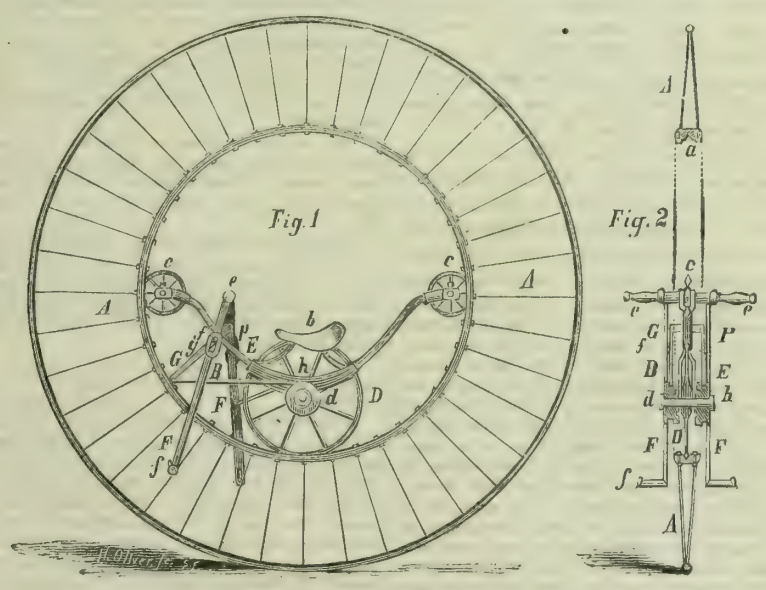
Do Not Delay.—Send us your subscriptions promptly Don't let any break occur in your subscriptions to the Watchman. Every live Workman needs every number of the paper, and we need his assistance to print as valuable a journal as we strive to for the special benefit of its patrons and the general good of the Fraternity. Send the cash direct, or, if more convenient, hand it in with your dues to the Financier and we will allow him for trouble and expense of remitting.

A Monocycle.

When people see the daring bicyclist perched precariously on top of his two-wheeled steed, those who cannot ride imagine he is performing some wonderful feat. He has two wheels, however, even if they are in a row; but what shall we say of a man who rides one wheel only? There is really a one-wheeled velocipede, which is exhibited by G. H. Strong, in Dewey & Co.'s Patent Agency at the Mechanics' Fair, pavilion and the greatest peculiarity of it is that the rider is safer from a capsize than he is on two wheels.

The wheel shown in the pavilion and illustrated in the engraving is seven and a half ft. in diameter and has what may be called an open center hub, the central part of the wheel being sufficiently open for a man to sit where the hub would be in an ordinary wheel. An annular flange is formed on the inner edge for the grooved driving and guide wheels. The carriage carrying the saddle for the rider is formed of right angled bars having grooved guide wheels on their ends, and a centrally placed bearing wheel immediately under the saddle.

The shaft of the central bearing wheel is extended through both sides, and outside its bearing on each side is placed a clutch, arranged to engage with the shaft on the forward stroke of the levers and allow the shaft to revolve independently when the power is relieved.



On the forward bar of the carriage is a short standard carrying a hand bar, which forms the pivot for the levers, which are provided with treadles. To the lower ends of the operating levers are attached the cords which encircle and operate the friction clutches.

To operate the monocycle the rider mounts the saddle, places his feet on the treadle and the hands on the bar. He is then on the center of the wheel, with the center of gravity below the actual center of the wheel. By moving the left foot forward, the lever, by its cord and connecting clutch, rotates the shaft and central bearing wheel, thus moving the carriage with its rider forward of the center of gravity of the big wheel, and causing the wheel to rotate and begin a forward motion. As the pressure of the foot on the lever is released and the lever comes back for its next stroke, the spring of the clutch rotates the clutch backwards and winds up the cord ready for the next stroke. Meantime the rider has pushed the right lever forward, which acts in the same manner, and, by working the levers alternately, the carriage is kept forward of the center of gravity and the wheel caused to keep up a continuous revolution, carrying the rider with it. The grooved central and guide wheels revolve on a flange so they cannot be displaced, the guide wheels serving to steady the carriage on which the rider is supported.

The wheel is guided in its forward motion by the movement of the body of the rider, who directs the course by swaying his weight to one side or the other. The weight of the rider being always below the center of gravity of the wheel makes it run steadily when once in motion from well-known natural laws.

A velocipede of this form is not so difficult to ride as the ordinary ones, owing to the rider's weight being below instead of above the center of gravity. A very large wheel can be used, as the diameter of wheel is not regulated in proportion to length of limb as in bicycles. With the large wheel, and the rider sitting below the center of gravity, a slow motion may be maintained and the effort to propel it need not necessarily be great. To stop the wheel, the treadle motion is stopped, when the saddle carriage will roll back of the center of gravity and stop the wheel. This machine is the invention of two citizens of San Francisco, Frederick Langmaak and Peter Strieff.

In the engravings here shown of this wheel, which its inventor calls the "American Center Velocipede," *E* represents the large wheel, *B* is the carriage carrying its saddle *b*, *C C* are the guide wheels, *D* is the central bearing wheel. *E* is the standard carrying the hand bar. *e* wheel forms the pivot for the foot levers, *F*, having treadles, *f*. The levers, *G*, form parts of compound levers with the levers *F*, but in the machine at the fair only single levers are used.

"AMERICAN CENTER VELOCIPEDE."

YELLOW FROM RED AND BLUE.—Lord Rayleigh described a plan for demonstrating that yellow color can be formed by combining red and blue. He mixes a red solution of chromate of potash with a blue solution of litmus, and, on filling it into a glass cell of a certain thickness, the light transmitted through it is seen to be yellow. Plates of glass coated with gelatine impregnated with chromate of potash, placed side by side with plates coated with gelatine impregnated with litmus, also transmit yellow light. Lord Rayleigh finds, however, that the eyes of different persons vary considerably in their power of appreciating the tinge of the transmitted yellow; but this has nothing to do with color-blindness, since all the persons tested could distinguish at once the components with accuracy.

DIGESTION.—R. P. Chittenden is inclined to the belief that in the stomach there are two stages of digestion, separate one from the other—a first, in which the action of the saliva can go on without hindrance, and a second, in which pepsin alone is active.

Homes and Their Influences.

Mr. H. W. Hand, writing in a recent issue on the "Needs of Civilization," says:

"All we need is elevation; this is our demand, and must be supplied." And in proceeding to tell where this supply must come from, he further says: "We therefore need better teachers in our public schools.

This we consider a broad expression, including every grade of teacher, from the highest down to the lowest grade, who, unfortunately, sometimes scarcely deserves to be recognized as a teacher, and whose qualifications consist only in the name. And though this expression be modified ever so much, I do not favor the opinion that all the evils of Christendom should be laid at the door of the school teacher, the preacher and the magistrate.

Parents of children have a responsibility which must not be overlooked. It seems to me a pitiable state of affairs, when the responsibilities of parents can be rolled upon teachers, who undoubtedly have already both hands full. The child of to-day must be the man of the next generation, and if this child is nourished with the milk of malice, jealousy and dissension, it will be impossible for teachers or preachers to cure him of his crooked ways. We do not gather figs from thorns, nor grapes from bramble bushes; nor may we expect honorable offspring from dishonorable parents. To illustrate, take the "Bender" family, who were all natural-born desperadoes, perhaps the worst of which we have any record. It would undoubtedly require much persuasion to make either of them submissive and law-abiding citizens. I could mention instances which came under my own observation where it would have been just as impossible for a teacher to make good children of certain individuals, as it would be to convert the Bender family to Christianity; and as sure as effect follows cause, their parents were the principal cause of this crookedness.

The mother of George Washington would have been insulted had anyone told her that the future greatness of her son rested in the hands of his teachers. She did not try to shirk her responsibility, but instead, educated him to believe that a great and good man must be a great and good boy. I have never heard any person say, that for the greatest of all our great men, we are indebted to the efforts of a common school master. But the name of Mrs. Washington with that of Washington, will long live in the hearts of the American people.

I will say by way of conclusion, that while marriage is considered nothing more than a contract, and while divorces may be had for a song, and both parties join in singing that song, so sure may we expect evil, and only evil, and that continually. AD REFERENDUM.

Colusa county.

IMPROVEMENT IN STEAMSHIPS.—The old Cunard steamship, *Persia*, was one of the finest steamships afloat, in her days; yet she required six tons of coal to carry a ton of freight across the Atlantic in her. To-day the steamer *Arizona* is carrying freight across the Atlantic with a consumption of only one-fifth of a ton of coal to a ton of freight. It is mainly by the reduction in the quanity of coal consumed that we estimate the progress made in the improvement of steamers during the last 40 years.

NEW TINNERS' TOOL.—A Bristol, Tenn., mechanic is said to have invented a valuable machine for tinners, that will supersede the square, circular shears and dies now used, which cost $800. The new machine can be run with great rapidity by foot power, as well as by steam and the inventor thinks it can be furnished for $200. The machine is on exhibition at Bristol, and attracts much attention among machinists and mechanics.

THE TELEPHONE UNDER WATER.—*L'Ectricite* states that M. Dohrn has introduced the telephone in connection with his scientific explorations of the bed of the Bay of Naples. By its use the diver and the boatmen overhead are able to communicate with each other quickly and intelligibly.

Measuring Mind.

A curious device has recently been invented by Dr. Mosso, of Turin, which is designed for the measurement of the force of mind as developed in the act of thinking. It is called the plethysmograph, and its revelations are based on the fact that thought creates nervous action, which consumes in its performance a certain quantity of blood, and that quantity may be measured. In an address before the American association of Paris, Prof. G. F. Baker describes the machine and its working as follows:

The forearm, for example, being the organ to be experimented on, is placed in a cylinder of water and tightly closed. A rubber tube connects the interior of the cylinder with the recording apparatus. With the electric circuit by which the stimulus was applied to produce contraction, were two keys, one of which was a dummy.

It was noticed that, after using the active key several times, producing varying current strengths, the curve sank as before on pressing down the inactive key. Since no real effect was produced, the result was caused solely by the imagination, blood passing from the body to the brain in the act.

To test further the effect of mental action, Dr. Pagliani, whose arm was in the apparatus, was requested to multiply 267 by 8, mentally, and to make a sign when he had finished. The recorded curve showed very distinctly how much more blood the brain took to perform the operation.

Hence the device is capable of measuring the relative amount of mental power required by different persons to work out the same mental problem.

Indeed, Mr. Gaskell suggests the use of the instrument in the examination room. to find out, in addition to the amount of knowledge a man possesses, how much effort it causes him to produce any particular result of brain-work.

Dr. Mosso relates that, while the apparatus was set up in his room in Turin, a classical man came in to see him. He looked very contemptuously upon it, and asked of what use it could be, saying it couldn't do anybody any good.

Dr. Mosso replied: "Well, now, I can tell you by that whether you can read Greek as readily as you can Latin."

As the classicist would not believe it, his whole arm was put into the apparatus, and he was given a Latin book to read. A very slight sinking of the reserve was the result.

The Latin book was then taken away, and a Greek book was given to him. This produced immediately a much deeper curve.

He had asserted before that it was quite as easy for him to read Greek as Latin, and that there was no difficulty in doing either. Dr. Moso, however, was able to show him that he was laboring under a delusion.

Experiments have also been made to show that this apparatus is so sensitive as to be useful for ascertaining how much a person is dreaming—how much effort is employed in the act.

REPORTED LITERARY DISCOVERY.—An important and hitherto unknown treatise by Copernicus, on the movements of the celestial bodies, has been discovered in the archives of the astronomical observatory at Stockholm. This treatise is said to fill a very valuable place among the writings of the great astronomer. There is no doubt as to its genuineness, as it is soon to be published and given to the world.

"How many comets did you say there were?" inquired the judge of the prisoner, who had been locked up over night for deranging the symmetry of a neighbor's features during an astronomical controversy. "Three av it please yer honner." The court smiled incredulously, upon observing which Patrick added, "I'm afther tellin' ye the thruth; Mickey Farrell, he saw wan; Mrs. Dinnis, she saw another; and it was mesilf that saw the third."

IF it takes a boy to make a cow tender, what will make a hotel spring chicken tender.

A Pleasure Trip.

Just at this season of the year one of the finest and most agreeable trips to be made in the State is that offered by the counties of Napa, Lake and Mendocino. Taking the Vallejo route, go to Napa and Calistoga by rail; from there by stage to any or all of the following springs: Anderson, Adams, Siegler or Highland; then to Soda Bay; thence by boat on Clear lake to Lakepor; by stage to Wilter and Piersen's springs; a day or two at Blue lakes; stage to Ukiah, and then to Mendocino through the far-famed redwood region; visit the mill at this place, where they daily turn out 50,000 ft. of lumber; thence by the Pacific Coast steamship line to San Francisco. We know of no round trip that will give one a better knowledge of the Coast range than this, which is full of picturesque scenery from beginning to end; good hunting and fishing anywhere along; dotted every few miles with medicinal springs, affording good stopping places at almost any specified distance so that one may lay over in comfort when weary. Soda Bay is a wonder of nature; Blue lakes are beautiful, cosy and health-inspiring, with fine fishing, hunting, boating, and the finest well of water in the State. The ride from Ukiah to Mendocino is all the way through dense redwoods, here and there deer jumping out of the way of the stage; huckleberries lining the road, and occasional glimpses of the vastness of the forest, and beyond the deep, placid, rolling Pacific, had from the summit of some bare peak around which the road winds. At Mendocino one may cruise up and down the river trolling for salmon, whipping for trout, wandering into the solitude for a deer, or gathering shells on the beach. Such a trip gives spice and variety to life, and adds to one's knowledge of the resources and beauties of our State.

THE SPEED OF THOUGHT AND THE SENSES.—Some interesting experiments have recently been undertaken by European scientists, to demonstrate the speed of thought along the various nerves of the human body, and also the speed of the several senses. Helmholz has shown that a wave of thought would require about a minute to traverse a mile of nerve, and Hirsh found that a touch on the face was recognized by the brain, and responded to by a manual signal in the seventh of a second. He also found that the speed of sense differed for different organs, the sense of hearing being responded to in a sixth of a second, while that of sight only required one-fifth of a second to be felt and signalled. In all these cases the distance traversed was about the same, so the inference is, that images travel more slowly than sounds or touch. It still remained, however, to show the portion of this interval taken up by the action of the brain. Prof. Donders, by very delicate apparatus, has demonstrated this to be about .7500 of a second. Of the whole interval, .4000 are occupied in the simple act of recognition, and .3500 for the act of willing a response. When two irritants were caused to operate on the same sense, 1-25 of a second was required for the person to recognize which was the first, but a slightly longer interval was required to determine the priority in the case of the other senses. These results were obtained from a middle-aged man; but in youths the mental operations are somewhat quicker than in the adult. The average of many experiments proved that a simple thought occupies 1-40 of a second.

TWINKLING OF THE STARS.—Recently M. Montigny has written again on the increase of the twinkling of stars when there is a display of the aurora borealis. The increased scintillation is seen all the more clearly on winter than on summer nights, and the phenomenon is more apparent when stars in the northern region are observed. The author thinks the effect is not due to the direct influence of the electro-magnetic light of the aurora on the scintillation itself, but to disturbances (probably a cooling) which coincide in time with the appearance of the aurora in the upper regions of the air traversed by the star rays.

EFFECTS OF INTELLECTUAL WORK ON THE BRAIN.—What are the effects of different kinds of intellectual work on the cerebral circulation? This question M. Gley, a French physiologist, has attempted to answer by experiments made upon himself. When he applied himself to a subject which he had a difficulty in understanding thoroughly, and had, therefore, to concentrate all his energies upon it, the rhythm of the heart was far more accelerated than when he took up some matter with which he was well acquainted.

SCIENCE IN FLOWER CULTURE.—A gardener at Naples holds out the hope that in the near future the camellia will rival the rose in fragrance as well as in beauty. After years of experience he has succeeded in producing a camellia with a delicate perfume. It is of a pale rose color, and the gardener hopes to obtain before long fragrant white blossoms.

A FRENCH laborer after being lost in thought for 45 minutes remarked: "*Eh bien!* when a man dies we bury him, and when a tree dies we disinter it!" Mankind waited 6,000 years for somebody to say that.

PACIFIC STATES WATCHMAN.

FRATERNAL RECORD EDITION.

Issued on the 1st and 15th of each month.

AT NO. 202 SANSOME STREET, SAN FRANCISCO, CAL.

Subscription (in Advance), $2 a Year.

Favorable to Advertisers.

By consolidating the large subscription lists of the *Pacific Workman* and *Fraternal Record* with the PACIFIC STATES WATCHMAN our advertisers gain an unusually great advantage. We doubt if any one weekly newspaper has ever been circulated to as many different readers on this coast, as have been served heretofore by the *Workman*, *Record* and WATCHMAN together. It is certain that no other periodical is now patronized by a better class of industrial, professional and business men. In fact, our subscription list embraces many of the foremost business and representative men throughout the towns and cities of the coast.

We have pride in making our paper "clean and handsome," and first class in all respects—to the benefit of both our readers and advertisers.

ADVERTISING RATES.

One Square (½ inch), per issue	$ .75
One Square per month	1,25
Two Squares, per issue	1.50
Two Squares per month	2.50
Obituary notices and resolutions (with 25 copies post-paid for friends of deceased) per sq. (½ inch)	50

☞For reading notices, extraordinary display, special advertising and choice places permanently, extra rates will be charged. Reasonable reduction will be made for large and long-continued advertisements. No extra rates for the space occupied by engravings.

Entered at San Francisco P. O. as second-class matter.

San Francisco, - September 15, 1881.

Defalcations.

The investigations going on in government circles develop some stupendous misappropriations of public moneys, insomuch that we are again for the thousandth time forced to the conclusion that not only is human nature weak and unable to withstand the temptations that are in the way of our officials, but also that there is something wrong in the details of a system that permits or makes it possible for such defalcations to occur. We all admit that it is wrong for a man to yield to temptation, but is it not a fact indisputable that no man is proof against temptation in some form? Money may not tempt some people, but they are the rare exceptions, and knowing this fact, as all men of sense must know it, most assuredly he who tempts cannot be held morally guiltless when the tempted falls.

Members of fraternal societies are but men, and are subject to all the weaknesses and frailties common to humanity. Their feet are just as liable to stumble and go down into pit-falls as are those of other people. The more personal regard we have for them, the more carefully should we watch, guard and protect them from temptations that may prove too much for their strength. Our financial officers, many of whom handle large sums of money, should be hedged about by all the safeguards that can practically be applied, not only for the safety of the Order, but also for the safety of the officer. It is not enough to protect our money. Bonds may wrench from innocent but over-trustful and confiding hands the money to make good a defalcation, but they cannot raise up and restore one who fell because too weak to withstand a temptation we carelessly, yes, wickedly subjected him to. Our Grand Lodge has wisely provided for a careful and frequent scrutiny of all the financial transactions of its officers, and not a single month has been allowed to pass since the organization of that body without such scrutiny having been exercised. We have a right to presume our officers as honest as men usually are, and no more so. We have a right to presume that they are as well able to withstand the temptation with which they are surrounded as men usually are, and more so. We are proud in the assurance monthly conveyed to the brotherhood, that not one cent of the Order's money has been wrongfully appropriated. Let it always be so, and we shall have no losses to the Order in this direction, and no trusted official brought to shame.

The business of subordinate Lodges should be no less carefully and watchfully transacted. Already brothers, whose only sin was moral weakness, have passed out dishonored; and in some cases, we are pained to believe, more from the fault of the tempter than the tempted, neither meaning any wrong, but yet doing it, and one alone bearing all the penalty for the guilt of both. Brethren, it is not right; it is not manly. A man is honest. His character is unsullied and above reproach. Help to keep them so. "Lead us not into temptation, but deliver [guard] us from evil."

Attempt at Fraud.

Fraternal beneficial societies do not escape the infliction which has time and again been inflicted upon insurance companies, that is, parties trying to gain the insurance by representing themselves dead. Eastern exchanges contain accounts of how a man named Rowell, holding benefit certificates in the Royal Arcanum, Empire Order and A. O. U. W., to the amount of $7,000, tried to swindle these societies. He was considered a thrifty and industrious mechanic, and had saved from his earnings nearly $2,000. To the mind of Rowell came visions of greater prosperity, and dreams of a more rapid accumulation of worldly things. His native village was a beautiful town, but too slow. One might live there a quiet, dreamy existence, and be lovingly gathered to his fathers, "unhonored, unsung and unknown." But an ambitious soul would not be thus restrained. It longed for the noise and turmoil of the great outside world. And so he gathered his household goods and migrated to Niagara Falls, leaving his family to follow when he had arranged their future dwelling.

He there entered his name at the Niagara House, and on the following day he secured and rented a house.

A few days afterward he suddenly discovered that his money, some $800, was missing. He immediately telegraphed his wife that he had lost his money and not to come one. Assuming that he had lost his money on the cars, and either that it had been abstracted from his overcoat pocket by a thief, or had dropped out, he telegraphed to the superintendent of the depot at Buffalo, and at 7½ o'clock P. M. retired to his room at the Niagara House.

On the next morning he failed to put in an appearance at breakfast. An examination of his room revealed that the bed had not been occupied. An overcoat and two unfinished letters to Mrs. Rowell had been left. The letters revealed nothing except a despondent mood over the loss of the money. The authorities at Niagara Falls were informed of the mysterious disappearance, and a diligent search was instituted, but no Rowell was found. Mrs. Rowell was summoned by telegraph. From her it was ascertained that there was a suicidal tendency in Rowell's family, a brother and sister having attempted to end their own lives, the latter successfully. Following up the clue thus afforded, search was made about the Falls for any tidings of the missing man. At length, about 25 rods above the Falls on the American side, some clothing, consisting of a fur cap, coat, vest and pants, were discovered. In the vest was a small silver watch; in the pants a knife and some small change amounting to less than a dollar. The vestments were identified as those of Oliver L. Rowell. No doubt could remain as to his untimely fate. Bowed down by the loss of all his savings of many years, the shock had been too great for a mind burdened with inherited tendencies; reason left her throne, and one more unfortunate was buried by the mighty cataract.

Early in the May following, demand was made on the Royal Arcanum and the other Orders for the insurance money, the demand being accompanied by affidavits setting forth the circumstances here narrated, and such other facts as tended to establish a *bona fide* demand.

The Supreme Secretary was not satisfied with the validity of the claim, and therefore placed the matter in the hands of Mr. E. A. Skinner, Supreme Treasurer Royal Arcanum, who employed Mr. F. M. Wright, Deputy Sheriff of Chautauqua county, to find the body of Rowell, "dead or alive."

Mr. Wright entered upon the task with real zeal. Proceeding to Niagara Falls, he gathered all the information to be had, satisfied himself that the job was too deliberate and too bungling for a *suicide*, and that there were many elements of a fraud. A visit to Mrs. Rowell at Dayton, N. Y., where she had gone to reside with a cousin, Mr. Thrasher, while it convinced the detective that there was no conspiracy involving her or any of her family or friends, furnished a clew to a second motive, or one besides that of obtaining insurance.

It seems that the father of Mrs. Rowell is an old man, possessed of considerable means; but so incensed against Rowell, that he has so devised his property that no portion of it should go to Rowell's family, and has declined to recognize his daughter so long as she was Rowell's wife. Now, assuming Rowell's death established, would not the father receive his daughter and make provision for her by a new will? Then, when the old man was dead, the missing husband, with due penitence, would put in an appearance and help to enjoy the wealth thus cunningly captured.

The detective, starting with his clue, began to fortify his theory of fraud, and among other things these facts had their weight: Would a laboring man who had saved by scraping and pinching, $800, carry it in an outside overcoat pocket? Could he have lost it 20 hours without knowing it? Why did he not notify the police at the Falls? It was also ascertained that he left his home in Bath with $1,800, and his claim of losing $800 did not cover all. These and other little details confirmed the fraud theory.

While the detective was following up the "clues" about the 15th of June, a body was found at Niagara Falls, on the Canada side, opposite the American falls. It had been for a long time in the water, and was in so mangled a condition as to be scarcely recognizable, but from a general description it was supposed to be that of Rowell.

The detective at once proceeded to the Falls, found the body had been buried at Drummondsville, on the Canada side, and in company with Mr. Thrasher, cousin of Mrs. Rowell, and Mr. Allen, of Dayton, N. Y., and detective Curtin, of Buffalo, who was operating in behalf of the A. O. U. W., induced the authorities to exhume the body and hold an inquest. Sheriff Higgins, of Bath, and Mr. Ballou, for whom Rowell had worked five years, were present as witnesses. After due deliberation the jury came to the conclusion that the body was that of Olivet L. Rowell, and so rendered their verdict. The inquest seemed to show that Rowell left the hotel near 10 o'clock, went to the house he had rented, took a rope of cord from a roll of carpet, then went to the falls, divested himself of his clothing, tied the rope about his neck, having attached a weight to the end of the rope, placed the weight in the water, and then placing a pistol to his head fired, and fell and was swept over the falls. An examination of the skull showed a small bony tumor upon the inside, which the medical witnesses testified was sufficient to so affect the brain as to produce insanity. So all the detective's fine woven threads of fraud and conspiracy went for naught. The body was re-buried, and the friends and family were fully convinced that they had shed tears above the grave of a sad and unfortunate soul.

Such was the report of Detective Wright, but attached to it was an opinion, that while there was a strong probability that the body produced was that of Rowell, yet he did not think its identity was fully or satisfactorily established.

The Supreme Treasurer reported in accordance with this view, and while the assessment was issued it was ordered held as a special fund to await the results of further investigation.

Meantime it came to the knowledge of Mr. White that on the first of July Mrs. Rowell was at Brocton. While there she met a man who showed her a letter. At his dictation she sent a telegram to O. V. R. Hulett, Connorsville, Indiana, saying—

"Johnny is very sick. Very much alarmed at first message. Go to farm. I will come soon.
[Signed] SARAH A. BLODGETT."

Mrs. Rowell was visited by the detective at her home, and upon being told what she did in Brocton, said she had received an anonymous letter telling her that by going to Brocton she would meet a man who would satisfy her that Rowell was alive. She accordingly had gone and met a man she had never seen before, and whom she could not now identify, as he concealed his features from her. He showed her a letter, not letting her take it, in which some facts were stated that convinced her it was written by her husband. These facts were nothing in relation to his disappearance, but concerned matters that happened during the war, to which both were privy. She declined to say anything more that would aid in detecting the missing man.

The clue now to be followed was the cipher telegram. It was ascertained that that dispatch had been ordered to be sent from the telgraph office at Connorsville to the Postoffice. From the Postmaster it was ascertained that orders had been received, and obeyed, to send it by express to College Corners, Ohio. Detective Wright, accompanied by Mr. Thrasher, was fast following it up, and the detective telegraphed the express agent to arrest the party calling for the dispatch, and hold him till he arrived.

The party calling for the letter was duly arrested, and two hours later he was confronted by Detective Wright and Mr. Thrasher, by whom he was fully identified as Olivet L. Rowell, late of Bath, later of Niagara Falls, but now known as O. R. V. Hulett, a patent coffee-pot vender and general itinerant.

On being asked for an explanation of his conduct, he said: "He was tired of living with his wife; that her father was wealthy and abundantly able to take care of her; that the old man was down upon him, and if he was out of the way and supposed to be dead, the old man would come down liberally to her. That he had got tired of his old clothes, and had a right to leave them where he pleased."

Unfortunately, Rowell had committed no crime recognized by the statue upon which to base a requisition, and he was permitted to resume his liberty. The officers of the Royal Arcanum are deserving of great credit for the vigor with which they followed up this attempt at fraud upon itself and kindred Orders.

THE funeral of G. W. Colby, late President of the Granger's bank, took place at Benicia last week, under the auspices of Benicia Lodge, No. 5, F. and A. M. The Vallejo Cornet band was sent for.

SHOW us a man who is continually growling about the way things are conducted at the meetings, and we will show you a man who is conspicuous at those meetings by his chronic absence.

A Fraternal Boom.

The present time is prolific in fraternal societies, notably those of what is commonly denominated beneficial societies. Scarce a week passes but one or more new candidates for public favor are projected into our notice. No sooner did the A. O. U. W. give promise of success than the Knights of Honor came into existence. This was well, for there was room for it, and more, there was necessity for it. The A. O. U. W. did not and could not fully serve the public want. After that, came another, and another, and still others, till now two score will scarcely number them. There are too many. Possibly five may find room for a useful existence—the balance must in time go as some have already gone. Fraternal stock is inflated. By-and-by a reaction will set in. The law of supply and demand will assert itself and then will come contraction. The strongest and best will survive—the balance will be engulfed in the insatiable maw of oblivion. This result may be counted upon, as certain as that history repeats itself. As a faithful watchman on the walls of fraternity and protection we see our duty lies in forwarning against the impending calamity. It is natural that each should think his favorite society the most secure. But none are absolutely safe, and it behooves every intelligent and prudent man to study closely the systems of each society, their plan and manner of doing business, and to watch with constant vigilance the conduct of the officers into whose hands the business matters are entrusted, to the end that no care shall be wanting to ensure permanency if permanency be possible.

This article is written with no desire to create distrust or make a sensation, but only to point out the danger that is even now almost upon us. Forewarned is forearmed.

A Division in the Ranks of the Foresters.

The business of the Independent Order of Foresters, a beneficial society paying $1,000 benefit, has not been managed so well as it might have been during the past two or three years, and a division has sprung up in their ranks in consequence resulting in the secession of about one-half the membership in Massachusetts from the National body. Those who have withdrawn distrust the management of the National body, and have been for some time dissatisfied with the condition of its business, and will attempt through a new organization to secure more satisfactory results.

Those who remain with the National body claim that the loss to the Order in the State will be, with few exceptions, one of members only, and that the division will improve the condition of the Order, physically, at least, as the seceders embrace the older portion of the membership. At the last meeting of the Supreme body a graded assessment rate was adopted, the "total disability" plan of the "Chosen Friends" incorporated into the Order, and other radical changes made. The Foresters up to that time were far behind other organizations of a similar kind in their laws and system. It is believed that the improvements made will attract a desirable class of members, and soon place the Society among the best of the beneficial Societies of the land.

A New Society.

The other day, after a strapping young man had sold a load of corn and potatoes, he admitted to the men around the hotel barn that he was very desirous of joining some secret society in town. The boys at once offered to initiate him into a new order called "The Cavaliers of Coveo." He was told that it was twice as secret as Freemasonry, much nicer than Oddfellowship, and the cost was only two dollars. In case he had the toothache he could draw $5 per week from the relief fund, and he was entitled to receive $10 for every headache, and $25 for a sore throat.

The young man thought he had struck a big thing, and after eating a hearty dinner he was taken into a storeroom above the barn to be initiated. The boys poured cold water down his back, put flour on his hair, swore him to kill his mother, if commanded, and rushed him around for an hour without a single complaint from his lips. When they had finished he inquired:—

"Now I'm one of the Cavaliers of Coveo, am I?"

"You are," they answered.

"Nothing more to learn, is there?"

"Nothing more."

"Well, then, I'm going to lick the whole crowd!" continued the candidate, and he went at it. Before he got through, he had his two dollars initiation fee back, and three more to boot, and had knocked down everybody two or three times apiece.

Ancient Order United Workmen

About Reinstatement.

Our Lodges are cautioned against making any regulation that will prevent the Financier from receiving arrearages from a member whose beneficiary certificate has been suspended for less than three months, whenever such moneys may be offered him. The law provides, (Art. XIII, Sec. 10, G. L. Const.) that "any member who renders void his certificate by reason of non-payment of assessments thereon, may renew the same *at any time within a period of three months* from the date of forfeiture thereof; provided he shall pay all assessments that have been made during that time." The Financier is the financial officer of the Lodge, and it is his business to receive all moneys legally due the Lodge. "Any time within the period of three months," means just as much in this connection as it would in connection with a note of hand. Our constitution is the higher law by which we must be governed—the "by-laws" under our Articles of Incorporation—and no Lodge has any right to make any different regulations. Should a Financier refuse to receive moneys in accordance with the law quoted, and the member die under suspension in consequence, the Grand Lodge would be compelled to pay his beneficiary just the same as if such member had remained in good standing, and it is safe to presume that lapse of time between suspension and death would not work to the prejudice of the claim, and if so, then a member once tendering his arrearages and being refused, might ever after refuse payment and still hold the organization responsible for the payment of $2,000 to his beneficiary in accordance with the original contract. A case involving substantially this view of the subject has been recently decided by the courts of New York against the Grand Lodge of that State, and no doubt a like decision would be rendered here under like circumstances. This matter is of so much importance and likely to be so far reaching in its results, that we cannot afford to treat it lightly, nor to construe the law as we may think it ought to be, instead of as it really is.

We notice our New York brethren are chafing a good deal under the decision above referred to. There may have been circumstances concerning the tender of money to the Financier which would seem to be sufficient ground on which to build a hope of success in resisting payment of the claim which they did, but so far as the law is concerned, we do not see how it could be more explicit. It simply requires a member whose rights have been impaired by non-payment of an assessment or assessments to pay all such as have accrued within a given period. No particular time nor place is specified. It will not do to say that payment can only be made on Lodge meeting nights, for they are not held at "any time" but on stated times. It will not do to say that payment must be made only in the Lodge-room, for the law makes no mention of any place where payment shall be made. Usually Lodge-rooms are not accessible at "any time;" therefore, the Financier must at other places receive moneys from delinquents when tendered to him within the legal period. This seems to us so plain that under the light we have we marvel that our New York brethren should have contested the matter at all.

Of another matter in connection with this law governing reinstatements, we desire to speak. The proviso is to the effect that the member to be entitled to the reinstatement of his privileges must pay "all assessments that have been *made* during that time;" *i. e.*, during the time intervening between his suspended privileges and that of payment The law means this if it means anything at all; and yet the late Supreme Master Rose, decided that a pending assessment not delinquent should not be exacted under the law. This is just as plainly wrong as the forced construction that would require payments to be made only at Lodge meetings, and would not hold, we believe, in a court of law. While a tender of arrearages cannot be legally refused by the Financier of a Lodge at any time within the period of three months from the time of beginning, he certainly would have a right to refuse anything less than such amount. Because an assessment might not be delinquent, would be no excuse, under the law, for denying payment. The assessment that is pending and not delinquent has been "made," otherwise it could not be pending and not delinquent, and if it has been made, the Financier has a right to demand its payment or refuse a tender of any sum less than would satisfy all claims, including the assessment last made. The law is just as plain on this point as on the other.

We fear many of our officers and brethren have been governed too much by their sympathies and sense of what they believed the proper thing instead of by the plain provisions of the law, and so we are occasionally getting into difficulties. We seek to avoid Scylla on the one side, but are forced to plunge into Charybdis on the other. Our advice is, now and all the time, stick to the Law!

Grand Recorder's Statement for August.

We condense from Grand Recorder Pratt's Financial Statement for August the following leading figures:

NEVADA.—We learn from Grand Recorder Thorburn that D. F. Fox, D. G. M. W., has left for Salt Lake City, Utah. He goes for the purpose of instituting Lodges and extending the benefits of the Order in that section. The Order in Nevada is very flourishing and in high favor, having proven itself to be very beneficial and advantageous to all belonging to it, as well as to society generally. Bro. Fox is liable to meet with a welcome reception in the part of the country to which he is going.

Excelsior 126—Anniversary.

The second anniversary of Excelsior, 126, was celebrated at Greer's Hall, Mission street, on Tuesday evening, September 6th, 1881, by diversified exercises, consisting of instrumental and vocal music, recitations and addresses, concluding with a dance. Greer's Hall is one of the large and desirable places for Lodge gatherings, and on this evening it was completely filled with a select audience of ladies and gentlemen, with a good sprinkling of wee folks. The reception committee were at the door making themselves quite useful in carrying chairs, seating the large audience, piloting the gentlemen to the *free* coat-room and distributing the artistic, elaborate and gilt-edged programmes. The exercises were commenced at 8 o'clock by F. S. Polland, M. W., introducing Bro. E. F. Adams, who made remarks which were quite appropriate, interesting and well-received. Duet (piano and violin)—Bro. F. C. Hahn and son, Rudolph Hahn. This was a highly pleasing and artistic performance which was the best effort of high culture and received merited applause. Recitation — Miss Julia Cochrane—a sentimental piece that was pathetically and gracefully spoken to the great delight of her audience. Song—Sam Booth, P. M. W., who is known as the humorous singer in Excelsior, and on this occasion sang an original poem dedicated to "Workmen of olden time," and, on receiving an encore, responded with an humorous poem on the Mechanics' fair that caused considerable merriment. Address—W. H. Barnes, G. M. W. This was a fine effort that carried his audience to the highest pitch of enthusiasm. Duet, violin and piano, (*a*), cradle song, (Hansen, *b*,) II. Pirati—Mrs. G. G. Burnett, wife of Bro. Burnett, of Spartan, and Mr. Thos. J. Duffy. This was an artistic performance that was highly appreciated and received a generous applause. Solo—Mrs. Blake Alverson. This piece, as usual, was finely rendered and rewarded with a hearty encore. Reading (humorous)—Mr. A. R. Gunnison. This was the feature of the evening; his audience only releasing him when he had appeared three times. A programme of eight dances, in which the most of the select company joined, brought to a close a celebration that was worthy of the anniversary of this, one of the prominent subordinates of this jurisdiction.

University, 88.

EDITORS WATCHMAN:—On Saturday evening, Sept. 3d, Bro. Watson, of No. 3, (at request of Grand Master Workman Barnes) visited us and gave the secret work. He also conferred the J. W. degree on a new candidate. Grand Master Workman Barnes not being able to respond personally to our invitation, made a most happy selection in deputizing Bro. Watson, who gave the work in a capital and impressive manner, making University feel somewhat abashed; but in return, we received much of that inspiration mingled with instruction that only those connected with the Grand Lodge can impart and that is so essential to lift a Lodge to a higher plane. After work was given, Bro. Watson spoke on Good of the Order in general, clearly and forcibly defining what constitutes a good and useful member of the A. O. U. W. The speech was greeted with applause, and at the close received a unanimous vote of thanks. Bro. Watson returned a kind farewell for the evening. Thus was spent a very pleasant and highly instructive time in University, No. 88. J. G. WRIGHT, Recorder No. 88, Berkeley.

Memorial, 174.

This young subordinate is keeping apace with the older Lodges in the increase in membership, and is particularly fortunate in her corps of officers the present term. The Lodge attendance as a rule is not large, but a goodly number of the faithful ones are always there. Their meeting of August 29th was a very pleasant and interesting one; two received the M. W. degree, in a manner that was very creditable to all the officers, Bros. S. Carkeet, M. W., F. A. Brooks, F., and J. O. Ralston, O., giving he work perfect, and in an impressive and and pleasing manner. The fifth quarterly meeting will be held at Fraternity hall, Shiels' building, 32 O'Farrell street, on Monday evening, September 26th. There will be a musical and literary entertainment of the highest order. The names of the committee are a sufficient guarantee that there will be nothing but first-class talent. Members of the Order, with their wives, sweethearts and friends, are most cordially invited to attend.—Chas. S. Hoffman, P. M. W., M. Livingston, M. D., L. Georges, Committee.

Sausal, 47.

This Lodge celebrated its third anniversary last month by giving a public entertainment. The musical part of the programme was well received, Prof. McCoy and his choir lending their services. Walter St. Johns, Master Workman of the Lodge, presided, and introduced Grand Master Barnes, who delivered an interesting and instructive address of over an hour's duration, on the objects and principles of the Order. A splendid collation had been prepared, at which plates were laid for 180 persons, and quite a number had to wait for the second table. No. 47 is a thriving subordinate, and the visit of the Grand Master has done much good.

MYRTLE LODGE, No. 42, will pay a fraternal visit to Occidental Lodge, No. 6, Oakland, September 16th,

American Legion of Honor.

Officers of Grand Council.—OSGOOD C. WHEELER, Grand Commander, Oakland; MRS. ABBIE E. WOOD, G. Sec'y., office room 1, Shiels' building, 32 O'Farrell St.; J. N. BESSE, G. Treas., Watsonville.

ADVICES from the East are to the effect that "Darius has ceased to be King"; his mantle has descended to another, the Supreme Council in its wisdom (we hope) has elected Jacob Roberts, of Philadelphia, as Supreme Commander. California was honored by the election of Rev. O. C. Wheeler, Grand Representative from the Grand Council, as Supreme Chaplain. But one of the Supreme officers of last year were re-elected, and that was Miss Nettie E. Mosher, Supreme Secretary. There was considerable business transacted, the details of which have not reached us yet.

THE Supreme Council of 1880, offered a prize of $500 for the best new ritual that might be submitted. There were four placed in the hands of the committee, of which Rep. O. C. Wheeler was Chairman, for consideration. Comp. Wheeler expects to return about the first of October.

GOLDEN SHORE Council has been numbered 695, and will hereafter meet every Saturday evening, Shiels' Building, 32 O'Farrell street, Charity Hall.

PROTECTION Council have voted to change their night of meeting from Saturday to Friday of each week, and their place of meeting to B. B. Hall, Eddy street.

DEPUTY Grand Commander D. S. Van Slyke, has got to work again. His first report comes from Sonoma, where he has instituted Crescent Council, with the following list of officers: George M. Wells, Commander; Oliver B. Shaw, Vice Commander; John A. Walker, Past Commander; James P. Weems, Secretary; Allen A. Converse, Collector; David Calloway, Treasurer; George Golden, Orator; Louis Breitenbusch, Guide; Charles R. Smith, Warder; Stephen R. McLaughlin, Sentry.

GRAND COMMANDER O. C. Wheeler and other Grand officers will pay an official visit to Washington Council soon after the Grand Commander returns from the East.

NEARLY all the Councils have advanced the sum of $10 towards paying the incidental expenses of starting our Grand Council. Those who have not, ought to try and do so at once, as the money is needed to pay current expenses. It is not asked for as a gift; it is simply an advance payment of per-capita tax that will be due Jan. 1st, 1882.

THE following decisions have been made and officially promulgated:

Ques. Is it necessary for two members of the A. L. of H. to sign a D. S. C. bond, or will any two good persons do?

Ans. No matter who if they are good.

Ques. Do the charter members pay for initiation according to degree?

Ans. No; the price of initiation is the same for each.

Ques. After institution of Council, how much must candidates pay for initiation?

Ans. Not less than $3.

Ques. Do lady members meet in the same council with gentlemen?

Ans. Yes.

Ques. Is the A. L. of H. incorporated?

Ans. Yes; by the Commonwealth of Massachusetts.

Ques. Should candidates initiated on their 30th birthdays be assessed as between 29 and 30 or 30 and 31?

Ans. Between 30 and 31.

Ques. How can an honorary member (who has become eligible to beneficial membership) obtain beneficial membership?

Ans. By making application for beneficial membership and being elected to it by ballot the same as a new member, except that a committee of investigation need not be appointed and the applicant need not be reinitiated or pay initiation fee, as provided for in the subordinate constitution, Art. VI, Sec. 3.

Ques. If the Commander of a Council fails to announce the suspension of a member at the next meeting after the expiration of the 40 days, in accordance with Law 1, Sec. 8, and the Secretary to at once notify the Supreme Secretary in accordance with Art. V, Sec. 4, subordinate constitution, is the Council required to pay the assessment of such suspended member?

Ans. Yes.

(CONTINUED ON PAGE 308.)

ABSOLUTELY INSTANTANEOUS PHOTOGRAPH.—Probably nothing, since the production of the famous photographs of Watron of horses in motion, has attracted more attention in that line than an exhibition now being made in New York of a photograph taken by an army officer with Anthony's instantaneous collodion. An old army mule, condemned to death, was killed by a small charge of dynamite placed on his neck and exploded by electricity. The picture represents the mule standing with his head entirely blown off, and the rope with which he was tied to a short stake in the ground in the same position that it was in when tied to his head, as it had not time to fall to the ground. The slide of the camera was dropped by the same charge of electricity that exploded the dynamite.

BURSTING POWER OF ICE.—Ed. Hagenbach experimented, during the past severe winter, upon the bursting force exerted in the expansion of water when freezing. Two interesting experiments were made with cast-iron hand grenades. The outer diameter was 15 centimetres (5.9 inches), the inner diameter 15 centimetres (5.04 inches). The shells were filled with water, closed with a screwed iron plug, and exposed to the cold. Both shells were broken and a curved thread of ice was projected, by means of an ice column, from the upper surface. One of the plugs was evidently thrown out with great violence, and to such a distance that it could not be found. The curvature in that case was bent upward.—*Wiedmann's Annalen.*

ICE AS A BURNING LENS.—A glass globe full of cold water, or even a lump of ice, will, in the sun's rays, act as a burning lens.

SECURE PATENTS

Through Dewey & Co.'s **Scientific Press** Patent Agency.

OUR U. S. AND FOREIGN PATENT AGENCY presents many and important advantages as a Home Agency over all others, by reason of long establishment, great experience, thorough system, intimate acquaintance with the subjects of inventions in our own community, and our most extensive law and reference library containing official American and foreign reports, files of scientific and mechanical publications, etc. All worthy inventions patented through our Agency will have the benefit of an illustration or a description in the MINING AND SCIENTIFIC PRESS. We transact every branch of Patent business, and obtain Patents in all countries which grant protection to inventors. The large majority of U. S. and Foreign Patents issued to inventors on the Pacific Coast have been obtained through our Agency. We can give the best and most *reliable* advice as to the patentability of new inventions. Our prices are as low as any first-class agencies in the Eastern States, while our advantages for Pacific Coast inventors are far superior. Advice and Circulars free. DEWEY & CO., PATENT AGENTS.

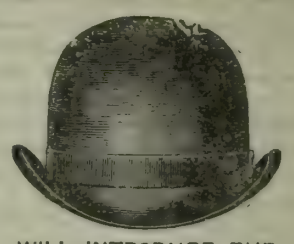
The Directors of the San Francisco Homœopathic Hospital would be glad to have donations of any of the follows articles. If you have any, please send your address, together with a list of the articles, to Mrs. C. J. Dempster, 36 Glen Park avenue, or to Mrs. C. E. Gibbs, 833 Post St:



Bedsteads, mattresses, pillows, sheets or sheeting, pillow cases or muslin, blankets, felt for mattress protectors, bed spreads, bureaus, wardrobes, washstands, small tables, rocking chairs, chairs, bedroom crockery, looking glasses, towels, lamps, candlesticks, clocks, strips of carpet bound, or mats, tables for kitchen or dining room, dining room crockery or glass, spoons, knives and forks, table linen and napkins, old linen or muslin, books or papers.

Any ornamental articles which would make a sick-room more cheerful.

A LARGE MONOLITH.—At a granite quarry in Westerly, Rhode Island, there was recently detached a monolith 150 feet long, 10 feet wide, and 8 feet thick, weighing over 1,000 tons. These dimensions greatly exceed those of the Obelisk of Semiramis, the largest of the Egyptian monoliths. The stone was loosened by one oblong blast-hole in such a simple and perfect manner that the theories and conjectures advanced by many as to the methods of the Egyptians appear absurd. It contains over 12,000 cubic feet of granite which, cut into smaller blocks, will fetch about $30,000. Mr. French, the engineer in charge, is quite positive that it could be taken to New York city, finished as an obelisk, and erected for about $150,000.

Workmen Guarantee Fund Association.

Additional $1,000!

Additional $1,000!

Additional $1,000!

FOR MEMBERS of the A. O. U. W. ONLY.

ADMISSION FEE, $3.00; ANNUAL DUES, $2.00.

Probable Cost to Each Member, about $8 a Year.

The object of this Association is to afford an additional protection of $1,000 to families of deceased members of the Ancient Order of United Workmen.

To become a member the applicant must be a Master Workman in good standing in his Lodge, under 50 years of age, and in sound bodily health. No re-medical examination is demanded, though the Association reserves that right, and when necessary, the applicant must pay the Examiner's fee.

There are no Lodge meetings to attend or Lodge dues to pay. There is no sinking fund, consequently the members have the benefit of every dollar received.

No Director receives any remuneration for services rendered.

The admission fee includes the first assessment of $1, which assessment is levied, and made payable on the death of a member, and disbursed on the same principle as the Beneficiary Fund of the Ancient Order of United Workmen.

The Association is governed by a Board of Directors, elected annually by the members. It is endorsed by Hon. Roderick Rose, Past Supreme Master of the Order in the United States, also, by W. H. Jordan, M. T. Brewer and C. W. Taylor, Past Grand Masters of California, H. G. Pratt, Grand Recorder, C. H. Haile, Grand Receiver, C. C. Terrill, P. Peck and E. H. Morgan, Finance Committee of the Grand Lodge, all of whom are members, and cordially recommend the Association to the support of the Brothers throughout the State.

The average cost of this additional $1,000 to the $2,000 already pledged by the Order, will be about $8 per year, or less than 20 cents a week.

FRATERNAL RECORD.

[CONTINUED FROM PAGE 305 OF THIS ISSUE.]

Grand Army of the Republic.

Officers of the Department of California.—C. MASON KINNE, Com., San Francisco; W. F. ELLIS, S. V. C., San Jose; J. M. DAVIS, J. V. C., Oakland; W. A. ROBINSON, A. A. Gen., San Francisco; O. B. CULVER, A. Q. M. Gen., San Francisco; J. W. STAPLES, Inspector, San Francisco.

A New Post at Santa Cruz.

For some time past the old soldiers at Santa Cruz have been arranging for the formation of a new Post of the Grand Army of the Republic. All being in readiness, the Department officers were invited to visit that place on Saturday evening, September 10th. Desirous of giving the boys a good send-off, and a desire as well, on their own part, to have a general good time, the following circular was issued to such as would be likely to respond:

Comrade: The Department Officers, G. A. R., extend you a cordial invitation to join them in a grand excursion to Santa Cruz, on Saturday next, Sept. 10th, at 3:30 P. M.

Special arrangements have been made with the S. P. R. R. Co. broad-gauge. We will have a special car; and every effort will be made to secure our comfort.

Fare for the round trip, including board at either of the principal hotels for one day, will be only $5.

It is expected that at least 50 comrades will go. Our purpose is to devote the day to unrestrained hilarity—to make it a grand jollification.

Comrades will meet at depot, corner Fourth and Townsend streets, promptly at 3 o'clock.

If you will join us, please notify ComradeO. B. Culver, A. Q. M. G., at LeCount Bros., 417 and 419 Montgomery street at once.

Commander Holmes, of Geo. H. Thomas Post, who will accompany the party, earnestly unites with us in the hope that you will become one of us.

The route has been changed on account of more favorable terms offered by the Broad-Gauge Co. Yours in F., C. and L.

W. A. ROBINSON, A. A. G.

As the 3.30 train drew out from Townsend St. depot the unique emblematic badge of the Grand Army could be seen borne upon the breasts of thirty-three comrades enroute for Santa Cruz. They were as follows: Col. J. L. Tharp, Assistant Inspector on Staff of Commander in Chief of National Department; J. M. Davis, Junior Vice Commander Department of Cal.; O. B. Culver, Quartermaster General; Geo. L. Harris, of Department Council of Administration; P. R. Downer, Past A. D. C.; Post Commander, W. H. Holmes; Junior Vice Commander, R. W. E. Robinson; Adjutant, B. M. Bramhall; Officers of the Day, A. J. Vining, and comrades W. F. McAllister, M. D., R. E. Whitfield, Charles W. Sturtevant, Martin Bacon, W. H. Saulsbury, H. Elleau, C. W. Scheck, S. W. Garretson, J. Simonson, Jr., C. L. Bigelow, E. F. Hartshorn, B. G. Barney, E. P. Cressy, H. A. Unruh, E. B. Guion and Charles E. Wilson of George H. Thomas Post, No. 2; Adjutant W. H. Voorhees and Comrades J. R. Cowan, J. W. Kinsley and J. Nicolaysen of Lincoln Post, No. 1; Past Commander A. P. Collins and Assistant Inspector J. C. Coolidge of Lyon Post, No. 8. As the conductor shouted "all aboard," the boys could be heard "shouting the battle cry of freedom" from the cares and responsibilities of business, and off for a good frolic.

At San Jose the party was increased by the addition of Senior Vice-Commander of Department of California, W. F. Ellis, Past Commander A. G. Bennett, Assistant Inspector H. T. Welch, Officer of the Guard J. J. Pierd; Past Officer of the Day John B. Owens, Past Chaplain Orrin Taber, and Comrade I. D. Berry of Phil Sheridan Post, No. 7. Arriving at Watsonville, their number was farther multiplied by the addition of Post Commander M. Valentine, Adjutant C. W. Benjamin, Quartermaster A. A. Morey and Comrades J. A. Linscott, George Cleveland and A. Brown of R. L. McCook Post, No. 26. At 7:30 the party arrived at Santa Cruz, where they found Assistant Adjutant-General Wm. A. Robinson and Comrades George S. Evans and George J. Hood awaiting their arrival.

A hungry set they were; and they relished a good dinner about as well as any party we ever saw.

As soon as their hunger had been partially appeased, they wended their way to Masonic Hall, where the company of "Old Vets" awaiting muster were in waiting.

Assistant Adjutant-General Wm. A. Robinson called the meeting to order and called upon Senior Vice-Commander of the Dep't of California W. F. Ellis, of San Jose, to assume the duties of Dep't Commander, Department Commander C. Mason Kinne being necessarily absent. The acting Department Commander filled the remaining positions necessary to open a Post with the following: Junior Vice-Commander of Department J. M. Davis, as Senior Vice-Commander; Post Commander W. H. Holmes, of Geo. H. Thomas Post, as Junior Vice-Commander; Comrade P. R. Downer, of Geo. H. Thomas Post, as Chaplain; Adjutant B. M. Bramhall, of Geo. H. Thomas Post, as Adjutant; Quartermaster General O. B. Culver, as Quartermaster; Assistant Adjutant-General W. A. Robinson, as Officer of the Day; Comrade Dr. W. F. McAllister, of George H. Thomas Post, as Surgeon; Officer of the Guard, J. J. Pierd of Phil. Sheridan Post; Assistant Inspector J. C. Coolidge, of Lyon Post, as Inside Sentinel, and Assistant Inspector H. T. Welch of Phil. Sheridan Post as Outside Sentinel.

A Post was then opened in due form.

Applications were then received from the following: John Butcher, late of 11th Regt. Indiana Vols.; Royal F. Clark, 15th N. H.; Albert L. Weeks, 26th Mass.; Chessman Gould, 4th Minnesota; Charles L. Handin, 19th Maine; Murdock Campbell, 24th Penna.; George I. Holt, 2d Mass. Cavalry; Joseph Montgomery, 15th Iowa; Chapin C. Cook, of Navy; Orlando J. Lincoln, 21st Maine; John Delehanty, 2d Kentucky; Lewis A. Stowe, 1st Minnesota; E. F. Werner, 6th California; Charles Peoples, 1st N. H. Artillery; Z. N. Goldsby, 12th Missouri Cavalry; J. A. Bachelder, 7th Maine; J. A. German, 136th New York; E. Spalsbury, 35th New York; Thomas Amner, 15th Conn.; W. H. Bean, 21st Maine; Solomon Agerton, 77th New York; John W. Shannon, 5th Kansas; all of which were referred to a committee of three, consisting of comrades A. G. Bennett, J. L. Tharp and A. A. Morey for examination. The same having all been reported favorably upon, they were all elected for muster in. Comrades W. H. Voorhees and J. R. Cowan, of Lincoln Post, E. F. Hartshorn, of Geo. H. Thomas, and John B. Owens, of Phil Sheridan, being detailed as guards, they were duly mustered in and regularly constituted as W. H. L. Wallace Post, No. 32, G. A. R. Dept. of California.

The nomination and election of officers being next in order, the following were elected as their first officers:

Post Commander, Thos. Amner; Senior Vice-Commander, Z. N. Goldsby; Junior Vice-Commander, J. A. Bachelder; Surgeon, Royal F. Clark; Chaplain, Geo. I. Holt; Quartermaster, E. F Werner; Officer of the Day, Orlando J. Lincoln; Officer of the Guard, Chessman Gould. The Post Commander elect then appointed as Adjutant, E. Spalsbury; Sergeant, Major Chas. L. Handin; Quartermaster Sergeant, Chapin C. Cook, all of whom were then regularly installed, W. A. Robinson, Assistant Adjutant General, acting as Mustering Officer and Officer of the Day; A. J. Vining, of Geo. H. Thomas Post, as Officer of the Day.

After transacting the usual routine of business, the Post was closed in due form.

Before doing so, however, the Post Commander invited all present to partake of a banquet that had been prepared for them.

After the boys had satisfied their hunger and thirst from a most bountifully supplied table, a literary treat followed, introducing several of the comrades as speakers and singers, as follows: Quartette, consisting of Comrades Wilson and Guion, of Thomas Post, and Messrs. Mueller and Moore, of the Loring Club, opening the exercises. "The Department of California" was then responded to by Senior Vice Commander W. F. Ellis, of San Jose; "The National Encampment" was responded to by J. L. Tharp, Inspector on the staff of the Commander-in-chief; "Lyon Post," by Post Commander of Lyon Post, A. P. Collins; "Staff of the Department Commander," by Assistant Adjutant General W. A. Robinson; "Geo. H. Thomas Post," by Comrade P. R. Downer; "Department Vice Commanders," by J. M. Davis, Junior Vice Commander; "Quartermaster Department," by Quartermaster General O. B. Culver; "R. L. McCook Post, No. 26," by M. Valentine, Post Commander; "Phil. Sheridon Post, No. 7," by Past Commander A. G. Bennett; "The Rank and File," by Comrade B. G. Barney, of Geo. H. Thomas Post; "W. H. L. Wallace Post," by Surgeon R. F. Clark. The evening's entertainment was brought to a close early Sunday morning by all present joining in singing "America."

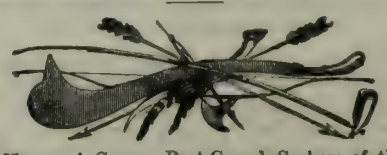
The boys all stopped at the Pacific Ocean house, kept by E. J. Swift, one of the landlords who knows how to "run a hotel." Mr. Swift gave the boys the run of his house; every opportunity was given them to gratify their "unrestrained hilarity," which was improved to their hearts' content. As the night wore away, one by one quietly withdrew to his couch. It being the understanding that all should stand or fall together, a solid phalanx must be preserved. In keeping with this idea, a self-constituted patrol, consisting of Comrades Voorhees, Vining, Sturtevant and Barney, set about emptying any beds that had been occupied contrary to orders. Not being accustomed to sitting up late, we with Commander Holmes had retired to a distant portion of the building, and supposed, from our distance from the main camp fire and our well-known reputation for regularity of habit, escape the inquisition. Alas, it was not so ordered! On the contrary, it was the especial order, that notwithstanding our retiring natures and retired conditions, we had to arise and report below and wait for the order to "break ranks." Others were served the same way; and many, many others, seeing our ill-success, remained until regularly disbanded.

After breakfast (for we will not make any great mention of the sleep any secured) the party all went about seeking another place of "hilarity." Some sought the cool, refreshing sea breeze, and witnessed what few bathers there were to see; others took teams and drove to the several places of interest—Big Trees, Felton and other points, while still others quietly, *very quietly*, withdrew to their rooms for a little nap.

Thus the day passed, and at 4:15 the cry of all aboard was heard, and they were homeward bound.

Thus ended one of the best excursions we ever attended; the number was about right, they were of the right sort of fellows; it was about long enough, not expensive, and taken all in all it was a grand success. We cannot close this account without expressing our only regret that Col. C. Mason Kinne was obliged to be absent, and our congratulations to Senior Vice Commander Ellis and Assistant Adjutant General Robinson for the perfect manner in which every detail of the work and discipline were performed, but to Quartermaster General O. B. Culver more than any one else is credit due for the general success, the unbounded pleasure, the complete arrangement, the unrestrained hilarity which were enjoyed by all, as he has had the management of the details of this trip in hand for weeks, and the boys all agree that if this was a sample of Culver's trips they all unite in saying, enter our names up for a chance every time Culver gets up an excursion. The affect of such a large delegation accompanying the department officers on their trip must be for good to the new Post, as it shows a lively interest, and the general effect cannot be but good in increasing the common interest in the Grand Army of the Republic.

Commander Holmes Won the Prize.



While all the different Fraternal societies have seemed to take new life during the past few months, the G. A. R. has not been behind in progress. As is well known this organization depends entirely upon the men who served as soldiers or sailors in the Union army during the time from 1861 to 1865. It is therefore the more remarkable that this Order can show such a great increase for three years. The actual gain in this city in two Posts, during the three months from April 1st to June 1st, has been 137, of which number 82 have been gained in Geo. H. Thomas Post, No. 2. Walter H. Holmes, the Commander of Post No. 2, has been indefatigable in his efforts to recruit the membership under his command, and as a result of his untiring energy, has the satisfaction of having made No. 2 the best Post of the United States in this respect.

During 1880, Comrade J. A. Joel, the proprietor of the *G. A. R. Gazette*, published in New York, in order to stimulate the comrades to earnest work, offered, through the columns of his paper, a prize, to be given to the comrade who should bring into his Post the greatest number of recruits from June 30, 1880, to July 31, 1881, which prize was to be the beautiful picture of the "March to the Sea," and a sum of money sufficient to pay for suitable frame. During the time specified, Comrade Walter H. Holmes brought into his Post the number of 107 (most of whom after January, 1881), which number, being submitted, proved to be (6) six in excess of the highest number reported by any other Post in the United States, and thus giving to Comrade Holmes the picture, and also the glory of having excelled in good works all his fellow comrades.

Making his Post the banner Post of the Order, and giving the Department of California the honor to number the most successful Post on her Roster, besides the number recruited by Comrade Holmes, there have been added during the time named 56, making the gain in this Post for one year to be 163. This example of what can be accomplished by persistent effort ought to stimulate every member to do what may be in his power to promote the progress of the good work. The gain in the Department of California for second quarter 1881 was 425.

Improved Order of Red Men.

Officers of the Great Council.—J. A. FILCHER, Great Sachem, Auburn; J. F. PINKHAM, Great Senior Sagamore, Oakland; C. E. Spencer, Great Junior Sagamore, Sacramento; EUGENE LEHE, Great Prophet, Stockton; H. S. WINN, Great Chief of Records, S. F.; ADAM SMITH, Great Keeper of Wampum, S. F.

HENRY A CHASE, Past Grand Sachem of the Improved Order of Red Men, and Great Representative to the Great Council of the United States, left on the overland train on Sunday the 4th inst., to attend the session of that body, which convened in the city of Annapolis, Maryland, on the 13th inst. Bro. Chase is also Grand Secretary of the U. A. O. D., and during his absence the duties of that office will be performed by Bro. John Biter, Past Grand Secretary.

Twenty-six years have elapsed since Bro. Chase visited his old home in Baltimore, and the assembly of the Great Council of the United States at a point in the near vicinity affords him an excellent opportunity to combine business with pleasure and

> "Revisit scenes his childish feet have trod,
> And sport once more upon his native sod."

A delegation of Red Men and Druids accompanied Bro. Chase upon the first stage of his long journey, when, with hearty wishes for his pleasant passage and safe return, good bye was spoken with all the word implies, and the brethren returned to the city. It is rumored that a movement is on foot to make it very warm for the Great Representative on his return, some four weeks hence.

GREAT SACHEM, J. A. Filcher, is making official visits among Tribes and doing his best to stir the Injuns up to renewed energy in their work.

WE are in receipt of the printed proceedings of the Sixteenth Great Sun Session of the Great Council of California, held at Santa Cruz, July 26, 1881, a full report of which appeared in our columns at the time. In the haste preparing notes at that time some important legislation was overlooked. The following among the rest:

Representative Katzenstein, of No. 14, offered the following resolution, and moved its adoption:

Resolved, That Great Sachem Bro. Eugene Lehe, Great Senior Sagamore Bro. J. A. Filcher, and Great Chief of Records Bro. H. S. Winn, be and they are hereby appointed a special committee to revise the laws governing this Great Council and Subordinate Tribes, and to harmonize the same with the Great Council of the United States, said special committee to report during the next Great Sun of this Great Council.

Carried.

Representative Johnson, of No. 30, submitted the following resolution, and moved its adoption: Carried.

Resolved, That the Advisory Committee be, and is hereby directed to prepare such amendments to the By-Laws as may be deemed advisable for the government of the Trustees of the Great Council; *provided*, that such Trustees shall be governed, as to their duties and actions, by the By-Laws so prepared, until the Great Council acts upon them.

THE closing address of the new Great Sachem was short and to the point, as follows:

REPRESENTATIVES: You have called me by your unanimous vote to fill this the highest office within your gift, and, fully appreciating the compliment, I enter upon the discharge of the duties incumbent upon me, with much distrust in my own ability to fully meet your expectations. I am fully aware that you have not thus bestowed this unmerited honor upon me as a mere compliment. I shall, therefore, bring to the discharge of the high duties that devolve upon me, my best energies.

The influence this body exerts over its subordinates, as its legislative and judicial head, and the confidence and esteem in which it is held by them, should impress upon us the importance of the faithful discharge of all our duties. I am profoundly impressed with the responsibility that rests upon me. I have but one purpose in view—to uphold and advance the great principles of our Order.

To you, Representatives, and brother officers, I shall at all times look for aid, council and advice. I trust that our legislation may tend to the benefit of all our Tribes, and to the prosperity of the entire Order. To you, who are privileged to attend our Great Council, your Tribes and brethren look for advice and instruction. It is your duty to watch over the interests of your Tribes, assist in transacting the business, and use your best energies for the welfare and advancement of your Tribes and the Order.

Wishing you, and each of you, a safe return to home, family and friends, a long and prosperous future, I tender to you my heartfelt thanks for this mark of your confidence and esteem.

POCOHONTAS Tribe are adding largely to their members, and their increase is from among the first citizens of our city.

POHONACHEE Tribe gave a most enjoyable social at their Wigwam, Monday evening, Sept. 5th.

Patriotic Sons of America.

GRAND OFFICERS.—C. L. WELLER, State President, S. F.; A. K. HELLIS, State Sec'y, S. F.; DR E. L. WILLARD Asst. State Sec'y, S. F.

THIS is an organization which, if carried on in accordance with the principles on which it is founded, is capable of exerting an important influence on the future of the nation. As its name indicates, its objects are patriotic. It is a secret society and its teachings inculcate the duty of the citizen to the State and the reciprocal rights of freemen. As ordinarily conducted, the Lodges or "Camps," as they are called, are little else than debating societies of various degrees of excellence, but the ritual of the Order, and, to a great extent, the subjects of debate, are such as to animate the members with a spirit of high patriotism, the effect of which was seen at the outbreak of the rebellion, when almost every "camp" in the country was seriously crippled by the enlistment of members in the army. The members of this association are principally young men. They are of the age which readily receives and retains impressions. The conductors of the Order, therefore, have in charge an organization capable of training an important body of citizens in the highest duties of citizenship, a training which in this country is altogether too much neglected

The future of America will be very bright if, through such agencies as this, her people become "sons" of the nation in fact as well as in name.

THE 16th annual reunion of the State Camp of Pennsylvania was held at Pottstown, August 9th. Delegates from all parts of the State were present, about 325 votes being cast in the convention.

Grand Officers.—CHAS. W. BRYANT, G. C., San Francisco; James M. BAIRD, G. A. C., San Francisco; JOHN W. SHAFFER, G. Treas., S. F.; S. DANIELEWICZ, G. Rdr. office 601 California street, S. F.

DEPUTY GRAND COUNCILOR SAMSON AMERICAN, assisted by several officers and members, instituted Social Council, No. 46, on Thursday evening, Sept. 1st, at Red Men's Hall, Post street. The following were installed as the first list of officers: Past Chief Councilor, Rev. Wm. F. Morrison; Chief Councilor, J. W. Kinsley; Vice Councilor, Mrs. W. F. Morrison; Chaplain, Mrs. Lillie W. Halton; Recorder, Mrs. Mary L. Holland; Financier, Joseph O. Jephson; Treasurer, P. D. Cahill; Marshal, A. Krouse; Warden, Mrs. C. St. John; Guard, Wm. McLean; Sentry, E. P. St. John. This Council will meet at Peon Hall, Red Men's building, on the first and third Mondays of each month.

PACIFIC COUNCIL, No. 8, celebrated their first anniversary by a fine literary entertainment and dance at Ixora Hall, in this city, on Friday evening, September 2d. The hall was well filled with the *elite* of our city, and the following programme was finely rendered: Piano duet, Prof. Delipiana and Miss Boukofsky; opening remarks by the Chief Councilor, C. A. Russell; song, Miss Eva S. Coon; harmonica solo, Mr. Rogers; song, J. Booth; address, Hon. P. A. Roach; piano solo, C. Schmitz; recitation, M. Benhayon; song, Miss Jessie Lowe; recitation, Miss Gately; piano duet, Pfeifer sisters, after which the floor was cleared, and dancing was the order of the evening. This Council is one of the best subordinates in our jurisdiction. Their meetings are always entertaining, and it was expected that their anniversary party would be a success, in which none were disappointed. The credit of the management of the anniversary celebration is largely due to the following committees: Arrangements—J. M. Baird, W. S. Wenkler, C. A. Russell, W. E. Jackson, T. B. McKenzie and Dr. Cook. Reception—C. A. Bernard, H. Murphy, D. Carr, F. P. Doe, T. B. Harrington and R. E. Williams. Floor Manager—C. Nelson. Floor Committee—H. H. Henning, M. F. O'Donnell, S. G. Nash, Geo. H. Williams, Misses Rickard and Seymour, and Mesdames Henning and Davis.

ON MONDAY evening, September 5th, Grand Recorder S. Danielwiecz instituted Empire Council at Red Men's Hall, Post street, with 54 charter members.

TUESDAY EVENING, August 27th, the members of America Council, No. 7, presented to their Past Chief Councilor, A. Rotenstein, a beautiful set of silverware as a testimonial of their esteem and regard. Past Grand Councilor Chas. L. Wiggin made the presentation speech.

THE regular quarterly entertainment of Golden Shore Council, No. 5, was held at Shiels' building on Thursday, August 25th. The programme consisted of vocal and instrumental exercises, and also addresses by members of Concord Council, who were paying a fraternal visit. After the exercises, the members adjourned to the upper hall to indulge in a sumptuous repast.

Howard's Method of Artificial Respiration.

We think it advisable at this season, says the *Canadian Journal of Medical Science*, to direct attention to the following rules for resuscitating the partially drowned:

1. *Instantly* turn patient downward, with a large, firm roll of clothing under stomach and chest. Place one of his arms under his forehead, so as to keep his mouth off the ground. Press with all your weight two or three times, for four or five seconds each time, upon patient's back, so that the water is pressed out of lungs and stomach, and drains freely out of mouth. Then,

2. *Quickly* turn patient, face upward, with roll of clothing under back, just below shoulder blades, and make the head hang back as low as possible. Place patient's hands above his head. Kneel with patient's hips between your knees, and fix your elbows firmly against your hips. Now, grasping lower part of patient's naked chest, squeeze his two sides together, *gradually* forward with all your weight, for about three seconds, until your mouth is nearly over mouth of patient; then, with a push, *suddenly* jerk yourself back. Rest about three seconds; then begin again, repeating these bellows-blowing movements with perfect regularity, so that foul air may be pressed out and pure air be drawn into lungs, about eight or ten times a minute, for at least an hour, or until the patient breathes naturally.

List of U. S. Patents for Pacific Coast Inventors.

From Official Reports for the "Mining and Scientific Press," U. S. and Foreign Patent Agents.]

FOR THE WEEK ENDING AUGUST 23, 1881.

245,991.—FURNACE—Bell & Griffith, Grantville, Nev.
245,994.—PROJECTILE—H. Carr, S. F.
245,946.—DAMPER PLATE AND REFLECTOR—A. Good, S. F.
246,129.—MECHANISM FOR CONVERTING MOTION—Wm. Hanua, Gilroy, Cal.
246,157.—HEADER—M. N. Laufenburg, S. F.
246,003.—FILTER—Benno Goldman, S. F.
245,962.—FIRE BASKET FOR STOVES—W. H. Loomis, Alameda, Cal.
246,030.—SPRING ATTACHMENT FOR SAWS—E. Mioberg, Callahan's Ranch, Cal.
246,032.—MUD CONVEYER—W. A. Phillips, S. F.
246,210.—DEPRESSION PULLEY IN CABLE RAILROAD—H. Root, S. F.
246,051.—GALVANIC BELT—H. C. Warner, Gilroy, Cal.
246,271.—STOVE MAT FOR COFFEE POT, ETC.—Elizabeth C. Zumwalt, Port Orford, Or.

NOTE.—Copies of U. S. and Foreign Patents furnished by DEWEY & Co., in the shortest time possible (by telegraph or otherwise) at the lowest rates. All patent business for Pacific coast Inventors transacted with perfect security and in the shortest possible time.

Notices of Recent Patents.

Among the patents recently obtained through Dewey & Co.'s SCIENTIFIC PRESS American and Foreign Patent Agency, the following are worthy of special mention:

BROOM.—Geo. Hall, Santa Rosa. Dated August 30, 1881. No. 246,500. In that class of brooms in which the handle projects from the broomhead in a line with the length of the broomstraws, the angle at which the handle is held in sweeping brings only one corner of the brush portion of the broom into action, so that the corners of the broom soon become distorted and unevenly worn, and the broom is rendered unfit for use. The object of the invention is to adapt this class of brooms to the sweeping position by arranging the brush or sweeping end so that it will bear uniformly upon the floor along its whole length at the same time that the broom handle is held in the usual position. To do this, Mr. Hall counteracts the angular position of the handle by giving to the brush or sweeping edge a corresponding angle.

INSECT-PROOF CLOSET AND SAFE—Chas. H. Larrabee, Napa. Dated August 30, 1881. No. 246,397. This invention relates to an improvement in closets, meat safes, or other similar devices, whereby they may be kept from ants and other insects, and also thoroughly ventilated whenever necessary. It consists of a closet or safe, in combination with a supplemental hollow base which is adapted to contain water, the main closet being rigidly attached to the base by means of pillars or supports which stand upon the bottom of the concave base, so that the whole forms one structure, while the outer walls of the closet extend downward around the base without touching it, whereby the tank is concealed from view. The bottom, shelves and top are perforated, to allow a circulation of air and ventilation, and a hinged cover is fitted to close the top entirely when desired.

DREDGING MACHINE.—H. B. Angell, S. F. Dated Aug. 30, 1881. No. 246,362. This invention relates to the class of dredging machines, and more especially to certain improvements thereon, consisting in peculiarly constructed irons or nose pieces for receiving and strengthening the ladder timbers, the said timbers having bails attached thereto at certain intervals, provided with pulleys, over which passes the chain connected with the gipsy or windlass. A peculiar hopper is connected with the elbow of the discharge pipe by a swivel joint; said elbow being supported on a pivot pin on a step below, while the pipe is supported on a turn-table, and has a door or opening for the purpose of introducing water to clean it. The object of these improvements is to obviate certain difficulties to each part particularly.

CART.—DeWitt C. Putnam, Petaluma. Dated Aug. 30th, 1881. No. 246,555. This invention relates to that class of carts known as breaking carts and is an improvement on one invented by the same patentee some time since. The object of this invention is to provide a cart which shall embody lightness and strength and a convenient mode of access, these objects being accomplished by certain attachments which support a footboard in front, as in the former invention, and by the further improvement of said attachments and appropriate construction thereof, the inventor provides a means of supporting a suitable step behind, whereby the vehicle is adapted to be entered from the rear and may afford convenient access.

FIRST EDITION ISSUED 1874).

Naturalists, Scientists, Teachers, Students, and Navigators will find the work not only exceedingly desirable, but in a degree indispensable. ☞ It is the only publication of the kind, and should be in all School, Public, Club, and Private Libraries. Sold Wholesale and Retail by

DEWEY & CO.

Publishers of the MINING AND SCIENTIFIC PRESS, No. 202 Sansome St., San Francisco, Cal.

Agents Wanted.

THE ARLBERG TUNNEL.—The boring of the Arlberg tunnel is proceeding with great rapidity. The length finished since June, 1880, is 1,720 meters, and an average yearly advance of 2,160 meters is confidently expected after a while. The average of Mont Cenis and the St. Gothard was only 1,112 and 1,670 respectively. The St. Gothard tunnel will be completed by the end of September, but the lines of approach are not likely to be ready before next spring.

A SHIP CANAL across the peninsula of Maryland and Delaware, shortening the distance by water from Baltimore to the Atlantic, is an old project; but now it is to be speedily carried out, the necessary $8,000,000 having been raised.

IMPROVING CHARLESTON HARBOR.—Government engineers are at work endeavoring to improve the harbor of Charleston in the same manner as the mouth of the Mississippi was deepened—by jetties. This work is proceeding with commendable energy. On July 1st the foundation for the jetty on the north side of the harbor had been carried out 12,000 ft. from Sullivan's island, and during July about 600 ft. more were completed. Some 5,000 ft. must yet be added before the foundation of the north wing of the jetty is completed. The foundation of the south jetty has been run out 6,000 ft. from Morris island, and it must be extended 12,000 ft. farther. Capt. Green, who is in charge of the works, thinks it can be completed within 18 months. The jetties so far have made no appreciable changes in currents of the harbor or the depths of the water.

BEFORE criticizing a hotel clerk, remember that it is his business to form an opinion of you.

Traveling Agents.

We want several canvassing agents who will make it their business to solicit subscriptions and advertising for our first-class progressive newspapers. Men of ability and experience can secure good pay and permanent employment. Send references and state your past occupation, etc., to the publishers of this paper.

To Patrons and Business Men.

In the consolidation of the *Fraternal Record* with the PACIFIC STATES WATCHMAN we have added to our large list of subscribers those of the *Fraternal Record*, which will make the PACIFIC STATES WATCHMAN one of the most desirable papers for advertisers published in this State. Our circulation is general throughout the Pacific coast, a small circulation in many of the Eastern States and among all fraternal and beneficiary societies. As a family and fraternal paper, patronized by a select class of citizens, we offer a portion of our columns to the public, with our increased circulation, without any advance in rates.

Our Agents.

OUR FRIENDS can do much in aid of our paper and the cause of practical knowledge and science, by assisting Agents in their labors of canvassing, by lending their influence and encouraging favors. We intend to send none but worthy men.

G. W. MCGREW—Santa Clara county.
M P OWEN—Santa Cruz county.
J. W. A. WRIGHT—Merced, Tulare and Kern counties.
JARED C. HOAG—California.
B. W. CROWELL—Yuba and Sutter counties.
D. W. KELLEHER—San Mateo and Santa Clara counties.
C. E. WETMORE—Alameda county.

Attend to This.

Our subscribers will find the date they have paid to printed on the label of their paper. If it is not correct, or if the paper should ever come beyond the time desired, be sure to notify the publishers by letter or postal card. If we are not notified within a reasonable time we cannot be responsible for the errors or omission of agents.

Sewing Machines.

Several first-class styles, good as new, will be sold at a bargain. Call on, or address H. F. D., this office.

The Appetite of Bread.

Did you know that bread was not only eaten but eats? Darwin has told us that some flowers enjoy a porter-house steak. Now M. Scheurer Kestner assures us that bread has a partiality for hogs and hominy. This discovery is interesting to dyspeptics, for bread can be made to do the work of the alimentary canal and relieve dyspeptics of all bother except mere deglutition—and of course, paying the baker's bill, which is harder work than digestion. Science has since found that several vegetable juices or saps dissolve meat, but M. Scheurer Kestner is the first person who observed that in the process of bread making a peculiar fermentation takes place which produces complete digestion of meat. A beef steak hashed fine and mixed with dough containing yeast disappears entirely by the time the bread is taken from the oven. The steak's nutritive principles are dissolved and incorporated into the bread. Not the least curious phenomenon noticed in these circumstances is that meat, which so rapidly becomes putrid, when once incorporated into bread may be kept longer than ordinary bread. Bread made in 1873 has been shown the Academy of Science; it was as sweet and free from mold as when it came out of the oven.

At first M. Scheurer Kestner used raw meat; he mixed one and one-tenth pounds of flour, one pound of leaven and three-fourths of a pound of raw beef minced fine; water in sufficient quantity was added, and the dough was left to ferment. In two or three hours the meat had disappeared. The bread was then baked as usual. This meat bread had a disagreeable, sour taste. To remove it M. Scheurer Kestner first boiled the meat in just the quantity of water necessary to wet the flour and used this water in kneading. The meat should be rid of all fat, and only salt enough to season the bread added; for if too much salt be added the bread will become humid (salt being a great absorber of water) and spoil. The objection to this bread is that it is insipid. If bacon be used instead of beef the objection is removed. Veal, too, makes a delicious meat bread. All these breads may be used to make soup. Cut in slices one-sixth of a pound of this bread, put the slices in a quart of water, salt to taste and boil for 20 minutes.—*New Orleans Picayune.*

"O, LOOK Louis! Fred just sent me this sweet, little puppy. Wasn't he kind?" "Yes, dear, but it's just like him."

The Cause of Somnambulism.

Various theories have been put forth to account for the phenomenal state known as "somnambulism." A writer in the *Phrenological Journal* says that it is due to incomplete sleep. That in complete sleep the brain is in a quiescent state as a whole, but in somnambulism it is a sleep only in parts, and in other parts active or awake. Dr. W. A. Hammond, a medical writer of some note, says that somnambulism is "analogous to sleep." He says of a person asleep: "If this quiescent state of the brain is accompanied, as it often is with nervous and excitable persons, by an exalted condition of the spinal cord, we have the higher order of somnambulistic phenomena produced, such as walking or the performance of complex and apparently systematic movements," etc.

The *Journal* differs with the Doctor. He says that if the brain is at rest and the spinal cord active, it would be as if the brain of the person was entirely removed, so far as the actions performed are concerned. If the brain is removed, or what is equivalent, perfectly quiescent, there is nothing to cause action in the spinal cord, which is not self-acting.

The editor states his opinion of the cause of the phenomena substantially as follows: The brain, in somnambulism, is only a sleep *in part*—a portion of the brain is asleep and another portion is awake, and in a state of intense activity. From these excited portions of the brain the stimuli pass to the motor mechanism of the spinal cord, through which, in their turn, the muscles are set in action, which produce the motions and acts of the somnambulist.

Enough is known of the mechanism and working of the brain, especially in the singular peculiarities in its blood supply, to render it quite certain that the phenomenal condition referred to, of a partial quiescence of the brain, is a possible thing.

May we not also infer that all dreaming is due to the same cause. In perfect sleep there is no dreaming, no action of the muscles whatever.

OLD Sammy Snowden was a noted colored preacher in Boston 40 years ago. His discourses were original and amusing—his prayers especially so. One evening he concluded a prayer with: "Lord bress everybody, 'ception de brudder who put de jackass cent in de contribution box."

Deaths from Industrial Pursuits.

Some startling facts respecting the amount of sickness and death which result directly from the circumstances under which industrial pursuits are carried on, have lately been discovered in England, where they have been brought to the attention of the authorities as a subject worthy of investigation with the view of amelioration. One statistician who compiled tables on this subject in 1877, giving the records of deaths and injuries by steam boilers, in mines, on railways and in factories, estimated the mortality in England from these causes, during the four years preceding 1877, at a total of 107,000 men, women and children; and he estimated, on the basis of these facts, that 500,000 workmen will lose their lives during the ten years from 1877 to 1886, from the following causes, namely, 300,000 in mines, 70,000 on railways, and 130,000 in factories.

Another writer on the same subject, criticising these figures, thinks they are altogether too small, and that the accidents reported comprise only a small part of those that actually take place. He is of opinion that not less than 100,000 persons are annually killed in England from causes directly resulting from the industrial occupations in which they are engaged.

These statements, which are doubtless based on reasonably accurate data, are sufficiently appalling to arouse from its traditional *sang froid* even so inert and conservative a body as the British House of Lords. Taking even the lowest estimate of mortality from industrial accidents as the safest basis for estimating the number of yearly deaths from such causes the world over, and it will be found that the "horrors" of war, with its reckless sacrifice of human lives, become far less horrible when a comparison of the number of victims is instituted.

PERHAPS it is the powder of the fair maidens cheeks that blasts the hopes of so many young men.

Anna Dickinson Speaks.

The Woman's Christian Temperance Union was in session, and Mrs. Hunt of Boston had answered one of the queries taken from what is known as the "inquiry box." The question was, "What can be done to reclaim fallen women?" On the temperance side of the question, Mrs. Hunt took the ground that women have less power of physical recuperation than men, and when they fall, in many cases, fall beyond reclamation. The remarks all the morning had been unfavorable to the ability or expediency of women reforming other women. Miss Dickinson, who was in the audience, arose and took up the subject in a masterly manner. It was soon whispered about who the speaker was, and she carried the audience with her from the first. "I am not a temperance advocate," she said, "but I can tell you that woman's proper work is with her sisters, and not with men. You fail where you can do the most. The woman who has nothing to do, the giddy, fashionable creature who learns to tipple with refinement; the woman who has too much to do, your laundress—who does a day's work getting her husband's breakfast and attending to her chil, dren before she comes in the morning—these- as well as the woman who drinks to drown despair, are the ones who need, but do not receive, your ministrations. You raise the man, but you spurn your fellow woman beneath your feet."

PROFESSOR STEVENSON, of the Smithsonian Institute, is organizing at Fort Wingate, his geological and surveying party. The Professor's work for the present will be the establishment of a base line 12 miles in length, to be used in triangulation. A number of naturalists and special scientists are included in the party, and they will explore the western part of New Mexico and the eastern part of Arizona.

The "Packsaddle."

The view upon this page represents a locality somewhat celebrated in days of primitive travel. It is situated upon what was then, and is now, one of the favorite routes to the central West, being very much the same that is now followed by the Pennsylvania railroad; in those days, however, the iron horse had not yet made his advent, and water was the means of transit. Leaving the valley of the Susquehanna, the traveler journeyed slowly and laboriously up the Juniata—first by keel-boat or canoe, afterward by canal boat—until its headwaters were reached. Here there was a portage of 20 or 30 miles across the Alleghany mountain summit to the waters of the Conemaugh, a bright little mountain stream which empties into the Alleghany some 30 miles above the junction of that river with the Ohio. Upon this Conemaugh river is situated the "Packsaddle," represented in our engraving. This was a point where the plucky little river, having forced its way through one of the outlying ranges of the great Alleghany chain, tossed and foamed down through the gorge it had made in a style that forbade all attempts to pass it with any save the lightest of crafts. Keel-boats and, later on, canal boats, coming either way, were compelled to stop and unload their freight on to the backs of mules or horses, and in this way it was carried on a well-beaten trail over the steep mountains, past the obstruction to the clear water on the other side. This was the origin of the name "the Packsaddle," which still clings to the locality, though the railroad has long since done away with the old water-travel, and an old-fashioned packsaddle would now be looked on in the neighborhood as a curiosity.

THE "PACKSADDLE," CONEMAUGH RIVER, PENNSYLVANIA.

The view will call to the minds of many of our readers similar ones among our own mountains, and probably scenes grander in proportions and more rugged in outline. It would be difficult, however, to find in California, such heavy and varied forest growths and such dense and closely matted underbrush as covers these Pennsylvania hills. The length of the Packsaddle gorge is some six or seven miles; the hight of the mountains (Chestnut ridge) through which the river has forced its way, is from 700 to 900 ft. above the river, but the sides are exceedingly rough and precipitous, and with the river roaring and foaming over the rocks in its bed below, a picture is formed that has few equals in the East for wildness and picturesque beauty.

An Example for Young Men.

The life of the late President of the United States, James Abram Garfield, stands out prominently as a shining example to all young men, no matter what may be their condition. It strikingly illustrates that the accident of humble birth is no bar to advancement, and that what may seem to be insuperable obstacles to win recognition and gain the plaudits of the world, can be overcome by a persistent and intelligent endeavor to gain the end sought for. Here we have a poor, humble boy, whose early youth was spent in the backwoods of America. He was then without friends, and had no counselors except the fond mother who watched over him and guided his immature years in the path of sobriety and honor. But the unconquerable desire to win distinction early took possession of him, and from the log cabin of that pioneer Western home has come a man who stood preeminently on an equal plane with the most intelligent of the land.

It must not be thought that the ability to worthily occupy the positions held by our late lamented President, was acquired without an effort. Of course, he must have been greatly endowed with a large amount of natural talent, and so have a great many young men who are frittering away their lives in the pursuit of what they call a "good time." It might never fall to their lot to occupy the positions held by President Garfield, but they can surely benefit their condition in life by an earnest endeavor to strive to gain all the knowledge possible. Knowledge is never lost. There comes a time in the lives of men when the learning they have gained will stand them in good need. This is the "luck" which we hear so much about. The opportunity came for advancement, and it found them in a measure prepared to embrace it.

It needs such a life as Garfield's to bring before the minds of our young men the honors that lie before them if they are only possessed of that ambition which seeks to win recognition by making themselves worthy of it. It may seem a toilsome journey; the briers that beset the path may be sharp and stick with merciless severity he who chooses to win distinction or occupy a position of honor among men. It must necessarily be so, but out of the crucible of trial and privation will come a man who will be an honor to himself and a credit to his country.

THE tribute of the fraternal societies of this city to the memory of the murdered President was spontaneous and hearty. No body of men in the procession attracted more attention, and none, we believe, had a more tender regard for him. This was evidenced by the large numbers who availed themselves of the opportunity to show their respect to the purity and nobility of his character. If it was possible for the late President to witness this grand outpouring of the members of the fraternal societies in his honor, we are confident no one feature of the procession would have given him more joy.

The Solar and Fraternal Systems.

How few of the many thousands belonging to the different fraternal societies ever think for a moment of the existing similarity between the solar system and that of the fraternal. In the solar system we have the sun, that grand old orb, daily and hourly performing his mission in behalf of all animated beings, giving light, warmth and comfort alike to all. Around him revolve the lesser planets, held in abeyance by the power of his attraction, each receiving from him their light, beauty and action.

Thus, with our fraternal system, we have in the center the embodiment of all that is grand and noble; the principles of fraternal love and fellowship performing their tender mission of charity alike to all who come within the power of their munificent embrace. Around them revolves many a noble Order, imbued with kindly purposes and blessed in the performance of noble deeds, each receiving light, warmth and encouragement in their different spheres of action. Prominent among them all stand out the noble Orders of the Eastern Star, Rebeccas, and the young but prosperous Degree of Honor, whose influences are daily and hourly felt by all who need their kindly aid. Many a weary mind has been inspired, many a sinking heart sustained, many a ray of light and comfort have found their way to the bedside of the sick and sorrowful through their gentle influences.

May prosperity crown their noble mission, and finally, when their labors are ended, receive their merited reward; for with woman lending her influence to the furtherance of so good and holy a cause, there can be no question of the final triumph of the duties upon which those societies are engaged.

IF a fraternal society on the insurance basis should cease to exist one year from its birth, or one year from the time any one of its members join the organization, would the member or members of said society suffer any financial loss? We think not. Suppose one should insure his house for one year, what does he do this for? The answer comes, why, if my house burns down, I will receive the amount of insurance placed upon it. But supposing it don't burn down, is not the insured out the premium he paid? Yes, certainly; but the premium paid for one year protects him, inasmuch as if he should be burned out, he will receive the amount for which he was insured. So with fraternal beneficial societies. A person, in joining one of them, pays the initiation fee and other charges, so that if, in case he should die, his family will receive the amount for which he is protected. Every month the accounts are balanced. If he should die within that month, his family will receive the amount of his certificate. If he should live and pays his assessment, he is safe for the next month, and so on.

Home Miscellany.

The Assassination.

Veil, now, O Liberty thy blushing face.
At the fell deed that thrills a startled world;
When fair Columbia weeps in dire disgrace.
And bows in sorrow o'er the banner furled.

No graceless tyrant falls by vengeance here,
Neath the wild justice of the secret knife;
Nor red Ambition ends its grim career,
And expiates its horrors with its life.

Not here does rash Revenge misguided burn
To free a nation from the assassin's dart;
Or roused Despair in angry madness turn,
And tear its freedom from the despot's heart.

But where blest Liberty so widely reigns,
And Peace and Plenty make a smiling land;
Here the mad wretch its fair, white record stains,
And blurs its beauties with a "bloody hand."

Here the elect of millions, and the pride
Of those who own his mild and peaceful rule—
Here Virtue sinks and yields the crimson tide
Beneath the vile unreason of a fool.

The End.

A wasp flew out upon our fairest son
And stung him to the quick with poisoned shaft;
The while he chatted carelessly and laughed,
And knew not of the fateful mischief done.

And so, this life, amid our love begun,
Envenomed by the insect's hellish craft,
Was drunk by Death, in one long feverish draft,
And he was lost, our precious, priceless one.

Oh! mystery of blind, remorseless fate!
Oh! cruel end of a most causeless hate!
That life so mean should murder life so great!'
What is there left to us who think and feel,
Who have no remedy and no appeal,
But to damn the wasp and crush him under heel?

—*J. G. Holland.*

The Recompense that Returns.

"I have come to ask your advice, Annie," said Mary Carter, entering her sister's small bed-room, "but first let me warm my frozen fingers, for the afternoon is fearfully cold."

She threw her snow-dusted cloak on the only vacant chair, and tossed her black hat on the bed; she coiled up at Annie's feet in front of the meager register.

"Well, darling, what is the trouble now?" and the elder sister looked down at the fair young face and at the sweet eyes so wistful and sad.

The two girls were orphans, and were toiling in the respectable harness of—teaching. Theirs was the only, the oft-repeated story of New York life. The father had failed, and had not strength to rally again, so the frail, gentle mother soon followed her husband to the rest where the weary are sleeping. A rich relative had educated the girls that they might be independent, and, therefore, now they are battling and struggling in the great city, whose God is gold! Annie, the elder by two summers, was a gentle-eyed girl of 22 years, one of those calm, self-relying natures that rise in all the strength of the old martyrs when circumstances so require; a heroine born, that storms only strengthen, misfortunes make grand; with a pure, classic face—a face that men gaze on more in admiration and respect than passionate love; and she strove and suffered as resident English governess in one of the large fashionable schools of the city, while the younger, the impulsive, sensitive Mary, was teaching Mrs. Vale's four children in a beautiful home on the avenue.

On Thursday Mrs. Vale had issued cards for a grand ball the following week, and to Annie's advice in reference to this ball the young girl had braved the driving November storm.

"And now, Annie, help me to decide, for although Mrs. Vale is exceedingly kind to me, even urging my presence on the plea of friendship, yet all that is soundly practical in my nature counsels me to come here, stay with you till 10, at which hour your 'retreat' is sounded, and then creep quietly back into my own little room and read till sheer weariness sends me to bed."

"Would it not be better, darling, for you to please Mrs. Vale?"

"Better, Annie?" and her eyes flashed, "better to feel the pangs of a position to which I have not been born? True, Mrs. Vale is a considerate woman, and would shield me if she could; but will her guests regard this protection? I know the women better! 'Who is that?' will some jeweled shoddy exclaim, and how can the question be answered? I am neither Mrs. Vale's relative nor guest, but—the governess of Mrs. Vale's children."

Her voice trembled, and her eyes were full of tears.

"No, Annie," she continued, "I have no place in society, and it is safer not to risk attack.

Annie felt the truth of her sister's logic, yet she knew that it was wiser for Mary to accept Mrs. Vale's invitation. No kind shelter awaited the orphans, for self-reliance was a hard necessity forced upon them, and it was braver to meet life's shares than to shrink, and shrinking, lose a good home. The elder sister also felt a pardonable pride in the rare beauty before her, so she tried to sooth the sensitive spirit, and wayward, haughty nature. And in truth Mary Carter was gifted with the "fatal gift," for if the mere accident of birth leaves its impress, she as thoroughly illustrated that birth as any of the patrician beauties of the old days of Rome. Light golden waves of hair, that the poets love, shaded her low Greek forehead, and beneath her proudly-arched brows shone dark, changeful hazel eyes—eyes that gleam with passion or glance tenderly soft, as a cooing dove; then a lithe, graceful, expressive figure, with a walk even characteristic, and you felt, when you looked upon her, that mere circumstance could not locate her, but that she belonged where she was born—among the daintiest of the land. A woman to be sheltered and cared for, not to struggle and suffer.

Annie's argument prevailed, and on the night of the ball, Mary Carter walked into the brilliant rooms with Mrs. Vale, and not even in that lovely gathering was one fairer than the young girl standing at Mrs. Vale's side.

Only a simple dress of tulle fell in a cloud mist around her, and a wreath of lilies bound her shining hair. Excitement deepened the color of her cheeks, and her eyes were luminous with the light that only such eyes ever give forth.

"My friend, Miss Carter."

How Mary's heart beat as Mrs. Vale introduced her. The inherited pride was undiminished; and although she felt that her position was honorable, yet she knew that society gave her no status.

But Helmsmuller's lovely music was sounding, and youth, with its keen relish of pleasure, cannot always feel the shackles of circumstances, so Mary forgot her nervous fears, and enjoyed every moment till—well, it was near the close of the evening. The beautiful Faust lanciers was echoing, and the third figure, so trying to a woman's grace, was begun. Mary Carter's vis-a-vis was a handsome, showy woman, flashing with diamonds, and, in the intervals of the dance, conversing with a tall, distinguished gentleman, who stood carelessly leaning against a pedestal near by. With the eye of a connoisseur he swept the crowded rooms, and rested it on the slight figure opposite.

"Saving your fairest self, Mrs. Edelbert, I would determine the young lady facing us the most beautiful in the room. Watch her movements and that graceful courtesy; in that simple inclination is the test of the breeding, which the exquisite feature substantiate."

"You are for once mistaken, Mr. Hardinge, for that is only Mrs. Vale's governess."

It was the second forward, the forward when the ladies courtesy, and just when the music sways for the low inclination, and when the cold, hard words fell distinctly, "only Mrs. Vale's governess." For one single instant the young girl faltered—for one second, as she afterwards said, her eyes were blind, her brain reeled. But true to its old source, the haughty blood rose to her rescue, and with a lady's flash, a fleeting look of ineffable scorn, she met Mrs. Edelbert's gaze until the woman quailed, then, as a queen, Mary Carter rose and glided back to her partner.

And John Hardinge saw it all and felt for the young fawn, so cruelly wounded, shrinking, quivering, yet with all the spirit of the rampant lion.

The man felt his heart beat quickly, and his pulses thrilled at the insult thus ruthlessly given; so he coldly looked at Mrs. Edelbert and walked away.

It was Sunday after the party, just at the soft hour when the twilight shadows the day, and on the warm curtains the fire gleams danced in weird fitfulness; the gas was not yet lit, and through the dimness floated the wailing notes of a sweer contralto. What a world of tender pathos in the tones as they appealed:

Flee as a bird to the mountain,
Ye who are weary of sin.

And she sang on, with a low sob in her voice, as though her heart echoed every note of the music. Her face was very pale, and her eyes rested on Raphael's Madonna. The children were very fond of Mary Carter, and they were kneeling and leaning near, perfectly calmed by the sweet, sad strain, when noiselessly the heavy curtain parted and Mrs. Vale walked in with her brother, John Hardinge.

"Mary, here is my brother, John Hardinge, of whom you have heard me speak so often; and this, John, is my friend, Miss Carter."

The poor child's thoughts were wandering to Thursday evening, when she had rested upon those very words, with such crushing results; therefore her bow was very cold, and her voice trembled as a few minutes after she arose, and, excusing herself, retired from the music-room.

The arrow was quivering still, and the poison was absorbing the heart's vitality—its trust in human nature.

A shade of disappointment clouded John Hardinge's face as the last fold of her trailing black dress disappeared from the heavy curtain, and then he told Mrs. Vale of what had happened.

She was a kind, gentle lady, and her heart sorrowed for the desolate young orphan.

Mr. Hardinge often strolled in at the "children's hour," and the little ones were really as lovely as the celebrated group known as Longfellow's children.

Always in the music-room he found Mary; for never since the night of the ball had she appeared in the parlor. Society had only stamped the impress which her own heart had warned her of, and she felt that as a governess she was unrecognizable. And so the buoyant, haughty spirit forced itself into the shackles, and the young heart fed upon its life for food.

But John Hardinge was no longer a young man; therefore he was not easily daunted, nor was he a neophyte to be discouraged by a girl's coldness. The heart that was unimpressed by the sun of forty summers at last felt the trembling of germination, and the realization came with untold strength and power; so the strong man yearned to fold within his protecting care the delicate blossom so tossed by life's storm.

Proud and shrinking, she seldom allowed herself to be talked to; but music was her greatest passion, and she quite forgot her life and position when Mr. Hardinge's pleasant visits came to brighten her winter days.

He was a cultivated, courtly gentleman, whose wealth made him sought after in the great marriage market; and mammas were especially suave and daughters very docile when Mr. Hardinge vouchsafed attention. But men in society; they weary of rote and routine, and tire of reproduction from the one unvarying and unvaried type, a pretty, expensive doll. Therefore they are more often attracted by the species *sui generis*, afforded without a grand whirl; and so the marriages of such men are disappointing and startling to the expectant battalions.

Madge was the youngest and fairest of the Vale household; a winsome little fairy of six summers; but fever flushed her soft cheeks, and her blue eyes were bright with that dangerous light which makes the heart of her mother throb hard within her bosom, for she feels instinctively that the Reaper is near.

Eight days and nights Mary Carter attended the child, for the faint voice always sounded her name, and the little arms ever sought her breast to nestle on.

But the fiat had gone forth, and Mrs. Vale saw the little one pass from her; saw the violet eyes close on Mary's bosom; heard the baby twice plead for Mary's hymn, and while the low music sounded Mrs. Vale fainted by her dead child.

Then the beautiful strength of the young girl developed, and her tender words of comfort called back the mother's faith. A woman's religion is never more lovely than when clouds and shadows darken; then she clings closer to the cross, her "rock of ages," and her words of trust and comfort seem almost inspiration. And Mr. Hardinge watched the slight figure as it softly glided to and fro on its errands of love in the house of sorrow.

* * * * * * * *

The little one had been laid to rest beneath one of the willows of the Trinity Cemetery, and the household seemed under a spell—the weight of the first great grief. Mrs. Vale was in her darkened chamber, the children in the nursery, and Mary sat in the low bay window of the library. Her face was very pale, for long watching had exhausted her. Mr. Vale had told her in the morning of his intention of sailing for Europe next month, and had placed a check for a handsome amount in her hands.

This Mary at once returned. There was a flush of the old pride warming her cheek when she wrote the simple lines enclosing the check to Mr. Vale:

I should be false to my name did I receive pay for any service it has only been my pleasure to render. The salary agreed upon is only one-fourth the sum returned. This I shall be glad to receive. MARY CARTER.

And now she was thinking of her future, she felt that she must find another home, though no one could shrink more from intercourse with strangers. There were many Mrs. Endelberts in the great world, and a governess was only considered a person to control and instruct unmanageable children; not a woman with the heart and soul of a woman, but a piece of household furniture, to occupy its own special place, and nothing more.

And so the rough tide surged on, and two burning tears blinded her eyes as these hard realities formed the picture of her life to come.

Her intercourse with Mrs. Vale had always been pleasant, and Mr. Hardinge's visits had become more of an anticipation than she cared to acknowledge. Now fate would drift her away and her very name would be forgotten.

Why had she met these kind people? and why Mr. Hardinge—

"Mary," sounded a well-known voice, and she looked up to meet the very face she had been dreaming of. "I have come to tell you a little story. Have you time to give me a half-hour's patience?"

She could not speak then for her heart was full—full of the sorrow that knows no utterance. He drew up one of the old gothic chairs close to her low seat and commenced:

"A very long time ago, Mary, my father died and left my mother with two little children and not a dollar to support them. We were comparative strangers in New York, and I was then a boy, only fourteen, and still attending a school.

"I shall never forget the dreary November afternoon on which my father's corpse was borne from the house. My mother's grief maddened me, and on my knees beside her, I promised to take care of her.

"I wandered out the next day with a boy's determination, but with a boy's faint heart. In twenty stores I offered myself and was twenty times refused. Work was what I wanted—labor, honest labor, and money for my toil. At last, footsore and pinched with cold, I nerved myself for my last attempt, and walked into the office of one of our merchant princes.

"There was a gentleman writing at one of the desks who was pointed out to me as the only partner in. He was just finishing a letter, and looked up as I paused before him.

"My appearance seemed to please him, for I was neatly dressed, and he spoke with some surprise as he answered my request.

"'You have an honest face, my lad,' he said, in conclusion, 'and I will see what can be done for you.'

"The words were few and simple; but I afterward learned that he never promised without fulfillment.

"I saw him next day, and he gave me employment—not only employment, but he saw my mother, and for years, through his kindness, we were saved from want.

"Then a great crash came. My kind friend died, and we heard that his family had left New York.

"Fortune smiled upon me and I became rich; but one sorrow weighed upon my heart, the family of my benefactor had escaped me. What if they were now suffering?

"I came back to New York last autumn, and as soon as I saw you I felt the haunting resemblance to a face that had somewhere crossed me. Your name at once struck the old chord, and I found to my surprise that you were the daughter of Thomas Carter.

"And so, darling, I wish you to help me lighten the debt I owe your father.

"I have to-day purchased a lovely home which I wish your taste to furnish, and if you will condescend to be an old man's pet I will promise," he added, smiling, "to submit to the rule of a very wayward woman."

She could not answer him then, for her tears fell rapidly, and the first words that pride urged were, "I am too poor for a rich man's wife."

But he kissed the tears away, and told her to consult Annie about it all. And so when the calm, practical sister heard the story, she soothed the little one as on the day preceding the ball, and the quiet, blue eyes looked up in Mr. Hardinge's face as she replied:

"The bread cast upon the waters has returned in many days."

And the house in—street received its beautiful mistress, and Annie Carter loved to watch her darling dispensing the noble charities which her husband's wealth allowed.

"You are right, Mary," he would always say, for you have taught me how precious is the recompense that returns."

COUNTRY GIRLS.—Meta Victoria Fuller, in a sisterly way, thus talks to country girls: "The farmers' daughters are soon to be the life as well as the pride of this country—a glorious race of women which no other land can show. I seek not to flatter them, for before they can become this they will have to make an earnest effort of one or two things. There are some who deprecate their condition, and some who have false pride in it, because they demand more consideration than they merit. A want of intelligence upon all of the subjects of the day, and of a refined education, is no more excusable in a country than in a town-bred girl, in these days of many books and newspapers. Many girls are discouraged because they cannot be sent away from home to boarding schools; but men of superior minds and knowledge of the world would rather have for wives women well and properly educated at home. And this education can be had wherever the desire is not wanting. A taste for reading does wonders, and an earnest thirst after knowledge is almost certain to obtain a sweet draught from the 'Pierian Spring.' There is a farmer's daughter in this very room in which I am writing—a beautiful, refined and intelligent woman—in whose girlhood books were not so plentiful as now, and who obtained her fine education under difficulties which would have discouraged any but one who had a true love for study."

THE CHILDREN'S BATH HOUSE.—A Kansas correspondent of an Eastern exchange writes: The children have made a very simple, convenient bath house, and cheap enough for everybody to have one. They took a store box about 6 ft. long and 4 ft. wide, and about 3 ft. high. To the top of this they nailed pieces of board to make it about 6 ft. high, and around the posts or boards they stretched old carpet and blankets with carpet over the top also. This makes a nice little room into which they can set a large tub and then have room enough to dress in the other end. One end is not closed up with carpet, but is boarded up about 3 ft; this is where they put in the tub and water and where they step into the room. The whole thing is movable and can be pushed around the yard, so as not to be long enough in one place to cause an odor from the waste water. The bottom of the box is the floor, and it is a nice clean place in which to bathe. The children draw a tub of water every morning, and let it set in the sun till nearly noon or afternoon; then they take turns in bathing, and sometimes the boys play an hour in it. But the girls like it quite as well, and every day they make their ablutions. Little three-year-old Fred enjoys it ever so much, and one-year-old cousin Robbie, who lives near us, cries to take a bath whenever he see the house.

IT IS a curious scientific fact that women are rarely afflicted with color-blindness; even in families where the defect has been transmitted and the men of the family are all more or less color-blind, the females are exempt. An attempt has been made to explain this on the grounds that the occupations of women, their attention to dress and to various handiworks where color enters as an important element, seem to have brought their sense for color to a higher degree of perfection than is the case with men, who usually neglect cultivation in this direction.

THE traffic in eggs in this country is estimated to aggregate $180,000,000. Hens our prosperity.

For our Boys and Girls.

Our Puzzle Box.

Numerical Enigma.

I am composed of 16 letters.
My 9, 5, 10 is distant.
My 4, 15, 6 is a nickname.
My 1, 7, 3 is a receptacle for grain and bulky commodities.
My 10, 5, 3, 13 is relative position.
My 6, 11, 10 is to injure or deface.
My 14, 7, 2 is a falsehood.
My 1, 5, 8 is a malediction
My 14, 7, 16, 2 is a small cord.
My 12 is found in all continental countries.
My whole was an eminent philosopher and sage who existed in the 18th century.

CLAUDE REVERE.

Hidden Animals.

1. 'I say, Rube, are you coming to see me to-night."
2. If I were in your place I would go at once.
3. The damage done by that cat amounted to $5.00
4. While they were trying to decide with regard to the colors, pink or buff, a low cry was heard.
5. Please show me how; let me try it once.
6. You shirking numbskull, come here.
6. 'Sahib, excuse my rashness," pleaded the faithful fellow.

JERRY.

Cross-word Enigma.

My first is in strap, but not in string;
My second is in song, but not in sing;
My third is in skill, but not in tact;
My fourth is in move, but not in act;
My fifth is in place, but not in room;
My sixth is in fate, but not in doom;
My seventh is in salute, but not in hail;
My eighth is in cover, but not in veil;
My whole is a tree resembling palms,
Which never grows on northern farms.

A. B. C.

American Towns.

1. An article of food.
2. Indispensable to sailors, a kind of meat.
3. A wild animal, an enclosure of land.
4. A color, ground.
5. In the middle, a port of refuge.

JOE.

Curtailments.

1. Curtail upright and leave sharpens; again, and leave to sharpen; again, and leave a little; again, and leave an exclamation.
2. Curtail a woman and leave a boy; again, and leave a musical note.
3. Curtail desire and leave to jump; again, and leave an exclamation.
4. Curtail part of a house and leave part of the body; again, and leave to listen.

CHARLES.

Answers to Last Puzzles.

NUMERICAL ENIGMA.—"Cast thy bread upon the waters, for thou shalt find it after many days."
CROSS-WORD ENIGMA.—William Shakspeare.
CURTAILMENTS.—1. Shed, she. 2. Barn, bar. 3. Wet, we. 4. Seek, see. 5. Kind, kin.
CHARADE.—Connecticut (I-cut-connect).
PROBLEM.—Twelve.

Dick's Journey.

As most children are aware, Cleveland is a city in Ohio, and Cape May is a watering-place at the very point of New Jersey's great toe. In the early part of this month of August two lads, whose homes are in Cleveland, were at Cape May together, but one of them was obliged to return with his father in order to get ready for school. Phil was the boy who took the train westward bound, and Harry was the lad who stood on the depot platform at Cape May and shouted: "Good-bye; don't forget Dick!"

"Dick" was not a boy, but a bird—as pretty a pigeon as ever was. His cote was at the Cape, and there also were his wife and children. Phil gave him some crumbs and carefully stowed the cage away under the car seat. All that night and the next day Phil and his pigeon traveled westward, coming finally to Phil's house in Cleveland. That evening Phil wrote the following in very small words on a tiny bit of tissue paper:

"Home safe. Tom's busted the cover off his ball and Prof. Jenkins got throwed of'n his horse and is laid up with a broken leg. All well. Your ma says you ought to come with us. Both of my pups can see, and Susie's cat's got kittens. Burglars got into your pa's house and stole everything. Good-by. PHIL."

Early the next morning Phil tied the note to Dick's neck, wrapping silk about it securely, and let Dick out of his cage. Dick flew up above the houses and went round in a circle. Then he mounted still higher and made another circle, and all at once darted in a straight line toward the southeast. Why he took that direction Dick didn't know himself. He felt it in him that he was right and nothing could have induced him to change his course. Phil couldn't see the sun when he let Dick go, but as soon as the bird got a few hundred feet above the treetops he caught a glimpse of the sun's round rim, just rising far to the east. Dick made up his mind to see his wife and children before night. He gave the air strong strokes and before Phil could count a hundred was out of sight. Dick saw houses and trees and fields below him, and a dark gray mist shrouded the earth, but he kept on. As the red rays of the sun shone upon his body he looked to other birds like a darting thing of light. A crow with a "hawk- hawk" flew across his path, a bee-bird tried to head him off and a flock of swift-winged swallows joined in the race, but not an inch from his air-line did Dick swerve. Soon away to the south he saw great clouds of smoke rising from Pittsburg and just ahead of him was a blue line of mountains. Dick wanted a drink of water very badly. The sun began to burn. The air was still and hot and only in cleaving it like an arrow could Dick gain a bit of comfort. On he flew, over the smoky oil country, into the blue of the high hills, and thus he passed many towns looking like blocks of toy houses far below. An eagle sat at the top of a dead hemlock on the summit of one of the Alleghanies and when Dick swept by the eagle shrieked at him and gave chase. Dick put on more speed. His wings cut the air so quickly that they looked as though they were standing still and long before the brave bird came to the Susquehanna he had left the old pirate of the mountains behind.

Dick heard the steam whistles harshly telling of noon. The sun was above, and the poor fellow was becoming tired, but he didn't want to drop down to earth to rest. Flying swiftly on for two hours more, he saw an object floating directly in his path. He saw with his quick eyes that it wasn't a live object, and so approaching he perched upon its peak. And what do the children think it was? A little balloon, no more or less! It was about the size of a bushel basket, and below hung a small car in which was a 'cute little doll. Whence did it come? Dick didn't know, nor did he care. He hopped down into the car, and was overjoyed to see a bit of bread that had been put there, no doubt, for the use of Miss Dollie. Dick he'ped himself to crumbs, blinked at the sun as if to say, "I've rested two minutes, at least," and then darted away on his journey. Broad fields were below him and the skies were blue, but off to the north the air look hazy, and from that direction came low mutterings of thunder. It was sunset, and the storm was rolling rapidly down. Would the whistling wind stop him? It was a race between the great clouds and the little bird, but Dick was brave, and he wanted to see his children before dark. The clouds, black, angry and full of noise, swept along. Dick flew higher and higher. Drops began to fall and Dick caught them upon his thirsty tongue. Lightning ran fleet-footed beneath him, but the bird's eyes were keen, and soon he found himself above the very top most point of the storm. Up there the air was still. As Dick passed over Philadelphia a great black curtain hung around the city, but he could hear a humming noise below. Not a moment did Dick stop to listen. To the south he saw in the twilight a great stretch of water. The moon came up out of the sea to the east. On Dick dashed until, with a soft coo, he put his head in at the door of his cote and kissed his children one by one.

I SAID to my little girl one day: "What a large forehead you have got. It is just like your father's. You could drive a pony carriage round it." To which her brother, five years old, said: "Yes, mamma; but on papa's you can see the marks of the wheels."

Household Hints

PAN-DOWDY.—Core, pare and quarter enough tart, juicy apples to fill a deep earthen baking-pan. Make a crust. Butter your baking-pan well. For a three-quart pan take a teacup of brown sugar, mix with it two teaspoonfuls of cinnamon, half a teaspoonful of clove, and a saltspoonful of allspice, with a pinch of mace. Mix all with a teacupful of molasses. Put the apples into the pan, scattering in a few bits of butter, and stir in the molasses and sugar. Roll your crust out into a thick round that will cover the pan, fit it over closely, put into a quite moderate oven, and keep a moderate, steady fire. Bake as long as you can without spoiling the crust. When done, take off the crust, break it up in small pieces, and mix it with the hot baked apple. Set all away to grow quite cold.

TROUT COOKING.—The trout is a peculiar fish; it requires great nicety in cooking or its flavor is lost. The flavor of the brook trout is exceedingly delicate and must be dealt with in a gentle manner. Brook trout should never be placed in boiling water, but over steam; boiling it in water soddens it and takes away its flavor. When steaming it put into the water some peppercorns and a very little salt. A second way of cooking trout is to melt a piece of fresh butter, stir into it some water, and place the trout in it, adding peppercorns and a little salt. Place round several slices of lemon and cover up very close. Stew like this 20 minutes. Take out and strain the gravy over the trout.—*Food and Health.*

FIG CAKE.—Here is a recipe for a fig cake which is nice enough for a wedding: Take two cups of white sugar, rolled very fine, one cup of butter; beat the butter and sugar to a cream; one-half cup of sweet milk and the whites of seven eggs beaten to a stiff froth; then add three and a half cups of flour prepared with baking powder; stir the cake well and bake in layers. For the filling, take one pound of figs, chop them fine, and cook until soft and smooth with a teacupful of water and half a cup of sugar. This filling should be prepared before the cake is baked and spread between the layers. Then cover the whole cake with icing.

COFFEE SYRUP.—Take half a pound of the best ground coffee, put it into a saucepan containing three pints of water, and boil it down to one pint; boil the liquor, put it into another saucepan, well scoured, and boil it again. As it boils add white sugar enough to give it the consistency of syrup; take it from the fire, and when it is cool, put into a bottle and seal. When traveling, if you wish for a cup of good coffee, put two teaspoons of the syrup in an ordinary cup and pour boiling water upon it, and it is ready for use.—*Caterer.*

Health Column.

Laws for Hair.

The general law for the care of the hair is cleanliness. But this essential condition is not always to be brought about by the same methods. In some cases the scalp and the hair itself require washing as often as once every month; in other instances, once in three months is sufficient. When the hair is in a healthful condition the glands at the roots are strong and vigorous and supply a natural oil. These glands often become obstructed or weak in their action, and finally dead. So long as they are inactive through obstruction or weakness, the hair may be restored, but when they are actually dead, and the scalp assumes a shining appearance, nothing will remedy it. Baldness may be prevented; it cannot be cured.

The obstructions are to be removed first by thoroughly washing or shampooing the head. This is to be done by using water and castile soap as warm as it can comfortably be applied. It must then be thoroughly rinsed. Three or four rinsings with tepid water are not too much. After this cleaning the hair for a day or two is apt to be harsh and dry. Special attention should then be given to rubbing and brushing the scalp. One of the most effectual methods to keep the glands in good working order and to bring out the oil, is to rub the head gently (either night or morning, when you have the most time to devote to its care) with the balls of the fingers. In this way the hair is not only separated, and the air allowed to pass through it, thus drying it from an unpleasant moisture, but the pressure upon the secretions of oil causes activity and brings it to the surface.

The hair should be thoroughly brushed every night or morning with a brush of good stiff English bristles. Wire brushes irritate the scalp and are very detrimental. For the same reason fine-tooth combs should not be used. It should always be remembered that while friction is necessary, irritation is to be avoided. Excessive irritation will itself produce dandruff, the most common of the scalp diseases, and often the forerunner of those of more serious nature. In cases where the dandruff is excessive, and of a dry, scaly nature, the scalp should often be washed, and always carefully. But even in such instances the hair itself requires occasional washings to cleanse it from dust. In such instances it is necessary to apply some safe and reliable wash, which should be free from oil. After the dandruff is removed, proper care and attention will promote luxuriant growth, and where there is not actual baldness, will restore natural vigor.

In order to keep the hair healthy it is essential that it should be trimmed about once a month. Merely chopping off the ends does not answer this purpose. The hair should be examined under a microscope and every end that is split—all hair splits after a time—should be trimmed off. These split ends are dead hair, and no matter how scanty the hair is the sooner one is rid of this much of it the better. The first time it is trimmed in this way, from a quarter to half an inch should be removed; after that only the extreme ends need be cut.

In regard to dressing the hair, the crown of the head should be kept free. The practice of parting it at the sides, just above the ears, and pulling it toward the top, is very injurious, making the crown soft and tender and the hair diseased. Crimping the hair may be done without much injury if great care is used. Instead of braiding in 10 or 12 small, tight braids, there should be but two. The buttons at the back of children's dresses, or aprons, often ruins the hair by snarling and breaking it, and luxuriant curls or flowing tresses have sometimes to be shorn close just for this reason. The prevailing notion is that children's hair should always be cut. But, if the child is perfectly healthful and the hair good, it is only necessary that the ends should be carefully trimmed every month. For delicate children, the hair should be kept cut close till they are 12 or 14 years of age. The most sensible and healthful style for girls for school and ordinary wear is to braid it firmly and leave it hanging down the back.—*Food and Health.*

WHY WE COMMENCE DINNER WITH SOUP.—The rationale of the initial soup has often been discussed. Some regard it as calculated to diminish digestive power on the theory that so much fluid taken at first dilutes the gastric juices. But there appears to be no foundation for this belief. A clear soup disappears almost immediately after entering the stomach, and in no way interferes with the gastric juice, which is stored in its appropriate cells ready for action. The habit of commencing dinner with soup has, without doubt, its origin in the fact that aliment in this fluid form—in fact, ready digested—soon enters the blood and rapidly refreshes the hungry man, who, after a considerable fast and much activity, sits down with a sense of exhaustion to commence his principal meal. In two or three minutes after he has taken a plate of good warm soup the feeling of exhaustion disappears, and irritability gives way to the gradual rising sense of good fellowship with the circle. Some persons have the custom of allaying exhaustion with a glass of sherry before food—a gastronomic no less than a physiological blunder, injuring the stomach and depraving the palate. The soup introduces at once into the system a small installment of ready digested food, and saves the short period of time which must be spent by the stomachin deriving some nutriment from solid aliment.

Worth Knowing.

Discovery and Uses of Water-Glass.

Von Helmont, in 1640, found that when, in making glass from sand and alkali, an excess of alkali was used, the glass would dissolve in boiling water. In 1827, Von Fuchs utilized water-glass, soluble glass or silicate of soda, in stereochromy or solid color-painting, in monumental and mural decoration, and in the preparation of cements and artificial stones. London *Engineer* suggests that, although used for a large number of purposes in the arts, it is capable of more extended application when it becomes better known. A compact, marble-like stone is formed when it is mixed with chalk and is dried. Similar stones are formed by mixing water-glass with bone-ash, zinc-white and magnesia. Ransome's artificial stone is prepared by mixing sand with water-glass solution, to form a plastic mass which is then pressed into the required shapes and placed in a solution of calcium chloride; the silicate of calcium thus formed cements the grains together, and the chloride of sodium formed at the same time is removed by washing with water. With clay, lime, sand, cement, etc., soluble glass enters largely into the composition of many of the patented artificial stones, plastic tiles, slates, etc., and also of our common soaps, the detergent qualities of the glass making it an excellent scouring material. In cold water this glass is nearly insoluble, or dissolves very slowly, but in boiling water it dissolves with facility; and remains in solution after the water has cooled. If the water contains 30% of the glass in solution, we have a substance of a sirupy consistence, which may be used as a transparent varnish on many substances; on drying, it forms a glassy coating that fairly resists moisture and change of temperature. *Engineer* remarks that, although the *Scientific American* says it has been used extensively as a vehicle for certain pigments to form paints known as silica paints, oil and the other common ingredients are used as the vehicle in the paints known and largely used by that name in England.

Leatherette—Its Manufacture and Uses

One of the many articles made of paper material, which is gradually coming into general use, says the *Paper World*, and for which something else gets the popular credit, is leatherette, which is manufactured by the Shawmut Manufacturing Company of Boston, at Turner Falls, Mass.

It is being brought into use in so many ways, and is at once so susceptible of beauty and economy in various mechanical and ornamental appliances, that we may well give something more than a passing notice of it. It is so perfect an imitation of leather that its use is time and again had, without its users being aware that they are handling something other than leather itself, and its serviceable nature renders the detection still more difficult. For all uses to which it has yet been applied it is nearly, if not quite, equally serviceable with leather, and gives excellent satisfaction to those who have occasion to use it or to deal in it.

It is only in this country that leatherette, the real, genuine article, is made. The Japanese are the only people who manufacture an article to be at all compared to our American leatherette, and although they make an excellent imitation, the price of their material is high and they copy but few grains and colors, while our leatherettes can be made to imitate any grain of leather, and in any conceivable color, so much so that it has rapidly grown into popular use in a great diversity of purposes, among which are book and pamphlet binding, silver, jewelry and all kinds of leather cases; fancy boxes for papeteries, pocket-books, trunk linings, boot facings, table and desk coverings, wall paper, letter-files, chess-boards, etc., and its durability has been proved by its use for covering whip handles.

As its name implies, it is a close representation of leather, so close that good judges are often deceived, and requires a thorough examination to detect its true nature, and when used in the different trades it answers the purpose to which it is put equally well with the real article. Being made of paper, it enters only into competition with leather when it can be fastened to some more solid substance than itself, as, for instance, cloth for belts, wood for boxes, leather for inner sole linings, or pasteboard for book binding, although for flexible covers it answers without any support. Its surface wear is remarkably durable, as it is made on the same principle as oil-cloth. Numerous imitations have been on the market for several years, but no exact imitation of leather has ever before been accomplished. The genuine leatherette, though unknown, even in name, only a few years ago, has now become an established article of trade, and taken a notable place among our American industries.

DYEING SILKS.—The process of dyeing has much to do with the durability of a silk. Ordinary silk when first spun and woven is strong and substantial, but often after it leaves the dyer's hands it is just the reverse. In dyeing black goods nitrate of iron can be employed without injury to the fibre; while sulphate of iron, made from copperas, though giving a good color, cannot be thoroughly washed out after the dyeing is completed, and remaining in the fabric is pretty certain to rot it. Nitrate of iron, however, costs considerably more than the sulphate, and hence it is used by some manufacturers.

FRATERNAL RECORD.

Officers and members of all associations in this Department are invited to send us regularly all news of interest.

President Garfield's Funeral.

The various fraternal societies were represented by large delegations in the great funeral demonstration on Monday, Sept. 26th. By actual count there were 6,056 of the societies represented in our columns, divided as follows: Free Masons, 1,322; Odd Fellows, 1,300; Knights of Pythias, 660; Ancient Order of United Workmen, 648; Knights of Honor, 432; Grand Army of the Republic, 360; Independent Order B'nai Bri'th, 360; Ancient Order of Foresters, 248; Chosen Friends, 224; United Ancient Order of Druids, 160; Improved Order of Red Men, 108; United Order of Red Men, 100; American Legion of Honor, 80; Native Sons of the Golden West, 64.

By request we reproduce a complete roster, with some few corrections as prepared by the San Francisco *Examiner*, of Tuesday, Sept. 27.

The fraternal society portion of the procession consisted of the following:—

GRAND LODGE OF FREE AND ACCEPTED MASONS AND ESCORT.

L. O. Plaisance, Marshal.
Walcott's Band.

MASONIC BODIES.

PETALUMA.—The event of the past few weeks was the grand celebration at Petaluma on the 9th ult. The proceedings did not reach us in time for our last number.

Corner Stone Laying of the New Masonic Hall at Petaluma.

Friday, September 9th, was a grand gala day for everybody at Petaluma, especially so for the members of the Masonic Order thereabouts. For several years the Lodges of the place have owned a valuable lot on the corner of two principal streets, Main and Western avenue. In June, work for a new hall was commenced. The old buildings were removed and excavating for the foundation begun. The building on the day of the ceremonies was all up one story, except the corner where the stone was to be laid. At 11 o'clock on the 9th, the members of the Order of the Petaluma Lodges and invited brethren, including representatives from all parts of the State, formed in procession at the old hall on Main street. First came Santa Rosa Commandery Knights Templars, Sir Geo. A. Johnson, Eminent Commander, headed by Dowe's cornet band; Petaluma Royal Arch Chapter, No. 22, and 200 Master Masons; the Grand Lodge of California. The Grand Master, S. C. Denson, was represented by Deputy Grand Master, Thos. H. Caswell. The Senior Grand Warden by B. F. Tuttle. Past Master of Petaluma; the Junior Grand Warden by A. Wright, Past Master of Healdsburg; and the other officers of the Grand Lodge by visiting Past Masters. The procession moved up Washington street to Keller, to B, to Main, to corner Main and Western avenue, the site of the new hall. Here the line halted, opened ranks, and the Grand Master and other Grand officers were escorted by the Grand Marshal to the platform. Prayer was offered by the Grand Chaplain, Rev. G. B. Allen; ode by a quartette choir. P. M., Wm. B. Haskell, President of the Hall Association, then arose, and in a short address invited the Grand Master to lay the corner stone with the usual ceremonies of the Ancient Craft. The Grand Master, in reply, addressed the members of the Order present and the assemblage in interesting remarks appropriate to the occasion, showing the speaker to be, as he is, one of the best informed Masons in the United States, and well worthy of the honor of conducting the exercises of this occasion. After the address, he proceeded to perform the work of laying the stone. A copper casket, eight inches square, was deposited in its place. In this casket was sealed up the following: A parchment containing this inscription: This corner stone of a Masonic Temple, erected by the Masonic Hall Association of Petaluma, was laid by the Grand Lodge of F. and A. M., of the State of California, on Sept. 9 A. D. 1881, A. L. 5881, Samuel Crawford Denson, Grand Master, and the names of the officers of the Hall Association. Act of incorporation of Masonic Hall Association of Petaluma; Constitution and Laws of the Grand Lodge, F. and A. M. of California; proceedings of the Grand Lodge of California session of October, 1880; Constitution of the Grand Chapter of California; Hand Book of the Grand Chapter of California; By-laws and lists of the officers and members of the following Lodges: Petaluma, No. 77; Arcturus, 180; La Fayette, 126; By-laws and members of Petaluma Royal Arch Chapter, No. 22; By-laws of Santa Rosa Commandery Knights Templars; Holy Bible; piece of mosaic from ruins of King Solomon's temple; copies of the following papers: Petaluma *Weekly Argus*, *Courier*, *High School Enterprise*, *Women's Christian Temperance Union*, *Land Journal*, Sonoma *Democrat*, Santa Rosa *Daily Republican*, *Russian River Flag*, Healdsburg *Enterprise*, *Marin Journal*, Sonoma *Index*, Cloverdale *Reveille*, San Francisco *Daily Alta*, *Call*, *Examiner* and *Chronicle*; wheat and barley from the mills of Petaluma; American silver dollar, 1881; half dollar, 1812; half dollar, 1836; half dollar, 1860; quarter dollar, 1876; 10-cent piece, 1835; 5 cents, 1861; German coin, and various American and Japanese coins, etc. The upper stone was lowered to its place, while the Grand honors were given and ceremony of the consecrating of the stone with corn, wine and oil was performed, the Grand Master applying the trowel to the cement. The Deputy Grand Master applied the square, the Senior Grand Warden the level, the Junior Grand Warden the plumb, when the Grand Master pronounced the stone well formed, true and trusty. Past Master and Sir Knight Geo. A. Johnson then, as Grand Orator, delivered a brief, but very appropriate and interesting address, setting forth in eloquent words the grand opportunities for Masonic work and a due appreciation of all that is good and ennobling. Old Hundred was then sung by the choir and the assemblage, and the procession reformed and marched back to the hall, and after closing a collation was partaken of by the members of the fraternity. They then dispersed, having passed a very pleasant time, although the day was excessively warm. May it be a day long remembered, that will bring to the Craft renewed ardor and interest in the noble principles and teachings of Freemasonry.

THE craft generally will be pained to learn of the attempted murder of Bro. Edwin Aldrich Rodgers, of Sonora, Wednesday evening, Sept. 21st. He was returning to his home, probably from a society meeting of some kind, as he is prominent in all the fraternities represented in that town.

THE fine painting of Grand Secretary Alexander G. Abell, ordered by the last Grand Lodge, has been placed in position in the gallery of the Grand Lodge. It is nearly life size, representing the Grand Secretary seated at his desk, with his glasses carelessly lying before him. Suspended upon the wall hangs a picture of the Masonic Temple, a most appropriate accompaniment for this grand picture, as Bro. Abell may be truly said to have been the originator, and for many years, almost the sole friend that institution had. It hangs in the center of the gallery, where the clock used to.

ON Friday evening, September 29th, Golden Gate Commandery, Knights Templar, of this city, formally dedicated their new asylum in the new building recently erected on the south side of Post street, between Kearny and Dupont streets, a full account of which we hope to have in our next. This new Commandery has had remarkable success during the few months it has been in existence, and we trust they will be still further favored now that they have so elegant a place to convene in.

THE GERMAN FREE MASONS.—At the annual meeting of the Gr. Orient of the Order of Free Masons in Holland, which was held at The Hague on the 19th ult., under the presidency of the Gr. Master, his Royal Highness Prince Frederick, a motion was unanimously adopted, amidst loud applause, in which the hope was entertained that Jews would no longer be excluded from some of the Lodges in Germany and Sweden. The resolution also contained an expression of regret that Freemasonry in Germany had not exerted itself to counteract the proceedings of the anti-Jewish faction in that country.—*Jewish Chronicle.*

THE Lodge at Fredericksburg, Va., in which Bro. Gen. George Washington was initiated on Nov. 4th, 1752, on the payment of £2 3s., has determined to erect a Washington Memorial Masonic Temple. The proposal has received the approval of the Grand Lodge of Virginia.

THE fraters at Vallejo and Woodland are contemplating the formation of a Commandery at each of these places. Sir Knight Abraham Powell has been designated as Eminent Commander, at Vallejo, and as soon as he perfects himself in the work the Commandery will be organized. At Woodland the fraternity are building a fine hall, suitable for meetings of Lodge, Chapter and Commandery, and as soon as the same is completed we shall expect to hear of the dispensation being issued for their Commandery.

ALTURAS CHAPTER, No. 34, formerly located at La Porte, Plumas county, has been removed to Quincy. The Grand High Priest has given his official sanction to the change of location. This will undoubtedly be the means of causing a large number of Companions of the late Quincy Chapter, No. 32, which surrendered its charter some years ago, to again place themselves in standing and renew their allegiance to the Royal Craft.

THE Masons of Omaha and Nebraska have arrived at the conclusion that their Order needs a library, and have commenced securing one. They already have a fine collection of valuable books.

BRO. JOHN W. BROWN, editor of the *Voice of Masonry*, has been appointed by the Grand Master of Illinois, Chairman of the Committee on Foreign Correspondence of the Grand Lodge of Illinois for the present Masonic year. We shall expect an able report.

THE statement is frequently made that Martin Luther was a Free Mason, and the year 1520 is named as the time in which he became connected with the craft, that date marking the period of his breaking away from Rome. There are several traditions to the effect that Luther was connected with one of the German Brotherhoods that had some points of resemblance to the Masonic institution, and it is by no means improbable that such was the case. There is no real evidence, however, to support the proposition that Luther was a Mason, and nothing is gained for Masonry by asserting a claim which rests on so slight a foundation.

CHINESE FREEMASONS.—Articles of incorporation of the "Dork Hung Tong," a Chinese benevolent society organized for the purposes of pecuniary profit, have been filed with the County Clerk of San Francisco county. The English name of the society is, "The Second Independent Order of Chinese Freemasons in America," its objects being the same as other benevolent societies. There is no capital stock, and the Directors are Chin Ah Fook, Young Ah Hop, Wong Ah Hong, Wong Ah Chan and Moy Ah Lum.

IT HAS been decided in the State of Arkansas that the loss of a foot, the missing member being artificially supplied, enabling the candidate to take all necessary steps, was no bar to the Lodge receiving and acting upon his petition, and initiating him if found worthy; the internal, more than the external, being what Masonry regards, and moral fitness has more to do in making "a perfect man" than physical conformation.

THE will of Bro. John Milton Jones of Suisun Lodge, No. 55, has been filed for probate. Testator bequeaths his estate, valued at $8,600, to his wife and four daughters. The estate consists of certificate of membership in the Northwestern Masonic Aid Association, valued at $5,000; one certificate in the beneficiary fund of the Ancient Order of United Workmen of California, valued at $2,000, and a certificate of membership of the Guarantee Fund, valued at $1,000.

Order Eastern Star.

Officers Grand Chapter — JEROME BANES, Gr. Patron, Red Bluff; MRS. S. JENNIE MANN, Gr. Matron, S. F.; MRS. ABBIE E. WOOD, Gr. Sec'y, S. F.

IVY CHAPTER, No. 27, O. E. S., at their regular meeting Tuesday evening, Sept. 13th, was largely attended. The pedestels and principal chairs were covered with choice flowers. Mrs. Jennie S. Mann, W. G. M. and Abbie E. Wood, Grand Sec'y, were in at-

"A. O. U. W. Diplomas."

EVERY MEMBER CAN HAVE ONE.

Each and every member of the A. O. U. W., who wishes a really artistic Certificate of Membership, should not fail to procure, without delay, one of "Adler's Diplomas," lithographed in five colors; size, 19x24 inches, with space for photograph of the holder. It is a fine ornamental picture, and distinguishes you as a member. Any Brother desirous of obtaining a perfect copy of the best issue can do so by applying to the WATCHMAN PUBLISHING CO., No. 202 Sansome St., S. F. P. O. Box 2361. Price, postpaid, $1, in cash or postage stamps.

☞It is an ornament for your room, as well as expressive and pleasing to yourself and friends.

OFFICERS and members of the A. O. U. W. receiving a complimentary number of the WATCHMAN with this notice marked are invited to examine its merits for their support, as we expect our agent to call and present personally further information concerning our enterprise for the future. Should our agent fail to call soon in some instances, we shall be glad to have our friends favor the office directly with their response. Persons receiving duplicate copies are requested to circulate them to the advantage of our cause and the publishers.

DO NOT DELAY.—Send us your subscriptions promptly Don't let any break occur in your subscriptions to the WATCHMAN. Every live Workman needs every number of the paper, and we need his assistance to print as valuable a journal as we strive to for the special benefit of its patrons and the general good of the Fraternity. Send the cash direct, or, if more convenient, hand it in with your dues to the Financier

The Nation's Loss.

The President is dead. For 80 days the country watched with longing eyes for every indication that his precious life would triumph over the wretched stroke of the assassin and has balanced hope and fear with almost affectionate anxiety. Meantime with heroic fortitude he has borne indescribable pain, and with brave heart awaited the result, longing to live and yet not afraid to die. And now he has gone hence, leaving to the country a rich legacy in the memory of a noble life and the example of high and disinterested patriotism. To-day the people mourn. The emblems of mourning are fixed upon a nation's homes and marts, along the country roads and beside the city streets. Everywhere hearts are heavy with the sense of the nation's bereavement.

James Abram Garfield was born on November 19, 1831, in the district known as the Western Reserve, about 15 miles from Cleveland, Ohio. His father, Abram Garfield, was a hard-working farmer, but the rough pioneer labor exhausted him before his prime. The mother was a woman of large frame and strong common sense. Of four children James was the only one who betrayed uncommon capacity. The elder brother is now a farmer in Michigan and the two sisters farmers' wives. In James, to the father's passion for work was added the mother's desire for knowledge. He worked early and late, but all his efforts were put forth to get an education. Labor on the farm through the summer, work at the carpenter's bench during the winter filled up his time, but, unlike his companions, he was never satisfied with this life. He had a strong desire to go to sea, and he walked 40 miles to Cleveland to ship on one of the lake craft. The captain swore at him and he retired discomfited, but compromised his nautical longings by hiring out as a canal boy. He drove the horses, and after a season of this apprenticeship was allowed to take charge of the helm of the boat. In the winter he turned his hand to any rough farm work. But even this active life could not satisfy him. He felt the stirrings of ambition—he had a consuming desire for knowledge. With a small amount of money which he got from his mother he set out for the nearest school. Here he studied hard, supporting himself by work at the carpenter's bench at morning and evening, and teaching school during the winter months. At 23 he concluded that he had gained everything possible from the academy. He had saved up money enough to carry him through one year at college. So, with that energy which always characterized him, he insured his life, made over the policy to a business man for a loan of ready money, and thus equipped, started for Williams College. In 1856, Garfield was graduated from college, receiving one of the best honors. On his return home he accepted the position of professor at the College of the Disciples, in Hiram, Portage county, Ohio. After two years of this work he was elected President of Hiram college. While a professor, he married Miss Lucretia Randolph, the daughter of a farmer in the vicinity, whose acquaintance he had made while preparing for college. They married because they loved each other. Neither had money, but the young girl sympathized with Garfield's tastes and aspirations; she encouraged his ambition and stimulated him to study and reading by her own scholarly tastes. In subsequent years he has acknowledged that no small share of his success in life has been due to her unwavering faith in him, and the encouragement which came from her intelligent companionship and womanly devotion.

The young college President was elected in 1859 to the State Senate of Ohio from the counties of Portage and Summit. The summer of 1861 saw him a Colonel, in command of the Forty-second Ohio Infantry—a regiment largely composed of his friends and of the students of the college. His army record is full of honors for honorable service, and he rose to the rank of Major-General. While in the field, Garfield was nominated for Congress and elected by a large majority, in December, 1863. He showed at once that, though unpracticed in parliamentary tactics, he was no mean antagonist in debate. Before the first session was over he had won an assured place in the regard of his associates, and had made his mark as a ready debater. He showed in his first session a great fondness for the study of financial questions, and when appointed later on the Ways and Means Committee, he did good service in enforcing his idea of specie payment. He never wavered in his convictions, nor faltered in defense of what he regarded as the only safe financial policy of the government. In January, 1880, he was elected to the seat in the Senate which was then occupied by Allan G. Thurman, whose term expired March 4, 1881. After Garfield's nomination for President by the Chicago Convention on June 8th of last year, he resigned his seat in the Senate to which he had been called, but which he never occupied. He was elected President by a decided majority, and inaugurated March 4, 1881.

The events of the last summer are too fresh in the minds of the people to need rehearsal. None can forget the darkness of that Saturday, July 2d, when the news was spread abroad that the President had fallen at the hand of a miscreant; none can forget the long days of suspense from that time until the patient sufferer was released.

Tributes to the worth of the dead President will occupy the tongues and pens of orator, poet and historian for a long time to come. Just at the moment, it is difficult to frame fitting praise, but the following from the New York *Tribune* is excellent:

At the very moment when he was stricken to the earth he was considered among the most acceptable of all the rulers of the nation. His ability, his statesmanship, and his personal purity of character, were recognized by all. He was esteemed as an example to all who claimed a share in the honor that such a ruler bestowed upon his country, and would also share in the brilliant prospects of his administration. He stood confessed as one of the foremost men of the age. The great chieftain, and what is more, the Executive of a great people, has been stricken down in the moment of his fame. Long will he be lamented. Long will the atrocity of his fate be cited in future times. Generations yet to follow will forever link the name of Garfield among the brightest and most glorious of the rulers of the American people. By the side of the name of Abraham Lincoln the American people have now reverently inscribed James Abram Garfield. These two great names will live forever in history. As they mourned Lincoln, they will mourn Garfield, with a feeling of reverential tenderness, with gratitude for the example of his lofty, pure life, and with pity for his cruel, untimely death.

THE LATE JAMES A. GARFIELD.

MRS. GARFIELD—MOTHER

MRS. GARFIELD—WIFE.

It is fitting as we mourn for the dead, that we should express sympathy with those whose personal loss is greater than ours can be—the honored mother, heroic wife and beloved children. The President loved his family with a love which is a shining example for a nation of sons, husbands and fathers. As a contemporary writer says: He died as a pure, upright Christian would prefer to die, with an unblemished record, wholly unmindful of personal pain and the abrupt termination of his highest political hopes, and grieving only for his cherished wife and children, whose love and affection made his home an earthly heaven. Around his bedside the American people have for weeks gathered in sympathy and prayer. To-day the same people will mingle their tears with those of his venerable mother, his wife and children, as members of one common family, mourning one common father and friend.

THE CHILDREN.

Mr. Garfield's Belief.

On February 8, 1876, after the regular business of the day, it is stated, in the formal phraseology of the *Record*, that Mr. Phelps (Connecticut) offered a resolution that the House has received with profound sorrow the announcement of the death of Orris S. Ferry, and that proper tributes be paid for his public and private virtues. One of the speakers was James A. Garfield, who delivered a touching and fraternal tribute, ending with the following:

"Before closing, however, let me refer to the crowning glory of his life. Mr. Ferry had a strong religious element in his character. This was with him a great controlling force, and not a sentiment. No cloud obscured the effulgence of his hope or dimmed his vision. Clear and high, his intellect and his faith rose above all storms and darkness, and sustained him in sweet companionship amid the unrevealed mysteries of pain. As his end drew near he came back to his home after a brief absence. There, under his own roof, with the angels of his household about him, he passed to his rest. Thinking of trials past, and knowing as we do how well he had wrought for the future, trusting in the merits of his dear Lord, he could repeat the sweet lines of Bonar:

'Beyond the parting and the meeting,
I shall be soon;
Beyond the farewell, and the greeting,
Beyond the pulse's fever beating,
I shall be soon.
Love, rest and home!
Sweet hope!
Lord, tarry not, but come.

Beyond the frost-chain and the fever,
I shall be soon;
Beyond the rock-waste and the river,
Beyond the ever and the never,
I shall be soon.
Love, rest and home!
Sweet hope!
Lord, tarry not, but come.'

"Ay, the sweeter word of inspiration—in the volume of the Book it is written: 'Lo! I come quickly. Even so, come, Lord Jesus.'"

And thus is chronicled the memory of a scene so unusual, so profound that the great hall of legislation, with its scores of careless, worldly men, seemed for the time transfigured. We all seemed to be "sitting in heavenly places in Christ Jesus." Even the reporters' gallery, a cool, phlegmatic region, as you may guess, showed a suspicious, surreptitious display of pocket handkerchiefs, and tears were in the eyes of many members on the floor. I have often heard General Garfield eloquent, but I have never, before or since, heard him approach the touching pathos of that hour. The occasion was ripe for him when he rose; he felt the solemn glow reflected from all hearts around him, and his voice, always sympathetic, took on an almost priestly function and an unconscious tone of exaltation that seemed above mortality, as he recited the dead man's tribute to the dead. The poem that formed its fitting climax seemed to glow with beatific flame.

Woman, the Queen of Home.

There is probably not an unperverted man or woman living, who does not feel that the sweetest consolations and the best rewards of life are found in the loves and delights of home. There are very few who do not feel themselves indebted to the influences that clustered around their cradles for whatever good there may be in their characters and condition. Home, based upon Christian marriage, is so evident an institution of God, that a man must become profane before he can deny it. Wherever it is pure and true to the Christian idea, there lives an institution conservative of all the noblest instincts of society.

Of this realm woman is the queen. It takes the cue and hue from her. If she is in the best sense womanly—if she is true and tender, loving and heroic, patient and self-devoted—she consciously and unconsciously organizes and puts in operation a set of influences that do more to mould the destiny of the nation than any man uncrowned by power of eloquence, can possibly effect.

The men of the nation are what mothers make them, as a rule; and the voice that those men speak in the expression of power, is the voice of the woman who bore and bred them. There can be no substitute for this. There is no other possible way in which the women of the nation can organize their influence and power that will tell so beneficially upon society and State.—*Scribner.*

KNOW THYSELF.—Horace Mann justly remarked—"A spendthrift of health is one of the most reprehensible of spendthrifts. I am certain I could have performed twice the labor, both better and with greater ease to myself, had I known as much of the laws of health at 20 as I do now. In college I was taught all about the motions of the planets as carefully as if they would have been in danger of getting off the track if I had not known how to trace their orbits; but about my own organization, and the conditions indispensable to the healthful functions of my own body, I was left in profoundest ignorance. Nothing could be more preposterous. I ought to have begun at home, and taken the stars when it should come their turn. The consequence was, I just broke down at the commencement of my second college year, and have never had a well day since. Whatever labor I have been able to do has been done only on credit, not on capital—a most ruinous way, either in regard to health or money. For the last 25 years I have been put from day to day on my good behavior, and during the whole of this period, as an Hibernian would say: 'If I had lived as other people do for a month, I should have died in a fortnight.'"

THE BRIGHT SIDE.—Look on the bright side. It is the right side. The times may be hard, but it will make them no easier to wear a gloomy and sad countenance. It is the sunshine and not the cloud that gives beauty to the flower. There is always before or around us that which should cheer and fill the heart with warmth and gladness. The sky is blue 10 times where it is black once. You have troubles, it may be; so have others. None are free from them; and perhaps it is as well that none should be. They give sinew and tone to life, fortitude and courage to man. That would be a dull sea, and the sailor would never acquire skill, where there is nothing to disturb its surface. It is the duty of every one to extract all the happiness and enjoyment he can within and without him; and above all he should look on the bright side. What tho' things do look a little dark? The lane will turn and the night will end. There is more virtue in one sunbeam than in a whole hemisphere of clouds and gloom. Therefore we repeat "look to the bright side." Cultivate all that is warm and genial—not the cold and repulsive, the dark and morose.—*The Interior.*

THE Boston *Courier's* advice to all aspiring young ladies: If you want to make your mark in the world, instead of lying in bed, "get up and dust."

PACIFIC STATES WATCHMAN.

FRATERNAL RECORD EDITION.

Issued on the 1st and 15th of each month.

AT No. 202 SANSOME STREET, SAN FRANCISCO, CAL.

Subscription (in Advance), $2 a Year.

Favorable to Advertisers.

By consolidating the large subscription lists of the *Pacific Workman* and *Fraternal Record* with the PACIFIC STATES WATCHMAN our advertisers gain an unusually great advantage. We doubt if any one weekly newspaper has ever been circulated to as many different readers on this coast, as have been served heretofore by the *Workman*, *Record* and WATCHMAN together. It is certain that no other periodical is now patronized by a better class of industrial, professional and business men. In fact, our subscription list embraces many of the foremost business and representative men throughout the towns and cities of the coast.

We have pride in making our paper "clean and handsome," and first class in all respects—to the benefit of both our readers and advertisers.

ADVERTISING RATES.

One Square (½ inch), per issue	$ .75
One Square per month	1.25
Two Squares, per issue	1.50
Two Squares per month	2.50
Obituary notices and resolutions (with 25 copies post-paid for friends of deceased) per sq. (½ inch)	50

☞For reading notices, extraordinary display, special advertising and choice places permanently, extra rates will be charged. Reasonable reduction will be made for large and long-continued advertisements. No extra rates for the space occupied by engravings.

Entered at San Francisco P. O. as second-class matter.

San Francisco, - October 1, 1881.

The Age of Beneficiary Societies.

The statement was made in the Fraternal Department of the *Call* that if the Masons or Odd Fellows had collected from each member $20 per year as assessments for a beneficiary fund they would have been enabled to pay $2,000 at the death of each of their members. This was doubted in some quarters, and in order to prove the truth of the statement a table was prepared which we copy as follows:

TABLE

Showing Admissions, Suspensions, Deaths and Total Membership from 1865 to 1830 in the I. O. O. F.

YEARS.	Admissions.	Suspensions.	Deaths.	No. of Members.

*June, 1870, to January 1, 1871.

Now, supposing that this Order, old and young, aged, infirm, healthy, etc., at the end of 46th year, in 1865, had agreed that each member should pay $20 a year in beneficiary assessments, in return for which the Order guaranteed to pay $2,000 at his death—what would have been the result? By glancing at the line of total membership it will be seen that for the time given, it aggregates the equivalent of 5,521,311 members for one year, which, at $20, gives the sum of $110,426,220. During the same time 52,152 deaths have occurred, which, at $2.000 each, would have cost $104,304,000, and left a surplus of $6,122,200 in the treasury. Another point, the monthly dues of an Order are sufficient to pay its expenses, and the sums received for initiation and conferring degrees are reserved to aid in paying extra assessments. At $10 each, this item would have brought $8,747,500, and if but half of it had been applied as a reserve fund, it would have made the surplus over $10,000,000 for the time given. This table not only proves the assertion made, but it will be found interesting, showing, as it does, the percentage of death-rate and fluctuations of one of the great Orders of the day. It also proves that the death-rate for a term of years will not average above 1% a year. These years include the epidemics in Tennessee, Mississippi, etc., where Odd Fellowship lost heavily.

Absenteeism.

A correspondent of the K. of H. *Advocate* has some pertinent remarks upon this subject, as follows: "It is estimated by all candid men that rich and powerful corporations have secured the control of our courts and State and National legislatures; and while our success insures the downfall of life insurance companies, we must not expect that they will succumb without a fierce struggle. If corporations can secure the control of our State and National legislatures, what is to prevent them from securing our Supreme and Grand Lodges? They have only to use money, and what money has done it can do it again. There is only one way left us to prevent any such ruin and disgrace. We must be warned by the lessons of the past. The corruption in the various departments of our Government has grown and strengthened upon the inaction of our voters. They have failed to attend to that most important of duties—to attend to the primaries, which are the source of all power; and the voter who fails to attend the primaries, is as much a traitor to our country and its institutions as if he openly took up arms against her. They are our country's secret foes, and strike far harder blows than her open enemies, for them we can find and put down; but we have no weapons to strike down those whose inaction and indifference allows base men to take charge of our affairs. What the primary meeting is to our Government, the subordinate meeting is to our Order. They are the fountains of all law and authority; and if we would prevent bad men from getting into power, we must attend our meetings to prevent it. There is the only place we can enter our protest against their base designs; and those who fail to attend Lodge meetings are holding out inducements to invite our enemies to prepare for our future destruction, and are discouraging the zealous members who are the faithful guardians of our Order's interests."

This is as true as the sun shines; and if members do not perform their duties, but trust all to the "faithful few," even these will grow "beautifully less," and their families will suffer the consequence. There is no sense or reason in meeting the same few familiar faces every meeting night in the Lodge-room. The delinquents have just as much right to attend meetings as the most enthusiastic brother; and perhaps his enthusiasm some of those days will run out through his bootlegs, the contagion will spread, and then you, delinquents, can whistle for the payment of the beneficiary certificate.

A Delinquent Fund.

The chronic delinquent is the curse of an Order. Probably every Lodge in the land has its tardy ones, men who are forever backward in coming forward and paying their dues and assessments. Meeting after meeting, when the question is asked, "are there any delinquents?" the same old familiar names are read off. Now these brethren get their notifications the same as the others do, they know the consequences of their non-action as well. They know that but for some brother's kindness, some brother more mindful of their interest than they are themselves, their insurance would incontinently go where the woodbine twineth, and they would be where Mahomet's coffin was, to wit, suspended.

He who cares not enough for his family to see to it that his assessments are paid as they fall due, is hardly worthy the name of brother, and only a feeling of charity toward that family rather than any appreciation of the character of its careless head, prevents the brethren from letting him reap the fruits of his unconcern. But this paying of others assessments has swelled to the proportions of a nuisance in many Lodges. It is often a severe strain on the generous ones, who pay out $1, $2, $3 or $5, and often have to wait months for reimbursement. Sometimes they never get their money back. We have known cases where one of these chronic nuisances got into debt to 3 or 4 members; but charity suffereth long and is kind, and other members still came forward and hazarded their money.

More than one Lodge has asked itself, "how can we remedy this nuisance?" The answer that a Lodge of South Boston, has given to this question is the best we have yet heard. It is practical and seems to meet the difficulty. The Lodge has a "contingent fund," made up of receipts from entertainments, etc. From this fund all over-due assessments are paid, and the tardy brother charged 15 cts. for the accommodation.

Now why cannot every Lodge set apart a small sum, say $25, from its general fund, for the paying of these assessments, and make a similar charge for the money advanced? But you could not enforce a fine of 15 cts. or any other amount on a brother for non-payment of an assessment, you say. To be sure you could not; but what of that? If you save a brother from suspension, and he is not willing to pay 15 cts. for the accommodation, simply take what the Lodge can collect, viz, the amount of the assessment. When it comes around again that he is in arrears, let him slide. The man who holds 15 cts. of more worth than his membership and insurance, isn't the man whose name will add any lustre to your roll of membership, Let him slide.—*Ex.*

Riding the Goat.

The St. Louis *Post-Dispatch* has the following amusing account of an initiation which took place in that city: The American Legion of Honor has a flourishing Council situated on Twenty-third and Franklin avenue, named Marquette, where every Monday night the shrieks of the victims who are subjected to its mysterious initiations break out on the night air, and the neighborhood wonders what new devilment the boys are up to. The Lodge is composed largely of Second street people, with a sprinkling of roving blades in it who are always up for some new kind of fun. The morale of the Lodge is evidenced by the officers, who are R. S. McDonald, Frank Ring, Morrison Renshaw, and a number of others of that kidney. Last Monday night the Council was called to order as usual, and after the opening prayers had been recited, the Lodge was declared ready for the initiation of candidates. There is a Tenth street physician, Dr. William Reilly, who has been induced to join the Order, under false pretences, and it was for his funeral that the torches were being lit. He is a large, full-bearded, dignified man, altogether unable to appreciate playfulness when directed against himself, and rather apt to believe that the prestige of his profession would protect him from the ribald assaults of the unedified. He was introduced to the body by Mr. Brooks, and the following are his experiences, as told to a sympathizing friend:

His eyes were bandaged tightly in the anteroom, and he was then led into the Council hall, where various vulgar practical jokes were played upon him. It is said that his body was measured, and the measurements recorded by the scribe, who did his work in a most flippant and frivolous manner; that this being done the doctor was required to climb to the peak of confidence, and cast himself off from the precipice at the command of the chancellor, whose lawful orders he had pledged himself to obey. This feat is accomplished by leading the blind folded man up and down a see-saw board until he imagines himself about 50 ft. from the ground, when, as a matter of fact, he is not more than 18 inches up. When the word comes to cast himself off, the victim seldom fails to refuse, and to emphasize his refusal by clutching a desperate hold upon the pole, whence it becomes necessary to pry him off and cast him into the abyss. It seems that one of the tests of the Order is the collection of damaging testimony about a neophyte, which is sprung upon him in one part of the initiation, and which consists simply of very mean personal questions, containing innuendoes of the most damaging description.

Dr. Reilly had never been initiated into a secret society before, and consequently all of this work was new and serious to him, and he did not take kindly to it at all. In fact, in the middle of the plank-walking he broke from the guides and succeeded in reaching the door, out of which he escaped to the street, with all the regalia of the Order upon him. Chase was made, but he was not overtaken. When the doctor woke up the next morning, the more he thought about the thing the madder he got. He conceived it was his duty to warn innocent outsiders of the ruffianly character of the Lodge, which he denounces in no measured terms as a collection of Mohawks, utterly devoid either of reason or decency. Marquette Council, at its next meeting, will bring the doctor up for trial on a charge of breaking his obligation and giving away the secrets of the Order, and it is whispered that a committee of stalwart young men has been appointed to bring the doctor before the Council next Monday night, *nolens volens*. In the meantime he has announced his intention of swearing out a warrant, charging the Council with assault and battery and malicious defamation of character. The row is a very pretty one, and is apt to furnish more developments. The only pity is that the doctor did not get through the initiation completely, so that the whole secret work might be exploited.

The above brought forth from the doctor the following: I have read a letter signed R. S. McDonald, replying to a somewhat lengthened and greatly exaggerated account in your issue of 22d inst., respecting initiation, etc., ceremonies of the A. L. H. As I was not your informant, I am not responsible for the statements therein contained, as to false pretences, etc., under which I joined the Order, but as I understand, the degree which was to be conferred only exists in the imagination of some of the members of Marquette Council, I must stigmatize the performances at that pretended ceremony as a hoax, gotten up to amuse the members at my expense, and to which I naturally had an objection. I think so astute a lawyer as R. S. McDonald is reputed to be should have more reliable information before charging me with revealing the secrets of the Order, a charge which I must brand in his own language as an infamous falsehood. I have in my possession documents to show that the honor of the degree referred to was not sought by me.

To which the *Post-Dispatch* replies: The facts in the above case are briefly these: Dr. Reilly had been initiated into one Council of the Order in a proper manner, and was finally prevailed upon to go to another Council for the purpose of receiving the "Medical Examiner's Degree." This degree (?) is simply the old work of the Sons of Malta, and is in no way whatever connected with the A. L. of H. The whole thing was intended only as a good joke on Reilly.

A Birth Insurance Company.

The latest new-fangled idea in the insurance line that has come to our notice is an association formed in Laurelton, Pa., for the purpose of paying to the parents of new-born children a stipulated sum. It is called the "Mutual Assessment Birth Association." From the K. of H. *Reporter* we learn that this association extends its helping hands to all married folks, who are the only class that can become members. Certificates are written for amounts from $500 to $3,000, a certificate for the former costing $4.50 and the latter $24. Members do do not become beneficiaries until a year after obtaining certificates, and in that time they are not subjected to assessment. The assessment will not exceed $1.25 on a $1,000 certificate, $2 30 on a $2,000 certificate, and $3 40 on a $3,000 certificate. Neglect to pay an assessment within 30 days after notice forfeits the membership. When a member becomes a beneficiary he is entitled to the face of his certificate, or so much thereof as one assessment, less costs of collection, shall amount to. Claims against the association are those arising from births only, and are payable 60 days from receipt of proof, by a physician's certificate, or the certificate of two reliable persons. Births within a year of the date of the certificate will not be recognized; no distinction is made as to sex or health of child, and the association must be notified within 10 days of its birth by the beneficiary. Unlike most speculative insurance companies, this one has a system of annual dues, out of which the officers expect to make their living. A member holding a certificate of $1,000 must pay $4 a year to keep it in force, half of this amount being due in January and the other half in June. This plan permits of one being insured from his birth to his death. His parents take out a policy before his entrance upon this vale of tears, another immediately succeeding that interesting event, and until he leaves the parental roof secures him against accident. He insures himself before his marriage, takes a policy on his prospective offspring, insures the little property and live stock he may have accumulated, insures his stock, and finally insures his life for the benefit of those who remain after he is gone.

It will be seen from the above that the projectors of this association have been very careful in their ground work and have reared an edifice that cannot be easily overthrown, and which is at the same time symmetrical in its entirety and beautiful in every part. It is a strictly moral organization, in the first place, in that it gives no encouragement to multiplying and replenishing the earth to people outside of the sacred bonds of wedlock. Then, again, no member can become a beneficiary until he or she has belonged to it a year. Therefore, no initiate can possess an undue advantage over another. All must join untrammelled by the shadow of coming events. It is a fair start with all, and no favors. Still another beautiful feature; it makes no distinction as to the sex of the children born. This one feature alone should commend it to popular acceptance, especially to the upholders of the theory of sexual equality. We believe the society has a long and prolific future before it. We believe that it will be an immense factor in the augmentation of our population. There's millions in it!

THE Chicago & Northwestern Railway Co. has issued in pamphlet form the address of Mr. Lloyd Tevis, delivered before the American Bankers' Association, at Niagara Falls, August 10th. This address deals with the growth, past and prospective, of the industrial and banking system of California. The enterprise of this railroad company in thus printing in convenient form this notable address is to be commended. Bro. J. Meredith Davies, Lick House, is General Agent for this company on this Coast, and parties desiring copies can procure them of him.

Fraternal Record.

[Continued from Page 317 of this Issue.]

tendance, besides prominent members from sister Chapters. One member was received into the Chapter by affiliation and one candidate initiated, after which a short time was spent in musical and literary exercises and voluntary speeches by several of the members, past officers and visitors. A pleasant feature of the evening was the presentation of a large magnificent basket of flowers made up of tuberoses and other choice selections, on which was the words, "Welcome to the new member, Mrs. Asa R. Wells." An adjournment was had to the banquet room where a fine collation was spread and that was finished up with ice cream. A very pleasant evening was brought to a close by an hour of spirited dancing in the large Lodge room.

Petaluma.—Past Patron Dr. R. Press Smith, of Santa Rosa, assisted by Grand Secretary Abbie E. Wood and Past Grand Secretary Anna M. Elliott, instituted Morning Star Chapter at Petaluma on Tuesday evening, Sept. 27th, and installed the following as their first board of officers:

Mrs. Libbie Zartman, Worthy Matron; Charles E. Hutton, Worthy Patron, Mrs. Mattie Cox, Associate Matron; Mrs. Jennie Fishburn, Treasurer; Mrs. Helen Singley, Secretary; Mrs. Alzina Jacobs, Conductress; Mrs. Fannie Roth, Associate Conductress. Twenty-two charter members.

The following new Chapters have been organized this year:

Placer Chapter, Dutch Flat. Matron, Jennie Martin; Patron, J. J. Harris; A. M., Sarah B. Harriman. Instituted by I. J. Rolfe, March 24, 1881.

Wheatland Chapter (18 charter members). Patron, J. M. C. Jasper; Matron, Linnie Keyes; A. M., Lillie G. Jasper. Instituted by Jerome Banks March 23d.

Home Chapter, Stockton (22 charter members). Matron, Hannah J. Thresher; Patron, F. M. West; A. M., Fran. Kinsley. Instituted by Jerome Banks May 21st.

Alturas Chapter (21 charter members). Matron, Mary Estes; Patron, Gamaliel T. Harris; A. M., Cynthia A. Spicer. Instituted by Max Posner June 3d.

Quincy Chapter (28 charter members). Matron, Carrie L. Variel; Patron, Geo. E. Houghton; A. M., Kittie A. Meyers. Instituted by Mrs. Banks June 21st.

Sincerity Chapter, Taylorville (42 charter members). Matron, Martha A. Gentry; Patron, Geo. W. Boyden; A. M., Arabella Young. Instituted by Mrs. Banks June 24th.

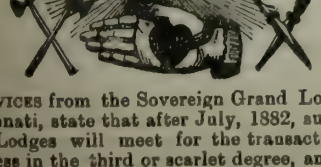
Marysville Chapter (17 charter members). Matron, Carrie A. Fuller; Patron, Lemuel T. Crane; A. M., Susan A. Saul. Instituted by S. Jennie Mann, Jerome Banks, A. E. Wood, Lizzie Aram, June 25th.

Ophir Chapter, Oroville (13 charter members). Amelia Ostroski, W. M.; Richard DeLancie, W. P.; Clara R. Gale, A. M. Instituted June 27th.

Fidelia Chapter (20 charter members). Inez K. Hamlin, W. M.; G. W. Alberti, W. P.; A. M., Martha E. Van Arsdale. Instituted June 28th.

Crystal Chapter, Auburn (14 charter members). Julia M. Lubeck, W. M; J. G. Bisbee, W. P; Mary Fubweiler, A. M. Instituted July 8th, 1881, by S. Jennie Mann.

Kingsley Chapter (17 charter members). Mary E. P. McCowan, W. M.; Walter L Bransford, W. P.; Emma M. Metzger, A. M. Instituted July 23d by Carrie A. Kingsley.



Silver Spray Chapter, Napa (25 charter members). Sister Ella M. Hann, W. M.; F. M. Hackett, W. P.; Sister Hackett, A. M. Instituted August 12th by S. Jennie Mann.

Yolo Chapter, Woodland (22 charter members). Rebecca G. Frost, W. M; William H. Martin, Patron; Harriett Wyckoff, A. M. Instituted August 20th.

Morning Star Chapter, Petaluma (22 charter members). Mrs. Libbie Zartman, W. M.; Charles E. Hutton, W. P.; Mrs. Mattie Cox, A. M.; Mrs. Jennie Fishburn, Treas.; Mrs. Helen Singley, Sec'y.; Mrs. Alzina Jacobs, Conductress; Mrs. Fannie Roth, Associate Conductress. Instituted by Past Patron, Dr. R. Press Smith of Santa Rosa, assisted by Grand Secretary, Abbie E. Wood and Past Grand Sec'y, Annie M. Elliott, Sept. 27th.

Indp't Order of Odd Fellows.

Grand Officers.—Davis Louderback, G. M., San Francisco; Leon D. Freer, D. G. M., Oroville; D. M. Burns, G. W., Sacramento; W. B. Lyon, G. Sec'y, San Francisco; H. B. Brooks, G. Treasurer, San Francisco.

Advices from the Sovereign Grand Lodge at Cincinnati, state that after July, 1882, subordinate Lodges will meet for the transaction of business in the third or scarlet degree, and not in the initiating degree as heretofore.

This change we believe to be for the better, as it is in conformity with the custom of all other bodies and places the full control of Lodge business in the hands of those who have attained a full membership in the Order. It will have a good effect in another direction. As all like to have a voice in the management of the affairs of a Lodge, it will cause many to take the degrees who have not done so, and in that way reduce the number of initiatory degree members and increase the number of scarlets.

The Grand Encampment will meet in this city two weeks from next Tuesday. The Grand officers have their reports about ready, they will show a good amount of work done during the past year, and that the Encampment branch is in a very flourishing condition.

Had it not been that hundreds of Odd Fellows turned out as Masons, Workmen and others, there would have been at least 2,500 Odd Fellows in the funeral procession on the 26th ult.

Several of the Eastern jurisdictions are complaining that their Grand Lodges are becoming unwieldy, and that for the dispatch of business, as well as saving of expense, representation should be reduced. It will not be a great many years before similar suggestions may be heard with reference to the Grand Lodge of California. A delegate body of 450 and a voting body at elections of about 600 will, with future growth and additions, soon become unwieldy.

Sale of Odd Fellows' Hall.—The trustees of Odd Fellows' hall, New York, have sold the premises to Robert Hoe, Jr. for $85 000, subject to a mortgage of $60,000. This is a better price than at first expected would be received. The personal property in the hall will be sold at private sale or auction, and the Grand Secretary and the few Lodges now remaining, will move up town. At one time 40 Lodges met in the hall, and the annual income was $25,000. Now only four Lodges meet there, and the income is hardly $4,000. The membership having moved up town, the Lodges had to follow, and the hall being thus deserted and of no further use, was sold. We hope ere many months to record the fact that our Lodges, Encampments and Grand Lodge officers have "moved up town" to their new building soon to be erected on the corner of Market and Seventh streets.

Grand Patriarch Charles H. French, of Portland, Me., was severely injured in that city during the past month. His horse becoming unmanageable by a passing train of cars, he was thrown violently to the ground, his head coming in contact with a rock. Bro. French is on the road to recovery, but it is feared will forever bear evidences of the disaster.

New Albany Lodge, of Indiana, paid one brother sick benefits to the amount of $6,500, covering a period of twenty years.

The Order at Large.—The Louisville *Argus* has been making up a table of statistics, which is presented here: "In numerical strength the largest jurisdiction in Odd Fellowship is in Pennsylvania, 905 Lodges and 74,476 members. The next rank is Ohio, which is the banner State of the West, having 44,562 members in its 642 Lodges. Illinois ranks fourth, with 25,932 members distributed in 588 Lodges. New York is the third jurisdiction in membership, having 37,891 in 481 Lodges. Then comes Indiana, with 541 Lodges and 26,541 members. Massachusetts is the sixth in rank in membership, has 156 Lodges and 24,965 members, a very large average per Lodge. The seventh in rank is California, having 21,468 members and 271 Lodges.

Knights of Pythias.

Grand Officers.—S. L. Terry, P. G. C., Stockton. John H. Harney, G. C., S. F.; George Cantus, G. Treas, S. F.; A. G. Booth, Grand K. of R. & S., S. F.

GOLDEN CITY, NO. 63. Friday evening, Pythian Castle, Hermann Shaffner, C. C.; Wm. Martin, K. of R. and S.

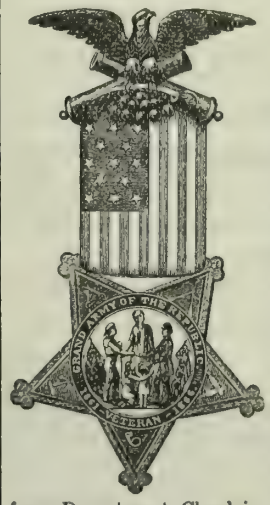
On Monday evening, after the grand parade, Grand Chancellor John H. Harney, accompanied by D. D. G. C. Frank Mitchell, visited Triumph Lodge, No. 47, at San Jose. The strife for membership among the various fraternities at the present time had caused a relaxation of energy and lack of interest in this Lodge. The presence of the Grand Chancellor and his Deputy at the meeting above referred to had a good effect; their words of counsel and good advice were well timed, and the result will be a renewed life and vigor into the membership of Triumph's boys.

The Grand Chancellor has advices from Red Bluff to the effect that the new Lodge recently organized there is enjoying a good degree of prosperity.

The largest turnout in the procession on the 26th, in proportion to their membership, was the Knights of Pythias. Out of a registered membership of about 2,000 in this city, they turned out 660 in line.

The Uniform Division won for itself new honors, and their appearance was highly creditable to themselves and the Order of which they are prominent members.

The interest manifested by the officers of the Order in the "Fraternal Record" edition of the Watchman, is we assure you fully appreciated by the publishers. Within the last few weeks nearly all the officers in this city have added their names to our lists. We shall publish in in our next a list showing how generally our efforts are being seconded, to make this the live Knight's journal of the coast.



Ivanhoe Lodge is quite likely to have another tidal wave. Their party will no doubt serve as a means of increasing the already large list of applicants.

If some mercantile house wants a good reliable man to fill almost any position of trust or responsibility, Chancellor Commander Rudolph Meiners, Jr., is at present out of business and would like to hear of such an opening.

Grand Keeper of Records and Seal A. G. Booth, is in receipt of a good strong petition for a new Lodge at Carpinteria, Santa Barbara county.

Grand Army of the Republic.

Officers of the Department of California.—C. Mason Kinne, Com., San Francisco; W. F. Ellis, S. V. C., San Jose; J. M. Davis, J. V. C., Oakland; W. A. Robinson, A. A. Gen., San Francisco; O. B. Culver, A. Q. M. Gen., San Francisco; J. W. Staples, Inspector, San Francisco.

During the week following the announcement of the death of President Garfield, the meetings of George H. Thomas Post, No. 2, and Lincoln Post, No. 1, of this city, were very interesting and largely attended. At Thomas Post, on Tuesday evening, able and eloquent addresses were made by Senator Miller, Department Commander Kinne, and others. At Lincoln Post, on Thursday evening, the Comrades listened to a feast of eloquence from Department Chaplain Rev. T. K. Noble, Hon. Walter Leman, and others. Both Posts adopted suitable resolutions, each of which will be suitably engrossed and presented to Mrs. Garfield by Senator Miller, who will call on her on his way to Washington, whence he is called to attend the special session of the United States Senate.

A strong petition has been received for a Post at San Diego. The boys of this city regret that San Diego lies so far down the coast, for if it was within reasonable distance, they would set Assistant Quarter Master General Culver on to getting up another excursion as they had at Santa Cruz, when they gave the boys of that new Post a good send-off.

General and Senator Ambrose E. Burnside, of Rhode Island, who died a few weeks since, was a Past Commander-in-Chief of the G. A. R.

On the evening preceding the public funeral service in memory of President Garfield (Sunday Sept. 25th) the comrades of Lincoln Post No. 1 and Gen. H. Thomas Post No. 2, attended divine worship at the church of Rev. T. K. Noble, Department Chaplain, and listened to a very appropriate service, delivered in that comrade's usual style of finished oratory.

Comrade Noble is a member of Lincoln Post No. 1.

Knights of Honor.

Grand Officers.—David McClure, P. G. D., San Francisco; Chas. E. Travers, G. D., San Francisco; S. H. Warfield, G. Treas., San Francisco; W. H. Mahoney, G. Reporter, office St. Ann's building, cor. Powell and Eddy.

Editors Watchman:—I observe from your Sept. 1 issue that the Grand Reporter of California feels exceedingly aggrieved at some of the remarks made in my article of August 15th. I made no direct charge that the Grand Reporter had neglected his duty, but intimated that it was possible that some of the delay in the payment of death benefits might be accounted for by failure of the Grand or subordinate Lodge Reporters to comply with the law. I expected that, if he had not failed in his duty, he would show the fact in your columns. I neither had nor have any desire to do the Grand Reporter any injustice, nor was my article written for the purpose, as he alleges, of injuring him.

He, with considerable asperity and display of temper, declines to furnish you with the facts, dates of death, etc., as requested by you. I have taken the trouble to secure them, and herewith furnish them, so far as concerns those names mentioned in the memorial sent by the San Francisco Lodges to the Supreme Dictator. Their publication by me ought to convince the Grand Reporter that no unfairness was intended him:

Deaths in California, February 20th to May 20, 1881.

Names.	Lodge No.	Date of Death.	Date of Notice from Lodge to Supreme Reporter.	Date of Notice From G. R. to Supreme Reporter.	Date of Notice from G. R. to Supreme Treasurer.	Date of Draft on Supreme Treasurer.

From this statement it appears that, in most instances, the Lodge Reporters have forwarded the death notices with a fair measure of promptness, and that the Grand Reporter has been so remarkably prompt that he has actually dated (if not sent) his notices on the same date of those from the Lodges. One exception only appears.

There appears to have been an undue measure of delay at Supreme headquarters, the cause of which we may confidently expect to know when an answer shall have been received to the memorial mentioned; and here let me suggest that, when such reply is received, the Grand Reporter furnish you a copy for publication.—Justice

The *Reporter* finds space to dwell at length upon our suggestions concerning the separate beneficiary plan and takes occasion to call the attention of its readers to an article it has referring to the A. O. U. W. Supreme Lodge and Ohio as a sample of what members of that Order think of the separate jurisdiction plan. If the readers of the *Reporter* understood why Ohio is not in favor of separate jurisdiction they might understand just how much importance to place upon an opinion on this subject coming from them. In order that our readers may understand why Ohio Workmen declare against separate jurisdiction, we will explain.

Some years ago the A. O. U. W. in Ohio became very much demoralized, and during a season of depression there, it is a well-known fact that they admitted many into the Order that never should have been allowed to become members. During this time their losses became very burdensome and many withdrew from the Order and their number became reduced below 2,000 members, and by the nature of our laws they returned again to the jurisdiction of the Supreme Lodge.

They have now come to their senses and the Order is growing rapidly by the introduction of good material, their number has increased beyond the minimum for a separate jurisdiction (2,000) yet they decline to ask for another separation, not that they do not think it the proper way to conduct the Order, but simply and solely because they have so much of that undesirable material still left within the Order in that State, that their losses now would oblige them to pay three, four, and sometimes five assessments a month. Hence, from purely selfish motives, they remain within the jurisdiction of the Supreme Lodge, to oblige the other members within that jurisdiction to help them bear the loss of their indiscretion. And they are quoted as good authority against separate beneficiary jurisdictions.

Assessment No. 87 became due October 1st. Members who did not pay up last week had better give the same their immediate attention.

Assessment, No. 88, will be due October 15th. The whole number of deaths reported, including those for which this assessment is levied, is 2,339, which suggests the payment of about $4,678,000 from the Widows' and Orphan's benefit fund.

(Continued on Page 324.)

AMBER.—Much of the amber, as it is found, is in small pieces. In order to give additional value to them, a large number of smaller pieces are ingeniously joined together so as to form one of larger size. This is accomplished by moistening two surfaces of amber with potash, warming them to the proper degree and pressing them together. Still smaller pieces are joined by exposing them, covered with sand in an iron pot, to the action of heat for 40 hours, or boiling it for 20 hours in rape oil, when the material will become transparent and the pieces will fuse together. As vessels and other objects of great size made of amber have come down to us from remote times, the fact suggests the probability that the art of molding and working amber in some such manner was known and practiced by the ancients.

IN spite of the magnificence of the domestic arrangements of the ancient and refined care bestowed upon all that could make life agreeable, they were without many of the most ordinary conveniencies. For instance a clock to regulate time, to us an indispensable piece of furniture, which a man of the most moderate means can command, and even the poorest does not like to be without, was for nearly 500 years unknown in Rome, and even in latter times only in a very imperfect state. According to Pliny there was no sun-dial in Rome until 11 years before the war with Pyrrhus, although in Greece they were in use somewhat earlier, about 500 B. C. Water clocks came into fashion later on; but there was no idea of accurate time keeping, and in order to know the hour, without giving themselves any trouble, the patricians kept slaves for the express purpose of watching the dials and reporting each time the hour expired.

Scientific Press

Patent Agency.

[ESTABLISHED 1860.]

Inventors on the Pacific Coast will find it greatly to their advantage to consult this old experienced, first-class Agency. We have able and trustworthy associates and Agents in Washington and the capital cities of the principal nations of the world. In connection with our editorial, scientific and Patent Law Library, and record of original cases in our office, we have other advantages far beyond those which can be offered home inventors by other Agencies. The information accumulated through long and careful practice before the Office, and the frequent examination of Patents already granted, for the purpose of determining the patentability of inventions brought before us, enables us often to give advice which will save inventors the expense of applying for Patents upon inventions which are not new. Circulars of advice sent free on receipt of postage. Address DEWEY & CO., Patent Agents, 202 Sansome St., S. F.

"Lo, The Big Injun."

Address of a big chief when invited to take a walk: "When the white father starts the music we waltz to it. We have been asked to irrigate the country here and hoe corn like the white man. Our hearts are heavy, and we cannot promote the string bean. We will do what is right, but we cannot work. The Indian cannot hunt the potato bug when the deer and antelope are ripe. He cannot dig post-holes in the hot sun when the chase calls upon him to go forth into the forest. Here, where we have roamed through the tall grass and hunted the deer and buffalo, the paleface asks us to dig irrigation ditches and plow the green earth with a rebellious mule. Here, where our warcry has been answered back by the giant hills, we are told to whack bulls and join the church. They come to us and tell us to go to school and wear pants. They ask us to learn the language and go to Congress. They send men to us who want us to learn to spell and wear suspenders. We cannot do this. We are used to the ways of our people. Our customs are as old as the universe. We scratch our backs against the mountain pine as my people did a thousand years ago. We cannot change. We can leave our land, but we cannot change our socks every spring and do as the white man does. We can go away from our homes and live in a strange land, but we cannot wear open-back shirts and lead in prayer. Warriors, we will go to the land our white father has given us. We will take our squaws and our yellow dogs, our wigwams and our fleas. We will go to our new home beyond the river now, and when the autumn comes we will take a bridal tour back to this country. We will construct holocaust, whatever that is, and spatter the intellectual faculties of the ranches all over the country. This is all. I am done. I have made my remarks. I have twittered my twit."

Workmen Guarantee Fund Association.

Additional $1,000!

Additional $1,000!

Additional $1,000!

FOR MEMBERS of the A. O. U. W. ONLY.

ADMISSION FEE, $3.00; ANNUAL DUES, $2.00.

Probable Cost to Each Member, about $8 a Year.

The object of this Association is to afford an additional protection of $1,000 to families of deceased members of the Ancient Order of United Workmen.

To become a member the applicant must be a Master Workman in good standing in his Lodge, under 50 years of age, and in sound bodily health. No re-medical examination is demanded, though the Association reserves that right, and when necessary, the applicant must pay the Examiner's fee.

There are no Lodge meetings to attend or Lodge dues to pay. There is no sinking fund, consequently the members have the benefit of every dollar received.

No Director receives any remuneration for services rendered.

The admission fee includes the first assessment of $1, which assessment is levied, and made payable on the death of a member, and disbursed on the same principle as the Beneficiary Fund of the Ancient Order of United Workmen.

The Association is governed by a Board of Directors, elected annually by the members. It is endorsed by Hon. Roderick Rose, Past Supreme Master of the Order in the United States, also, by W. H. Jordan, M. T. Brewer and C. W. Taylor, Past Grand Masters of California, H. G. Pratt, Grand Recorder, C. H. Haile, Grand Receiver, C. C. Terrill, P. Peck and E. H. Morgan, Finance Committee of the Grand Lodge, all of whom are members, and cordially recommend the Association to the support of the Brothers throughout the State.

The average cost of this additional $1,000 to the $2,000 already pledged by the Order, will be about $8 per year, or less than 20 cents a week.

FRATERNAL RECORD.

[CONTINUED FROM PAGE 321 OF THIS ISSUE.]

Ancient Order United Workmen

Degree of Honor.

The dallying with the Degree of Honor is puerile. It can be made an important auxiliary to the Order, and would prove one of its strongest pillars, if the Supreme Lodge only had the courage to do what all must see is necessary to accomplish that result. Instead of doing so, however, the august body avoids taking decided action, and puts the matter off from year to year, and so the Degree remains a sort of sickly side-show, doing no good for itself or the Order, and not likely to do any until it is revolutionized. It is strange that so powerful an influence as this Degree affords, should lie at our doors clamoring for admission, and we coolly ignore it and the plain advantages it would bring to that Order. This is certainly short-handed policy.

We are glad to see our views in relation to the Degree of Honor endorsed by so able an advocate as the *National Bulletin*, the oldest journal of our Order. The Degree of Honor is coeval and co-existent with the Supreme Lodge, but since it was born into the world, it has been compelled to hover around the paternal table and be content with such crumbs as might fall unobserved to the floor. Now the Degree is desirable or it is not. If desirable, then the Supreme Lodge should do whatever in its best wisdom it can, to make of the Degree a grand success. If not desirable, then it should be eliminated from the Order altogether.

At the last session of the Supreme Lodge, a committee was appointed, of which Representative Pratt, of California, was Chairman, to consider all matters referred to them concerning this Degree. The committee made an elaborate report embracing general laws, a beneficiary article, and a general constitution for the government of all Degree of Honor Lodges. This report presented beyond question the most perfect beneficiary system that has ever yet been devised, at least so far as its details are concerned, and could only have been evolved from minds schooled in the practical workings of the Order. But notwithstanding this fact was seen and acknowledged by the leading men of the Supreme Lodge, still we have reason to know that only by parliamentary strategy was this committee able to get its report into print, or even get it before the body for consideration. Its fate was postponement for a year.

The WATCHMAN desires to be put on record as favoring the Degree of Honor, and also as in favor of making it beneficial so far as practicable. The scheme submitted to the Supreme Lodge by the committee before referred to, or something substantially the same, we believe ought to be adopted; and we ask, as it is now in the hands of every Lodge in this jurisdiction, being embodied in the proceedings of the Supreme Lodge, that it be read and considered by every well-wisher of the A. O. U. W.

There is no earthly reason we know of why our wives, daughters, sisters and mothers, if fulfilling the requirements of safety, should be denied the privileges we have for ourselves, nor any tenable ground for refusing the privilege to such of our members as may desire it, of securing an additional amount of protection for their families to the extent provided for in the scheme under consideration, and that without being compelled to join some other organization to do it. We venture the assertion, that had the Supreme Lodge adopted the plan proposed, there would have been organized in this jurisdiction, before the next session of that body, more than 50 Lodges, with an average of more than 50 beneficial members each. At this date we could have mustered more than 1,000 such.

We have great faith in the power of the press as an educator. Our Supreme Lodge representatives need educating as to the wants of the brotherhood in regard to the subject under consideration. Two amongst the most powerful advocates in the Order, the *National Bulletin* and the Missouri *Overseer*, stand shoulder to shoulder with the WATCHMAN in this regard, while several others, we believe, entertain the same views. It is a noteworthy fact that no one has spoken in opposition. How can anybody? What objection can there possibly be? We have heard only doubts of its desirability expressed, but never a reason for such doubts.

Brethren, think this matter over; study it as one worthy of the most earnest consideration of every true Workman, and we are sure you will arrive at the same conclusion we have, and then at the next session of our Grand Lodge, obedient to your will, that body will formulate an appeal to the Supreme Lodge that will be heeded.

Send in Your Amendments.

EDITORS WATCHMAN:—I noticed in the WATCHMAN of Sept. 3d, a note from Bro. Dunbar, calling attention to the fact that there was a standing committee to whom all amendments to the constitution of the Grand and subordinate Lodges were to be referred during the year. This committee was called into existence for the following reasons: First, not less than one whole day of the last session of the Grand Lodge was consumed in introducing amendments to the existing laws; this was a consumption of time which that body could ill afford. Second, one-half these amendments could not receive the attention they deserved, simply because it was impossible for the committee, efficient as it was, to give the time to them that they perhaps deserved. These two reasons led to the creation of a standing committee of five, consisting of Bros. L. L. Dunbar and G. Winehill, of S. F.; Sol. Ehrman, of Mission San Jose; H. S. Ball, of Salinas City, and C. H. Dunton, of Oakland, to whom all amendments are to be referred during the year, and no amendments will be received by the committee later than two weeks prior to the next session of the Grand Lodge, and no amendments can be introduced during the session except by the consent of two-thirds of that body. Now there seems to be some misunderstanding among the brothers as to when and how these amendments are to reach the committee.

Permit me to say that the idea and spirit of the provision is this: At any time during the year up to within two weeks prior to the next session of the Grand Lodge, any brother in any Lodge anywhere in this jurisdiction, who thinks that any law or laws of the Grand or subordinate Lodges can be improved in any way, has simply to draw up his amendments in as clear a manner as possible, submit it to the Past Master of his Lodge who was and is a member of the present Grand Lodge, have it signed by him and forward it to either of the brothers I have mentioned and it will receive all the attention it may by its importance demand. In this manner every brother who thinks he can benefit the Order through its laws, has through his Past Master an opportunity, and every amendment proposed will receive its proper amount of attention, which it could not receive under the old law.

At the opening of the next session of the Grand Lodge, this committee will be in readiness to report, and the time heretofore consumed in the simple introduction of amendments can be devoted to the discussion of those important matters which come before that body and are too often crowded out for want of time I trust this is sufficiently clear so that every Master Workman who reads the WATCHMAN (and they all *ought* to read it) will understand and govern himself accordingly. Of course all members of the last Grand Lodge understand the law fully as well as yours in C. H. and P.

C. H. DUNTON,
Chairman Committee on Amendments.

A MOVEMENT is on foot which will be crystalized some time next month for a grand reception by Magnolia Lodge, No. 6, D. of H., of San Jose, to Silver Spray, No. 3, Aurora, No. 8, and Diamond, No. 5, D. of H. The exercises will be a reception, the initiation of 100 members, to conclude with a grand ball.

The Workmen at the Obsequies.

The Lodges of this city were well represented at the obsequies of the late President, James A. Garfield. The division was preceded by the Excelsior band, followed by Grand Master Workman Barnes and Grand Recorder Pratt. Then came the Deputies, Past Master Workmen, Master Workmen, Foremen, Overseers, Guides, Recorders and Receivers, after which were the members of the various city Lodges. There were about 648 Workmen in line. Noe Valley, No. 185, turned out the largest percent.—90. Deputy Grand Master Loud was efficient in his duties as aid to the Grand Master Workman. When the Workmen reached Tenth and Market, the order was given to disperse, and the tired and hungry Workmen went their various ways.

Notwithstanding that a great majority of the members belong to other societies, from the fact that so many preferred to turn out with the A. O. U. W., it shows their esteem for the Order. The only fault that could be found was the want of harmony in regalia, which it is hoped will receive attention from the proper authorities in the near future. As an evidence of this, we heard some of the sidewalk brigade say, when the Workmen hove in sight, here comes the Hibernians. This should not be so. The Workmen should have a regalia distinct from other societies, so that when they do parade in public they will not be confounded with any other.

Grand Master Workman's Appointments.

W. H. Barnes, G. M. W., will make official visits as follows:

Monday, Oct. 3d—Deputy Rector's district, at Oak Leaf Lodge, No. 35, Oakland.

Tuesday, Oct. 4th—Hercules, No. 53, anniversary Saratoga hall, city.

Thursday, Oct. 6th—Dedication of A. O. U. W. hall at Walnut Creek, Contra Costa county.

Saturday, Oct. 8th—Deputy Fleming's district at Berkeley.

Tuesday, Oct. 11th—Deputy Barstow's district at San Rafael.

GRAND MASTER WORKMAN BARNES will officially visit San Leandro Lodge, No. 18, on the 28th of October, and a good time is expected, and all Workmen are invited to attend. The attendance of No. 18 is rather small, but this is fully accounted for from the fact that nearly one-half this Lodge have removed to Benicia lately, but those brothers remaining are alive to the interest of our beloved Order, and will doubtless soon work the membership up to the proper standard.

AN Eastern exchange contains an account of a gentleman who had been proposed for membership, passed examination and elected, and a dispensation had been granted for the conferring of the two degrees at one meeting. The evening arrived but the candidate did not present himself, and before another opportunity offered he was prostrated by sickness and died. The event is noticeable from the fact that death is likely to visit us any moment, and that delays in matters of such vital importance to one's family are dangerous. The old maxim of putting off for to-morrow what can be done to-day s here fatally illustrated.

PRESENTATION.—On Sept. 16, 1881, C. H. M. Curry, sitting P. M. W. of Yerba Buena, was the recipient of a handsome black mesquit gold headed cane, on which was inscribed "Yerba Buena, 14, A. O. U. W., to C. H. M. Curry, P. M. W., 1881." Bro. Frank B. May made the presentation speech in a style that was equal to the occasion. Bro. Curry was taken by surprise and in choice words portraying gratitude answered.

ONE of the Philadelphia Lodges having found out that the restriction against smoking had a tendency to keep the members away from the Lodge-room, abolished the rule, and the result is reported to be that the members take an interest in the Lodge's affairs, and lively meetings are the result.

THE Supreme Recorder's report for July places the total membership of the Order at 102,317; beneficiary received, $140,999.75; disbursed, $143,666.20.

ONE assessment this month, and a good surplus carried over.

American Legion of Honor.

Officers of Grand Council—OSGOOD C. WHEELER, Grand Commander, Oakland; MRS. ABBIE E. WOOD, G. Sec'y., office room 1, Shiels' building, 32 O'Farrell St.; J. N. BESSE, G. Treas., Watsonville.

THE beautiful banner borne in the great procession was the handiwork of Grand Secretary Abbie E. Wood, assisted by one or two lady companions of the Order.

GRAND COMMANDER O. C. Wheeler is expected home about this time. He will visit Washington Council in San Francisco soon after his return, and will probably be accompanied by other Grand officers.

THE proceedings of the first session of the Grand Council are in the printer's hands and will be ready for distribution within a very short time.

COMPANION Miss Eva Coon was installed Secretary of Metropolis Council last week by District Deputy Grand Commander J. W. Kinsley.

OFFICIAL CIRCULAR No. 1 has been issued from the Supreme Commander's office as follows:

We thank the Companions for the confidence reposed in us, and yet feel the responsibility in its fullest sense.

The third annual session met at Hall of College of Physicians and Surgeons, Essex street, Boston, Mass., August 23, 1881, and consumed five days of arduous labor. Each representative made personal sacrifice, each studied the good of the Order, and all separated with congratulations, and prayers for the continued success of our noble Order.

The following are the officers-elect for the year ending fourth Tuesday of August, 1882: Medical Examiner-in-Chief, Darius Wilson, M. D., 5 Temple Place, Boston, Mass.; Supreme Commander, Jacob Roberts, M. D., 2033 Green street, Philadelphia; Supreme Vice-Commander, Frank J. Smith, Houston, Texas; Supreme Orator, A. Warnock, 268 W. Thirty-fourth street, New York, N. Y.; Past Supreme Commander, Darius Wilson, M. D., 5 Temple place, Boston, Mass.; Supreme Secretary, Miss Nettie Mosher, 442 Washington street, Boston, Mass.; Supreme Treasurer, J. M. Gwinnell, Newark, N. J.; Supreme Chaplain, Rev. O. C. Wheeler, D. D., L. L. D., Oakland, California; Supreme Guide, Thos. H. McGechin 9 S. Gay street, Baltimore, Md.; Supreme Warden, Hon. L. S. Ebright, M. D. Akron, Ohio; Supreme Sentry, N. R. Morse, M. D. Salem, Mass.

Supreme Trustees—A. E. Keyes, M. D., Mansfield, Ohio; M. F. Hundall, Richmond, Va.; Chas. K. Darling, Boston, Mass.

Finance Committee—M. Nisbet, 808 Walnut street, Philadelphia, Pa.; D. B. Kimball, Salem, Mass.; A. Warnock, 268 W. Thirty-fourth street, New York.

Committee on Laws—Geo. L. Hill, Marshall, Texas; T. H. McGechin, 9 S. Gay street, Baltimore, Md.; F. A. Benson, Binghampton, N. Y.

Committee on Appeals and Grievances—Gen. O. C. Horne, Hawkinsville, Ga.; E. M. Crawford, 5 Temple Place, Boston, Mass; W. P. Gannett, 12 P. O. Square, Boston, Mass.

Committee on Secret Work and Journal—Chas. E. Meyer, 1717 Chestnut street, Philadelphia, Pa.; Rev. Wm. Bradley, Jamaica Plain, Mass.; Prof. Geo. W. Blish, 50 Temple Place, Boston, Mass.

The amended laws take effect at once. Ten copies of the proceedings will be sent to each Grand Council and two copies to each Subordinate Council. The amended laws will be compiled and printed as soon as possible, and two copies mailed to each Subordinate Council.

There were six copies of Ritual submitted for competition for the prize of $200, offered by Supreme Council of 1880; neither of which meeting the approval of Committee on Ritual, the Supreme Council has offered another prize of $500 for the Ritual submitted and approved by Supreme Council of 1882. Until the adoption of a new Ritual, the present one will be the only one recognized.

By a change in the laws, the annual election of Medical Examiner is abolished. Each Medical Examiner of the Order will be required to make application as per form 1, and be commissioned by Supreme Commander as Medical Examiner of the Order. New Councils at their institution, will select a commissioned Medical Examiner. Councils already instituted will see that their present Medical Examiner is thus commissioned, or select one that is.

The Supreme Council will furnish sets of supplies to all Grand Councils free of cost. The Deputy Grand Commanders will apply to the Grand Secretary for the same. Subordinate Councils, working under Supreme Council jurisdiction, will apply directly to the Supreme Secretary for supplies. One common fee to Deputy Supreme Commanders and Deputy Grand Commanders has been agreed upon. All Deputy Supreme Commanders, to institute new Councils, desiring their commission renewed, must make formal application to the Supreme Commander and file new bonds.

All communications from Grand and Subordinate Councils to the Supreme Commander,

Supreme Secretary and Supreme Treasurer, must be attested by the signature and special address of the proper officer, with seal of Council affixed. Otherwise no attention will be given them.

We congratulate each Companion on the unprecedented progress of the Order, and pray for a hearty and common reciprocity with all co-laborers in future working for the Order.

Given under my hand, and the seal of the Supreme Council, the day and year above mentioned. JACOB ROBERTS, S. C.

Attest: NETTIE F. MOSHER, S. Sec'y.

ROYCBIV CHOSEN FRIENDS

Grand Officers.—CHAS. W. BRYANT, G. C., San Francisco; JAMES M. BAIRD, G. A. C., San Francisco; JOHN W. SHAFFER, G. Treas., S. F.; S. DANIELEWICZ, G. Rdr. office 601 California street, S. F.

THERE are just 50 councils of the Order in California to-day, which fact speaks volumes in praise of those who have labored in its behalf. The work of spreading the Order has been divided among many earnest hands. The prosperity of other older and larger Orders of similar character, yet excluding ladies from membership, made the work of extending the Chosen Friends comparatively easy, hence the rapidity with which it has grown.

THE Representatives to the Supreme Council, Brothers Patterson and Danielewicz, will leave for Detroit during the first week in October.

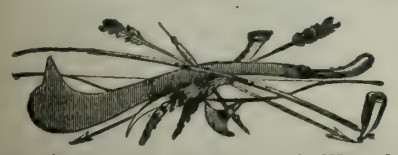
D. MCNEIL has finally resigned as Recorder of Phœnix Council and Professor J. W. Anderson has been elected to fill the vacancy.

HOME COUNCIL meets at Red Men's Hall on Tuesday evening of each week; a visit to this Council always repays one, as their sessions are always interesting, and their membership pleasant and agreeable.

DR. L. J. HENRY, who has heretofore been an active, efficient and faithful worker in the Order, has resigned his commission as Deputy Grand Councilor under circumstances to be regretted. The Doctor is a gentleman of a keen sense of honor, and could not stand it to be trifled with, as he felt he had been by his superiors in office. We trust he will not allow his interest to relax, nor his hand to grow idle, as he is one of those members who give character to the institution.

AT THE last meeting of Bohemian Council, No. 23, O. C. F., the following preamble and resolutions were adopted by a rising vote:

WHEREAS, That noble and gifted nature, whether on the tented field, the council of the nation, or in the exalted position as executive of the Republic, was ever wont to manifest the truest devotion for the country's welfare; therefore, be it



Resolved, That while we bow with humble submission to the will of Almighty God, who for some wise purpose has seen fit to allow this dire calamity to be inflicted upon us, we, as members of Bohemian Council, No. 23, O. C. F., in common with our fellow citizens, desire to render our tribute to the many virtues and noble qualities of our deceased President, James A Garfield, and to unite in the expression of a nation's sorrow over this sad bereavement; and be it further

Resolved, That we tender to the family of the deceased President our sincere and heartfelt sympathy in this their sore affliction. Be it further

Resolved, That this preamble and resolutions be spread upon the minutes of our Council.

Improved Order of Red Men.

Officers of the Great Council.—J. A. FILCHER, Great Sachem, Auburn; J. F. PINKHAM, Great Senior Sagamore, Oakland; C. E. Spencer, Great Junior Sagamore, Sacramento; EUGENE LEHE, Great Prophet, Stockton; H. S. WINN, Great Chief of Records, S. F.; ADAM SMITH, Great Keeper of Wampum, S. F.

GREAT CHIEF OF RECORDS, H. S. WINN, has removed his office to No. 122 Geary street. The Chief is one of the most accommodating Grand Officers in this State, and we are placed under many obligations to him for favors rendered and information imparted, in our efforts to advance the cause of the "Big Injuns."

GREAT REPRESENTATIVES Johnson and Chase are due back to this reservation soon. Their duties as members of the Great Council of the United States are over for this year.

THE library room of the Red Men on Post street is now one of the most inviting places to spend an hour in the city. It is light and airy, and well stocked with the various newspapers of the day, while the arrangement of the books and shelving are convenient and attractive.

THE Improved Order of Red Men's Endowment Fund Association of California has recently been thoroughly re-organized, a new code of laws adopted, new plans of operation proposed, and in general terms placed in a condition that will not only be pleasing, but attractive to the members of the Order generally. The following constitute the new board of officers: John F. Pinkham, President; A. Andrews, Vice President; H. S. Winn, Secretary; W. M. Betts, Treasurer. Directors, J. A. Filcher, Eugene Lehe, John F. Pinkham, Geo. B. Katzenstein, H. S. Winn, A. Andrews, Wm. Rotrosky, Wm. A. Betts and Hosea Barker. Medical Examiner-in-Chief, Henry M. Fiske, M. D. In our next we will give more particulars concerning this important branch of fraternal endowment.

Native Sons Golden West.

Grand Officers—FRANK J. HIGGINS, D. G. Pres.; San Francisco; H. CLAY CHIPMAN, G. P., Sacramento; GEORGE. B. BALDWIN, D. G. P., Marysville; HENRY LUNSTEDT, G. Sec'y, San Francisco.

ON Tuesday, the 13th ult., the Native Sons gave John H. Grady a serenade at his residence, in honor of his election as Tax Collector of San Francisco. After several tunes had been played the members of the society, some 70 of whom were present, were invited inside, where they partook of the good things provided by Mrs. Grady, occasionally toasting the health of John and Mrs. John in the "nectar of the gods." After the serenade, the whole party repaired to a banquet which had been spread by the directions of the committee at the Southern Pacific Oyster House, Mr. Grady occupying one end of the table, and Mr. A. C. Lutgens, the President of the N. S. G. W., the other end. After the sumptuous supper had been decently interred, Pres. Lutgens opened in a neat congratulatory speech. Bro. Grady replied that he recognized the fact that but for his being a native Californian and a member of the Native Sons, he would to-day have been sailing on the mournful voyage up "Salt river." He felt, and would not forget, his deep obligation to the Sons for their warm fidelity. Ex-Assemblyman Gavigan was called upon, and paid a glowing tribute to Mr. Grady's worth and ability. Mr. Jas. H. Barry, who was introduced by Mr. Higgins as the would-be Supervisor, said that the sting of his defeat was lessened by the election of his friend, Mr. Grady, and earnestly and eloquently spoke of the power for good possessed by the young men, urging them to study the principles underlying our system of government, and then to exercise their influence in the favor of men who will leave it in their hand, when in the course of nature their time comes, unsullied and unimpaired. Mr. Barry then introduced Mr. Frank J. Higgins as the would-be Assemblyman from the Ninth District. Mr. Higgins replied in his usual felicitous manner. Speeches were also made by John E. McDougald, H. Lunstedt, G. Harvey Fairchild, Frank Wisker, Ed. L. Meyer and others. After three cheers for the first native Californian elected to a municipal office, the party adjourned.

CALIFORNIA PARLOR had a very interesting meeting Thurday, September 16th, Pres. A. C. Lutgens presiding. J. W. McCarthy, County Clerk of Stanislaus county, was initiated. After the usual relief and other routine business was transacted, Mr. McCarthy was called upon, and said that he was an old Tuolumnite and a schoolmate of J. H. Grady. He had frequently read of the Native Sons, and at the last session of the Grand Parlor had noticed the familiar names of John Grady and S. L. Terry, to whom he had written for information, as he felt that as a native Californian the Order concerned him. What he had thus learned had stimulated in his heart a strong desire to be "one of us," and now he felt that the fraternal cords had been indissolubly wound around his heart. He proposed within a very short time to organize a new Parlor in Modesto.

FRANK D. RYAN, President of Sacramento Parlor, was also present, and was called upon and spoke, as only Frank can, of the strong hold of the Order upon the affections of the members everywhere, and particularly those enthusiastic, progressive Sons of Northern California. By request, he afterward recited, in his thrilling, eloquent manner, "Sheridan's Ride." Speeches were also made by all the "old standbys," as John McDougald would say.

AT ITS regular meeting, held September 22d, California Parlor, No. 1, N. S. G. W., adopted the following by a rising vote:

"President Garfield is dead!" Ominous telegram! With a dull thud, it falls like a black pall upon the hearts of a family of 50,000,000 mourners. Tongue and pen are arrested in an impotent effort to describe the sorrow that weighs down our heavy hearts. Often has the spirit of our youthful ambitious natures been thrilled by the recital of his glorious career, from the canal-boat to school, through college, the army and Congress, each successive place too small for his great spirit, until elevated to the pinnacle of the ambition of an American citizen; in his whole course always mindful of his duty to his God, his country, humanity and his family; winning from all respect for his honor, esteem for his unfaltering fidelity, and confidence in his rigid Christian integrity. We regard his illustrious career as a conspicuous exemplification of the glorious possibilities that our country offers to her sons, teaching us that the road to greatness is open to the humblest in the land, and stimulating us to emulate his glorious example. In common with all humanity, we deplore and mourn his violent and untimely death, and bow with the resignation of a chastised spirit to the decrees of an inscrutable Providence.

Resolved, That we condole with his bereaved and stricken family, mindful that though all human sympathy may fail to mitigate their grief, they are in the hands of One who will not suffer the waters of bitterness to overflow.

Resolved, That the Native Sons of the Golden West do participate in the funeral obsequies to take place in this city on Monday, the 26th instant.

H. Lunstedt, Frank J. Higgins, F. G. Wisker, Committee.

The Parlor then adjourned out of respect to the memory of James A. Garfield.

THE Native Sons made a very fine showing in the Garfield obsequies, following immediately behind the Pioneers, turning out about 175 members, with flags and regalias appropriately draped. A number of the Sacramento and Oakland Sons parading with them.

THINGS are "booming" in Sacramento Parlor, No. 3. They have now over 110 members, and every meeting shows an increase in the roll of membership. A large number of regalias for members have been added to the already large number, as the increase in membership in the last six months required their immediate addition. New and handsome constitutions in their revised forms have also been procured both by Sacramento and Placerville Parlors.

MARYSVILLE PARLOR, No. 6, has just received its handsome new seal.

PLACERVILLE PARLOR, No. 9, is enjoying a season of prosperity, having received some six or seven applications for admission since its organization in the early part of the present month, and a spirit of energy has been infused into the members by their worthy President, Alderson.

ARGONAUT PARLOR, No. 8, has received its new regalias, and rumor hath it that an elegant banner will be forthcoming ere long.

GRAND PRESIDENT CHIPMAN keeps a fatherly eye on all the Parlors, and is well satisfied with the rapid progress being made in the Order throughout the State. Yours truly, C. E. PARKER, Treasurer Parlor No. 3.

Women at Fifty.

It is absolutely untrue that under tolerably fair conditions, a woman is (if we may repeat that crude phrase) "played out" when she has seen 45. If all goes well, or even not very ill, a woman more frequently than not takes a new departure at about 50. It is preposterous to assume that a woman of mature age is likely to be behind her growing daughters or her growing sons, in effectiveness of intellect, in aptitude for "subjects" new or old, in general brightness and susceptibility. In what might be called "quality," in the French sense of the word, she is, upon the suppositions we have just made, so much the superior being, that if the daughters, and the sons, too, do not feel it, there is something wrong with them. It must, indeed, be granted as a preliminary that there is love between the husband and the wife, and that the young people are good in harness, and above all, in themselves; but with these inclusions, little more is needed. And the battle is to be won along the whole line. A gray hair is a gray hair, a crow's-foot a crow's-foot—and these rarely come to the young; but "certainly," as Lord Bacon says, "it is no marvel, though persons in years seem many times more amiable, *pulchrorum autamnus pulcher*, for no youth can be comely but by pardon, and considering the youth as to make up the comeliness. It is the mistake of giddy adolescence, or sand-blind conceit, to suppose that a woman of 50 cannot be exquisitely beautiful, cannot command a man throughout the whole range of his nature; cannot take up all the gladness of life, and beautifully radiate it again, for him and for others. In all his, we are, of course, leaving out, with a sad heart, the miserable life of the very poor. But even with the poor the general rule holds; and amongst them, some of the pleasantest, brightest, handsomest women are women of advanced maturity, but released from the pressure of the cares and toils which young children bring. Such women may even be observed to take a fresh start in mental growth; they read more, and, mixing more with men, pick up general knowledge, and become more agreeable companions than ever. These remarks become more strikingly true, as we carry our eyes upward in the scale of money and culture. Rahel, who was always ill, wrote at 50 years of age that she felt in most particulars just as she did at 14 or 15; that she had, on the whole, the same opinions and inclinations as at 30, only that the background of her life was richer with gathered experience and well connected thought. She laid stress upon the connectedness, meaning, no doubt, that she could take bird's-eye views better than in early life; and she adds, that at her ripe age a joyful yearning or tendency to look forward had sprung up in her, which was a kind of echo of the feeling of early youth.

Of course, every woman is not Rahel, but it was certainly no fault of hers to expect too much of the young. Why, she asks, should they believe the old? "Wrinkles are no testimony." No; but one may add that they can believe "for the work's sake;" and, in spite of prejudice of nearness, apprehend a little of what Rahel meant, and what is exemplified in the lives and letters of numbers of women of ripe age. Not to quote other ladies of great ability and culture, take a very ignorant old country dame, Wm. Godwin's mother. She puts "succages" for sausages, and had, on the whole, a hide-bound sort of intellect; but what wise, hearty, lively, penetrating letters she writes! The cold Godwin, himself 45, says at her death that he felt as if he had now no one to council him and take care of him. But, to go to a type common enough, something between Dame Durden and Rahel, take the mother of Frederick, in Mr. Coventry Patmore's "Faithful Forever." You may meet her any day in ordinary society. Nothing can be more beautifully wise than her letters; and though it is true that a poet writes the felicitous things for her, yet the poet has something of Richardson's truthfulness. Such a lady had no need to ask for toleration from clever young people.—*The Spectator.*

A NEW WAY OF COLORING THE HAIR.—Dr. D. W. Prentiss, of Washington, reports to the Smithsonian Institute that he recently gave a little girl of that city jaborandi, a Brazilian plant, as a cure for blood poisoning. He was much surprised to find that her hair, which was at first a light blonde, soon began to turn dark, and watched with much interest the darkening process for four months, when it was almost black. He believes that the change was due to the medicine which he administered during that time for the child's blood.

LONDON *Fun*—O'Mulligan: "It's drink, sorr's the curse of ould Oireland. Drink!—that makes a man 'bate' his wife, starve his children, go out to shoot his landlord—and miss him, too, bedad!"

List of U. S. Patents for Pacific Coast Inventors.

From Official Reports for the "Mining and Scientific Press," U. S. and Foreign Patent Agents.]

FOR THE WEEK ENDING SEPTEMBER 6, 1881.

246,747.—MACHINE FOR REFRIGERATING—C. W. Gellett, Oakland, Cal.
246,674.—OVERALLS—H. Heynemann, S. F.
246,614—COMPOUND HYDROCARBON FUEL—J. P. Jones, Gold Hill, Nev.
246,786.—GRATE FOR STOVES AND FURNACES—Thomas Kearns, S. F.
246,682.—TRICYCLE—R. Lorenzo, Summit, Cal
9,863.—OVERALLS—D. Newstadter, S. F. (Reissue)
246,825.—COFFEE POT—Geo. A. A. Giffait, Portland, Or.
246,826.—GASOLINE STOVES—Geo. A. A. Giffait, Portland, Oregon
246,695.—KITCHEN TABLE—C. H. Townsend, Oakland, Cal.
246,840.—WOOD BORING MACHINE—J. M. Trackwell, Skookumchuck, W. T.
246,845.—APPARATUS FOR ILLUMINATING BUILDINGS—J. B. Whitcomb, Berkeley, Cal.

FOR THE WEEK ENDING SEPTEMBER 13, 1881.

246,925.—ORE CRUSHING STAMP MILL—C. H. Baker, S. F.
246,862.—SAFETY ATTACHMENT FOR ELEVATOR—E. B. Bishop, S. F.
247,018.—MIDLINGS PURIFIER—Wm. Crye, Walla Walla, W. T.
247,020.—COMBINED WATER COOLER AND REFRIGERATOR—Geo. W. Deitzler, S. F.
247,021.—COOLING APPARATUS FOR AIR OR LIQUIDS—Geo. W. Deitzler, S. F.
247,022.—REFRIGERATING APPARATUS—Geo. W. Deitzler, S. F.
246,872.—AERONAUTIC APPARATUS AND REGULATOR—E. DeJough, Salem, Oregon.
247,031.—DRIER FOR PAINTS—A. H. Eeverett, S. F.
246,948.—SEAM AND WELT FOR UNITING LEATHER—C. F. Glanville, S. F.
247,072.—MAKING PAPER PULP FROM WOOD—R. B. Lane, Stockton, Cal.
247,080.—BOILER FURNACE—John Mailer, S. F.
246,917.—DEVICE FOR SHARPENING PLOW SHARES—D. F. Spangler, Dayton, W. T.
246,918.—TOE-CALK VISE—D. F. Spangler, Dayton, W. T.
246,919.—APPARATUS FOR PULLING TIRES FROM WHEELS—D. F. Spangler, Dayton, W. W.
246,983.—HAND ROCK DRILL—W. P. Stevenson, Vallecito, Cal.
246,990.—STEAM GENERATOR—J. S. Woolsey, Gilroy, Cal
246,934.—TOOTH BRUSH AND CASE—Arment & Scott, Dayton, W. T.

NOTE.—Copies of U. S. and Foreign Patents furnished by DEWEY & CO., in the shortest time possible (by telegraph or otherwise) at the lowest rates. All patent business for Pacific coast Inventors transacted with perfect security and in the shortest possible time.

To Patrons and Business Men.

In the consolidation of the *Fraternal Record* with the PACIFIC STATES WATCHMAN we have added to our large list of subscribers those of the *Fraternal Record*, which will make the PACIFIC STATES WATCHMAN one of the most desirable papers for advertisers published in this State. Our circulation is general throughout the Pacific coast, a small circulation in many of the Eastern States and among all fraternal and beneficiary societies. As a family and fraternal paper, patronized by a select class of citizens, we offer a portion of our columns to the public, with our increased circulation, without any advance in rates.

Our Agents.

OUR FRIENDS can do much in aid of our paper and the cause of practical knowledge and science, by assisting Agents in their labors of canvassing, by lending their influence and encouraging favors. We intend to send none but worthy men.

G. W. MCGREW—Santa Clara county.
M. P. OWEN—Santa Cruz county.
J. W. A. WRIGHT—Merced, Tulare and Kern counties.
JARED C. HOAG—California.
B. W. CROWELL—Yuba and Sutter counties.
D. W. KELLEHER—San Joaquin, Amador and Calaveras counties.
A. C. KNOX—State of Nevada.
C. E. WETMORE—Alameda county.

Attend to This.

Our subscribers will find the date they have paid to printed on the label of their paper. If it is not correct, or if the paper should ever come beyond the time desired, be sure to notify the publishers by letter or postal card. If we are not notified within a reasonable time we cannot be responsible for the errors or omission of agents.

Traveling Agents.

We want several canvassing agents who will make it their business to solicit subscriptions and advertising for our first-class progressive newspapers. Men of ability and experience can secure good pay and permanent employment. Send references and state your past occupation etc., to the publishers of this paper.

Interesting Statistics.

The production of agricultural implements in this country gave employment in 1850 to 5,361 hands; in 1860, to 12,867; and in 1870, to 23,251. Now the number of hands engaged in this industry is 40,680. Maine now has 282; New Hampshire, 245; Vermont, 495; Massachusetts, 646; Rhode Island, 108; Connecticut, 790; New York, 7,237; Pennsylvania, 3,097; Delaware, 71; Ohio, 10,248; Michigan, 1,938; Indiana, 2,526; Illinois, 7,870; Wisconsin, 2,700; Minnesota, 330; Iowa, 1,104; Missouri, 1,074; Kansas, 261; Nebraska, 81. Ohio has made notable advancement in this industry. In 1860 she had 165 persons employed in it and to-day has 10,248.

Alabama is as large as England, and yet has only 1,000,000 of people to England's 21,000,000. California, with less than 1,000,000 of people, is very little smaller than France with 36,000,000. We do not think Massachusetts overcrowded with 1,500,000, nor Ohio with less than 3,000,000, nor New York with 4,500,000; and yet, if Texas were settled as thickly as New York, its 1,000,000 would grow to 22,000,000; if like Ohio, it would have 21,000,000; if like Massachusetts, it would hold 52,000,000, or more than the whole present population of the Union. There are only 15 States out of the 38 which have each more than 1,000,000 of people, while there are 14 States which have a larger area than England with her 21,000,000. Settled like England, these States would have more than 300,000,000. The States toward which emigration is now mainly setting are Minnesota, Nebraska, Kansas, Texas and Colorado. These about equal Missouri in population, while their area is ten times hers. So, to be evenly populated like Missouri, sparsely populated as that State is, these five should have 29,000,000; and to be settled like Massachusetts, being ninety times as large, they must have 135,000,000, or three times our country's present population. If the whole territory of the Union was settled like New York, it would contain 270,000,000; if like Massachusetts, 560,000,000; and if it reached England's ratio of inhabitants to the square mile, its population would almost equal the present population of the globe.—*Exchange.*

A RESTAURANT keeper writes his own bill of fare, thereby saving the cost of printing. It announces: "Coffy, supe, roste befe, fried hamm, boyled and baked pertaters, fried and could pudden, mins pys, mutting chops, vele culverts, and hasch.

Floor Building.

So few of the floors constructed in new houses are, says the *Building News*, equal to their work, that the attention of architects and builders might be profitably called to the subject. In going over some of the newly-erected houses in the suburbs of London, it is not infrequent that one finds dwelling house floors which have sunken so much in the center as to destroy the comfortable assurance that they are safe. These instances occur chiefly in houses erected by speculative builders, who seem to be under no regulation of any kind in respect of floor timbers. * * * Many practical builders have a conviction that if a timber as a joist has a larger cross section than another it must be stronger. Thus they fancy a piece of timber 8 inches by 3 inches, which equals 24 square inches in sectional area, cannot be so strong as a piece 5 inches by 6 inches which has 30 inches in area. The fact is, the smaller piece is the made up of furniture, though this is generally placed, at least the heavier articles, round the walls of rooms. The space occupied by tables and other objects in the center of a room reduces the available standing area, and thus, for all ordinary floors, 70 lbs. per superficial foot may be calculated for as the full load in extreme cases. Rules founded upon the resistance of beams to rupture are, however, of little use, as the floors may be seriously affected by deflection, and deflection is directly as the cube of the length. In regarding stiffness, the load per foot has been given by one authority as 90 lbs. per foot, including weight of materials. It makes all the difference to place joists an inch nearer, though builders like to give as much interval as they can, for economy's sake. Instead of joists being placed 12 inches apart, it is oftener to find them 13 inches or even 14 inches, and the consequence is a scantling which has been found to answer in a well-built house fails when it is introduced with a greater distance or interval. Then the modern speculative builder's floor is seldom properly stiffened by cross bridging. There is only one row instead of two or more. Of course no practical man will deny the advantage of bridging his floor joists. It helps wonderfully to prevent deflection under a concentrated load, for the joist immediately beneath the load is relieved of direct strain, and the joists on each side take a share of the weight.

"THERE must be lawn order," said the policeman when he mowed his fruit yard.

Tomatoes as Food.

Tomatoes, remarks an authority, are not without some defects as an article of food. They are not, like milk, a perfect diet of themselves, and besides, like most other articles of food, they contain some obnoxious qualities. But they need not be thrown aside on that account. Nature has provided us with such sufficient excretory organs that obnoxious matter in our food, if in moderate amount, is readily cast out, and the body is protected against any material injury. Were it not so, we should be obliged to throw out of our dietary many kinds of food now eaten, not only with impunity, but with advantage. Thus, red cabbage, cherries and peaches contain prussic acid, which is a deadly poison when taken in sufficient quantity. The very small amount of the poisoning acid these vegetables contain is cast out of the system without any material injury to the person using them. A positive good may actually be derived from the use of food containing some such foreign matter, by way of giving increased activity and strength to the excretory organs from their exercise in casting such foreign matter from our bodies, provided the quantity is not so great as to overburden them. Since we are all the time liable to take in our food substances the tendency of which is harmful, a good development of efficiency in our excretory organs is necessary to protect us against the pernicious effects which might otherwise occur. Almost every kind of grain and fruit in use contain more or less things which in a larger amount would prove hurtful. Unless we closely study our food, we are taking them in when we little suspect it. A Frenchman, not many years ago, discovered a substance in wheat bran, under which the high heat used in baking, dissolved out and spread over the crumbs of bread, of which bran forms a part, and discolored it, and hence the brown stain peculiar to graham bread. But from this discovery such bread has not been rejected, but continues to be accounted among the most wholesome kinds of food. Rye is seldom used without containing more or less ergot, but rye bread is also reckoned among the most healthful. Tea contains tannic acid, apples contain malic acid, lemons and oranges citric acid, no one of which is used either in nutrition or respiration, but they only become objectionable when used excessively. —*Leeds Mercury.*

SILVER IN THE ARTS.—A circular has been prepared by the Mint Bureau for the purpose of ascertaining the amount of gold and silver used in manufactures and the arts in the United States during the last fiscal year. It will be forwarded by mail to manufacturers, with a request that they fill up a blank form which will be inclosed, calling for the amount of United States coins melted and worked up, fine bars used, and foreign coin, dust and old manufactured articles made into new work. Nearly 3000 answers were received from persons addressed with a similar object in view last year, which showed that there had been an aggregate of $12,198,363 in gold and silver used in the manner indicated during the fiscal year 1880.

TO EXTRACT OIL FROM HERBS.—The volatile oils are generally obtained by distilling in a deep narrow retort the articles along with an equal weight of water; but some substances that give out their oil with difficulty are first soaked for twenty-four hours in twice their weight of water, to each gallon of which one pound of common salt has been added, by which its boiling point is raised, and consequently the oil comes over more readily. The distillate separates into two layers, the water being drawn off and returned to the retort, and this is repeated until distilled water ceases to come over mixed with oil. The rectification of the oil is performed without water, by the careful application of heat, just sufficient to cause them to flow over pretty rapidly, so that they may be kept heated for as short a time as possible.—*Scientific American.*

COMPOUND OXYGEN — NOT A DRUG

A NEW TREATMENT for Consumption, Asthma, Bronchitis, Catarrh, Dyspepsia, Headache, Debility, Neuralgia, Rheumatism, *and all Chronic and Nervous Disorders.*

ACTS DIRECTLY upon the great nervous and organic centres, and *cures by a natural process of revitalization.*

HAS EFFECTED REMARKABLE CURES, which are attracting wide attention.

HAS BEEN USED BY Rt. Rev. John J. Keane, Bishop of Richmond, Va., Hon. Wm. D. Kelley, T. S. Arthur, and others, who have been largely benefited, and to whom we refer *by permission.*

IS STRONGLY ENDORSED: "We have the most unequivocal testimony to its curative power from many persons of high character and intelligence."—*Lutheran Observer.* "The cures which have been obtained by this new treatment seem more like miracles than cases of natural healing."—*Arthur's Home Magazine.* "There is no doubt as to the genuineness and positive results of this treatment."—*Boston Journal of Commerce.*

THE OXYGEN HOME TREATMENT contains two months' supply, with inhaling apparatus and full directions for use.

SENT FREE: a Treatise on Compound Oxygen, giving the history of this new discovery and a large record of most remarkable cures. Write for it. Address

ADMINISTERED BY INHALATION. Drs. STARKEY & PALEN, 1109 and 1111 Girard St., Philadelphia, Pa.

Depository on Pacific Coast.

WE HAVE ESTABLISHED A DEPOSITORY OF OUR COMPOUND OXYGEN HOME TREATMENT at San Francisco, Cal. This will enable patients on the Pacific Coast to obtain it without the heavy express charges which accrue on packages sent from Eastern States.

All orders directed to H. E. MATHEWS, 606 Montgomery street, San Francisco, Cal., will be filled on the same terms on which we fill orders sent directly to our office in Philadelphia.

Patients ordering from our depository in San Francisco, should, at the same time, write to us, and give a statement of their case, in order that we may send such advice and direction in the use of the Treatment as their special disease may seem to require.

Arizona Apaches.

Now that the Apache Indians of Arizona are brought prominently before the public consequent upon the war in that Territory, the illustrations upon this page will be of interest. These Indians are known everywhere as among the worst, the most treacherous and relentless of the Indian race. Their raids have brought grief to many travelers or settlers in their domain, and their bad name has been spoken with execration in many quiet neighborhoods at the East as their murders have robbed peaceful firesides of those who have gone out on ventures or in the service of the country.

The Apaches are of medium size, physically quick and active, and are capable of enduring great hardships. Their muscles of locomotion have been developed to the fullest extent, and they are capable of moving with great rapidity. Intellectually they are very shrewd, have good command of language, are quite witty and fond of joking. It is related that ex-Gov. Safford was present at the first attempt to make a general peace between them and the whites and the friendly Indians. The conference lasted two days, and the chiefs who spoke for the Indians argued their points with great ingenuity, far excelling in shrewdness the tame Indians.

AN APACHE CHIEF.

APACHE SQUAW WITH PAPPOOSE.

The greatest war chief the Apaches ever had was Cochise. He never was whipped in a fight, and was a natural born chief. He was kind to his men, and never tasted food until they were first supplied. But he exacted in return implicit obedience to his commands, and a very slight deviation cost the offender his life. He had no more hesitation in plunging his spear through the heart of one of his own men, than in killing an enemy in battle. He was a man of great energy, of superior ability and firmness of purpose, and was generally faithful to his promises. He was tall, straight and commanding in appearance, and his features were regular with a placid, though rather sad countenance. He rarely ever smiled, and was thoughtful and studied in all his expressions. A writer talked to him of the superior advantages of civilization, but he replied, "I am too old to adopt new customs." He had captives with him who could speak and read the Spanish language and he was well advised of everything the newspapers said about him. He expressed a desire that his children should learn to read and write, "but of us old people," he said, "you can make nothing of us but wild men." He died a natural death about five years ago. During the last three years of his life he and his people lived at peace with the citizens of Arizona, but carried on a relentless war against the Mexicans across the frontier.

Since the Apaches have been brought on the reservation and have got acquainted with civilization, they have undergone considerable change. They have commenced to labor, and many of them seem desirous of earning their own living. The events of the present outbreak, however, show that the old wild spirit is still dominant. They have for several years been self-governing; the police duties have been entirely performed by men belonging to the tribe. In one instance an Indian attempted to kill the U. S. Agent at the reservation, but was almost instantly killed himself by his brother, who was acting as a policeman.

By Indian custom the woman is the property of the man. When an Indian desires to marry, he purchases his wife from the father. A man is allowed as many wives as he is able to purchase. She is thus his property to do with as he pleases. He can beat her at will, and even kill her if he so inclines. Of course she is treated according to the disposition of her husband. Some are kind and indulgent, while others are brutal and cruel. There is nothing in the Indian custom to which they cling with more tenacity than this supreme power over their wives; and no Indian, however unjust or cruel another may be, ever thinks of interfering to protect her; and the sentiment of a whole tribe has often been united against the efforts of agents who have tried to correct these abuses.

But the Apaches with their barbarous customs must go the way of all the historic tribes who once inhabited the now prosperous States east of the Rockies; and while one can but feel commiseration for their utter extinction, the happy and prosperous homes which will be founded in their hunting grounds, must compensate them for their spoilation.

HEALDSBURG, No 31, whose celebration was postponed on account of the death of the President, will hold a public reception October 27th. They have a live Lodge of Workmen up there, and a grand time may be expected.

AFTER a full discussion of the question of paying sick benefits by Bernal Lodge at its last meeting, it was decided not to incorporate this provision in the by-laws. It seems to be the general opinion that this feature will prove an element of weakness.

The Law's Jugglery.

One of the most prominent matters forcing itself upon the attention of the people is the legal hair-splitting taking place in the various courts of the country. When a person is now placed on trial for some crime committed against society, and has the money wherewith he can hire lawyers skilled in the fine points of the law, the chances are as ten to one that person will never be convicted. It would seem as if the more desperate the case the more likely will it be that counsel will endeavor to hide its enormity by legal technicalities, and thus try to shield their clients from the consequences of their wrong-doing. The lawyers, to a certain extent, cannot much be blamed for striving to do all in their power for their clients. They are hired for this purpose, and cannot well help taking advantage of every point. The principal trouble lies with a too complaisant court.

Courts are supposed to be formed for the protection of the people and not for the protection of criminals. Whatever power they have is derived from the people, and when they seek to abuse that power the source from whence it is derived will surely have something to say about the matter. There is such a thing as carrying this juggling with the law a little too far. A suffering people may have its confidence so far impaired in the correct administration of justice as to resort to heroic methods to remedy the evil. This would be an event greatly to be deplored.

All good people should unite and try to bring the courts of the country to a proper sense of their duty to the people. If one set of judges are negligent of their duties, then the people should see to it that they are deposed, and men of known probity chosen in their stead. Old Californians well remember the scenes that were enacted when justice was weak in early days. It was then found almost impossible to convict a criminal. We do not want to see a repetition of these days. A little common sense let into judicial reasoning would be a good thing, and thus make our courts what they should be—the pride of every citizen.

THE *Pioneer* has an item stating that there are about 420 Workmen in the two Lodges at San Jose, and that the membership is constantly increasing.

THE first Lodge of the A. O. U. W. has recently been established in Greenbackville, Accomac county, Virginia.

Home Miscellany.

The Wheel Goes Round.

Though daily we may plan and plot,
Each day we are sure to find,
To our distress, that things are not
Exactly to our mind;
And useless 'tis to grieve and fret,
Or meet our fate with frowns,
For life was never perfect yet
Without its ups and downs.
The wheel goes round and round;
The wheel goes round and round;
And those who now are at the top
Will soon be on the ground;
And those who at the bottom lie
Will then be at the top;
For so the wheel goes round and round,
And round, and will not stop.

To-day my neighbor soareth high
On fortune's favoring breeze;
His wants abundant streams supply,
His life is one of ease;
His cup of pleasure and delight
Seems sparkling to the brim;
The sun is on his path so bright
That many envy him.
And yet the wheel goes round;
The wheel goes round and round;
And those who now are at the top
Will soon be on the ground;
And those who at the bottom lie
Will then be on the top;
For so the wheel goes round and round,
And round, and will not stop.

Some labor hard from day to day
To till the stubborn soil,
While some from morn till evening gray
Reap rich reward for toil;
And those who in their early youth
Escape much grief and care,
May, when old age creeps on in truth,
Life's heaviest burdens bear.
The wheel goes round and round;
The wheel goes round and round;
And those who now are at the top
Will soon be on the ground;
And those who at the bottom lie
Will then be at the top;
For so the wheel goes round and round,
And round, and will not stop.

— *Josephine Pollard.*

Peachy Peay.

The annual check had come from Cousin Winamaker, and Mrs. Caldwell and her daughters were discussing where they should go for the summer. Mrs. Caldwell was a widow with but a small income, and Mr. Winamaker was a millionaire.

Mr. Winamaker himself, though a widower, was still in the prime of life, and eminently handsome; and Mrs. Caldwell, perhaps, would have preferred his hand to his check; but she knew this was a hopeless wish.

"So kind of Cousin George," she said, "And now, girls, where shall we go? I am tired of Saratoga and Long Island. What do you think of a quiet country retreat somewhere?"

To a quiet country retreat, after some discussion, it was resolved to go. The place selected was a farm, up among the hills, belonging to a well-to-do farmer, known as Grandfather Tole. Aunt Phœbe, Grandfather Tole's sister, had rather opposed the taking of boarders, as she opposed everything that was novel; but Chloe, the eldest of the granddaughters, who was the Jupiter, had spoken up promptly. "Why not?" she said. "It will stir us up and give Maggie some idea of great folks, for I am told these Caldwells are very fashionable. Let us have them, by all means." Maggie was Chloe's younger sister, and the pet and beauty of the family; and when she, too, pronounced in favor of the scheme, the thing was settled. So the Caldwells came—mother and daughters.

"They're not stuck up a bit, if they did come from below," said Aunt Phœbe, when tea was over. "Appear just like our sort of folks."

The Caldwells were equally pleased.

"Let's stay here always," said Mabel, the younger daughter, to her mother; "it is so beautiful in the country. I hate the city."

It really was very pleasant at the old farm house those early summer days. There was a tender green on field and tree, such blossom and scent; such sparkling mountain streams; such wonderful moonlight. The Tole family, too, were so pleasant. Maggie was the life of the house. She was so full of fun and was so obliging. "So cultivated, too," said Mabel, who had fancied that farmers' daughters must be ignorant. "Why, she has read more books than I have, ma!"

But as the summer advanced and the days grew hotter, and things lost their novelty, the fickle Mabel began to be less enthusiastic about the country.

"Always the same milk and fruit, always the same drive," she said. "And Maggie has so much to do now that she can't be with me like she used to. I'd rather a thousand times be in town. It is so dreadfully stupid here, with not so much as a donkey cart going by. The musquitoes are ever so much worse than at home. There we have bars, and there are more people, so they needn't bite just us all the time. And the flies are awful."

In the midst of her grumble there came a smart rap on the door, and was directly pushed open by a little old woman, who dropped a brisk little courtsey on the threshhold, and then stepped in. She was dressed in an old-fashioned "short-gown and petticoat," and wore on her head a huge green silk affair, fashionable 30 years ago under the name of "calash," and bearing close resemblance to a chaise top. Away in under this monstrous bonnet was the wide frill of a white muslin cap; and a pair of colored iron-bowed glasses covering a pair of twinkling black eyes. The old woman carried on her arm a covered basket, and in her hand a great bouquet of field lilies, jewel-weed, golden rod and clematis.

"Miss Peay, Miss Peachy Peay," said she, dropping another courtsey; "I called to fetch you a handful of my sopsovine apples. My tree is early, and I thought maybe you hadn't had a taste of apples yet this year. And here is a parcel of blows I picked as I was a coming. Mebby you will like them, too. They are considerably pretty."

As she spoke, Miss Peay opened her basket and took out a dozen smooth, red apples, fragrant and fair.

"Oh, how nice! Thank you ever and ever so much!" cried the Caldwells, in a heartfelt way. "Do stop and sit with us awhile."

"Yes, I was a meaning to," returned Miss Peay. "I live over to the cross-roads, a good bit from here; but I rode with my brother Philip as far as the turn of the road. He brought his grist to the mill here, for he thinks Cooley grinds better than the man does at our place. And he had one or two arrants at the store; so I don't need to be back to the turn under half an hour or such a matter."

"And you live with your brother?" asked Mrs. Caldwell.

"Oh, yes! Him and me, we never, ne'er a one of us married, and we've always lived together. We was twins, but we arn't any alike. You would not think we was anything to each other."

"Is it on a farm like this where you live?" asked Mabel, forgetting her discontent at once.

"Something like," returned Miss Peay. "My brother, he carries on the outdoor work and I keep house for him."

"Do you do all the work your own self—every bit?" asked Mabel, in a tone of pity and wonder.

"La, yes, Miss; I hope so; and I have a good bit of time left for my knitting. I knit 25 pairs of white muslin mittens and 25 pairs of feeting last winter. Mr. Call, to the brick store takes them, and pays one-half the money and one-half the goods."

"Feeting! What are feeting?" asked Mabel.

"Feeting! Why, don't you know? Men's socks or stockings, or whatever they call them. I finished off a pair this morning."

"Oh, mother! exclaimed Mabel. Can't I get a pair of Miss Peay's feeting, and send to Mr. Winamaker."

Mrs. Caldwell smiled; and the quick black eyes under the calash caught the smile and the thought behind it.

"'Tisn't likely," said she, "my homespun, blue yarn would be suitable for a city gentleman, but I would send him a taste of my sopsovines in welcome, if there was a chance."

"Oh, yes!" cried Mabel, "do send him some apples! We are just sending a box of ferns and mosses for his aquarium, and there is plenty of room."

"Send them, to be sure," answered Miss Peay, opening her basket again, and as though it had been the widow's barrel that never lacked its handful, producing another dozen of smooth, red apples, fragrant and fair.

Miss Peachy Peay went away presently with another brisk little courtesy. But the effect of her visit lasted longer. It even outlasted the apples. Mabel's good nature continued all day, and as she occupied herself filling a letter to Mr. Winnamaker with a picturesque and enthusiastic account of the visitor.

But that was not the last of the visitor. She came again upon another day, when Mabel was in the midst of another fit of dissatisfaction.

This time Miss Peay brought some early blackberries and a great handful of water-lillies; and she came in a dress still odder and older-fashioned, with the same little dipping courtesy, and the same quaint cheerfulness of manner.

"Mr. Winnamaker was ever and ever so much obliged for those apples, Miss Peay," cried Mabel; "and he says if you are as nice as your apples, he wishes we would take you home with us. Will you go, Miss Peay? Now please do."

"Home with you!" exclaimed Miss Peay, her black eyes shining with mirth. "A plain country body like me would make a pretty figure in the city! And I should be worried to death by all the noise and buz. Somebody a-going by in the road pretty much continually, I expect; and a fire likely enough somewheres about, almost every day. But I thank him and you, too, for the invite."

"Oh, Miss Peachy, you must go! Mr. Winamaker wants to see you awfully. He truly does," persisted the inconsiderate child.

Miss Peachy laughed heartily; but before she had time to do more, the village coach drew up before the door, and Mr. Winamaker himself got out.

At that sight Mrs. Caldwell rushed eagerly upon the plazza, followed by all the children; and Miss Peay was left alone in the room, with no way of escape but through the little square entry, where Mr. Winamaker stood paying the driver, and shaking hands with the Caldwells.

She had no idea of meeting him, though, and so she darted across the room to seek an exit through the window. But her dress caught on an ugly nail that Mabel had driven in the casement to hang thistle-down upon.

"I am awfully glad you've come. I do love you so!" she heard Mabel say; then the party began to move toward the room.

Miss Peachy Peay at this made another effort to escape; but the nail held firmly to the stout chintz gown that couldn't tear, for alas! it was not woven on our degenerate looms.

"Miss Peachy Peay is here this minute, Mr. Winamaker, and so you can see her," continued Mabel, with a lisp that she put on, like a state dress, upon a state occasion.

Miss Peachy Peay at this struggled still more fiercely, but still the nail and chintz refused to part company. And it was this astonishing tableau that presented itself to Mr. Winamaker's eyes as he entered the room.

"Permit me, madam," said he, coming forward politely.

At that instant the gathers of the gown gave way, and at the same time the green calish and iron-bowed glasses fell off, and down floated a mass of fair hair, and up looked a sweet, girlish face in a pretty flush of girlish shame.

Mr. Winamaker had only an instant look, for as soon as she felt herself released, Miss Peachy Peay disappeared around the corner of the house never to return.

"Oh, mamma! what a trick has been p'ayed on us," cried Mabel. "Did you know it was Maggie all the time? I didn't dream it.

Mamma smiled with wise superiority.

"Country life gets dull sometimes, and we have to amuse ourselves with all sorts of travesties," said she, in a side apology to Mr. Winamaker.

As to poor Maggie, she would gladly have hidden her diminished head during Mr. Winamaker's stay; but that was not possible. The servant who was to have been such a family relief never came, and Maggie was both chamber-maid and table-waiter. But when she appeared that night with his cup of tea, Mr. Winamaker gave no sign of recognition. So by degrees the hot color burnt itself out on her cheeks, and she quite recovered her tranquility. Nevertheless, he noted every look and word and gesture, though so quietly that even Mrs. Caldwell's observant eyes did not see it.

So that, for once in her life, she was taken unawares when, at the end of two weeks, Mr. Winamaker led her to the arbor at the foot of the garden for the sake of asking her advice, as she said, and began to ask it by announcing his intention of adopting Maggie Tole as his daughter.

"My advice!" thought Mrs. Caldwell, curling her lip a little. "He is past advice, and a good way past it. I have seen for two days which way the robin was going to fly."

But outwardly she was sweeter than honey and smoother than oil.

"How nice!" she said, heartily, yet, as a woman would have perceived, with an undertone of disapprobation. "A capital idea," she continued, after a reflective pause, "only—I doubt if her grandfather would part with her. And then she is rather old for adoption—22 at least, I fancy."

"Twenty-two!" repeated Mr. Winamaker, aghast.

To be sure! What had he been thinking of. Whatever it was he evidently thought of it no more, for, though he staid another two weeks, he never spoke of adopting a daughter.

Neither did he at Christmas when he came to Cranberry, to see how the country looked in its robes of transfiguration, white and glistening. Nor in the early spring-time, when he came for no reason at all that Aunt Phœbe could discover.

"Unless to see about getting board for next summer; and I should 'most thought he'd a wrote for that, and not be to the cost of a journey down here," said she. "Look here! I wouldn't go in the parlor—there's folks there—that New York gentleman, Mr. Wagonmaker. Likely he wants to see your pa on some business or other," she added, as Maggie came down the stairs, looking as fair and fresh as a daisy.

She went right on, however, in spite of Aunt Phœbe's warning, and as soon as she opened the parlor door, Mr. Winamaker came forward, and, bless you, kissed her!

"I want to know—" ejaculated Aunt Phœbe, opening her eyes.

She did know, and soon, for though Mr. Winamaker still said nothing about adopting a daughter, Maggie Tole, before the water-lilies were in bloom, went to live with him in his beautiful home in the city.

And when she went, packed away in the choicest corner of her trunks, among white satin and lace and muslin and orange flowers, was a green calash.

"In memory," said the happy bridegroom, "of Miss Peachy Peay, who first introduced me to my wife."

GIRLS, don't be in a hurry to get married. If you are but 16, don't allow such an idea to get into your head for at least four years. Don't even run the risk of it by permitting any young man to get as far as the proposing point. Fight him off, and make him wait or go away to somebody who is ready. Don't live under the impression that you must accept the first lovesick youth who proposes. Be patient, deliberate and sagacious. There is a world of happiness for you between 16 and 20. The world would be a dreary old waste if it were not for the sweet faces of young girls with their piquant sayings and melting smiles. After you have reached 20, it would be well to consider the matrimonial problem with some seriousness.

A YOUNG man at Keene, N. H., licked 200 postage stamps and was badly poisoned. The mucilage contained corrosive sublimate. A clear case of star contractors trying to reduce the males.

Who Are the Ladies?

In his address to the young women who competed for the premiums offered for culinary achievements at the State fair the President, J. McM. Shafter, said:

I do not think that baking a loaf of bread is the highest duty of a girl, but I do think that to become an accomplished housewife is not only one of the first, but one of the most imperative duties of women; and it is to direct attention to, and to create in you a belief of this fact that I offer you this premium.

I have calle you ladies. What is your title to this appellation? There are titles of birth, place, honor and worship; these are of right. There are also titles of courtesy, and in this country lady is one. It is true that there are some who strive to confine this title to those esteemed or the highest in social position. But this assumption is denied by most, and the title is generally applied to all respectable women of tolerable manners. But I feel constrained, young ladies, to put you upon a higher plane than most, and to assert for you the highest and most time-honored claim to this honorable name. Indeed, you alone inherit it from that time when the memory of man runneth not to the contrary. Some hundreds of years before our era the Greeks and Romans made large conquests in Asia, the birthplace of the human race. They brought back to Europe the spoil of nations, captives, theology and the productions of nature, including animals, fruits and grain. It was in this way that wheat among its agency was diffused throughout Europe, and soon furnished bread for all. While the warlike men from the north of Europe were making their excursions by land and sea, the mistress of the household cared for the wild brood which remained. She prepared the stores of hard bread which the men carried away, and welcomed their return with a full supply of the staff of life. In their boisterous banquet, from her own baking she caused a manchet of bread to be placed at each seat, or sent the loaves of bread around in baskets to the feasters. To mark her high office she was denominated *ladie*, the breaker, dispenser, and, with slight assumption, the maker of bread. While we may, out of our magnanimity and courtesy, allow this word to be used by those who have not of courtesy, but of right—and do not forget either, it is to be retained by practicing its virtues and its art—I have caused the legend Bread Maker to be engraved upon this piece of plate, and I trust the lady, Miss Clara A. Murphy, 17 years of age, a resident of Brighton, county of Sacramento, into whose hands I now place it, will always retain and exhibit it as evidence of actual merit and honorable distinction.

A Mother's Influence.

Wendell Phillips related the following in an address a short time ago: In a railway car, once, a man, about 60 years old, came to sit beside me. He had heard me lecture the evening before on temperance. "I am master of a ship, sailing out of New York, and have just returned from my fiftieth voyage across the Atlantic. About 30 years ago I was a sot; shipped while dead drunk, as one of a crew, and was carried on board like a log. When I came to, the captain sent for me, and asked me: 'Do you remember your mother?' I told him she died before I could remember anything. 'Well,' said he, 'I am a Vermont man. When I was young I was crazy to go to sea. At last my mother consented I should seek my fortune in New York.' He told how she stood on one side of the garden gate and he on the other, when, with his bundle on his arm, he was ready to walk to the next town. She said to him, 'My boy, I don't know anything about the towns, and I never saw the sea, but they tell me those great towns are sinks of wickedness, and make thousands of drunkards. Now, promise me you'll never drink a drop of liquor.' He said, 'I laid my hand in hers and promised, as I looked into her eyes for the last time. She died soon after. I've been on every sea, seen the worse kinds of life and men—they laughed at me as a milksop, and wanted to know if I was a coward. But when they offered me liquor I saw my mother across the garden gate, and I never took a drop. It has been my sheet-anchor; I owe all to that. Would you like to take that pledge?' said he." My companion took it, and he added: "It has saved me. I have a fine ship, wife and children at home, and have helped others." How far that little candle threw its beams! That earnest mother saved two men to virtue and usefulness—how many more He who sees all can alone tell.

A YOUNG lady was sitting with a gallant captain in a charmingly decorated recess. On her knee was a diminutive niece, placed there *pour les convenances*. In the adjoining room, with the door open, were the rest of the company. Says the little niece, in a jealous and very audible voice, "Auntie, kiss me too." Any one can imagine what had just happened. "You should say twice, Ethel dear; two is not grammar," was the immediate rejoinder. Clever girl, that!

THE electric light may be brilliant and all that sort of thing, but there's nothing like a tallow candle for dropping grease all over the carpet.

For our Boys and Girls.

Our Puzzle Box.

Numerical Enigma.

I am composed of sixteen letters.
My 3, 8, 4 is an instrument for propelling a boat or other small sailing vessel.
My 5, 11, 16, is an intoxicating beverage.
My 13, 15, 8, 14, is an animal.
My 14, 3, 12, is a weight.
My 9, 10, 2, is a personal pronoun.
My 10, 15, 1, is a filthy animal.
My 7, 8, 5, 15, 12, is a vehicle on four wheels.
My 6, is a vowel.
My whole was a distinguished American general.
PAUVUS.

Transpositions.

1 Transpose a band surrounding a cask and form an exclamation.
2. Transpose a small animal and form a pitchy substance.
3. Transpose food and form two or more horses harnessed for drawing.
4. Transpose a European city and form a greater quantity.
5. Transpose to remove the skin and form to harvest.
6. Transpose a boy's nickname and form a conjunction.
JERRY.

Hidden Authors

1. The cow performed a wonderful feat this morning.
2. Red Riding-Hood passed this way last night.
3. Who wrote that beautiful poem?
4. Wasn't the master near the building when it fell?
E. H. B.

Decapitations.

1. Behead a weapon and leave a kind of fruit.
2. Behead a kind of fruit and leave a plant.
3. Behead a part of the body and leave a kind of wood.
4. Behead a tool and leave an illuminator.
5. Behead a part of the body and leave a conjunction.
PERCY.

Conundrums.

1. What is that whose head and mouth are at opposite extremes?
2. Why is the letter N like the Staits of Gibralter?
MAGNUS.

Cured by Kindness.

"You oughtn't to do so," shouted Willie as the peddler dashed past in his wagon, giving the whip unmercifully to his poor half-starved horse. Another moment in turning the corner the wagon was upset and the horse broke into a run. He ran for a mile or more. The wagon was broken to pieces, and the man thrown out and badly bruised. Next day the "vicious beast" was offered for sale. Willie's father bought him for a low price for use on the farm. It was a foolish bargain, people said, for the horse was quite uncontrollable. Even his owner said he would bite, rear, kick and run away. But Mr. Ely bought the horse to please Willie, whose tender little heart was full of pity for the poor animal. "We will be so kind to him that he won't want to be bad, papa." So they agreed to follow Willie's plan.

Before long Mr. Ely and Willie began to drive the horse. People were surprised at the change in him. "He would go as slow as desired," said the gentleman who told the story, "stop instantly at whoa, follow his master, come at his call and rub his head on his shoulder." What had made the change? Not force! The poor horse had been beaten, kicked and starved before, and grew more and more stubborn. Now he was well fed, well bedded, well watered; not over driven or overloaded, never whipped, kicked or scolded. Kind words were given him, and now and then an apple or a piece of sugar. No gentler or more faithful horse went on the road. Willie's plan had succeeded. The little fellow fairly lived with the horse, and the horse seemed to know he was his best friend. Ben was a favorite with all the family.

One night Mr. Ely was away from home. He had taken Ben early in the afternoon, but when bedtime came he had not returned. Thinking he would not be home that night, the family closed the house and retired.

About midnight, Willie heard Ben's neigh. Jumping out of bed, he ran to the window, and there was Ben at the door without his father. In a few moments the family were aroused, and Willie's brother hurriedly opened the door. No sooner had he done so than Ben turned around and trotted off toward the road. He followed him quickly. Ben lead him a quarter of a mile and then stopped. There Mr. Ely lay on the ground in a swoon. When he was taken home he soon recovered, and told them that as he was riding through the woods, he struck his head against the overhanging branch of a tree and fell from the horse. He was stunned by the blow, and did not remember anything more. After that night Ben was the hero of the village. But there was one strange thing about him, he never forgot either a benefit or an injury. Sometimes when in harness he would see his former master. Then all his old fire would return; his eyes would roll, he would champ and bit fiercely, and show his intense desire to get at his enemy. Only Willie or his father could quiet him then. Ben taught the people of that village more than they ever knew before of the power of kindness. And a good many of Willie's little friends began to pratice his way of treating their dogs and ponies. They found out the surest way to manage them was by kindness.

Humorous.

Chips.

SLIPPERS for evening wear are cut exceedingly low, and the stockings to be worn within them are embroidered in proportion to the expected display.

ONCE they started a girls' seminary in one of the territories. It flourished well, but just in the hight of its prosperity the principal eloped with the whole school.

LEMONADE parties in Bodie! A splendid opening for a coroner, and undertaker. They should each take along a barrel of citric acid and a lemon for baggage.

THE advice of one who had been kicked, and did not care to call the kicker out, though he deprecated a recurrence of the outrage, was, "Sit down whenever you see him."

LIFE is a pack of cards. Childhood's best cards are hearts; youth is captured by diamonds; middle age is conquered by a club; while old age is raked in by a spade.

SENATOR MAHONE has twice been the father of triplets, and an exchange flippantly says that when the children are out in the front yard on pleasant days, his residence is mistaken for an orphan asylum.

SAID one fellow to another: "If I was as flat-footed as you are, I would not be afraid of slipping on the sidewalk." "Yes," was the response, "some people are flat on one end, and some on another." The first chap looked thoughtful and went down the street.

NOW is the winter of impecunious discontent made summer sun of oblivious repose by the new postal regulation about nuisant mail matter. No more can tailors and bakers dun an inoffensive debtor by postal card, for the said inoff. d. can just tell the p. m. to destroy all such agitating nuisances.

Household Hints

GALETTE.—This cake is a great favorite in France. Sift a pound of the best flour, put it in a heap on the pastry board, make a hole in the middle, put into it a pinch of salt and one of sifted sugar, three-quarters of a pound of butter, and a gill of water. Knead the ingredients together, and when they begin to mix sprinkle over by degrees half a gill of water, continuing to knead with the palm of the hand, and when the paste is perfectly smooth make it into a ball and let it lie for an hour. At the end of this time roll out the paste to thickness of half an inch. Mark the edges as for Scotch shortbread, put the cake on a baking sheet, brush over the top with yolk of an egg, and score it in the form of diamonds Bake in quick oven for half an hour, or until the galette is elastic on pressure of the finger.

DAMASCENE ROLL.—Boiled pastry should be prepared with as much care as that meant for baking, the proportions of butter, lard and flour the same. Stew the cherries or whatever fruit you desire, with a little sugar; roll out the pastry into a thin sheet—the thinner the better; spread over a thick layer of the fruit, and then, commencing at one side, roll carefully until all the fruit is inclosed within the paste; punch together at both ends, and tie up in a strong cotton cloth, then drop into a pot of boiling water. The Morello cherry is the best for this purpose, or some other fruit possessing acidity. To be served with sweet sauce.

LIGHT CHOCOLATE CAKE.—The ingredients of light chocolate cake are two cupfuls of sugar, one cupful of butter, three and a half cupfuls of flour, one cupful of milk, one-half teaspoonful of soda, one teaspoonful cream of tartar, the yolks of five eggs and the whites of two. For the frosting use the whites of three eggs, 18 teaspoonfuls of sugar, two squares of chocolate and two teaspoonfuls of corn starch. Melt the chocolate, stir in the beaten eggs, the sugar and the corn starch, flavor with vanilla and put on the cake while hot.

BAKED INDIAN PUDDING.—Take a part of a quart of milk and stir in a cup of Indian meal; put the rest of the quart on the fire, add a teaspoon of salt; when it boils add the Indian meal, stirring constantly for several minutes; while boiling remove from the fire and mix in a cup of molasses, and one and a half of cold milk; bake in a buttered pudding dish four hours, or better, all night in a slow oven; raisins can be put in if desired after the pudding has been baking an hour.

ONION TOAST.—Boil some onions of moderate size, change the water twice in boiling; salt in the last water. When nicely done take out with a skimmer. Make a gravy such as you make for cream toast. Toast slices of bread, lay them in a dish, put the onions on the slices, one on a slice, and pour the gravy over both.

Note.—The onions will cook in half the time if you cut them into 3 or 4 slices before you put them into the water.

CREAM TOAST.—Boil a pint and a half of cream or new milk and thicken with a tablespoonful of flour or corn starch, add a little salt. Toast slices of stale bread quickly, of an even brown on both sides, lay them in the toast dish and dip over them a plentiful supply of the hot thickened cream; add another layer of toast and then more cream.

Health Column.

The Hygiene of Old Age.

At no period of life is a careful observance of the laws of health of so imperious importance as in advanced age. The vital machinery is worn and weakened, the vitality at low ebb, and it is of paramount importance that all unnecessary hindrances should be removed, that every removable obstacle to the healthy performance of the bodily functions should be taken out of the way. Thousands of lives are annually sacrificed through the mistaken idea that hygienic rules which are acknowledged to apply to young persons and adults are not to be observed by those in advanced age. For example, many popular writers maintain that while the use of wine as a beverage by youth and adults cannot be condemned too strongly, it is necessary for the aged, as a means of stimulating the declining forces.

Another writer condemns bathing by the aged because, it is claimed, it uses up the animal heat.

The error of the first theory is apparent when the fact is recalled that stimulating lessens, instead of reinforcing, vital strength, thus weakening the hold on life and shortening its duration. The fallacy of the second theory is equally apparent when we take into consideration the fact that in old age the wastes of the body are greatly increased. The discharges from all the outlets of the body are more heavily laden with organic impurities than during youth and adult age. The breath is laden with the poisonous products of disintegration, and the perspiration with effete matter. It is for this reason that a sudden obstruction of any of these outlets is so speedily followed by fatal results. If frequent bathing is neglected, the skin becomes obstructed and the kidneys are overworked. The urine becomes irritating in character, and inflammation or congestion of the bladder is likely to be the result. We have met scores of cases of irritable bladder in elderly men which could be traced, in a great part, at least, to the neglect of the bath.

Old persons should recollect, also, that the bath is for them particularly necessary as a sanitary measure. As the waste of the body preponderates over the repair, the skin, if unwashed, soon becomes covered with a film of the most intensely poisonous and readily decomposable matter. A few days' accumulation is enough to produce a condition not only in the highest degree detrimental to the individual himself, but offensively injurious to all persons of acute olfactory sensibilities who may be closely associated with him.

It is true that cold bathing may be, and generally is, in a high degree injurious to aged persons; but bathing in water at or near the temperature of the body cannot be more productive of harm than putting on a clean suit of clothes. Cleanliness is enforced by one of the first laws in the "code of health," and is binding at all times, and at all ages. The greatest enemy of health is dirt; and the worst of all kinds of dirt is that which arises from the destructive processes at work in the body.—*Good Health.*

The Improvement of Human Health.

In result of a somewhat large acquaintance with the facts held to indicate the state and progress of "human health," I fear my testimony must be given to show that the improvement effected by science consists in a prolongation of the passive endurance of life, rather than an extension of the period of true vitality, or any increase of the opportunity for good work and real intellectual enjoyment. We may "live" longer, but our lives are not either happier or more useful for the excessive energy recently devoted to the conservation of health, or this inordinate and laborious means taken to avoid disease and death. It may, doubtless, be possible to raise humanity to the level of one of those scientific toys which approximate perpetual motion, but expend their whole force in moving themselves. Whether longevity purchased at the price of passing a life-time in running away from death would be worth having, I must leave to be determined by the judgment of those who set a value on our so-called sanitary progress, which I, for one, fail to recognize.

I think men were happier and better, and lived nobler lives before the pursuit of health and the yearning for longevity became a craze, almost amounting to madness. What to eat, drink and avoid, what to wear, where and how to live, by what means to avoid infection, to keep off disease, and to escape death for a few weary and worried years, are questions which so engross the thoughts, if they do not embitter the lives, of the multitude, that the proposition, "Is a sanitary life worth living?" has come to be a subject of serious contemplation, and one which the taxed and harassed community will sooner or later be compelled to entertain.—*Dr. Granville, in a letter to the Spectator.*

SINGULAR DEATH.—A singular death occurred in Paris recently. A man struck a match to light it, and a bit of phosphorus flew on his hand, burning it slightly. The next day there was a white spot, which he covered with plaster. A pus vessel formed, which caused blood-poisoning, and the man died.

Worth Knowing.

THE fusibility of soft solders is increased by adding bismuth to the composition. An alloy of lead four parts, tin four parts, and bismuth one part, is easily melted, but this alloy may itself be soldered with an alloy of lead two parts, of bismuth two parts and tin one part. By adding mercury, a still more fusible solder can be made. Equal parts of lead, bismuth and mercury, with two parts of tin, will make a composition that melts at 122° F., or an alloy of tin five parts, lead three parts and bismuth three parts, will melt in boiling water. In mixing these solders melt the least fusible metal first in an iron ladle, then add the others in accordance with their infusibility. To cast strips of solder, pour the molten metal on a flat surface of stone or metal, drawing the ladle along the while to leave a thread of metal of the desired substance.

CLEANING BRASS.—Make a mixture of one part common nitric acid and one-half part sulphuric acid in a stone jar; then place ready a pail of fresh water and a box of sawdust. Dip the articles to be cleaned in the acid, then remove them into the water, after which rub them with sawdust. This immediately changes them to a brilliant color. If the brass is greasy it must first be dipped in a strong solution of potash and soda in warm water. This cuts the grease so that the acid has the power to act. This is a government recipe used in the arsenals.

TEST FOR LINSEED OIL.—An excess of crude nitric acid mixed with a suspected oil, and agitated, will indicate the presence of fish oil by the dark brown discoloration of the oil which follows. Pure linseed oil under the same treatment would be changed to a sea green, and finally greenish yellow, while the acid itself becomes yellow. Rosin oil to any extent is also indicated by adding to one part of the suspected oil in a small vial three parts of pure linseed oil. If the samples contain a rosin oil, the pure linseed oil floats on the top and the line of contact is plainly visible.—*Leffell's Mechanical News.*

FRENCH WATERPROOFS.—The method of making clothing, paper, gloves, and other porous substances water proof, as pursued under a patent in Paris, is as follows: Cut paraffine in small slices, and dissolve in pure naptha or benzine free from fat or oil. Make a solution in a vessel with a glass stopper, and shake repeatedly until a thorough solution is made, and there may be an excess of paraffine to bring about a good result. Immerse the articles till perfectly saturated. Dry by heat or in the sun. The solvent evaporates and leaves the paraffine, which is impervious to water and will resist acids. Iron cloths, and a polished surface will be obtained.

CEMENT FOR LEATHER BELTS.—For making cement for leather belts take of common glue and American isinglass equal parts, and place in a glue pot. Add water to cover the whole. Soak 10 hours. Then bring the mixture to boiling heat, and add pure tannin, till the whole becomes ropy or like the white of eggs. Apply warm. Buff off the grain of the leather where it is to be cemented; rub the joint surfaces solidly together; let it dry a few hours, and it is ready for use. If properly put together no rivets will be needed, as the cement is as strong as the leather.

A TEST OF PURE DYE IN BLACK SILKS.—Dilute muriatic acid will discharge a pure black dye from the silk without injury to the fiber, leaving the silk a light straw-yellow color. Weighted silks will suffer more or less change and breaking down of fiber by the same test, and if particularly bad will sink into shapeless gum. Care should be taken to obtain the proper degree of dilution, which, as the commercial acid itself varies in strength, can be ascertained best by trial.

TO PAINT TIN ROOFS.—First scrape off the rosin and sweep the roof. Wash with strong soda water, and let remain till rained on. Give it a coat of pure Venetian red mixed with one-third boiled and two-thirds raw linseed oil. The second coat may be of any color. The soda water dissolves the rosin after the scraping, and destroys the greasy nature of the solder and the new tin, so that the paint will take hold.

SPECIFIC AGAINST MICE.—As a specific against mice, calomel is recommended. One part of calomel, five parts of wheat flour, one part of sugar and one-tenth part of ultra-marine are mixed, and the whole exposed as powder in the localities infested.

PAINT and varnish brushes should never be used as dusters, nor used dry. If, from any cause brushes have shrunk, they can generally be restored by putting them for a short time in a cellar or moderately damp place.

A GOOD GLUE AND MUCILAGE.—The best quality of mucilage is made by dissolving clear glue in equal parts of water and strong vinegar, and adding one-fourth of an equal volume of alcohol and a small quantity of a solution of alum in water

To clean grease from bolts, moisten them in benzine; roll in sawdust and brush off.

FRATERNAL RECORD.

MASONIC.

Officers Grand Lodge.—SAMUEL CRAWFORD, DENSON, G. M., Sacramento; CLAY W. TAYLOR, D. G. M., Shasta; MOSES HELLER, G. Treas., S. F.; A. G. ABELL, G. Sec'y, S.F.

Address of Grand Master Denson.

The following annual address of the Grand Master of Masons in California, was delivered at the annual communication of the Grand Lodge, October, A. L. 5881.

BRETHREN OF THE GRAND LODGE OF CALIFORNIA:—At the last communication of this M.·. W.·. Grand Lodge you conferred upon me the highest honor within your gift, and signified in the strongest manner possible your fraternal confidence and esteem, by placing in my hands the Grand Master's gavel for the year now about expiring. For this most emphatic token of your high respect, my heart responds with sincerest gratitude.

The year of my exaltation now draws to a close, and the report of my stewardship is here presented. I congratulate you, and the fraternity of this jurisdiction, that the past year has not been marked by any serious discord among the craft. The correspondence of my office has been extensive, but by rare good fortune few perplexing questions have arisen; the exercise of executive power has rarely been invoked, and in no case has it been deemed necessary to have recourse to the high prerogative powers of the office in any but matters of an agreeable nature.

The year has been one, the peace, tranquility, prosperity, and happiness of which have been marked and emphasized, rather than interrupted by only infrequent sounds of discord. No present or Past Grand officer has been summoned hence; no great pestilence, epidemic, or other wide-spread calamity has visited our territory. Floods and fires have raged in other lands, but have touched us lightly. Mother Earth has yielded an abundant harvest, and gladdened our hearts with her millions of shining gold and nutritious grain. In place of the fierce and relentless storms which have swept over and devastated other lands, we have been fanned by gentle breezes laden with fragrance and life-giving vigor. To God, "from whom all blessings flow," let us reverently bend the knee and render grateful adoration and praise.

While the correspondence of my office has embraced some hundreds of letters, very many of these were of a nature to require no special notice in this report. Many contained inquiries, the answers to which consisted of mere citations to sections of the Constitution, or to resolutions or edicts of the Grand Lodge; and with such matters I deem it unnecessary to encumber the proceedings of this august body, but shall confine this repert to such questions as seemed to be new, or of such importance as to merit your consideration.

In my judgment each subordinate Lodge should be permitted to manage its own affairs, so far as may be consistent with the good of the craft; but when a Lodge, having a limited membership and no considerable accumulation of funds, reduced the monthly dues to 25 cents, I felt constrained to withhold my consent to the amendment to its by-laws providing for the reduction. Doubtless the payment of dues frequently becomes an onerous burden upon many a good Mason, and possibly the dues in some Lodges are now maintained at too high a figure; but certainly every Lodge should have a secure and reliable income sufficient to meet the ordinary expenses, and keep something in the treasury for emergencies and works of charity.

Bro. Rucker, of La Grange Lodge, proposed this question: "Is an actual residence within the State for six months necessary in order to entitle a party to petition for the degrees; and will a temporary absence from the State, covering a part of the last six months before petitioning, debar him?" This was answered in the negative; my decision being, that so long as the petitioner is in good faith and intention a resident of the State, a temporary absence, with the continuous intention of returning to his California domicil, does not disqualify him.

A somewhat singular case arose in Janesville Lodge, No. 232, and my advice was called for in the premises. In conferring the third degree upon a candidate, and just as he was being instructed in the guard and sign, he was seized with sudden illness and had to be removed from the Lodge-room and carried to his home, where he continued for some time to be so sick that his life was in great peril. The Lodge thereupon desired to know the status of the afflicted brother; his rights and privileges, and the duties of the craft and Lodge toward him. My decision was, that since the brother had taken the * * * *, which made him a * * * * *, he was entitled, for all purposes of charity and relief, to be so considered and treated, and in case of his death was entitled to Masonic burial; that when his health was sufficiently restored, it was the duty of the Lodge to begin where its proceedings were interrupted and impart to him that to which he was already entitled. But it being feared that, even if he survived his severe illness, he might not sufficiently recover all his faculties to conform to the ritual in the remaining portions of the degree, the Lodge desired to know what then would be his status, and to this I answered: "He is a Master Mason, and entitled to be so considered for certain purposes; but not having been fully instructed, he is not a member of the Lodge, and cannot sit in a Master Mason's Lodge."

In the matter of charges against the Worshipful Master of Colusa Lodge, No. 142, this Grand Lodge, at its last annual communication, reversed the decision of the Grand Master, refusing to appoint a Commission, and hence it devolved upon me to make the appointment; but before the necessary information could be had and a suitable Commission selected, the annual election was held, and another brother was chosen as Worshipful Master of the Lodge; wherefore, I concluded that since Colusa Lodge was no longer disqualified to try the charges, it would be best to send the matter back there for adjustment, and it was so ordered.

In answer to inquiries from several Secretaries of Lodges, I have uniformly instructed that no action of the Lodge is necessary to authorize the Secretary to issue a certificate of membership as a basis for an application for a Grand Lodge Diploma; that every member of a Lodge is entitled to have such certificate so long as he is in good standing, and his dues are paid; and the Secretary has full authority to issue the certificate, attested by the Lodge seal.

A question arose as to which Lodge should pay the expenses of a trial, where one Lodge preferred charges against a non-affiliate, residing within the jurisdition of another Lodge. Not being aware of any written law upon the subject, present and past Grand officers were consulted by me, and the conclusion arrived at that the established custom or usage has been, for the Lodge making the charge, to defray the expenses of the trial. While this was my decision, it does not entirely satisfy my judgment, and it is respectfully submitted to this Grand Lodge, that the question may be settled for the future. There is something meriting consideration in the argument, that such trials are for the good of the fraternity at large, and not especially for the benefit of the complaining Lodge.

Several Lodges have made inquiries as to the proper course to pursue, where a candidate has been initiated, and after waiting for several years without apparent cause, has presented himself for advancement. My reply to all has been, that after taking proper care to ascertain whether or not, in the meantime, any valid objection to advancement has arisen, the candidate, if worthy and well qualified, should be advanced, and that where he was originally elected to the three degrees, an additional ballot was not necessary or proper.

Touching the rights of contributing non-affiliates, the following decision was made: 1st. A non-affiliated Mason has the right to tender a contribution equal to the monthly dues to any Lodge in the jurisdiction, and the Lodge has the right either to accept or reject the same.

2d. When a non-affiliated Mason contributes or tenders to some Lodge an amount equivalent to the monthly dues, he thereby merely preserves his standing in the craft, and is entitled to all the charities and fraternal courtesies due a Mason at large. He does not, by contributing to any Lodge, become in any sense a member thereof, and has not, necessarily, any greater claim upon such Lodge than any other non affiliate in good standing. Where a non-affiliate resides within the exclusive territorial jurisdiction of one Lodge and contributes thereto, it is clearly the duty of that Lodge to see that he is not "made a burden to others." This duty, however, arises from the fact of his residing within the jurisdiction of the Lodge, and not as a reciprocal duty resulting from his contribution—the contribution merely having the effect of preserving his standing. But when the contributing non-affiliate lives within a city under the concurrent jurisdiction of several Lodges, the fact that one of such Lodges has received his contribution does not increase the measure of duty of that Lodge, nor relieve any other Lodge, of concurrent jurisdiction, of its obligations. In case of the death of a brother under such circumstances, he should be buried by the Board of Relief, while, if he has contributed for any considerable length of time exclusively to one Lodge, a very strong moral obligation would rest upon such Lodge to extend relief to him or his family out of its own treasury.

Decisions have been made:

That permission from the Lodge in whose jurisdiction a petitioner for the degrees resides, to another Lodge, to receive his petition, can only be given by unanimous consent.

That the Master of a Lodge has authority to fill a vacancy in the office of Secretary by appointment, and that an election, is not necessary.

That Masonic law does not forbid the receiving of a petition from a candidate more than once rejected, after the lapse of the prescribed time, but that the fact of repeated rejection should admonish the Lodge to be more than ordinarily careful in examining into the qualifications of the applicant.

That an entered apprentice, initiated in a foreign Lodge, cannot be advanced in a Lodge in this State without the written request or consent of the Lodge in which he was made, and that upon the properly authenticated request of his Lodge, the work may be done without the formalities of a petition, reference and ballot.

That a resident of this State who, while abroad in another jurisdiction, receives the degrees without the permission, or request of the Lodge having jurisdiction over the place of his residence, cannot visit any Lodge in this State until cured by affiliation in the Lodge where he resides, in the manner and upon the terms prescribed in the general regulations.

That the office of W.·.M. does not become vacant by the failure of the Lodge, at the proper time to hold the annual election, nor by the failure of the Master elected to qualify for installation. In this connection legislation is recommended establishing some reasonable time within which the officers must, after election, be installed, and requiring the Lodge at the expiration of such time, without installation, to apply for a dispensation to hold an election.

It has also been decided:

That in a case where charges were preferred by the W.·.M. by direction of the Lodge, against a brother for using vile language toward and striking a brother Mason, and the charges are being tried before a commission, the brother against whom the offense was committed can neither withdraw the prosecution nor refuse to testify when summoned as a witness.

That where a brother under suspension for the non-payment of dues is tried and found guilty upon charges of unmasonic conduct, and sentenced to be reprimanded, it is proper to summon him, and admit him into the Lodge for the purpose of receiving his reprimand; though it would seem that a Mason who can and will not pay the trifling amount required for dues, and suffers himself to be suspended, and then commits an act justifying a finding of "guilty of unmasonic conduct," ought not escape with a mere sentence of reprimand.

The San Francisco Board of Relief has applied to me in several cases where Lodges in the interior of the State have ignored demands made by said Board for sums expended in relieving the distress of persons claimed to be entitled to relief from such Lodges. I have corresponded with the Lodges, and in several instances satisfactory adjustments have been made; while in others no solution could be reached. Not feeling authorized to institute an investigation or trial as to the merits of such a demand, I have satisfied myself with endeavoring through fraternal suggestions and advice to secure an agreement, not deeming it lawful for me, even in a clear case, to peremptorily order a Lodge to pay such demand and enforce the order. It has therefore, been suggested that the Board of Relief present a memorial, in each case, to the Grand Lodge, where such questions can be authoritatively tried and settled.

It has more than once occurred during the year, that the arrearages of a Mason under suspension for non-payment of dues, and when such Mason was about to die, have been tendered to the Secretary by interested relatives, and under such circumstances as to convince the officers of the Lodge, that the tender was made for the mercenary purposes of others and not at the instance of the suspended brother.

My views upon this question are expressed in the following extract from a letter to Bro Gideon Wing, of Columbia Lodge, No. 28: "In my judgment when a brother is so indifferent to Masonry as to refuse to pay the small amount required for dues, having the ability to pay, and is suspended, and while under suspension, is about to die, it looks like fraud and deception, for any interested person—particularly one not a Mason—to volunteer the payment of the small amount requisite to restore the suspended brother, for the manifest purpose of imposing upon the Lodge the burden of burying him, and taking care of his family. Masonry is not an insurance society, and every Mason renounces selfish motives prior to entering our portals; but there seems to be some tendency toward a degeneracy of motive, and many appear to think entirely too much of what can be gained out of Masonry. No man is bound to submit to what he knows to be a fraud; why then should a Lodge? I would not lightly impugn the motives of any one, but if I knew the relative of a suspended Mason in volunteering to pay up his dues, had only selfish an dpecuniary purposes in view, I should certainly decline to receive the payment; for the knowledge of the unworthy motive would rebut all presumptions of acquiesence on the part of the suspended brother."

Reports have been received from all the District Inspectors except those of the Second, Fifth, Sixth, Seventh, Twenty-fifth, Twenty-seventh and Thirty-third.

Bro. Watson, of the First District, says in his report: "The craft in my District are enjoying a season of unusual prosperity, owing doubtless to a revival of business. In this county the Lodges are doing good work and are financially in better condition than for several years past."

From the Third District Bro Bonner reports general prosperity.

Bro. Winsell, of the Fourth District, makes a very full and elaborate report, showing a very encouraging state of affairs in that District generally. Two or three of his Lodges require overhauling in their work, but they are under good supervision, and no doubt that very efficient Inspector will bring them up to the proper standard.

Bro. Brown, of the Eighth District, reports all the Lodges in his District in a flourishing condition, and a similar report came from Bro. Rolfe of the Ninth District.

From the Eleventh District the otherwise encouraging report of Bro. Warren, brings tidings of discord in Table Mountain Lodge, No. 124.

Bro. King, of the Fourteenth District, makes a very full and satisfactory report; the condensation of which is, that all the Lodges work well and enjoy harmony and prosperity.

The report of Bro. Wright, of the Fifteenth District, is of the same tenor. He recommended that the present system of keeping the "Black Book" be abolished, and a scrap or letter book in which the reports of rejections, etc., by the Grand Secretary can be pasted, and thus save a great amount of labor to the Secretaries. The suggestion merits consideration, and I submit it to you.

From the Sixteenth District comes a good report of correct work and harmony in the craft, and the Inspector, Bro. Adams, in his very well written report, says: "Some of the Lodges in this District have had a good share of work, while others have had none; and while some are very careful in the selection of material, others are very careless and do not seem to care what kind of material they introduce. Of late years, so many different societies have come into existence, and so many of our members are becoming connected with them, that they are losing, in a great measure, their interest in Masonry. I am not an alarmist, but I think at this time it is important that we should be true to our principles."

Bro. Pockman, of the Seventeenth, and Bro. Burnham, of the Eighteenth District, report general prosperity, good work and harmony; and the condition of affairs in Bro. Aitken's (the Nineteenth) District is satisfactory, except as relating to St. Mark's Lodge, No. 85. This Lodge is in a deplorable condition, and something ought to be done by the Grand Lodge to relieve it. The town of Oleta, where the Lodge is located, is reported as one of many villages in this State which prospered in the good old days of profitable placer mining, and decayed with the exhaustion of that class of mines. The prosperous conditions which once called for the establishment of a Lodge there, no longer exist, and it is manifest to my mind that the burden of longer maintaining a Lodge at that place is more than the few good brethren remaining there can be expected to bear. This Lodge might be removed to the flourishing town of Plymouth, or consolidated with Drytown Lodge; or, if nothing else can be done, the brethren would do well to consider the propriety of surrendering their charter.

From the Twentieth District, Bro. Hedges reports the craft flourishing and working well.

Bro. Clark, of the Twenty-second District, concludes his well-written report with these words: "Throughout the District, harmony and good feeling are particularly noticeable, not only among the brothren individually, but between the different Lodges, each striving in its own particular sphere, and all together, to advance the sublime principles of our Order."

The Twenty-third District is reported by Bro. Reynolds to be in unexceptionable condition.

From our much esteemed Bro. Rucker, of the Twenty-sixth District, comes a good report; and aside from petty discords, and want of punctuality in keeping up the records, the Lodges in that District may be considered as steadily advancing toward a state of perfection.

The Lodges in the Twenty-ninth District, as reported by Bro. McGuire, transact all their business in conformity to the Constitution and regulations.

A good report comes from Bro. Hines, of the Thirtieth District; "he is a good man and bringeth good tidings." He reports that all the Lodges in his District work well up to the ritual; that their records and accounts are well kept, and their financial condition sound. He suggests the consolidation of Santa Barbara Lodge, 192, and Magnolia, No. 242, both located in Santa Barbara, and occupying the same lodge room; which would make one strong and vigorous Lodge, in place of two feeble ones. This suggestion is a good one, and if the process of consolidation should be resorted to in many other localities much good would result.

While the condition of the several Lodges of the Thirty-first District, as reported by Bro. Hinds, is not all that could be desired, still the outlook is encouraging. He very justly complains of the too prevalent practice of remitting dues in some of the Lodges. In one Lodge of 84 members, the books show the enormous sum of $867 of delinquent dues; and in another, members able to pay were relieved of their ar-

rearages, when the Lodge had not in its treasury enough to pay the dues to this Grand Lodge.

Bro. Curtis, of the Thirty-second District, reports the seed planted by this Grand Lodge in Arizona soil as flourishing and promising much in the future.

These are the only reports which came to hand in time to receive special mention in this report. Others have been received more recently, and are, together with those already referred to, submitted herewith for your consideration. Much valuable information is contained in some of them, but I feel compelled to limit this portion of my address to a bare reference to some of their general features.

On the 30th day of November, 1880, the Grand Lodge was specially convened at Elk Grove, and the new and well appointed hall erected in that town by Elk Grove Lodge, was dedicated in due form. On the 22d day of February last, the Grand Lodge was convened and duly opened in this hall, and proceeded thence to the city of beautiful homes across the bay, where the stately and imposing temple erected by the Masonic fraternity of Oakland, was solemnly dedicated to Freemasonry, according to the traditions of our craft.

Deputations have been issued as follows:

On the 17th of November, our Very Reverend Grand Chaplain was deputed to dedicate the new hall of Laurel Lodge, No. 245, located at Willows, Colusa county:

On the 9th of September, to Bro. Thos. H. Caswell, Past Master, to lay the corner stone of the new temple to be erected by the brethren in Petaluma:

My sanction was given the 22d day of April, 1881, to the removal of Keystone Lodge, No. 161, from Copperopolis, Calaveras county, to the town of Milton, in the same county, and the wisdom of the removal has been demonstrated by the increased prosperity of the Lodge:

Dispensations to form new Lodges have been issued, as follows:

Lompoc Lodge, U. D., at Lompoc, Santa Barbara county, Cal., on the 10th of December, 1880.

Tucson Lodge, U. D., at Tucson, Pima county, A. T., on the 17th of February, 1881.

Solomon Lodge, U. D., at Tombstone, Cachise county, A. T., on the 8th of June, 1881.

The labors of my responsible office have been greatly alleviated by the kind and fraternal advice and assistance of the past and present Grand officers, and particularly the Grand Lecturer, and our very excellent and efficient Grand Secretary, who, as all know, is a living encyclopædia of Masonic knowledge.

To all of these, and particularly the latter, who has been ever obliging and ready to aid in every way possible in the performance of the varied and sometimes delicate duties of the office, I desire in the most emphatic and grateful terms to return my sincere thanks.

I herewith present a circular recently received from the so-called Grand Lodge of Ontario, but inasmuch as this matter was pretty effectually disposed of at our regular communication in the year 1876 (see printed proceedings at pages 360 and 492), I deem it inexpedient to re-open the question, and therefore submit the same, without comment, for your consideration.

A question of conventional jurisdiction has arisen between Greenville Lodge, No. 249, and Sincerity Lodge, No. 132. It is represented that when Greenville Lodge was about to organize, the petitioning or charter members applied to Sincerity Lodge—that being the nearest chartered Lodge—for a recommendation that a dispensation issue, which recommendation was cheerfully given, but with an express agreement upon a line of jurisdiction about one mile nearer the new Lodge than a central line between the two. A misunderstanding has arisen, and my opinion to the validity of such an arrangement of jurisdictional lines was invoked by Sincerity Lodge. Not deeming it essential that the question should be hastily settled, and being in much doubt, I respectfully refer the question to this grand body, and recommend that the proper committee hear the representatives of the two Lodges and report their decision of the question.

With this report I present a circular letter just received from Bro. Wm. P. Innes, Grand Secretary of the Grand Lodge of Michigan, appealing to the fraternity of the United States for contributions for the relief of sufferers from the fire that recently raged over the northeastern part of that State, and laid waste a large section of a flourishing country. The suffering is represented to be great, and the need of contributions urgent. Such an appeal never went unheeded in this land of generous deeds, and I therefore deem it unnecessary to do more than bring this cry of distress to your knowledge, and leave your own hearts to suggest the response.

To this Grand Lodge will be submitted the report of a special committee appointed at the last regular communication to prepare and submit a plan for establishment of a permanent institution for the relief, care and maintenance of our orphan children. The committee is composed of able and thoughtful men, and it may well be assumed that whatever plan shall be recommended by such committee will be good. It is not my purpose, however, to forestall the judgment of any member of this body in favor of any prrticular scheme, and you are earnestly entreated to give this momentous question your most profound consideration. No more important matter will come before you, and now is the time to think and act. We are about to lay the foundations of a structure that may, if we act unwisely, dwindle, decay and tumble down, or which may grow and increase and accumulate power for good, and become so permanent and firmly established that thousands of grateful hearts will praise the generous scheme after you and I have been forgotten. Benevolence to mankind is man's noblest work, and man never approaches nearer the attributes of Divinity than when engaged in schemes of pure and unselfish charity. We have it now within our power by the exercise of prudence and good judgment to inaugurate a plan of systematic and substantial charity that will reflect credit not alone upon us, but also upon the age in which we live. Let a free and full discussion be had, and then let us adopt the plan proposed by the committee, or such other plan as may promise better results, and if possible let it be put into immediate operation. Above all things, let us avoid the too common error of attempting to conduct an extensive enterprise upon other than sound business principles. Whatever plan of organization may be determined upon, this Grand Lodge should, in my judgment, manage, control and assume responsibility for it, and not one dollar's indebtedness should ever be incurred without the dollar being first provided to meet the debt. No costly buildings should be erected at present, nor should any unreasonable or utopian thing be attempted. If we manage wisely, as we must, the necessary means can be readily furnished by the Lodge alone; and if we succeed in laying well the foundations of this grand and good work, as I feel assured we shall, I feel justified in expressing an abiding hope that there will be found men of generous hearts and ample means who will with hearty pride make such munificent donations and endowments as will make this one of the most magnificent eleemosynary institutions in all our broad domain. There are many noble and generous-hearted men whose sublime energy and comprehensive business capacities have been rewarded, in this land of grand opportunities, with wealth computed by millions, and to such men can we appeal with confidence for liberal endowments to aid so deserving a cause, founded upon such a sound and intelligent a basis as to assure them that their contributions will be wisely managed and prudentially appropriated to alleviate human distress.

A painful theme now comes in place. On the second day of last July, while the nation of which we are proud to be humble citizens was decorating its halls, its streets, and its homes in holiday attire for the joyous celebration of the natal day of the proudest enactment of our country's history, a single vile act turned all our joy to woe and plunged a happy people into the depths of anxious grief. A great and good man who had been chosen to the highest political place attainable by man, one with whom a nation was satisfied, and of whom a nation was proud; one to whose noble and generous impulses the conflicting sectionalism and distrust hitherto disturbing our land were rapidly yielding; one whose great heart and honesty of purpose were rapidly uniting the several chains of mutual confidence and unity, and rekindling the smouldering fires of patriotism throughout the States; one whose every thought and act reflected the light imparted to him in a Masonic Lodge—was struck down by an act of unprovoked, unmitigated and fiendish assassination. I cannot dwell upon the dreadful thought nor recount to you how that brave and magnanimous man, in spite of his ghastly and mortal wound, kept grim-visaged death at bay week after week, with a sublime and heroic resolution to cling to life and perform his unfinished mission, until all of him that was mortal had so wasted away as to be unable longer to contain his great soul

When the solemn clang of the weeping bells tolled out the mournful intelligence of his death, the nations of the earth put on the habiliments of woe, and the 26th day of September, in the year of our Lord, 1881, when his body was consigned to earth, was entered upon the calendar as the gloomiest day of time. This Grand Lodge was specially convened, and joined the sorrowing throng, which, all over the land, celebrated the last sad rites to the nation's dead and our departed brother.

Brethren of the mystic tie, the term of my stewardship is drawing to a close, and this emblem of authority entrusted by your confiding affection one year ago into my hands will soon be returned to you, and upon my part, with conflicting emotions of joy and sorrow—sorrow when I reflect that the many imperative calls to other duties have rendered it impossible for me to administer the high and distinguished office better, and joy when anticipating an early emancipation from the grave responsibilities clustering around this jewel. Perhaps in taking leave of you, it would sound well to expatiate somewhat upon the beauties and excellence of Masonry, and congratulate you upon the increasing number of the craft, and the cheerful prospect of a good crop of candidates in the future. But while the highest encomiums do not exaggerate the excellence of our tenets, in my humble judgment, they are pronounced with injudicious frequency, and lead directly to the popularization of Masonry and the two rapid increase of Masons. This organization is a grand old growth of the illimitable past, nourished and supported by its eternal springs of immortal principles, and hardened by the wintry storms of adversity, and has no place in the race of modern societies for popular favor and rapid accumulation of members. As well might the sturdy oak, gnarled and scarred by the contending hurricanes of untold centuries, envy and seek to emulate the cereals that flourish and rapidly grow beneath its protecting boughs. We have too many Lodges and too many members, and the tendency of to-day to make Masonry more of a popular institution, is the darkest cloud within the Masonic horizon. While the great moral lessons we inculcate can make no man worse, it is useless to expect them to miraculously transform the man whose inherent nature is not fitted to receive and appreciate the heaven-born principles of Faith, Hope and Charity, into one who will, in his life's conduct, exemplify those excellent principles. Man's views, belief and conduct may be greatly modified and improved by correct moral teachings and associations, but his nature is seldom radically changed; and while the Lodge and its associations elevates every man coming within its influence to a superior moral plane, still, it cannot be expected to work miracles in reformation. The man whose heart, though uncultured and in the rough ashlar state, does not pulsate in harmony with the fundamental principles of morality and manly character taught in our symbolic lessons, is not a fit pupil for our instruction, has no place in the Lodge, and if there, is a burden and a non-assimilating element that must eventually produce discord and a sort of moral dyspepsia. It is a familiar principle in mechanics, that nothing is stronger than its weakest part, and a society or association of men may well be judged by the similar principle, that no exclusive body can be ranked higher in the moral scale than the lowest character, received, recognized as entitled to fellowship and held out to the world as a member.

Greater care should be taken in the selection and admission of material into our social structure. No man who is not of such character and standing that his name means honesty, integrity and broad-minded benevolence toward his race, should ever be encouraged to send his petition to a Lodge; and when the petition is presented, the candidate should receive the most searching investigation, and be promptly rejected if any doubt exists as to his fitness for membership. To be a Mason signifies much, it is true, but it should signify much more. The fact that a man is a Mason ought to be a guarantee, not alone to the fraternity, but to all the world, that he is a man of honesty, integrity, liberality and moral character. In fact, it may be assumed that, as a general rule, such is the fact; but unfortunately there are too many exceptions. Every member of the craft who falls short of what a Mason should be, detracts in the same degree from the average estimation in which we are held by the world and by each other. Masonry has never been, and was never calculated to be, a popular society. The very first declaration made by every candidate for the fraternity with us clearly admonishes him of this fact. All selfishness and mercenary motives must be renounced before even our outer door can be entered, and these are the life-giving principles of most of the modern popular societies.

Far be it from me to utter one word of disparagement of any other society. They are, so far as I know, all organized upon good principles and charged with important missions, and are the promoters of much good. Those societies are not in the way of ours, are not our rivals or our enemies, and will aid rather than injure us. Let them increase and prosper and enjoy their popularity and strength of numbers; but let us sail according to our ancient chart, and maintain our exclusiveness, our high code of morals, assumed when time was young, and our traditional practice of disinterested and voluntary charity. Let us be distinguished by the average high moral character and intelligence of our members, rather than by our numerical strength. Let us see to it that every Mason is a man of good natural sense, of good, clean everyday character, honest, truthful and sober, and not addicted to any habits or vices unbecoming a gentleman. We cannot hope to elevate practical or real Freemasonry to the standard of the ideal, but by constant watchfulness we may be able to maintain in the practical a strong resemblance to the ideal.

These are plain thoughts, clothed in plain words; but to them I believe each of your hearts responds with a sincere *"So mote it be!"*

During my administration I have received from the craft nothing but profound respect, gentlemanly courtesy, constant succor and the warmest of fraternal fellowship, for which you and your respective Lodges will ever be borne in grateful memory.

And may the Spirit of the Supreme Grand Architect of the Universe abide within and bless this Grand Lodge and all its subordinate bodies; may our conduct ever be characterized by brotherly love, relief and truth. May Mother Earth continue to yield her abundant treasures; may you and yours be blessed with health and material prosperity; may all our lives be inspired by Faith and Hope and our pathway adorned by Charity; may we live in honor, die in peace and meet beyond the grave in that Celestial Lodge where confusion cannot enter, and where harmony is supreme.

Knights of Sparta.

At the session of the Supreme Lodge, held in this city Wednesday, October 5th, the following officers were elected for the ensuing term: Past Supreme Archon, C. W. Nevin; Supreme Archon, D. L. Levy; Supreme Vice-Archon, A. G. Palmer; Supreme Recorder, I. M. King; Supreme Treasurer, Walter H. Levy; Supreme Medical Examiner, Dr. F. F. Lord; Supreme Prelate, Dr. M. H. Logan; Supreme Marshal, C. H. Carkeet; Supreme Warden, D. McNeill; Supreme Guard, John Brainard; Supreme Sentry, Henry Schwind; Supreme Trustees, C. W. Nevin, Dr. F. F. Lord, D. McNeill, P. J. Horan, C. S. Hoffman.

The following officers were installed by Past Supreme Archon, C. W. Nevin, as first officers of Alpha Conclave, No. 1, Knights of Sparta, for the ensuing term: J. H. Harny, Past Archon; C. E. Baker, Archon; John Hanna, Vice-Archon; John F. Naughton, Recording Scribe; C. S. Hoffman, Financial Scribe; J. Hintz, Treasurer; D. L. Leavy, Oracle; T. W. Tompkins, Master of Ceremonies; Daniel P. O'Donovan, Guide.

Knights of Pythias.

Grand Officers.—S. L. Terry, P. G. C., Stockton. John H. Harney, G. C., S. F.; George Cantus, G. Treas, S. F.; A. G. Booth, Grand K. of R. & S., San Francisco.

GOLDEN CITY, NO. 63. Friday evening, Pythian Castle, Hermann Shaffner, C. C.; Wm. Martin, K. of R. and S.

Grand Chancellor John H. Harney will start on an extended trip next week. He will visit Santa Barbara, Los Angeles, San Bernardino, San Luis Obispo and Lompoc. He expects to institute a new Lodge at Carpintiria, from which point a large petition was received some time since, and the Grand Chancellor will improve this opportunity to give the new Lodge a good start.

Alameda Lodge paid a fraternal visit to Laurel Lodge of this city last Monday evening. It was a grand good time and only a sample of what should occur often, as the results of such visits are very beneficial to any Order.

The party and entertainment given by the Ivanhoe Lodge last Thursday evening was a grand success. The talent was of the highest order, the programme was well carried out and everybody present enjoyed the evening.

Ancient Order of Foresters.

The Ancient Order of Foresters, an Order which is of English origin and has its official head in England, has a governing body in each State known as a District Court. The District Court of California held its annual session at 413 Sutter street, Druid's hall, in this city, Monday, Oct. 10th, opening at 1 o'clock P. M. At the opening session there were present the following District officers: District Chief Ranger F. C. Hensley, Deputy Sub-Chief John Songate, District Treasurer E. C. Hatcher, District Secretary F. C. Haskell, and 20 delegates, representing 11 subordinate Courts. The reports of the District officers were presented, showing the Order to be in a very flourishing condition, numerically and financially. There was a large number of unimportant amendments proposed to the District and subordinate Courts' constitution. A long time was taken in the evening discussing the legality of holding an election for officers at that time, which resulted in a vote to proceed with the election. Every office was strongly contested, showing the earnestness existing among the membership and their desire to select good material for every position in the District body. The result of the election was as follows: District Chief Ranger, J. B. De Witt; District Sub-Chief, James Healing; District Treasurer, Dr. W. M. Brown; District Secretary, F. C. Hensley; District Beadle, Dr. W. R. G. Samuels. The officers were then installed, and after transacting considerable outside business, the meeting adjourned.

For a more complete report of the proceedings of the Grand Lodge of Masons, see our "Fraternal Record" edition, which also contains numerous items from various other fraternities.

A. O. U. W. Directory.

Cards inserted in this list at the rate of 25 cents per month payable semi-annually in advance. If errors or omissions are noticed, please write the office direct.

J. D. VINCIL, Missouri, S. T.

There's a heap of philosophy in the question which a Washington young lady of the mature age of six propounded to her aunt the other day. It was after the story of the creation and the fall had been related, and the young lady had been meditating for some time on the moral of it, when she suddenly broke out with: "Aunty, after Adam and Eve disobeyed God, why didn't he kill 'em and begin over again?" It is not impossible that the question has occurred to older people.

Quail on toast and oysters on the half shell are every day feed for poor printers, but when they are confronted by syrup on beefsteak they quail in oysterics.

Officers and members of the A. O. U. W. receiving a complimentary number of the Watchman with this notice marked are invited to examine its merits for their support, as we expect our agent to call and present personally further information concerning our enterprise for the future. Should our agent fail to call soon in some instances, we shall be glad to have our friends favor the office directly with their response. Persons receiving duplicate copies are requested to circulate them to the advantage of our cause and the publishers.

Do Not Delay.—Send us your subscriptions promptly Don't let any break occur in your subscriptions to the Watchman. Every live Workman needs every number of the paper, and we need his assistance to print as valuable a journal as we strive to for the special benefit of its patrons and the general good of the Fraternity. Send the cash direct, or, if more convenient, hand it in with your dues to the Financier and we will allow him for trouble and expense of remitting.

Hunting the Sea Otters.

The sea otters are, according to Scammon in his "Marine Mammals of the Northwest Coast," the most valuable fur-bearing animals inhabiting our ocean. They are caught as far south as 28° north latitude and northward to the Aleutian islands. The full-grown animal may be five ft. in length, including the tail. The head resembles that of a fur seal. The fur is black or dark brown. Otters have been secured along the California coast for many years, but now there are but few secured. Of late they have been shot from the shore by hunters who have wandered up and down in search of them.

The mode of capturing the sea otters between Point Greenville and the Aleutian islands varies with the different native tribes inhabiting that coast. The Aleutians, dressed in their waterproof garments, made from the intestines of the seals, wedge themselves into their *baidarkas* (which are constructed with a light, wooden frame, and covered with walrus or seal skin), and, donning their hunting caps, plunge through the surf that dashes high among the crags, and, with almost instinctive skill, reach the less turbulent ground-swell that heaves in every direction. These aquatic men are so closely confined by the narrow build of their boats, and keeping motion with them, too, that their appearance suggests the idea that some undescribed marine monster had just emerged from the depths below. Once clear of the rocks, however, the hunters watch diligently for the otters. The first man that gets near one, darts his spear, then throws up his paddles by way of signal; all the other boats forming around him, at some distance. The wounded animal dives deeply, but soon returns to the surface, near some one of the *baidarkas* forming the circle. Again, the hunter that is near enough hurls his spear and elevates his paddle, and again the ring is formed as before. In this way the chase is continued until the capture is made. As soon as the animal is brought on shore, the two oldest hunters examine it, and the one whose spear is found nearest its head is entitled to the prize.

The number of sea otter skins taken annually is not definitely known, but from the most authentic information we can obtain, the aggregate for the past three years has been 5,000, 1,000 of which came from the Kurile islands; and, valuing each skin at $50, amounts to the sum of $250,000.

The Oldest Pensioner. — Maryland can probably claim the oldest pensioner in the person of Mrs. Elizabeth Cretzer, who resides in the Ninth district of Baltimore county, upon the York road. She was 103 years old in last December, and is the widow of John Cretzer, of Capt. Parry's company of Maryland militia, who served in the year of 1812. Notwithstanding her advanced age she can walk about the house and attend to household duties. She has the record of her birth and her marriage to John Cretzer in the year of 1801. Her sight and hearing are good, and her mental faculties are in excellent preservation. On Tuesday, she was driven in to receive her pension payment at Maj. Adreon's office on Calvert street, and he would not give her the trouble to alight; he carried her check to her at the carriage, and found her thoroughly cheerful and in the humor for quite a talk. She is believed to be the oldest pensioner, if not the oldest person in the United States.

Reading in Bed.—Never read in bed or in a reclining attitude; it provokes a tension of the optic nerve very fatiguing to the eye-sight. An exchange says: "Bathe your eyes daily in salt water, not salt enough, though, to cause a smarting sensation. Nothing is more stengthening, and we have known several persons who, after using this simple tonic for a few weeks, had put aside the spectacles they had used for years and did not resume them, continuing, of course, the oft-repeated daily use of salt water. Never force your eyesight to read or work in insufficient or too broad light. Reading with the sun upon one's book is mortally injurious to the eyes.

How I was Elected Circuit Judge.

Rev. Dr. H. W. Pierson, who is doubtless known to many of our readers from his sojourn in this State about five years ago, is the author of a book, soon to be published by Appleton & Co., entitled "In the Brush; or Old-Time Home Life in the Southwest." The book will be a very entertaining sketch of the customs and characteristics of the dwellers in the back districts of the southwest a generation ago, and will give much amusement to the general reader and to those who happen to have had an opportunity to observe the home life which the author describes. From an advance sheet we take the following description of a style of electioneering, which shows how well local traits are touched off by Dr. Pierson "In the Brush:"

"I made," said the Judge, "a very thorough canvass of the district with my opponent. We closed our public discussions, and I returned home a few days before the election, which was to come off on the first Monday in August. My opponent was Judge K——, whom you know as a very worthy man, a perfect gentleman, and a superior judge. He was honored by the bar, popular with the people, and a very hard man to defeat. He had held the office several years. I wanted it, had worked very hard for it, and was determined to gain it if possible. I looked over the district very carefully, made the closest estimate I could, and found I should be defeated unless I could make very heavy gains in some precinct. It was a desperate case, and I could in honor only electioneer on the 'still hunt.' I concluded to mount my horse and ride to C—— F——, which you have visited and know is about the most ignorant and uncivilized region in the State. I thought it more than probable that I would find a barbecue-dance in progress there on Saturday afternoon, at which all the people in the precinct would be present. When I arrived I found a dance in full progress in the open air under the trees, and an ox roasting over the fire near by. It was the last of July, and very hot and very dry. A perfect cone of dust arose above the crowd, in which all the dancers were enveloped. It was a strange, wild scene—a scene to be witnessed nowhere else but in the wildest portions of our southwestern wilds. There were old men and old, grizzly-headed women, young men and young women, parents and children, grandparents and grandchildren, all mingling together and dancing with backwoods energy and wild delight. As I dismounted, hitched my horse, and went up and joined those that were looking on, one and another saluted me, very respectfully, with—

"'How 'dy, Broadcloth?'

"As the weather was very warm, I had worn from home a black alpaca sack-coat. This was the only deviation from home-made butternut-colored jeans in the entire crowd. My black coat, therefore, distinguished me from everybody else; and as I walked about among the people, the invariable salutation was—

"'How 'dy, Broadcloth?'

"I moved around among them very quietly an hour or more, observing all that was going on, and watching for the most favorable opportunity to make myself known to them and win their favor. At length my course was clearly settled in my own mind. I saw what would be my opportunity. I could see that the fiddler was already so drunk that he would fall off the block, dead-drunk, before a great while. I had learned to play the fiddle when a boy. I could take the fiddler's place and prevent the calamity of a complete break-up of the dance.

"His powers of motion failed sooner than I had expected, and there was great sorrow in all the company. After a while I intimated quietly to some of them that I could play the fiddle, and they shouted at the top of their voices:

"'Broadcloth can fiddle! Broadcloth can fiddle! Hurra for Broadcloth!'

"'At once there was a general rush of the company about me, all of them imploring me to take the fiddle and play for them. I replied, very positively:

"'No, gentlemen, I won't fiddle for you!'

"'Why not, Broadcloth? Why not?' they all responded.

"'I will tell you why not,' I said. 'I came here a stranger, and you haven't treated me with any civility at all; you haven't invited me to dance; haven't introduced me to the ladies; haven't made me one of yourselves at all; and I won't fiddle for you.'

"But they made so many apologies for the past and promises for the future that I finally relented, changed my mind and agreed to fiddle for them. This announcement was greeted with a general shout of joy. I then began to brag in the most extravagant manner possible. I told them that when they saw me draw the bow, it would be such music as they had never heard since they were born. I took off my coat, unbuttoned my shirt, rolled up my sleeves, took the fiddle, and drew the bow across it, back and forth, for a minute or two, with all my might. They responded to this very noisy musical demonstration with a scream and yell of wild delight, and a 'Hurra for Broadcloth!' I took my seat and began to play just before sundown, and played—until the sun was up the next morning. During the night they came around me and said:

"'Who are you, Broadcloth, anyway?'

"I told them I was a candidate.

"They shouted:

"'Broadcloth is a candidate! Hurra for Broadcloth.' And then asked me what I was a candidate for.

"I told them I was a candidate for circuit judge, and they repeated:

"'Broadcloth is a candidate for circuit judge. Hurra for Broadcloth for circuit judge!'

"This was as much information as I dared to give them in one installment. I did not wish to give them any more until what I had told them was perfectly fixed in their minds, so that they would not make any mistake when they came to vote on the following Monday.

"One of them, a little more thoughtful than the rest, came to me afterward, and, applying an oath to the party to which I belonged, said he hoped I was not a —— ——. I did not, in behalf of myself or party, resent the oath or favor him with any definite reply to his question. I knew that the greater part of the company generally voted with the opposite party, and that, enthusiastic as they now were in my favor, too much information on this point would be fatal to my prospects. I felt quite sure that neither my opponent nor any of his friends would give them this information, and undo the work I had accomplished between that time and Monday morning.

"As the morning dawned, in response to the inquiries of some of the more enthusiastic of my friends, I gave them my name in full, which was greeted and repeated in cheer after cheer.

"When I bade them good-by, mounted my horse and rode away, they followed me with their cheers, and when out of sight among the dense forest trees I could still hear their enthusiastic—

"'Hurra for S——, candidate for circuit judge!'

"When the election returns were announced, every vote in C—— F—— precinct had been cast for me. That night's work with the fiddle secured my election."

The Emotions.—We believe strongly in the emotions as an element of health and disease. Every person should strive to maintain an equable temper. Fretfulness and ill-temper impair both moral and physical beauty. A scold bears that brand upon the countenance as indelible as the mark of Cain. Good emotions improve digestion, while the bad ones impair it.

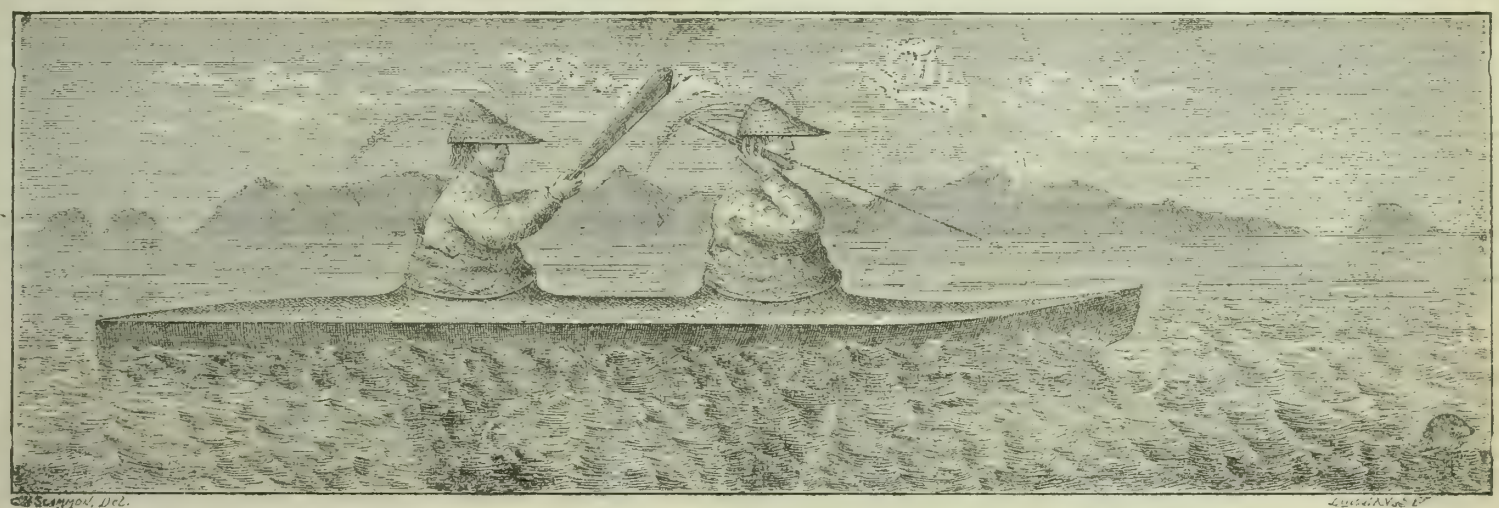
It doesn't pay to be too good natured. An Indianapolis editor got a letter from an unknown correspondent, asking how he contrived to flirt without his wife's being able too catch him. He pitied the ignorance of the inquirer and wrote him an explanation of the whole racket. And when he found that the inquirer was really his wife, he had delirium tremens, without the fun of getting 'em.

"Mr. Jones, you must come to my room soon and see my lovely baby," said a fond mother to a fellow lodger. "Thank you, I heard him all night," was the equivocal reply.

Mechanics in Surgery.

Dr. W. G. A. Bonwill, of Philadelphia, has recently invented and put in actual practice, a mechanical appliance for superseding the use of hand tools in surgery. Although this is not the first instance of the introduction of the higher refinements of mechanics into the practice of surgery, it is nevertheless quite a step in advance, both in the comprehensiveness of the machinery and its varied applications, over anything which has preceded it.

The apparatus has been for some time in use in several of our principal Eastern cities, where it is received with much favor by leading surgeons. Quite recently it has been brought to the attention of English surgeons, at the session of a Medical Congress, where it has been described and commented upon as follows:



"Our American friends have always been foremost in devising mechanical appliances for superseding manual labor, and Dr. Bonwill's is the latest which has been brought under our notice. Besides saving labor, the present machine tends to redeem from something of barbarism certain surgical operations, particularly amputations. As well as being the latest addition to the list of labor-saving appliances, it is, perhaps, the most startling, inasmuch as the amputation of a limb may now be effected by the aid of machinery, just as conveniently as hair-brushing is.

"The surgical engine of Dr. Bonwill consists of an iron standard carrying an arrangement of multiplying wheel gear, which, by means of an endless cord passing over pulleys, transmits rapid rotary motion to either small drills or very fine circular saws, as the case may be. These instruments are attached to the end of a series of rods connected by universal joints, which permit the operator to move the cutting instrument in any direction he pleases while it is revolving at an incredibly high speed. It will, of course, be understood that these instruments are intended to deal only with bone. Thus with the drill it was shown that in cases where it is desired to hold the parts of a fractured bone together in a certain position, holes can be drilled and pins inserted, which, being held in a steel frame, keep the parts exactly in position. With the circular saw it was demonstrated that pieces of any required shape can easily be cut out of and removed from a bone, or a bone can be cut through in a few seconds.

"For amputations, a small, straight saw can be used. It is simply fitted into the holder, and as it is attached to a small eccentric worked from the main gearing, it has a very rapid reciprocating action imparted to it when the gearing is put in motion, which is done by means of a small hand-wheel. The comparatively slow movement of the hand of the operator is here replaced by the inconceivably rapid motion of the mechanical saw. By this means not only is the time occupied in the operation greatly shortened, but the operation itself is much more neatly performed, owing to the smallness of the cutting instrument and the high speed at which it is moved.

"Dr. Bonwill is certainly entitled to the thanks of the medical profession, and no less those of the suffering public, for having dedicated his invention to their free service. We may add that this is not the only adaptation of mechanical means to surgical ends devised by Dr. Bonwill. He has made several other applications of machinery in minor surgery.

The *Moniteur Industriel* describes a new covering for gutters or leaders crossing sidewalks. Heretofore these covers were plates of cast iron, the surface of which was broken by elevated ridges. Much travel, however, wore these plates quite smooth and polished, making them dangerous to tread upon. The government of the city of Paris is now laying new covers, which are cast with a ridge around the edges, forming a font or basin, which is filled with bitumen or asphalt flush with the sidewalk; this leaves but two narrow ridges of metal exposed, which give no trouble. Throughout the Rue Richelieu these covers have been placed, and the city is introducing them in the Rue Montmartre.

SEA OTTER HUNTING ON THE PACIFIC—THE ALEUTIAN ISLANDER'S CANOE OR BAIDARKA.

PACIFIC STATES WATCHMAN.

Regular (A. O. U. W.) Edition.

Issued on the 1st and 15th of each month.

At No. 202 Sansome Street, San Francisco, Cal.

Subscription (in Advance), $2 a Year.

Favorable to Advertisers.

By consolidating the large subscription lists of the *Pacific Workman* and *Fraternal Record* with the Pacific States Watchman our advertisers gain an unusually great advantage. We doubt if any one weekly newspaper has ever been circulated to as many different readers on this coast, as have been served heretofore by the *Workman*, *Record* and Watchman together. It is certain that no other periodical is now patronized by a better class of industrial, professional and business men. In fact, our subscription list embraces many of the foremost business and representative men throughout the towns and cities of the coast.

We have pride in making our paper "clean and handsome," and first class in all respects—to the benefit of both our readers and advertisers.

ADVERTISING RATES.

One Square (½ inch), per issue	$ .75
One Square per month	1.25
Two Squares, per issue	1.50
Two Squares per month	2.50
Obituary notices and resolutions (with 25 copies post-paid for friends of deceased) per sq. (½ inch)	50

☞For reading notices, extraordinary display, special advertising and choice places permanently, extra rates will be charged. Reasonable reduction will be made for large and long-continued advertisements. No extra rates for the space occupied by engravings.

OFFICIAL RECOMMENDATION.

[*Resolutions adopted by Grand Lodge of Cal., Feb. 3, 1881*]

Whereas, the Pacific States Watchman, the pioneer A. O. U W. advocate on this coast, without official aid, has long rendered able and valuable services for the good of our glorious organization, we earnestly recommend that our Lodges and the brethren individually patronize the Watchman as liberally as circumstances will justify.

Entered at San Francisco P. O. as second-class matter.

San Francisco, - October 15, 1881.

Grand Master Workman's Appointments.

Wm. H. Barnes, G. M. W., will make official visits as follows:

Tuesday, Oct. 18th—Celebration of Vesper Lodge, No. 62, of Livermore.

Friday, Oct. 21st—Reception of Silver Star, No. 2, D. of H., Temescal.

Monday, Oct. 24th—Newark Lodge, No. 169.

Tuesday, Oct. 25th—Visit Olympic Lodge, No. 127.

Thursday, Oct. 27th—Healdsburg Lodge, No. 31.

Friday, Oct. 28th—San Leandro Lodge, No. 12.

There is no one fact that gives us more pleasure in putting on record than the one where father and son are members of our Order. It may seem to the casual observer of little moment, but reflection will show its deep meaning. One grain of sand is but a trifle, but when the sands accumulate and are piled one upon the other a mountain is the result, which, rising grandly above the sea, stands as an impregnable barrier against the waters. So with the A. O. U. W. Father recommends son to join one of the grandest fraternal beneficial Orders the world has ever seen, and the foundations are thus laid so strong and enduring that nothing else than the world's destruction would seem to be able to destroy it. These remarks are brought forth from the fact that Bro. H. Mitchell, of Enterprise Lodge, No. 17, San Jose, is the father of Wm. Mitchell, of Gilroy Lodge, No. 26. May the record increase from time to time.

The meeting in Deputy Fleming's district, Berkeley, on the 8th inst., drew a large attendance from all the Lodges in this district. An address by Wm. H. Barnes, G. M. W., and several of the brethren whiled a well-spent evening. A fine collation was spread at the close of the meeting.

R. B. Nixon, Recorder of Temple Lodge, No. 11, Temescal, writes us that this Lodge is in a flourishing condition. They have taken in three new members this term, and have at present 48 Workmen in good standing. The attendance is very good.

We met Bro. E. R. Hill of Industry Lodge, No. 8, Oregon, at the grand District meeting, on the 3d inst.

It is Well.

The axe has fallen, and the official head of the Grand Master of Iowa lies in the basket. It was not unexpected, but the announcement will not be less gratifying to the Brotherhood for all that. The jurisdiction of Iowa has for a long time been in a state of chronic insubordination. Her quota of the yellow fever contribution is unfilled into about $9,000, and when the relief assessment for the benefit of Indiana was sent out every jurisdiction responded with the utmost alacrity except that of Iowa, and there the Grand Master utterly refused to execute the law, and as a dernier resort the law, or rather the executors thereof, had to execute them. Now let the Grand Foreman "step to the music of the Union" and all will be well, otherwise his head will join company with that of the defunct Grand Master, and so on till the guillotine shall have cut away the head and front of rebellion.

We believe the mass of Iowa Workmen to be good and true men. We believe, furthermore, that the leading men of the Order thereaway to be not only the peers of any in point of ability, but in loyalty also, but the reins of government by some ill-starred mischance had fallen into the hands of men wrong headed and, we fear, wrong hearted, so that nothing but the most extreme measures could work a remedy, and we rejoice that we have men at the head of the Order who have dared to sustain the majesty of the law by applying the only available means to work a cure. We breathe freer. We are lifted out of the valley of humility. One guilty man has been made to suffer, but the innocent have not been disturbed. Now we look with some confidence for good reports from Iowa. We look for a rekindling of the fires of fraternity on her slumbering altars. We look for the awakening of a new life that shall make the jurisdiction a source of strength and not an element of weakness—one of which we may speak with pride and not with shame. Such a result accomplished will crown the administration of Supreme Master Workman, Wm. H. Baxter, with a halo of glory that time shall scarcely obscure.

We have lived long enough to learn that in fraternal organizations, as well as all others, laws should be made as plain and explicit as possible. Generalities should be avoided. Had our laws plainly and explicitly set forth the exact relations between the Supreme Lodge and Separate Beneficiary Jurisdictions the Iowa difficulty would, in all probability, have been avoided. It may be well to count on the natural impulses of men to do right who are bound by the ties of a fraternal organization, but it is safer and better to rely on a positive law that each member has obligated himself to uphold and defend. Selfishness is too strong a passion to be stimulated by temptation or to be trusted in any case of danger. It should be walled in and double guarded. Fraternal laws of all others should be plain, explicit, and just, and then they should be executed without fear or favor. Such societies exist only by mutual consent on the part of the membership, and the moment any one of the members refuses to abide by the laws, which alone make a fraternity possible, he should be compelled to part company with the rest. The whole body should not allow itself to perish because of the defection of a single member. Iowa first took advantage of laws which, to say the least, were not as plain and explicit as they should have been, and that lead to a flagrant violation of laws about the meaning and legality of which there can be no question. We say Iowa, for she has to bear the shame of the action taken by her officers. God grant this shame may be speedily wiped out.

We can scarcely see how any difference of opinion can be entertained in the future regarding the respective rights of the Supreme Lodge and Grand Lodge jurisdictions. Our laws and decisions and precedents have settled all serious questions in this regard and to the satisfaction of the brotherhood with scarce an individual exception. We all know that the control of all that pertains to the secret and ritualistic work of the Order is within the exclusive control of the Supreme Lodge. We also know that the beneficiary laws are framed and controlled by the Supreme Lodge, and that "no change shall be made except by the Supreme Lodge," or, by a Grand Lodge with the consent of the Supreme Lodge, as the law has been judicially interpreted. We know that the Supreme Lodge is the body of ultimate responsibility and stands behind every individual beneficiary certificate issued by the Order; and we know that to sustain this responsibility the Supreme Lodge has the power to mass the financial ability of the entire organization. These questions being thoroughly settled, established and understood we rest in confidence that no conflict of authority between the different branches of the Order can arise in the future.

What now seems most necessary to guard against is radical changes in our laws, for such changes are likely to be for the worse rather than for the better. Continual tinkering is an evil that cannot be too severely condemned. Changes even of a trivial character, are being made from year to year, and we are subjected to much annoyance and expense but to no purpose except to gratify the vanity of some member who has at best but a shabby and unpromising hobby to ride. Let well enough alone. We want no changes except such as actual experience shall prove to be really necessary.

Statistics of Sickness in Benevolent Societies.

We clip from a recent issue of the *Medical and Surgical Reporter* the following article which will, no doubt, prove of interest to many of our readers:

There is a valuable source of statistics relating to the amount of sickness in certain classes in this country, which, so far as we know, has not been utilized by our sanitary students. We refer to the reports of those benevolent societies which pay their members a certain sum when they are incapacitated by illness from pursuing their vocations. The most important of these societies is the Independent Order of Odd Fellows. For the experience of this influential organization we are indebted to the courtesy of Mr. James B. Nicholson, Grand Secretary of the Grand Lodge of Pennsylvania.

The attention of this Order is naturally turned to a study of the prevailing average of sickness, because the question of this average for each year of an individual's age is of importance in estimating the obligations which a Lodge assumes on receiving a member, and in devising a system of dues which shall bear equitably on every person. And all the statistics which have been accumulated for years go to prove that there is a steady rate of increase in sickness for the average individual, proportionate to his advance in age. Years ago this fact was established by the authorities of Great Britain in their investigations into the conditions of friendly societies. The only reasonable question that remained was, whether the conditions of health and disease on the continent of North America were the same as in Great Britain. That question may also be considered as answered—all statistics showing that the yearly increase takes place in the new world as in the old; that the rate is slightly lower among our members than among the members of benevolent societies in Britain; and that in all these organizations the rate is much lower than with the general community.

In Pennsylvania, throughout all the Lodges, there has been, as might be expected, a steady increase in the average of sickness as the Order grew older, and a larger number of its members approached old age. This is strikingly illustrated in the following table, which gives the general average of sickness, in weeks, per 100 members:

In 1873 this was	62 25
In 1874 " "	62 91
In 1875 " "	67.22
In 1876 " "	64 47
In 1877 " "	77.39
In 1878 " "	80.90
In 1879 " "	89.78

Classifying the Lodges by hundreds, the statistics render apparent how much less time is lost by sickness in the junior Lodges than in the old ones. Thus, the oldest 100 Lodges in this State lost, in 1879, 128.81 weeks' sickness for each 100 members; while the 100 junior Lodges lost but 22.35 weeks' sickness for each 100 members. A mathematical law has been deducted from the study of this progression, to this effect. It appears that after making due allowance for the causes that produce fluctuations, the existence of a law that regulates the demand for sick benefits is as clear as any mathematical demonstration can be made.

In the Lodges numbering from 1 to 100, the increase in five years was 24 weeks for each 100 members. In the Lodges numbering from 501 to 601, the increase during the same period of time was 13 weeks, while in the Lodges numbering from 701 to 801, the increase was five weeks. Thus showing that the ratio of increase in five years was greatest in the older Lodges, and least in the younger Lodges. Nothing can be clearer than the fact thus demonstrated by the experience of the Order, that in every Lodge there will be an increased demand for benefits in the future, as the Lodges grow older, and that the ratio of increase will change and be enlarged with each decade of years, until the maximum demand is reached, on account of the maximum of sickness having been attained. The financial bearing of these facts on the prosperity of the Order is perfectly well recognized by the able men who have its interest in charge.

The reports of Mr. J. W. Hallam, Grand Secretary for the State of Delaware, present the statistics of the Order in other forms, one of its tables showing the number of members sick at each age, with the number of week's sickness, and the number who died. While another table shows, by decades, the number, averages and percentages of members sick at each age, the number of week's sickness, and the number who died. A part of this table we make room for, as it strongly shows the increasing invalidism with advancing life:

Ages.	Total Membership.	No. of members sick.	No. of weeks sickness.	Average No. of weeks each member is sick.
From 21 to 30	[illegible]	248	1061	4
" 31 to 40	330	361	1946	5
" 41 to 50	423	332	2279	6 83
" 51 to 60	191	221	1488	6 73
" 61 to 70	[illegible]	127	1230	9 85
" 71 to 80	22	43	647	15

It is believed, also, that temporary causes, especially business prostration, increase the amount of sickness, even among active, fairly well-to-do males, as most of the members of the I. O. of O. F. are. Thus the Grand Secretary remarks of the sick rate in 1879, which mounted up the heavy figure of 89.87 weeks for each 100 members:

The amount of sickness for which benefits have been paid, if distributed *pro rata* among the entire membership in the jurisdiction, would assign to each member during the past year a sickness of six days, six hours, 58 minutes and 40 seconds duration, an increase of nearly two days the past five years. It was thought that the steady increase in the average amount of sickness was abnormal, arising largely from business depressions and want of steady employment. It is yet too early to declare that there is no ground for the idea. The experience of the current year will be looked for with some anxiety, to ascertain whether the increase will continue upon the same ratio as it has done in the past, or whether the revival of business will not have a favorable effect upon the ratio of sickness.

It is highly probable that this is an exciting cause of many maladies. The depressing of anxiety, grief and fear, of disappointment and discouragemet, are too well known to need any special mention.

These observations by no means exhaust the documents of the Order in their hygienic and sanitary interest, and we refer to them rather to bring them to the attention of special students in that branch than for any other purpose.

The mineral cabinet of Bro. H. Mitchell, of San Jose, is one of the handsomest we have ever seen. It is 10 ft. 6 inches in hight and 3 ft. 6 inches wide, containing 60 different kinds of wood, native and imported, divided into 2,136 pieces. It consumed a good portion of one year in making, and is valued at $1,000.

Bro. W. O. Thrailkill, formerly of Sacramento, has taken up his residence in Oakland, following his profession as dentist. He is also publishing the "Dental Jairus," which has several corresponding editors in the East assisting, making it a valuable publication not only to the profession, but to every household. We welcome him to our sister city across the bay.

On Tuesday, October 18th, Vesper, No. 62, Livermore, will have a celebration. This Lodge has not been represented in our "Locals" for some time. Brethren, let us hear from you.

Grand Recorder's Department.

Headquarters of Grand Lodge, A. O. U. W., Rooms 40 and 41, St. Ann's Building, corner of Eddy and Powell, San Francisco. H. G. Pratt, G. R.

Wm. C. Flint, Esq., 216 Sansome street, S. F., is Chairman of Committee on Laws and Supervision. All By-Laws' or amendments to same, should be sent directly to him.

Our beneficiary certificates now number up to 14,860.

Four sets of supplies for new Lodges have been issued from this office during this month.

The double assessment for September had little effect on the usual number of suspensions, the increase being scarcely, if at all, perceptible.

Our Degree of Honor Lodges are without charters. Some years ago the Supreme Lodge adopted a design for charters for Degree of Honor Lodges, but there the matter was dropped, as has been the case with most matters connected with the degree. At request of some of our Lodges, I made application to the Supreme Recorder for charters, who in a letter referring to the subject, says: "It has been brought to the attention of the Supreme Master Workman and Finance Committee, and no steps in that direction [the printing of charters] have been authorized, and I do not think that anything will be done in that way until further orders from the Supreme Lodge are had." It is the old story. The Supreme Lodge would do itself more honor by disowning its only daughter altogether, or else make some provision for her necessities. But possibly it is as well that no charters be issued until after the next session of that body may be adopted.

Medical Examinations.

Dr. E. P. Iliff, of Newark, N. J., having been requested to give his views to a sister society upon the subject of medical supervision, gave utterance to some truths which should have a wide circulation, as there is no more important position in the Order than that of Medical Examiner. He says: All men are not honorable, and it is necessary in all insurance organizations to make provision for all probable contingencies, and to secure protection from all imposters. To the casual observer the examination papers of any one of these societies seem to be very rigid, and appear to contain sufficient inquiry to detect all forms of disease. This, however, is not the case. There is undoubted evidence of evasion of facts. The examiner is not sufficiently bound in the performance of his duty; neither is he sufficiently paid for the labor which it is necessary he should bestow upon that duty. Any practitioner who has a large practice demanding his attention, cannot be expected to devote the time necessary to these cases for the pittance he receives, while his private patients are clamoring for his attention. The consequence is, he rapidly makes the inquiries, affixes the answers, taking the candidate's word for everything, gets the work off his hands, pockets his little fee, and gives himself no trouble about what may be the result of that examination. To carefully examine a candidate requires time. There is also necessary a certain adroitness on the part of the examiner to bring out facts in the life habits of the candidate which he is reluctant to disclose, and which may have a marked effect upon the risk. For instance, candidates as a rule are very reluctant about previous habits of dissipation, and an answer of "an occasional glass of beer" is oftentimes all that can be obtained, and the candidates habits are set down as temperate. Now the question arises, "what is meant by an occasional glass? Does it mean one glass a month or one glass per hour?" Certainly the answer is very indefinite, and to my mind, very unsatisfactory. Do you ask why unsatisfactory? I will tell you. By carefully scanning the lists of death causes in a society to which I now belong, I notice that of 168 deaths, there were from Bright's disease, 9; from cirrhosis of the liver, 3; from heart disease, not designated acute, 12; cancer of the stomach, 2, and from consumption, 31. Considering first, then, all those afflictions of the kidney collectively demonstrated Bright's disease, and which are in a large proportion of cases the result of the abuse of alcohol, I conclude that in the case of death from Bright's disease occurring within 16 months from date of examination, the disease must have existed at that time, and a careful examination of the urine would have revealed the presence of the incipient disease. Cirrhosis of the liver and fatty degeneration of the heart are to be suspected if it can be learned that the candidate has been for years even the most moderate, yet habitual drinker. When evidences (be they ever so slight) of Bright's disease are found to exist, I regard the risk as extremely hazardous. When family history points to the existence of tubercular disease in a single member of the family, the candidate should undergo the most rigid examination; his age should be over 35 years, and his occupation should be such as does not especially predispose to lung disease. If he is found to be perfectly sound, is over 35 years of age, his occupation suitable, his habits and customs such as conduce to good health, he might be admitted.

This is a matter of business, not pleasure. We are not to look upon applicants as honest, pure-minded individuals simply because they desire to unite themselves with us in the bonds of a brotherhood.

It is, I believe, a universal law in all secret Orders to appoint a committee to investigate the standing of each candidate. It is my candid conviction that these committees very frequently perform their duties in a very flimsy manner. I know of cases of favorable report where the candidate was known to be addicted to habits of dissipation. This should never be. No committee should report favorable in such cases, and they should be held accountable to the Lodge when the facts respecting the candidate's habits become known. Very much depends on the efficiency of the committee.

I cannot conceive why men should bind themselves in a contract to pay a stated sum of money to the family of one who invited disease and death through indulgence in pernicious habits, which indulgence has cost him an actual outlay of cash perhaps far exceeding the amount for which he was insured. Let the instructions to committees be explicit, and let those instructions be reiterated from the chair whenever a committee is appointed, something after the manner of a judge's charge to a jury.

Resolutions of Respect.

[In Memoriam.]

Hall of Temple Lodge, No. 11, A. O. U. W, North Temescal, Oct. 3d, 1881.

To the Officers and Members of Temple Lodge, No. 11, A. O. U. W:

Sirs and Brothers:—We, your committee appointed for the purpose of drafting resolutions of respect to the memory of the beloved wife of Bro. J. W. Shurvell of this Lodge. most respectfully submit the following:

Whereas, It has pleased Almighty God to take unto himself the beloved wife of Bro. J. W. Shurvell, we feel it right and proper to pay a fitting tribute of respect to the memory of our beloved Sister; therefore, be it

Resolved, That in the death of the wife of our beloved brother we deeply sympathize with him and his dear little children in this, their sad affliction; and pray that he may be spared to raise and educate them in the fear and love of the Supreme Ruler.

Resolved, That this Lodge tender to him and his motherless little ones its sincere and heartfelt sympathy in this, their great affliction; and be it further

Resolved, That these resolutions be spread in full upon the records of this Lodge, and that the Pacific States Watchman be furnished with a copy for publication.

O. R. Morgan, R. B. Nixon, H. C. Babcock. } Com.

R. B. Nixon, Recorder.

Col. Fizzletop recently met Col. Gilhooly, who is a prominent secret society man. Said the former: "I've made application to become a member of your noble Order, and I want you to see that I am elected. I want to join on account of my wife." Yes, that's a good idea, as every man should protect his family against poverty and distress." That's not what I mean. I want to join your noble Order on account of my wife, because unless I've got some Lodge to go to, or some other good excuse, she won't let me come down town at all nights. Just as soon as I am a member, there will be called meetings almost every night, that I'll just have to attend, and I'll always set 'em up,' and the admirer of the noble Order winked a wink that had beer in it.

Bro. Alex. De Elom, who has for eight terms served his Lodge (San Francisco, No. 4) as Guide, has been presented by his brothers with a silver Workman's badge as a token of their respect and for his faithfulness in the duties of his position.

Silver Star Lodge, No. 2, D. of H., Temescal, will give a grand entertainment October 21st.

Official Responsibility.

We copy from the *Fraternal Censor* the following excellent article upon the responsibility of subordinate Lodge officers, and the position which the individual member occupies in the Lodge: Are the officers of subordinate Lodges the agents of the Order, or of the members of the Lodge in which they hold office? This is a question that must soon receive an authoritative answer, and if the Supreme and Grand Lodges are incapable of fixing the relative responsibility of the respective interests, then the courts will; and the Order may be called upon to submit to a decision, emanating from a mind ignorant of the principles of beneficial Orders, and imbued with an antagonism engendered by the teachings of the "old line" life insurance system; or possibily the cause of justice may be relegated to the tender mercies of a jury, with whom the sympathetic plea or hypocritical tear, would inevitable outweigh the facts, though clear as the noonday sun.

The recent experience of the Order in the Peugh case contains a warning that should not be lightly regarded, especially as it is the first case in which the laws of a beneficial Order have been overruled by the court.

It is not creditable to the Supreme and Grand Lodges that so large a proportion of each session is frittered away discussing questions of purely local bearing, to the exclusion of such subjects as official responsibility, that affects the interests of every member in the Order.

If it is conceded that the subordinate Lodge officer is the agent of the Order, his acts will bind the Order as between it and a third party, and the officer alone is subject to the penalties of the Order's laws, which cannot exceed expulsion. A medical examiner may receive correct replies from any number of applicants who are physically disqualified, and yet so fill out the blanks that each pass, and in the course of a few weeks, months or years the Order is required to pay $2,000 for each of the risks so admitted; and during life their membership cannot be disturbed because the testimony is forthcoming to substantiate the claim of innocence. The interest of the physician may not be apparent, and yet be very substantial.

An isolated Lodge of say 40 members may think, that 50% or 75% of the cost of insurance might be saved by an omission of the Financier to send them notices of assessments on that percentage, or, as in the Peugh case, a Financier by failing to give a statement of account when asked, may release the insured from payment, and yet hold the Order liable for the risk.

The officers of a Lodge may collect the dues and assessments from the members, and put the money in their own pockets instead of remitting to the Grand Recorder, and if suspension of the Lodge, and death of one or more members follow, the Order is liable to the heirs of the deceased, although the deceased was under suspension when the death occurred, such possibilities might be indefinitely multiplied; and that which is possible, may become probable. We are aware that these possibilities are not pleasant to contemplate, and will be dismissed by many, as too improbable for a serious contemplation, or to justify any precautionary measures. As to all questions, there is another side to this: shall the innocent member be required to suffer, for the shortcomings of an officer, with whose election, possibly, he had naught to do? Shall the innocent heirs of a deceased member be deprived of the benefits guaranteed by the Order because a careless Financier omitted to send a notice of assessment or failed to give credit for payments, which results in the suspension of the member without his knowledge? These are questions that will be differently answered, as viewed from different standpoints, and will depend largely upon the relationship existing between the member and his Lodge. If in the habit of attending his Lodge meetings, taking an interest in the election of officers, the reading of reports and receipts, and the management of the fiscal affairs of the Lodge, he will know whether the officers are performing their duties, and will know the exact status of himself and Lodge, and will be an advocate of the theory that it is every man's duty to do likewise or take the consequences. The man who joined for the insurance cares nothing for the fraternal features of the Order, and thinks attending Lodges a waste of time, is a firm believer in the theory that the Order should assume all risks, and that his responsibility ceases when he has paid his dues and assessments to an officer of the Lodge. Let us see which of the two theories are nearest in harmony with the genius of the Order.

Life insurance at the minimum of cost is the foundation upon which the Order has been built, and it has been demonstrated that the co-operative system is the most economical and safest insurance when conducted upon the fraternal plan, *i. e.*, by Lodges. It is the cheapest, because, through the co-operation of its members, new risks are constantly being secured without the payment of commissions to agents. It is the simplest, because each member carries his own reserve, which renders unnecessary the services of article financiers on princely salaries to invest the money of the insured. It also renders unnecessary the incomprehensible actuary, and the accommodating director who draws his salary regularly for the use of his eminently respectable name. It also reduces the host of clerks to a list of two or three, whose salaries and office rent about equal the salary of first-class clerks. But the question arises, is this simple system safe where the management rests in the hands of these two or three? The laws of the Order require that these officers shall give security, sufficient to protect the Order from loss by reason of their delinquencies, and they are selected by the representatives of all the Lodges and hence are the agents of the Order. But as these men cannot personally supervise the acts of the subordinate Lodge officers, each Lodge is required to make its own selection, and each member being an interested party is expected to co-operate with every other member in supporting the principles of the Order, and enforcing its laws. Each member can, and is supposed to know the law, and by attendance on Lodge meetings can always know his own standing and that of his Lodge. The Order is an aggregation of individuals, each of whom have agreed to perform his just proportion of the work incident to its management, that each may thereby secure $2,000 insurance at the minimum cost. The duty of each is to pay all just demands upon him and see that his Lodge and its officers conform strictly to the law. The officers of a Lodge, being the selection of its members, are their agents, and it is just and proper that they should be responsible for their acts; and it would be eminently unjust to hold them responsible for the delinquencies of officers of other Lodges, in whose election they had no part or interest, and of whose acts they can have no personal knowledge. It is also proper in this connection to consider the tendencies of the two theories. To declare that the officers of a subordinate Lodge are the agents of the Order, is to relieve the member of that sense of responsibility which tends to care in the selection of officers and the management of the Lodge. It encourages corruption and collusion by making such things possible. In fact, the whole tendency is to laxity in discipline and inattention to the management of the Order; while on the other hand the doctrine of personal responsibility of each member for the management of his Lodge tends to strict discipline, strict and honest management, and accomplishes what the Order was designed to do, viz: furnish insurance on a cheap and safe basis.

This was an exhibit at the recent Mechanics' fair that attracted attention and favorable comment by the artistic display of different kinds of appliances, but more especially for the Elastic Cork Truss. From numerous testimonials from leading citizens, recommendations from the California State Medical Society, in 1876–7, and the first premium at the Mechanics' fair of 1880 and 1881, Mr. Beman is not only known as a skillful and artistic surgical mechanic, but seems to have a mechanical genius in making appliances for the human family. The truss has no iron plates, hard springs or cumbersome pads to chafe and gall, or rust and corrode. Cork is a non-conductor, soft and elastic, and the truss can be worn sleeping, riding, dancing or swimming. Those who are afflicted can be helped and relieved by applying or sending to Wm. Beman, anatomical surgeon, Shiels' building, 32 O'Farrel street, S. F.—*From Mining and Scientific Press.*

Bro. Adam H. Murphy, formerly doing business at No. 12 Fourth street, has associated with him John E. Adams, and removed to No. 406 Sansome street, where will be carried on the business of coffee and spice manufacturing. They have have had long experience and knowledge of the business, and are confident they will be able to please all their customers. Among some of the articles they deal in are the following: Whole and ground spices of every name, whole and powdered herbs, baking powder, bicarbonate of soda, saleratus, Empress of India curry powders, chocolate, broma, cocoa, flavoring extracts, teas, spice-mill supplies and essence of coffee. The building in which the new firm is located is very eligibly situated, and consists of three stories, with basement. It is fitted up with all the appliances necessary for the conduct of a large trade. A visit to the new house shows that the firm means business, and they will no doubt take a leading place among our spice and coffee firms.

The Pacific Straw Works, 16 Fourth St., is the popular place of this city for renovating and remolding hats and bonnets. Having had a long experience, Bro. G. A. Dean is always prepared to furnish the latest styles of hats and bonnet frames and remodel them to the fashion.

Danger from Dust.

A probably serious source of disease is the dust of cities. When we reflect that this is the dried and pulverized dirt and filth of our streets, derived from all kinds of refuse matter, its dangerous qualities may be suspected if they are not clearly obvious. Conveyed by the winds, it is diffused everywhere, and settles upon or adheres to everything. We inhale it, drink it, and eat it with our food. A speck of mud on our bread excites disgust; but who minds the same thing when it is nothing but a little dust? If our food just brought from the market or the provision store is examined with the microscope, it is found to teem with small particles of dust, consisting of fine sand, bits of hay and straw, filaments of cotton from old paper and rags, wood fibres, hairs and scurf scales of man and beast, starch grains, spores, etc. Recent investigations render it probable that dust contains the germs of decomposition, gangrene, and contagious diseases.

While our view of the dangerous qualities of dust may be exaggerated, there is certainly sufficient reason to regard it with apprehension, and make it desirable to avoid it. Its subtle and all-pervading character renders this, to a great extent, impossible, but it may be much reduced by the removal of its sources of supply—the accumulation of dirt and filth. For this reason the streets should be kept clean, by sweeping and washing; and, to facilitate this, they should be as smoothly paved as will be consistent with safe walking and driving. Especially is this desirable in the vicinity of the depots of our provisions, the market houses, where, unfortunately, we often observe the greatest accumulation of dirt. The streets around our markets should have an asphaltum or other smooth pavement, and it should be swept and washed weekly, or oftener.—*American Journal of Microscopy.*

BAVARIAN ANTI-FRICTION COMPOSITION.—Ten and one-half parts of lard, melted with two parts pulverized plumbago. Melt the lard and mix in the plumbago slowly, and be sure that it is fine. Stir well. Apply in cold state. Used with great success instead of oil, tallow, etc.

CEMENT.—To make a cement for boiler joints, take 10 parts of white lead ground in oil, three parts of black oxide of manganese and one part of litharge. Reduce to a proper consistency, and apply where needed.

BRASS castings shrink one-eighth of an inch to a foot in cooling. Copper shrinks one-fourth of an inch to a foot. Iron shrinks one-tenth of an inch to a foot.

Action of Jaborandi on the Hair.

Science, of Sept. 17th, contains some further particulars in reference to the action of jaborandi in changing human hair to a darker hue The active principle of the drug, which was employed, is knownas philocarpin—an alcoloid, derived from the plant jaborandi, which has been quite recently introduced into medicine from Brazil. The philocarpin was administered by hypodermic injection. It has a peculiar and powerful effect upon the human system, producing profuse perspiration and salivation. It also stimulates the growth of the hair. It was administered for the purpose of eliminating urea from the system of the patient, which was present as a consequence of the suppression of urine due to other troubles. About 40 centigrams were put in gradually increasing dozes, and producing 22 "sweats," and it was estimated that 14 pints of fluid were removed by these "sweats." The ureamic symptons were completely removed.

The administration of the philocarpin was commenced Dec. 16, 1880, and the change in the hair was first noticed Dec. 28th. After that time the change was gradual. The hair, in its normal state, was light, tinged with yellow. In Jan., 1881, it became a chestnut brown, and in May following almost black. In addition to the change of color, the hair also became thicker and coarser. While previously quite dry, it became moist and oily. The hair on all parts of the body underwent the same change. The eyes also became much darker—a dark blue.

Another case, that of a 14 months-old infant is reported by the same party—Dr. D. W. Prentiss, of Washington City—with the same results in case of the hair. In this instance the drug was administered for membraneous croup.

The effect of this drug on the hair appears to be something new, and if experience confirms these observations, another will be added to the several already-known marvelous influences which philocarpin has upon the human system. The *modes operandi* of the change is yet to be determined. It is known that the drug stimulates the growth of the hair, and the suggestion is made that the change in color may be due to an oily pigment that is increased in quantity under the influences of large and continuous doses. As age advances the processes of nutrition are enfeebled, and the hair gradually becomes thin and dry and white, until it finally dies and falls off. Possibly this drug, if it can be administered without detriment to the general system, may become valuable as a preventive to premature baldness.

"DOES your sister Annie ever say anything about me?" asked an anxious lover. "Yes," replied the little girl; "she said if you had rockers on your shoes they'd make nice cradles."

Residence: 965 West Street, Oakland. Before 10 A. M., after 5 P. M.

Office: 759 Market St., San Francisco From 11 A. M. to 3 P. M.

A SINGULAR USE FOR ELECTRICITY.—Perhaps one of the queerest applications of electricity to the useful arts is its employment in the hiving of bees when they swarm. The old fashioned way of accomplishing this interesting feat of domestic economy was, if not absolutely dangerous, at least quite annoying and provoking. German scientists of a practical disposition conceived the notion of utilizing the electric force to stupify, without injuring, the bees for a short period. The plan was found to work like a charm. It was first tried upon bees that had gathered upon trees. Whether the clusters were large or small, the result was perfect. The bees fell upon the ground in a trance which admitted of safe handling. The next stage in the experiment was to capture the bees when they were about to swarm. By introducing the ends of two conducting wires into a fully occupied honeycomb, and turning on the current for an instant, the insects were rendered inactive for about 30 minutes. Bee-rearing and the producing of honey are yearly becoming a greater industry in this country. Parties interested in the business should test the German idea of hiving bees by electricity. The chance is not remote that bee proprietors will apply too strong a shock and lose their bees, but they will gain in science, which ameliorates all small disasters in this progressive age.

A NEW MALARIA PARASITE.—Prof. Laverau, of the medical school of Valde-Grase, has just published a work describing what he considers to be a new parasite which he has found in the blood of persons affected with malarial fever. A notice of his discovery was communicated to the Academy of Medicine so long ago as November, 1880, but it seems to have attracted little attention, being thought to be simply one of the numerous announcements made of late years, of the discovery of the cause of malaria, which prove in the end to have no foundation. The organism described by Prof. Laverau is a minute cell, in general appearance somewhat like a white blood corpuscle, and having like it amœboid movements. He considers it to be animal rather than vegetable in character, but for this there seem to be no sufficient grounds. The matter is one of great importance and we shall look with interest to see what the forthcoming report by Dr. Sternberg of the army, to the National Board of Health upon the supposed causes of malaria, may contain in regard to the claims of Prof. Laverau.

THE coinage at various mints for September was $7,847,300, of which $2,400,000 was in standard dollars.

EARTHQUAKE SHOCKS IN DEEP MINES.—It has been frequently stated that earthquake shocks are seldom felt at any great depth beneath the surface, as in deep mines. This reported fact has given much hold to the electric theory of earthquakes, under which the earth would not be supposed to be disturbed at any considerable depth. But the following item, clipped from a late English paper, puts quite a different face on the matter: "A severe shock of earthquake is reported to have been experienced in the mining district of Teversal, in Nottinghamshire, about noon on Friday last, (Aug. 1881.) In one of the pits belonging to the Stanton Iron Works Co., the miners were so alarmed at the shock and the accompanying noise that, thinking an explosion had occurred, they rushed to the mouth of the pit. In the Pear Tree Inn, Fackley, bricks were removed from the chimney, and the same thing was noticed in a house at Taversal. The stationmaster at the latter village, while sitting in his house, was thrown from his seat by the shock, and a quantity of plaster was detached from the ceiling. There was no explosion in the mines or other circumstance to account for the phenomena, and an upheaval of the floor of one the pits indicated that the cause of the disturbance was below the workings. One of the pits is 1,290 ft. deep. The shock traveled in a northwest direction."

ANTI-WHISKY AND TOBACCO ESSAYS.—We have received circulars from the Women's Christian Temperance Union, announcing that Dr. R. H. McDonald, President of the Pacific bank, has placed at the disposal of this society the sum of $1,500; $1,000 to be distributed among the public schools of San Francisco, for prizes awarded for the best essays on the evil effects of intemperance and tobacco; $500 for prize essays on the same subject (Intemperance and Tobacco), for the public Normal school at San Jose, and the public High schools of the State, outside of San Francisco. The competition for these prizes is governed by many rules and conditions, and those who desire to know the full scheme had better address Mrs. M. E. Congdon, Secretary W. C. T. U., 314 Sutter street, S. F., asking for circulars.

AN extract from the letter of a recent immigrant: "I'm wurking on the streets, but I don't intend to do it long. Shure, Mike Mulhooley, who left home three years ago come nixt Aister, has a rich young young lady to drive him around the city wid a beautiful span, and he sitting up behind with his arms folded, like a fine gintleman intirely."

Provisions.

R. CLUFF. J. S. CLUFF. WM. CLUFF.

Proprietor and Patentee.

State and County or Township Rights for sale. Price of Faucet, $4.00.

San Francisco Lodge Locals.

Recorders are invited to correspond. Lodges may also find suitable reading here for "good of the Order."

Hercules' Anniversary.

Hercules, No. 53, with their numerous guests celebrated their third anniversary, at Saratoga hall, on Tuesday evening, Oct. 4th, 1881, by a literary and musical entertainment, closing with a very enjoyable dance. This large hall was elaborately trimmed and festooned for this special occasion with flags tastefully hung and grouped in clusters from wainscotting to ceiling, with shields and pretty devices and evergreens artistically arranged around the room. Suspended from the ceiling were a dozen cages containing the sweet singing canaries. Over the platform in large gilt letters was the word "Welcome," while on each side were banners, on one these words, "Hercules, No. 53, A. O. U. W., instituted Sept. 13th, 1879." on the other, "Hercules, No. 53, A. O. U. W., third anniversary, Sept. 13th, 1881." The several committees were on hand early, Bro. Bergmann being the chief to distribute the programmes at the entrance to the hall, whilst at his side was the flower girl ready to pin on the lappel bouquets, whilst others politely showed their guests to the reception parlors and free hat-room. The exercises were commenced with appropriate remarks by C. E. Carroll, M. W. Overture, band of six pieces; address, Wm. H. Barnes, G. M. W. It being a grand gathering, the Grand Master seemed to arise to the occasion, delivering an address that was replete with statistical facts, interesting thoughts and complimentary words for the young giant of the A. O. U. W., Hercules. Vocal solo, Mrs. Sadie Parker, Miss Roxie McFarland accompanying on the piano. This was an artistic performance of great merit, that was favorably received and rewarded with a hearty encore. Cornet solo, Prof. Von der Mehden, with band and piano accompaniment by Prof. Yanke. Vocal solo, "Where is Heaven?" Mrs. H. W. Baxter; an interesting and sentimental song that was exquisitely rendered and received with much favor by the audience, and for a unanimous encore, Mr. H. W. Baxter, her husband, joined in a character piece on sweets of married life, that created much merriment, each stanza being encored, and at the close recalled. Piano solo, by Miss McFarland, that was finely executed and given a generous applause; closing with a character and sentimental song, by request, by the Grand Master. Saratoga hall is one of the most popular places in San Francisco for parties or entertainments. The acoustic properties are pronounced by the leading musicians as among the best in the city. The reception parlors and accessories are large, and under the management of Mr. Jacob Schleicher, the proprietor. This is one of the popular resorts for first-class entertainments and balls, and on this evening the perfected arrangements were carried out to the letter. Bro. Jas. S. Cluff, floor manager, lead the grand march which was large enough to fill the entire hall. Spirited and pleasant dancing was kept up until the wee sma' hours, in carrying out a programme of 18 figures, one of which, as appeared in the list, the Virginia reel, was dedicated to the "growlers;" we suppose to those of Hercules, although none appeared on this festive occasion. The gentlemen vied with each other in their courtesies and attentions to each other and their guests; the ladies were finely and richly dressed, and everything went merry as the marriage bells. The several committees seemed determined to make their 3d anniversary worthy of the occasion; and we believe it was universally acknowledged to be one of the best of the season. That they may have some slight token of remembrance, we herewith give the names of the several committees: Committee of arrangments, P. E. Hilton, P. M. W., Chairman; E. F. Baruth, A. Bergmann, Chas. Carroll, Sr., M. W., F. Hill, L. M. Manzer, W. H. Miller; floor manager, James S. Cluff; floor committee, E. R. Folsom, J. L. McKee, J. P. Nichols, John Plath, T. C. Gainey, C. C. Megowen; reception committee, A. J. Vining, P. M. W., Chairman; W. W. Morrison, P. M. W., B. Hastings, P. Veasey, P. M. W., L. L. Dennery, A. F. Bell, John Fick, J. H. Congdon, Wm. Litch.

Bernal, No. 19.

The worthy brethren of Bernal Lodge, No. 19, are moving along in their usual prosperity. At their meeting on the 10th inst., one candidate was elected to receive the degrees. A resolution was introduced providing that on the death of a member or his wife, the surviving party shall be paid $75. Under head Good of the Order, G. Powell, P. M. W., made some well-timed and interesting remarks, in the course of which he paid a just tribute to our Grand Master. After which Bros. Juniper, Prince, E E. Worth, Rd'r, Carsten, Cullin Rv'r, and Brady discussed the question of paying $75 under the circumstances heretofore named, in a pleasant and fraternal manner. It is always interesting to spend an evening with the brethren of Bernal, No. 19.

Bay View, 159.

Bay View Lodge, No. 159, had an entertainment in their hall, South San Francisco, Friday evening October 7th, which is reported to have been very successful. Wm. H. Barnes, G. M. W., was present and enlivened the occasion with one of his spirited addresses. Geo. T. Shaw, D. D. G. M. W., did the honors of the chair. The following programme was given: Banjo duet, Messrs. Wm. West and G. Winterburn; recitation, Master Ralph Sloan; song, Miss E. Ellinghouse; piano solo, Miss Lulu Shaw; Reading, Miss Minerva Ellis; song, Wm. E. Lutz; recitation, J. C. Kispert; song, Miss Katie Welby; piano solo, Miss Alma Kelly; recitation, Miss Alice G. Jewell; song, Miss E. Ellinghouse; piano solo, Mis Henning; vocal duet, Miss Jewell and Mr. Flagg; Committee of Arrangements—John Sloan, Henry Lehrke, John T. Welby. Bay View is quite a distance from the center of the city, but the Workmen in No. 159 "hold the fort" with honor to themselves and credit to the Order.

Anniversary of Fidelity, 136.

The second anniversary of Fidelity, No. 136, was celebrated on Thursday evening, October 13th, at Saratoga hall, by a grand banquet and ball. The marvelous success of this Lodge of Workmen induced an almost unanimous agreement of the members to celebrate in a regal manner. Commencing at the sidewalk the stairway was canvassed to the hall door, while on each side of the stairs in hall and reception rooms were filled with pots and racks of evergreens and exotic plants in so profuse a manner that you easily imagined you were gliding through an oriental garden. Flags, streamers and wreaths were spread out and hung in clusters at close intervals in every part of the hall. A mammoth anchor, on which rested the shield, was covered with roses and pinks and delicate flowers with the letters A. O. U. W. wrought in with different colors, beneath which set out in burning gas-jets was the word "Fidelity 136." On a rustic pedestal near the platform, was a mammoth glass globe, in which sported the different colored fishes, and at the extreme end was the large bowl filled with choice lemonade. Saratoga hall was dressed in a manner of taste and elegance seldom if ever known to this favorite resort. The gentlemen in attendance made a fine appearance in their dress suits and lappel bouquets which had been distributed to all who wished them free. A large number of the ladies were in full dress, their dresses being of the richest material and most elegant suits. At 8:45 Brother George R. Sanderson, P. M. W., and his wife, led the grand march with a company that filled this large hall just full enough for dancing. A programme of 16 dances, with a few extras, was kept up until the "wee sma' hours," by a real cordiality, and enlivening music by Blum's band of eight pieces, with an occasional flood of calcium light thrown over the merry dancers. At 11:15 the grand march was formed that led to the large hall above, where "Ned," of the "Mercantile Lunch," 212 Sansome street, had set a banquet that did him honor as a caterer and gladdened the hearts of over 300 guests at one sitting. The six long tables were fairly loaded with choicest meats, salads, fruits, pyramid and ornamental cakes, with the best ice cream for dessert. Everyone seemed in their best mood, and an hour was happily spent in feasting and jollification in the banquet-room. Extreme politeness and cordiality seemed to pervade the entire company, especially the several committees who showed particular attention to their invited guests. From the commencement to the close there was not a word of censure or of dissatisfaction expressed, and to a casual observer it seemed like the reunion of one great family. Thus has passed the second anniversary of Fidelity Lodge of Workmen, with its selected membership now numbering over 300, which will at the session of the next Grand Lodge be over 500. With a unity of action and oneness of purpose, the possibilities for doing good to their fellow men will be exemplified in Fidelity, No. 136, A. O. U. W. We herewith give the several committees who carried out the wishes of their brother Workmen by giving an entertainment that was worthy of the Lodge they represented: Committee of Arrangements—F. J. Symmes, J. W. Rourke, F. S. Chadbourne, W. T. Caldwell, J. B. Curtis, L. W. McGlauflin, A. W. Moore. Reception Committee—W. H. Penfield (P. M. W.), Geo. W. Brower (P. W. W.), T. A. Farless (P. M. W.), Walter H. Holmes (P. M. W.), E. W. Reading (P. M. W.), L. L. Dunbar (P. W. M.), Geo. R. Sanderson (P. M. W.), Wm. B. Smith (P. M. W.), E. B. Young (P. M. W.). Floor Manager—Geo. R. Sanderson. Assistants—Chas. H. Smith, A. M. Grim, Geo. S. Neale, J. E. Cook, Harold Holderness, John T. Bent.

Triumph, 180.

This fortunate and successful young Lodge is moving steadily ahead in membership. One hundred and fourteen names of first-class material are now enrolled. On October 11th there were five applications lying on the Recorder's desk, which resulted in the J. W. degree being given to two and the M. W. to one. There were two applications received for the degrees. Unfortunately, the principal officers were absent on this evening, but their places were admirably filled by the veteran P. M. W.'s of this Lodge.

Excursion of Valley, 30, to Monterey.

Over 100 Workmen, members of different Lodges of the city, under the auspices of the brethren of Valley, made an excursion to Monterey on October 1st. The party consisting of a preponderance of ladies, wives and daughters of Workmen, occupied four coaches. The passage was pleasantly spent in singing and enlivened conversation the entire trip. The company, headed by a band of music, marched from the depot to the Hotel Del Monte, and were assigned their rooms. As soon as their toilets were ready, the banquet room was thrown open, where a magnificent dinner was in waiting, which was indulged in with gusto. The evening's entertainment consisted of a grand ball in the large hall adjacent to the Del Monte. Large bowls of the choicest temperance drinks were prepared, where all could indulge at their election. Mr. Chas. Crocker and daughter, and other distinguished guests of the Del Monte joined in the dance, and a real enjoyable evening was had. On the following day the party separated in groups, for a drive, surf bathing, sight seeing, visiting all the noted places in the quaint old town. Lunch was served at 2 o'clock, and the party returned at 4 P. M., arriving at 8:45. Everything passed off pleasantly, and not a grumble from the commencement until the close. The gentlemen having this party in charge, Mr. A. C. Bassett, S. P. R. R.; Mr. H. R. Judah, Assistant Passenger Agent, S. P. R. R.; and Geo. Schoenwald, manager of Hotel Del Monte, received a unanimous vote of thanks for the efficient and princely manner in which they treated the excursionists. The committee of arrangements, consisting of W. B. Lyon, P. M. W.; D. McLeod, P. M. W.; Jas. M. Camp, Financier; Henry Hoeber, P. M. W., did so well that the boys hope they may inaugurate a similar excursion soon.

Aurora, No. 8, D. of H.

A thoroughly enjoyable evening was spent by the brothers and sisters of this Degree of Honor Lodge, on the evening of the 11th inst. One lady and two gentlemen were initiated into the mysteries of this degree, the work being performed by the officers in their usual faultless manner. A short recess was had, when Bro. Mau took his seat at the piano, and then—

> "On with the dance,
> Let joy be unconfined
> When youth and beauty meet
> To chase the glowing hours with flying feet,"

After a short season spent in this pastime, the programme was commenced with a duet by Mrs. Sexton and Mrs. Rossbach, the former lady at the piano, when, in response to an encore, the latter lady played the accompaniment. An essay on some of the conceits of men and women was then read by Mrs. Adley H. Cummins, which is printed elsewhere. Piano solo, Miss Congdon, who received an encore for her able effort. The programme was closed with a song by Bro. Cahill. The Lodge then closed in due form, all seeming well pleased with the evening's entertainment.

Lodge Locals.

Mt. Hamilton, San Jose.

The brethren of Mt. Hamilton held a very pleasant and interesting meeting in A. O. U. W. hall on Oct. 5, 1881. As quite usual among our Lodges, resolutions of respect to our late President were spread on the records of the Lodge. A ballot was had and three candidates were elected to receive the degrees. The petitions of three persons were received and committees appointed; also one petition for affiliation. One very gratifying feature of this Lodge, as displayed on this evening, was willing response by members to assist a brother whose family was sick. The average age of the last six candidates elected and given the degrees was 30 years, and taking the average age of 16 candidates during this term, it has been 31 years and 8 months. Several brethren made interesting remarks under head "Good of the Order," and Bro. Chas. W. Shortridge, Financier, paid the Pacific States Watchman a compliment, by saying it was the best paper published in the Order, and every Workman should take a copy.

Mission 56.

Editors Watchman:—Let me give you a brief description of three interesting occasions in the history of Mission Lodge, No. 56. Two of these she shared with Newark and Reliance Lodges; the third was especially her own day. The first was the visit of the Grand Master, Bro. Barnes. A reception was given him September 12th, in the public hall of Centerville. A literary and musical programme was followed by a lunch and dancing. A very large company of the Workmen and their friends filled the spacious hall. Bro. Barnes was in his usual happy mood and convulsed the audience with his funny squibs and irresistible stories. The city readers of the Watchman, of course, are familiar with the nature of the brother's performances, but to us poor folk of the country much of it was new, and all of it entertaining. The second occasion, in point of time, was the third anniversary of Mission Lodge. This Lodge numbers 71 strong. It is made up of good material, as, indeed, is true of all the neighboring Lodges; but Mission was the earliest organized, and, having a favorable location, grew rapidly. Washington hall was ablaze with light on the evening of the 27th of September, while carriages and wagons streamed along the roads converging at the Mission, pressing toward the light that promised a hearty welcome and festivity. Nor were the pleasure seekers disappointed. Sunol, Pleasanton and Livermore sent their sturdy sons and healthful daughters, while the valley of the Alameda, for miles, contributed her gallant and her fair to join with unrestrained joy in the happy anniversary. There are few little circles in a radius of six miles that do not contain a member of Mission Lodge; so that her gala days are like the mustering of a Scottish clan. The music was the best that the country affords. The refreshments were superior and in princely abundance. The tables fairly groaned under loads of grapes, fair as those of Eschol. The committee, composed of Bros. Lebrecht, Hibbard, Goley, Howell, Trimmingham, Healey and Owens. All worked faithfully, but to the two first, new members, whose opportunities for work were better than those of the others, but whose activity exceeded their opportunities, special praise is due. They worked very quietly, but achieved a marked and most gratifying success, and the anniversary of '81 will remain memorable to the hundreds who were there. The third occasion of interest was the burial of Bro. George Smith of Reliance Lodge, killed by a boiler explosion. He was a poor man, but he was a Workman; and 80 carriages followed his remains to the grave. The beautiful ceremony for Workmen was read by Bros. W. T. Ralph and W. F. Emery of Reliance, with much feeling. It was the first death in the three Lodges participating, and the "last sad rites" were observed as became the spirit of brethren. I think the brethren present will pay the next assessment with even more than the usual cheerfulness, for the widow is among us, and our faith is made perfect in sight. The sad event is sending in applications, and we report a very encouraging outlook.

According to instructions, I send the following resolutions, which explain themselves:

At the regular meeting of the Mission Lodge, A. O. U. W., Saturday, September 24th, the following resolutions were adopted:

Whereas, He who presides over the destinies of nations has been pleased to remove from his high place, our beloved President, James A. Garfield, therefore, be it

Resolved, By Mission Lodge, No. 56, A. O. U. W., that while bowing to His dispensation, who doeth all things best, we mourn with sincere grief the wise ruler, the able statesman, the exalted patriot and the truly good man; and

Resolved, That our warmest sympathies go out toward the noble wife, whose remarkable fortitude in her severe affliction has so endeared her to the people, and to her who mourns a son, and they who will miss a father's guiding hand, may the Great Father be gracious; and

Resolved, That these resolutions be spread on the minutes, and be sent to the bereaved family, and be published in the *Alameda County Reporter* and Pacific States Watchman

Signed, H. Dusterberry, J. E. Wamsley, P. M. Fisher.

P. M. Fisher, Recorder.

San Rafael, 24.

A very good meeting was held at San Rafael on the 11th inst. The work was illustrated by Wm. H. Barnes, G. M. W., after which the doors were thrown open and the public admitted, when an address was given by the Grand Master Workman. A supper and a general good time concluded a happily spent evening.

Oakland Lodge Locals.

District Meeting.

The Workmen of District No. 2, Oakland, held a good meeting at the A. O. U. W. hall, on Oct. 3d, under the auspices of Oak Leaf, No. 35. The brethren met in goodly numbers at an early hour, and promptly at 7:30 o'clock the M. W., Bro. Osborne, called the meeting to order and dispatched the business of the Lodge quickly. Wm. H. Barnes, G. M. W., E. F. Loud, D. G. M. W., and H. G. Pratt, G. Rd'r, were received with honors and a welcome by the M. W. Bro. Pratt, G. Rd'r, was called on for a few remarks, which were of a complimentary character, at the success of our Order. Bro. E. F. Loud, D. G. M. W., followed in a short speech, particularly condemning the practice of forming too many beneficiary orders. Wm. H. Barnes, G. M. W., as usual, made the speech of the evening, reviewing the work that has been done in our Order, what is being done and the probable future of this favored child of the 19th century. Among many things he said during his interesting speech was this: "Eight-tenths of the men of California belong to some great fraternal or beneficiary society, and from this great army not a widow can be found in the poor-house or have filled a pauper's grave. Fraternal societies are the great key that unlock the coffers of benevolence and charity. In our Lodge-rooms and around our altars we educate and mold character, for deeds of kindness to our fellow men. The man who surrenders his horded wealth when the grim monster death calls him away is not entitled to the credit that we are who divide our substance voluntarily, knowing where and to whom we dispense our charities. The advance guard that we are, shall be the forerunner of an army of 100,000, marching to victory and new laurels." Bro. M. S. Levy, Rabbi, was called and made a short eloquent speech. Bro. E. F. Loud at request, gave the secret work of both degrees. Bro. Dunton, P. M. W., of Oak Leaf, made a short interesting speech that was well received. Bro. Northey, P. M. W., of Brooklyn, No. 3, undertook to make a speech, but deferred it until some evening in his own Lodge. Bro. Watson, P. M. W., of Brooklyn, No. 3, made some interesting remarks of a fraternal nature, that were listened to with marked attention and favor. Bro. D. S. Hirshberg, P. M. W., made a few remarks, in the course of which he paid the Pacific States Watchman a very high compliment as a paper that should be taken by every Workman. Bro. W. O. Thrailkill, from Sacramento, also made a few remarks, followed by a piano solo by the Grand Master Workman. It being time to take the city train, the brethren of San Francisco were excused, departing delighted with their evening's entertainment.

The favorite resort for getting Havanas, is at 202 Sansome street. Bro. H. Kozminsky will remove across on Pine street some time this month.

Grand Recorder's Statement for September.

We condense from Grand Recorder Pratt's Financial Statement for September the following leading figures:

WARRANTS ISSUED.

279, Supplies, Supreme Lodge	64.00
280, Postage, H. G. Pratt, G. R.	20.20

Some of the Conceits of Men and Women.

The following essay was read before Aurora Lodge, D. of H., on Tuesday evening, October 11th, by Mrs. Adley H. Cummins: Every man and woman is possessed of the fancy that there is some distinguishing trait or superior faculty which marks each out of the common herd, which elevates each a little above their fellow creatures, which places each upon a nice little pedestal all of their own, from which high spot they can see over the heads of the rest of mankind, and pity them in a superior sort of way. And when the man upon the pedestal, feeling a little lonely, perhaps, in being so isolated from the rest of the world by his superior qualities, suddenly discovers several other people daring to mount pedestals also, he is at first amused, then curious. For what quality can these stupid, ugly creatures imagine that they possess to entitle them to mount a pedestal?

Let us stop in our grand parade, sliding along through the world on our rollers far above the common folk, step down a moment, and see what conceits these are which lift us to such a hight of self-appreciation. We shall find that the humblest down-trodden worm of a human being has a pedestal at hand when occasion requires.

A very homely man with homely ways is poor Wilkins, but there is a latent satisfaction hidden beneath that broken-bridged nose of his, which beams out occasionally quite bewildering to the beholder. What can that man have to be so self-congratulatory over? If you are curious instead of cynical you may discover the cause. "I had the finest shaped nose in our family before it was broken." Poor Wilkins, why not let him take pleasure in the thought, it hurts no one.

And there is no commoner or prouder reason for mounting the pedestal than upon the beauty of one's personal appearance. The beauty may be utterly inapparent to the observer, it makes no difference to the owner, he or she knows of its existence, and a single feature well moulded is sufficient to take the owner up.

Poor Martha had a tip-tilted nose, and was scarred with cruel pit-marks. Some one who wished to put her in a good humor, told her a little fiction of a certain gentleman, that he had said she was quite a good-looking girl, thinking it would give her quite a surprise. But Martha's head was thrown back to a dangerous angle, and her nose was pointed toward the sky as she responded in acid accents: "It is not the *first time* I have been considered handsome!"

Beauty is only relative after all. One who is considered the prettiest of the family may be very plain when compared with other families, and even a pretty person may sink into nothing beside a dashing beauty. The belle of a country town feels her insignificance, and melts into tears when trying to rival the belle of the city—one who has gained her title over a greater competition. One may be quite pretty at home with no other face for a foil, yet become utterly commonplace in a crowd. Yet every woman is aware of some little point in her favor, which warrants her in holding her head up, either she has pretty hair, or good teeth, or a small white hand, or a nice little foot. If her complexion is not good she forgets that and consoles herself with not possessing various other failings of other women, and with the fact that "she has a dimple in her chin, anyhow." And men are not a whit behind, in fact as they surpass women in everything else they attempt, the sciences, art, manufacturing, etc., which they are so proud of expatiating upon, so also do they surpass women in their Narcissus-like admiration. There is no man so homely that he can not be discovered in considering that "he is a pretty good looking fellow." The vainest woman cannot in her vanity equal simply a vain man. Yet, is it not an excellent thing that in this life so heavy with tears that every man should have inherent in him so simple, harmless and inexpensive a conceit as this—it costs nothing yet makes him happy. He is a self-running, perpetual-motion mechanism of happiness. Beauty is the lever of the world, after all.

Men are nearly always proud of some inherent faculty of their own, but ladies frequently float along in a blissful state of conceit over some wonderful quality in their husbands (yes, they do, I know dozens of them), and sit waiting with wondering eyes for the world to join in. In this Lodge there are several exceptions, however, which I must be fair enough to grant, several lovely gentlemen who adore their wives and think they are sufficient cause for claiming a pedestal apiece. And that is the way it ought to be. But of the former a case comes to mind. Young Mrs. Marigold said once to a roomful of company: "Really, do you know when I looked around the church this morning, and saw all the men, I wondered how any woman could have married any one but—John—." This remark was not received with favor, for all the other wives had been thinking the same thing of their own particular John.

Some people are sustained through life and its trials by some happy little conceit. Mrs. Dandelion was a woman of many miseries, but she could always be cheered and strengthened by telling a new neighbor that her father had had the largest funeral ever seen in that part of the country, and that her babies were the prettiest corpses ever laid out in the neighborhood.

Some people enjoy abusing and criticising the rest of human beings from their lofty standpoint, those who have dared to mount pedestals lower than their own. One of this class says, boldly: "All men are fools," and yet he does not include himself. He simply smiles and says: "I am not a fool because I can see that the rest of you are."

O, it is lovely to go sailing along in this lofty way, one feels quite happy in his isolation.

And yet, human beings are very nice—each is of a different pattern, each of a different prismatic ray—just turn on the calcium lights and the homeliest becomes angelic—each is a curious study—so sensitive, so easily unstrung. But do not play upon the strings roughly—the human soul is very tender and sweet underneath all those quaint, burr-like conceits—even a plumber may have a musical soul—each is so mirror-like, can reflect the image before it and reveal the faults and flaws so unmercifully.

And yet, send back the beauties and graces as well, the color and the smile.

If we step down occasionally and study up other people's claims to pedestals, we may find so many lovely things, the good, the true, the beautiful, that we may hesitate about remounting our own.

THE new store, "City of Hamburg," 714 Montgomery, is stocked with a choice assortment of white goods, toilet articles, notions, gents' furnishing and fancy goods. Our worthy brothers, Messrs. Moller and Mautz, are experienced merchants, and are selling goods at prices that will be a surprise to Workmen and their wives.

ANYONE wishing portraits painted from life, old pictures or photographs enlarged, in oil, water color, India ink or crayon, will do well to call on Bro. A. Heussler, P. M. W., at room 91, St. Ann's building. He is one of our leading artists.

NEW milliner parlors have been opened at 104 Taylor St., by Sister Annie Dayton. Any one wishing the latest and best style of bonnet made to order, at very reasonable prices would do well to call at this popular millinery and purchasing agency.

THE Workman Guarantee Fund Association is now paying $1,000 upon the death of a member, without cost or expense to the receiver. The annual cost of the additional $1,000 to Workmen is about $8 per year, which seems a very reasonable figure for so substantial a sum of money.

NEW PATENTS.—Dewey & Co.'s SCIENTIFIC PRESS Patent Agency has received official notice of the issue of the following patents to Pacific coast inventors, for the week ending Sept. 27, 1881.

247,479, Brittain, Rolley & McGeorge, Springville, Cal., remedy for cure of scab in sheep; 247,535, N. D. Burlingham, Garden Valley, Cal., amalgamator; 247,545, P. F. Dundon, S. F., mud-ring for boiler furnaces; 247,546, P. F. Dundon, S. F., furnace for steam boilers; 247,668, T. J. Loftus, Sacramento, Cal., faucet; 247,571, C. F. McGlashan, Santa Barbara, Cal., railway balloon, electric tramway and truck; 9,885, (reissue), W. A. Rogers, Folsom, Cal., device for raising tailings from mines; 247,585, W. C. Stiles, Nevada City, Cal., grinding and pulverizing apparatus; 247,705, W. A. Stoddard, Dalles, Or., stump extractor; 247,709, Sweyea & Lowe, Walla Walla, W. T., Buckle; 247,720, Caroline Weisser, Los Angeles, Cal., hair tonic.

Attend to This.

Our subscribers will find the date they have paid to printed on the label of their paper. If it is not correct, or if the paper should ever come beyond the time desired, be sure to notify the publishers by letter or postal card. If we are not notified within a reasonable time we cannot be responsible for the errors or omission of agents.

COMPOUND OXYGEN — NOT A DRUG
A NEW TREATMENT for Consumption, Asthma, Bronchitis, Catarrh, Dyspepsia, Headache, Debility, Neuralgia, Rheumatism, and all Chronic and Nervous Disorders.
ACTS DIRECTLY upon the great nervous and organic centres, and cures by a natural process of revitalization.
HAS EFFECTED REMARKABLE CURES, which are attracting wide attention.
HAS BEEN USED BY Rt. Rev. John J. Keane, Bishop of Richmond, Va., Hon. Wm. D. Kelley, T. S. Arthur, and others, who have been largely benefited, and to whom we refer by permission.
IS STRONGLY ENDORSED: "We have the most unequivocal testimony to its curative power from many persons of high character and intelligence."—*Lutheran Observer.* "The cures which have been obtained by this new treatment seem more like miracles than cases of natural healing."—*Arthur's Home Magazine.* "There is no doubt as to the genuineness and positive results of this treatment."—*Boston Journal of Commerce.*
THE OXYGEN HOME TREATMENT contains two months' supply, with inhaling apparatus and full directions for use.
SENT FREE: a Treatise on Compound Oxygen, giving the history of this new discovery and a large record of most remarkable cures. Write for it. Address
ADMINISTERED BY INHALATION. Drs. STARKEY & PALEN, 1109 and 1111 Girard St., Philadelphia, Pa.

Depository on Pacific Coast.
WE HAVE ESTABLISHED A DEPOSITORY OF OUR COMPOUND OXYGEN HOME TREATMENT at San Francisco, Cal. This will enable patients on the Pacific Coast to obtain it without the heavy express charges which accrue on packages sent from Eastern States.
All orders directed to H. E. MATHEWS, 606 Montgomery street, San Francisco, Cal., will be filled on the same terms on which we fill orders sent directly to our office in Philadelphia.
Patients ordering from our depository in San Francisco, should, at the same time, write to us, and give a statement of their case, in order that we may send such advice and direction in the use of the Treatment as their special disease may seem to require.

Mechanical Air Navigation Possible.

Notwithstanding the numerous ineffectual attempts in this city to produce a machine that will navigate the air and be subject to the will of the pilot, the thing has been successfully accomplished elsewhere. The Boston *Journal of Commerce*, in a recent number, gives the following:

Four years ago Charles F. Ritchell of Bridgeport, Conn., made some public exhibitions with an air-sailing contrivance that attracted considerable attention at the time, from the fact that his machine could be absolutely governed in ascent and descent by mechanical means, independent of a levitating gas, and relatively directed in a horizontal course. At that time, in a trial made at Hartford, Conn., his machine, as witnessed by the writer, went to a height, perpendicularly with the level of the ground, of at least 300 ft., passed eastwardly over the Connecticut river, turned about and came back to the point of starting, and landed at the feet of the gentlemen who, as a committee, witnessed the ascent.

The next day the apparatus was sent up when a considerable breeze was stirring. The operator took his car up to a line of moving air that carried him away a distance of nearly nine miles. But, working his way down, he was able to descend into a door yard, call for and obtain a glass of water, and then re-ascend, but was unable to get back to his starting point against a breeze. In short, this trial demonstrated the fact that such a machine as that could not contend against adverse wind. But it also demonstrated that mechanical means could guide as well as propel in the air, and more, that mechanical means could be successfully employed to elevate and depress the position of the aeronaut at will.

But these experiments also proved that the limit of guiding and elevating control was confined to that of the power to be employed—which must be manual, as combining the largest amount of exerting force with the smallest amount of weight.

In the experiments made at this time the machine used was a cylindrical gas-holder, suspended horizontally over a frame holding the aeronaut. This frame was made of hollow, thin steel pipe, combining great strength with little weight. The operator, when seated, made a weight which, with the machine, would be just about the balance in the atmosphere by the gas-holder. To ascend, the operator rotated rapidly a fan on a vertical shaft directly under the center of the contrivance, the fan acting like the propeller of a ship.

A similar propeller in front of the operator, on a horizontal shaft, produced a horizontal movement. This front propeller worked on a universal joint, so that it could be turned to face 30 degrees of the circle, or at least as much as the rudder of a vessel at sea.

It will be seen by this brief summary that the Ritchell machine could be elevated and depressed, and guided in horizontal planes by means of rapidly revolving fans—it has been demonstrated that this can be done. But the limit of action is narrow, as it is controlled by the power supplied by the operator. This power, as applied to lifting, Professor Ritchell finds, is only about 15 lbs. He now proposes to make an experimental machine carrying an engine, to be fed with compressed air, which will furnish available power to lift a very much larger weight and more perfectly control the lateral movements of the machine. He is at work on it now, and when completed it will be exhibited in some large hall or in connection with some exhibition that has sufficient tent area to give room and exclude wind.

EXTRACTING MAGNESIA FROM SEA WATER.—The *Moniteur Industriel* describes a new method for extracting magnesia from sea water, which is an inexhaustible reservoir for it. The magnesia may be precipitated by chalk, the same as from other solutions. After allowing the precipitate to settle one day, one cubic meter of sea water gives about 80 liters of gelatinous magnesia. The process could readily be carried out on a large scale, making an industry of it, by collecting the precipitate in large basins. The chalk would be the principal expense incurred. Having thus obtained the magnesia, a calculated quantity of dilute phosphoric acid is added, which will again precipitate a tribasic phosphate, which settles and which can be filtered on linen or by a filter press, and becomes an excellent agent for extracting the ammonia from fertilizers consisting of ammonia magnetic phosphates.

A MAN recently obtained a divorce, and declared, "Once more I stand erect and assume the attitude of freedom and a single man." Then he went home, got into bed, and in an hour awoke with a bad illness, yelling "Where's Maria? Quick! Get a mustard plaster, or I am a goner."

702 Market St., San Francisco, Cal.

Brain and Body Work.

Physiologists, after patient and close inquiry, have arrived at the important and practical conclusion, that the power of the entire man, his vitality, is as much expended by two hours of deep mental effort as by a whole day of ordinary bodily labor. This fact seems to be founded on observed physiological laws; hence, the man who spends four hours in the 24 in earnest mental labor, goes to the utmost allowable limit for a day's work, and all the time that remains, after deducting 10 hours for eating, sleeping and dressing, should be conscientiously expended in muscular exercises, which require no brain effort, and such exercises should always, by preference, be those which are agreeable, useful and profitable; for they not only promote the healthful condition of the body, but give rest to the brain, which, by that rest, recuperates its powers; many can remember, when turning back to their school days, that they have gone to bed feeling that they did not know their lessons, yet, on rising in the morning, the mind would run over them with a gratifying and surprising clearness. It is this which accounts for the observation that persons have striven hard to remember some important fact, or as to where valuable papers have been laid, and towards morning, when the mind began to awake, a little before the body, this being the time of dreams, the point is made clear in the form of a dream, thus showing that rest of the brain, whether by actual sleep or the passive, comparative rest which manual labor affords, gives mental activity, vigor, perspicacity; from these it follows that no form of muscular exercise is ignoble in a student, a brain-worker, which has to be done by some one, and by being done by him, will save money, or will save the time of another, who, perhaps, may already be overtaxed. How many servants are overtaxed! how many faithful, uncomplaining wives are overtaxed! and sons and daughters sometimes; and clerks, and apprentices, and other employees. In every dwelling in a large city, there are many things which the master could do which would reflect benefit on himself and others.

A Remarkable Pony.

A well authenticated and extraordinary case of the sagacity of the Shetland pony has just come under our notice. A year or two ago, Mr. William Sinclair imported one of these little animals from Shetland on which to ride to and from school, his residence being at a considerable distance from the school buildings. Up to that time the animal had been unshod, but some time afterward Mr. Sinclair had it shod by Mr. Pratt, the parish blacksmith. The other day Mr. Pratt, whose smithy is a long distance from Mr. Sinclair's house, saw the pony, without halter or anything upon it, walking up to where he was working. Thinking the animal had strayed from home, he drove it off, throwing stones after the beast to make it run homeward. This had the desired effect for a short time; but Mr. Pratt had only got fairly at work once more in the smithy, when the pony's head again made its appearance at the door.

On proceeding a second time outside, to drive the pony away, Mr. Pratt, with a blacksmith's instinct, took a look at the pony's feet, when he observed that one of its shoes had been lost. Having made a shoe he put it on, and then waited to see what the animal would do. For a moment it looked at the blacksmith as if asking whether he was done, then pawed once or twice to see if the newly shod foot was comfortable, and finally gave a pleased neigh, erected his head, and started home at a brisk trot. The owner was also exceedingly surprised to find the animal at home completely shod the same evening, and it was only on calling at the smithy some days afterward that he learned the full extent of his pony's sagacity.

BURNING GOLD INTO CHINA.—To dissolve gold for gilding china or glass that has to be burnt: Triturate gold leaf in a mortar with a little honey until reduced very fine; then dissolve out the honey with hot water, and mix the gold dust with a little gum water for use; or dissolve the gold in hot aqua regia, evaporate to dryness in a porcelain dish over a hot water bath, and dissolve in ether for use.

No lady with any refinement will use her husband's merschaum pipe to drive nails in the wall.

A Charming New England Scene.

It is to be hoped that this characteristic New England scene will not aggravate any feeling of homesickness in the hearts of those whose youthful days were spent among the elms of this stern and rugged portion of our country. The saying, "There's no place like home," will doubtless suggest itself to many, and the mind will wander back to the happy days of childhood.

Many of our readers, no doubt, will be reminded by this of similar scenes "back in the States." Those beautiful elms, so appropriately conspicuous in the foreground, will confirm the "regular down Easter" in the opinion that there is no tree that the forests of any country produce that equals the elm in grandeur, beauty, expressiveness and hardihood, the essential requisites of a perfect shade tree. The rank and file in the background, we will suppose, are maples; and along the border of this grove the ox cart, drawn by a pair of steers with the horse-of-all-work on the farm acting as leader, is wending its way, perhaps, to the far distant part of the miniature farm; *almost beyond the sound of the tin dinner horn.*

THE ELMS OF NEW ENGLAND.

SILVER WREATH LODGE, No. 2, Globe City, Arizona, gave a ball on the evening of Oct. 21st, the object being to raise funds to purchase an organ for the Lodge. Bro. Jacob Abraham writes us that it was a success in every way, and that the Lodge was represented by 37 of its members.

IT has come to the notice of many of our leading brethren, that notices of funerals and special meetings called in the daily papers should have the emblem of the Order, as is usual in such cases. The prominence of the Workmen in this city, it seems, would warrant our daily papers in procuring those emblems.

California's Material Prosperity.

There's music in the air. Not the music that comes from the vocal organs or that produced by the various instruments, but the far sweeter and more tangible melody which arises from a people who are happy and on the road to material prosperity. Long have the residents of this coast, and especially those of California, been watching and waiting for that boom which struck the Eastern States some three years ago. It would seem as if our isolation was a supreme bar to the advancing tide of prosperity which filled the workshops of our sister States beyond the Rockies with orders for manufactured goods, and brought to the husbandman a fair compensation for his hours of weary toil. But slowly and surely are we marching onward with steady strides, and the happy hum of reviving trade and mechanical and agricultural industries is now an assured and absolute fact.

There is one thing which marks the prosperity now nearing fruition one to be doubly rejoiced at. We are building on a sure and solid foundation. There is nothing of the wildcat or speculative interest entering into our business or other pursuits. The advancement now obtaining seems to be marked by the entire absence of all those artificial means which seem to find foothold and thrive when prosperity will be continued. Visionary and wild schemes have no place in a sound and healthful material prosperity. All projects which promise more than the legitimate products of well applied industry, are but barnacles to our progress, and should be closely scanned by all when they are submitted for public favor. As we have started out in so conservative a manner, rearing our structure upon sound and enduring business principles, it is of paramount importance that we should continue so to act.

The various lines of railroad that are now forging ahead across the continent, uniting the Eastern seaboards with those of the Pacific, are one of the most encouraging signs of the times. These railroads are not built by their managers for the mere fun of the thing. They are constructed to make money. This they cannot do without population. Hence it is a self-evident truth that they will do all in their power to promote immigration to this coast. Then, with our vast tracts of fertile land cut up into small farms and peopled by a population such as have made the great States of the West so prosperous, we will have entered upon an era such as was never seen before. It is cheering to think of this. It gives joy to all Californians who have stood by their fair State when the clouds were dark and lowering, and it seemed as if we were marching onward to our sure destruction.

If it were not for a few local questions, which it is to be hoped will be settled satisfactorily to all, there would seem to be nothing in the way of our advancement. To particularize the many industries into which man can enter, would occupy more space than we can at present command. It is sufficient for our purpose to state that there is no place on this continent which offers better inducements to energetic men to better their condition. Take, for instance, the cultivation of the vine. Here is a field which one can enter with the reasonable certainty of amassing, if not a fortune, at least a reasonable competency. Year by year are the wines and raisins of California winning wider recognition in the markets of the world, and the time is not far distant when they will command the highest prices. Then look at the possibilities of the great fruit interest of this State. Even now, with our limited population and lack of cheap transportation facilities, there is a greater demand for the best varieties of fruits than can be supplied. So, also, can the various other pursuits of the farm be engaged in with profit, and, as the years go by, those districts which at present suffer by reason of a lack of water, will be brought into a high state of cultivation by means of artificial irrigation.

The prosperity of the rural population will bring to our cities and towns a like onward advancement. Manufactures will spring up, affording employment to numerous operatives. It would be the part of wisdom for those intending to engage in this line of industry to commence early. Some of the largest manufactories in the world were started from very humble beginnings, and the splendid chances that will be offered here should spur on to immediate action all those who are mechanically inclined.

Yes, California's future is assured. It has been a long time coming, this bright messenger of material prosperity. Let us all direct its way through the straight road that leads on to the happiness of the whole people, avoiding the quicksands and quagmires, keeping in mind that as our lines are cast in such a genial clime, we will seek to make our citizenship in it a reflex of all that is good, and noble and true.

BIGGS LODGE, No. 102, Butte county, will give a grand ball on Friday evening, November 4th. It is the intention to have a fine time, and No. 102 will see that everybody that will attend shall enjoy themselves.

BRO. A. N. GRISWOLD, P. M. W. of Bodie Lodge, 143, was among the company visiting Myrtle, 42, on the 22d ult.

Home Miscellany.

Dialogue of the Horses.

FIRST HORSE.

We are the pets of men—
The pampered pets of men!
There is naught for us too gentle and good
In the graceful days of our babyhood:
We frisk and caper in childish glee—
Oh, none so pretty and proud as we!
They cheer and cherish us in our play—
Oh, none so smilingly sweet as they!
And when a little our lives have grown,
Each has a table and room of his own,
A waiter to fill his bill of fare,
A barber to clean and comb his hair.
Yes, we are the pets of men—
The pampered pets of men!
Then show us, gayly dressed and proud,
To the eager eyes of the clamorous crowd;
They champion us in the rattling race.
They praise our beauty and cheer our pace;
They keep for us our family trees—
They trumpet our names beyond the seas;
They hang our portraits on the walls,
And paint and garnish and gild our stalls.
Yes, we are the pets of men—
The pampered pets of men!

SECOND HORSE.

We are the slaves of men—
The menial slaves of men!
They lash us over the dusty roads,
They bend us down with murderous loads;
They fling vile insults on our track,
And know that we can not answer back;
In winds of winter, or summer sun,
The tread of our toil is never done;
And when we are weak, and old, and lame,
And labor-stiffened, and bowed with shame,
And hard of hearing, and blind of eye,
They drive us out in the world to die.
Yes, we are the slaves of men—
The slaves of selfish men!
They draft us into their bloody spites,
They spur us, bleeding, into their fights;
They poison our soul with their senseless ire
And curse us into a storm of fire.
And when to death we are bowed and bent,
And take the ball that for them was meant,
Alone they leave us to groan and bleed,
And dash their spurs in another steed!
Yes, we are the slaves of men—
The slaves of brutish men!

—*Will Carleton's Country Fair.*

Aunt Serena's Trialations.

I was sittin' one cold evenin', a spell ago, meditatin' and toein' of a stockin' that I was knittin' for a nephew of mine when I heerd sumbody rap. It kinder startled me at fust, for I'm a poor, lorn creetur, and there is so many tramps pokin' round that natterly I felt sort of skittish. Howsumever, I took the kerosene lamp and went to the door—and behold! there was the same nephew of mine—Robert Grimes—that I had been knittin' for, and a grand-lookin' gal with him.

I was real tickled to see Robert. I had the bringing up of that boy, mostly; I washed his face and combed his hair ev'ry mornin' for about 19 years, and spanked him when occasion required. I shook hands with him, and then he said:

"Allow me to introduce my wife—Anna—Aunt Serena."

Sakes alive! I was completely beat. The idea of that high-falutin' thing bein' my niece. Why, she looked as if she was Queen Victry, at the very least!

I axed 'em to cum in, and then I see that her dress was dragging about half a yard on the floor. Thinks I, now sumbody has stepped on the back bredth and ripped out the gathers. It's too bad! But before I had time to speak about it, she gave it a little swish and sot down, and then I made up my mind that them are gathers was ripped out purpose.

I axed 'em if they had ben to supper, and they sed no. They had been travelin' ever sense mornin'. So I made a rousin' cup of tea, and sot out the table. I put on a plate of cold beans, cause sumtimes people want suthin' hearty to commence on when they ben travelin'. I sot on a plate of pickles, sum bred, cheese and donuts, and one of my best punkin pies. Then I told 'em to set up and have some supper.

The minit that gal got site of the table, she throwed up both hands and yelled:

"Baked beans! Oh, horror! Robert, do hand me my vinegarett—I shall surely faint!"

I sprung right up, and says I: "I don't know anything about your vinegar-*ett*, but here's sum good, strong cider vinegar; p'r'aps that'll help ye. Want a swaller on't?" and I held the vinegar bottle right to her mouth. But she pushed it away, and Robert said:

"I'm sorry, aunt, but my wife is so extremely delicate that she could never bear the sight of baked beans!"

"Fudge and fiddlesticks! Delekit!" sed I; "more likely she had to liv on 'em to hum till she got sick on 'em! I'll carry the things off—then p'r'aps she'll revive!"

Just then she spied the pickles, and said to Robert:

"What are those green things lying in the dish before you?"

"Them's cowcumber pickils, you ninny!" sed I, for I begun to think she didn't know nothin'.

"Cow what?" said she.

"She means cucumbers," said Robert, "you have eaten cucumbers, haven't you, dear?"

"Oh, yes," said she; "but really, until this moment, I always imagined they grew in slices!"

"Where on airth have you ben, and what have you ben doin'," sed I, "that you don't know eny more?"

"I attended a boarding-school till my education was finished, and mamma never would allow me to come near the kitchen. But I have done lots of worsted work; I'll make you the lovliest sofa pillow, some day, with a dog on it."

"Young woman," sed I, "I have got a piller onto my sofa in the parlor; it is made of goose feathers; it's a span clean piller case, and I won't have no nasty dog a settin' on it—I tell you."

"She means a worsted dog on canvas, aunt," said Robert.

"Waal, I don't want eny of them are things. I don't suppose you could git a meal of vittals, could ye?" sed I.

"Oh, no!" sed she, in a horrified way.

"Waal, what be you goin' to do, now you've got married?" sed I.

"Board, of course, like other people, my dear aunt."

"Waal, like enough if Robert's well and has a big sal'ry, you'll manage to get along. But what are ye going to do if he should be sick?"

"Oh, I'm one of the cheerful kind; I never borrow trouble. But, really, aunt, I should like to take a few lessons in cooking of you. It would be such fun."

I looked at her as she sot there with that long, silk gownd on, big gold things shakin' in both ears, gold bracelits, a long chain with a watch on the end of it, and curls and braids and frizzles a whiskin' ev'ry way, and I sed, calmly: "I guess you'll hev to take off sum of them fixin's, and get into a sensible caliker dress with a big apern, before I try to larn ye enythin'; I ixpect it'll be hard work, enyways; it's rather discouragin' tryin' to beat enythin' into a body's head where the brains are as few and scatterin' as yours appears to be. Howsumever, for Robert's sake, I'll try."

And so I did, and of all the trials I ever had that gal was the wust. Why, she didn't know nigh so much as I thought she did at fust, and that was useless.

The fust time I let her make the tea, she put in, as near as I can calkerlate, about half a pound of my best green tea and then filled the teapot with water. You can imagine the result.

One day I had a lot of carpit rags I wanted to sew, and I thought I'd let her get dinner alone. I told her I thought we better hev sum biled rice for toppin' off, cause that was healthy, and Robert was powerful fond of it. I told her she mite jest run down to the store and git sum. I told her to put it on airly, so as to let it cook slow.

I got so ingaged in carpit rags that I didn't go nigh the kitchen for onct all the mornin'.

About half past 'leven, she come to the settin' room door, and said she wished I'd cum out and see about that rice. She didn't know what to do with it.

So I went out—and massy sakes! the sight was enough to disgust a starving savage! There was my kittle that would hold a pailful, on the stove runnin' over with rice, and she had got every bowl and tin dish in the house full of biled rice. She sed the stuff kept comin' up, and comin' up, and she didn't know what to do with it.

I looked at her and sed, as calmly as I could: "How much rice did you put into that kittle?"

"I got four quarts, aunt, and I put it all in," says she.

I didn't say enythin' more; I could not. We fed the hog on biled rice that day, and I told Robert, kinder confidentially, that I had a strong mind to make a good mustard plaster, and put it right on top of that gal's head, and mebbe, if she had eny grains of common sense, 'twould sort of draw 'em together, for I was about sick tryin' to make enythin' of her.

One Saturday mornin', jest as I had got reddy to go to bakin', one of the naybors cum in, and sed I must cum right over to his house, for one of the young ones had got the croop, or hoopin' coff or suthin'. I didn't know how to leave, but Anna sed:

"I'll make the pies, auntie; I've seen you make them so many times, I know I can."

Waal, thinks I to myself, I'll let her try. I told her where things was as I was gettin' reddy; told her I shortened my pie crust with lard, then mixed it with sour milk, cause I thought it was softer that way. I told her the lard was in the buttery, cut up in chunks on a plate.

Waal, I went off, and didn't git home till most supper time. She had got things in tolerable order, considerin'. I kinder felt encouraged; thought mebbe I shouldn't need the mustard plaster, arter all.

She had got four pies made. They did look sorter decent, and I put one on the table for supper.

Just as soon as I tasted it, I knew suthin' wan't right. The fust mouthful made me sick.

"Anna Grimes," sed I, "for conscience sake, what have you put into these pies?"

"Why, just what you did, aunt—I put in most a whole square chunk of lard, and I had to cut it all up into little pieces. It wouldn't dissolve."

A thought struck me all of a sudden, and I riz right up and went to the buttery, and as true as you live, that sap head had shortened her pie crust with hard soap. I had jest bought a dozen bars of hard soap, and put it on the bottom shelf in the buttery, and she had put most a pound of it into them pies.

I gave right up that nite. I told her firmly that the best thing she could do was to let herself out to sum respectable milliner or dressmaker, to stand in the winder for to hang new bunnits and gownds onto.

I felt that I could stand a bushel of biled rice at a time, and green-tea puddin', but when it cum to short'nin' pie crust with hard soap, 'twas time to take a decided stand. It was a leetle more'n I could swaller.

I hev only jest this remark to make: If there's eny gal who reads this here paper, that thinks cowcumbers grows in slices, or shortens their pie crust with hard soap, they need not set their caps for any of my nephews. I'll brake up the match just as sure as my name's Serena Wiggins! I sartingly will!

Womanhood in Germany.

The American lady who travels in Germany views with astonishment and indignation some of the labors there assigned to her sex. All the most menial, the most repulsive, and much of the most exhaustive work is accomplished by the German women.

They hoe the beet fields, and where it is not safe to use a hoe, weed on their hands and knees. They sow, stack and reap the grain, and bear it home upon their shoulders in sheaves that a few paces off they appear like walking haystacks.

They drive the plow, and in some cases draw as well as drive it. They carry heavy loads of manure upon their backs, bringing it from distant places of deposit and distributing it as it is needed. They haul away heavily loaded carts. They break stones and mend roads. They dredge small streams for the sake of their fertilizing mud.

In the cities they clean the streets, working with shovels, handcarts and brooms made of rods. They collect the offal and refuse from houses and stores. They are harnessed to milk carts and bakers' carts, which they draw from door to door. They saw and split wood. They unload freight cars at depots. They serve as porters, conveying their loads on their backs in baskets made to carry 60 lbs. They are yoked with dogs, cows and oxen to drag heavy weights along the highway, and they even act as hod carriers, climbing up and down steep ladders to bring bricks and mortar to the masons. So reports Mrs. Livermore in a recent letter to the *Women's Journal*. It strikes the mind with horror. In our own country the condition of women who sew on shop work in a hot loft 10 hours a day, supported by a lunch of pie and cold tea, is bad enough; but, thank God, we have no such horrible sights in this free land as the harnessing of a woman alongside of a cow!

—*Colorado Farmer.*

FLOWERS AND HOMES.—Why should your homes be dreary? Let the floral beauties invite the bees to keep you company. The beauty and freshness of spring is only the more welcome when it is made balmy with odor of flowers. Plant flowers. They have a language all their own. They refine and elevate, and soothe and ennoble mankind. The feast, the tournament, the triumphal ovation, the hymenial ceremony, and the obsequies of the dead all call for bouquets, wreaths, and blossoms of beauty, and sympathetic, silent, consonant voices speaking to you in subduing potential charms through the language of flowers. It will crimson the face of the maiden with blushes of joy to present her with a bouquet, which speaks in emblems and tokens of your own heart pulse, and it will cheer the octogenarian to put the choice twigs in the button-hole of his coat, as in it he wears the sentimental tokens of child-like innocence. The soldier puts the cluster in the gun-barrel as he marches from home with his fluttering heart, thinking of the "girl he left behind him." Plant flowers; there is more in them than language can speak.

HOME, love, duty worthily accomplished, work, learning—these are the true perennials of life and sweeten what they adorn. In youth it is perhaps natural that there would be a certain restlessness and eagerness for novelty, a certain impatience under monotony, and a feeling that to lead a quiet life without pleasure or its fatigues is to "bury one's days" in a most unprofitable manner. This is only right, and what we must expect and allow for. Still, even youth, with all its eager desire for movement and excitement, cannot do without love and duty, without home and work; and to lead a life all of pleasure only, devoid of emotion or conscience, is to live on sweets alone, whereby comes nausea and disablement instead of nourishment and strength.

MAKING THEMSELVES AT HOME.—Some of the customs out on the stock ranges would be rather surprising to people in more settled communities. One of the customs is for the men when out gathering up stock to go to the nearest camp, or house, at night. What this may involve will be understood from a recent case at Mr. Jacob McKissicks camp, in Lassen county. He had just got there with a load of provisions, when 53 vaqueros came in to supper; they remained in the neighborhood three days, and in that time ate up his entire load. No charges are ever made. The men ride up, pull the saddles off their horses, turn them to a haystack, and then go into the house expecting to find food; after eating, they tumble into the hay. In the morning they are up, eat breakfast, and off by daybreak.—*Greenville Bulletin.*

THE flowing reporter who wrote, with reference to a well known belle, "Her dainty feet were encased in shoes that might be taken for fairy boots," tied his wardrobe up in a handkerchief, and left for parts unknown, when it appeared the next morning: "Her dirty feet were encased in shoes that might have been taken for ferry-boats.

The Child Hero.

The statue of the child hero, Joseph Bara, has been erected in the church square at Palaiseau, on which a chateau of the Condes, in which he was born and reared, looks down. Joseph Bara's father was a woodranger on the Palaiseau estate of the Condes, and his mother was a domestic in the chateau. She was a widow when her son, at the age of 12, enrolled himself as a volunteer. His head had "taken fire" at a patriotic meeting where Carnot's appeal for 450,000 men was read before him.

The boy learned to play the fife and drum, and furbished the arms and cleaned the horse of a major of Spahis who had fought in India under Bussy. This officer, the little drummer, followed to La Vendee. To harrass and throw the enemy off the track, this major often sent his little drummer running through the brush to beat here and there the drum, or sound the fife. Bara was one day surprised by a band of peasants. He was a boy of delicate features and aristocratic air. The Vendeans thought him some nobleman's child who had been perverted, and told him that if he cried "Live the king!" they would let him off. He answered by beating his drum. "Are you deaf?" roared a country brute, who took aim at him. "I am a republican," replied the boy. "Ah! young brigand, have a care! Give up your drumming, and, like us, cry, "Live the king!" "Live the republic!" cried Bara. Twenty firelocks were discharged at him, and he fell dead. Horrified at the execution, the Vendeans fled. But some of them returned, picked up the corpse, and respectfully bore it to the camp of the Blues. The Convention decreed a pension to Bara's mother, and ordered that an engraving of the little drummer's execution be made and hung up in every primary school to show what a child can do when inspired by a noble sentiment. Chenier, in "La Chant de Depart," alluded to Bara's execution, and David (d'Angers), who found one of the engravings ordered by the Convention, chose his death as a subject for his chisel in 1837. The statue at Palaiseau represents the youthful hero in the uniform of a Hussar. A drumstick has fallen from one of his hands, the other he still holds. The boy has been struck with the 20 bullets, but the expression of heroic exaltation still lingers on the delicate young face.

THE LESSON FOR BOYS.—It is a grand thought that from the woods of Ohio, a boy could come forth, nameless and fortuneless, without family, without influence, with nothing but his strong arms, quick brain and the bold hopes which are the birthright of American boys, and challenging the rough world for a contest, at the call of duty, as a soldier, he could win for himself a glorified name; that, following that same duty, he could for 18 years, as a representative in Congress, so bear himself as to become the acknowledged leader of that august body; that lifted still higher he could assume and wear with a grace and dignity all his own, the highest honors of the republic; that at the very pinnacle of his power, and with the full fruition of his hopes almost within his grasp, receiving the stroke of an assassin, he accepted the decree without a murmur; and while anxious to live, without a protest or complaint, with the same gentleness and dignity which gave a charm to his life, waited, with unblenching eyes, while death drew near. There is nothing loftier than this in all history. It exalts American manhood everywhere, and makes men exult, even while they weep. The country sorely needed more years of the life of its dead President; but he who has gone needed nothing more, for though from poverty and obscurity, he had not 50 years in which to do his work, he so lived and wrought that the measure of his life is full. Beside Lincoln and Washington he takes his place, and around his dust all Christian peoples stand as mourners.—*Judge Goodwin.*

WOMEN'S RIGHTS.—Within the memory of people now living, married women had no legal existence. The law regarded them as practically the property of the husbands, who could not only spend their money and do as they pleased with their possessions, but could administer corporal punishment or deprivation of liberty the same as to their children. The wife had no redress. She had no rights before the law, and could not bring a suit, excepting with her husband's consent and in his name. In view of the representations heard at the present day of the degredation of women, it is well to look about and see what progress she has made. She can now hold property, engage in business, bring suits in her own name, and enjoy every right of citizenship except that of suffrage, and even that has now been granted, to a certain extent. And now the English House of Lords has decided that she is legally responsible for her own debts, which her husband is not bound to pay, provided he has furnished her the means for procuring necessaries. He is not even bound to notify people not to trust her, nor to forbid her to pledge his credit. He is, in fact, relieved from all liability on her account, excepting in cases wherein he authorizes her to contract it. What result this reversal of a previously understood law will have upon this country remains to be seen.

"I am the oak; you are the vine," remarked an ardent though silly lover to his Marianne. "Let the vine, therefore, creep around the oak until it reaches the topmost leaves—" "And finds nothing there," exclaimed the heartless beauty.

For our Boys and Girls.

Our Puzzle Box.

Numerical Enigma.

I am composed of eighteen letters
My 3, 6, 13, 13, is to cultivate the soil.
My 17, 5, is an animal.
My 12, 14, 11 is one of the forms of my whole.
My 15 is a letter but little used.
My 7, 4, 8, 9, many exchange for my whole.
My 18, 16, 10, 2, my whole may bring upon you.
My 1, 11, 2, is where my whole can usually be procured
My whole is a great curse upon humanity.

J. C. B.

Hidden Rivers of Europe.

1. The robins have come again.
2. Helen and Jane have gone to a ride.
3. Charles said he would win a prize.
4. The little cur always snaps at my heels.
5. The box used to be hidden under that tree by the roadside.
6. Charley, don't go near the river.

UNCLE CLAUDE.

Problem.

Add one to a certain number, then subtract the sum from the original number and have one remaining.

JUSTICE.

Cross-word Enigma.

My first is in wren, but not in crow;
My second is in fellow, but not in beau;
My third is in row, but not in scull;
My fourth is in tempest, but not in lull;
My fifth is in heart, also in hand;
My sixth is in company, but not in band;
My seventh is in ark, but not in ship;
My eighth is in leather, but not in kip;
My ninth is in old, but not in new;
My tenth is in yellow, also in blue;
My eleventh is in ice, but not in snow;
My twelfth is in finger, but not in toe;
My thirteenth is in reap, but not in sow;
My whole a Southern State you'll find to be—
Who among you can tell its name to me.

PERCY

A Floral Bouquet.

1. To injure, a personal pronoun and a valuable metal.
2. A falsehood and to want.
3. A part of speech, even, and a vowel.
4. A nickname, two articles, and silent.

CONUNDRUMS.—1. A river. 2. Because it is at the end of the Mediterranean.

Darkey Jim.

"Where under the sun is Darkey Jim," said Pinkie to herself, as she turned over and over in bed trying to find him. "I don't beheve Kitty put him to bed at all."

Kitty was the nurse, you know, and Darkey Jim was the black rubber doll that Santa Claus brought last Christmas time. I don't know why Pinkie always wanted Jim to sleep with her, because he was torn most to pieces. The big dog got him once and ate a whole leg off, and one night Jim was left ontdoors in the rain, and was dreadfully soaked out of shape. But Pinkie had a little sister, Ruth, who slept in another room, just through the doorway, so when Darkey Jim wasn't found that night, Pinkie called out:

"Ruth, are you asleep?"

But no answer came.

"I believe she's got him herself, and won't tell," said Pinkie.

So she got out of bed and went into the next room.

"Ruth, have you my Darkey Jim?" she asked, as she came to the crib. Ruth didn't answer, and so Pinkie began to feel all about for the doll, and at last she found it. But do you suppose that Ruth was really asleep? Not a bit more than you are at this moment; and when Pinkie tried to lift Jim out of the crib to take him to her own bed, she found out that Ruth was wide awake and had tight hold of Jim's leg.

"Go way!" cried Ruth, sitting up in bed and tugging with all her might to keep hold of Darkey Jim.

"He's mine, Ruth Vail, and you know it," answered Pinkie. "So give him to me."

They were both dreadfully cross, it seems to me, but they were dreadfully sleepy, too.

Well, the end of the quarrel was that mamma, who was down stairs, came running up to see what the noise was all about. Ruth was crying, but Pinkie wasn't—because she had the doll.

"He's mine, and I want him," said Pinkie crossly.

"I got him first, and I think I might keep him, I do," sobbed Ruth.

"Now look here," said mamma, taking Darkey Jim away from Pinkie, "this is too bad, to make all this noise and fuss, and neither one willing to give up to the other. I tell you what I must do. I'm going to stand Darkey Jim up here against the door between the rooms and have him sleep there all night. He'll be just as near one of you as he is to the other, and I hope both of my little girls will be satisfied—although I must say that I think Ruth should't have taken Jim at all, because he did'nt belong to her."

So that was the arrangement made, and mamma went down stairs again, leaving the children in bed, and Jim standing on his one leg against the door.

Pinkie hadn't been in bed two minutes before she began to think:

"I don't see what use Jim is to anybody, over there."

Then she thought a little more;

"I don't think I was very good to Ruth, particularly as she gave me half her peach to-day. I know what *I'm* going to do. I'm going to get Jim and put him straight in Ruth's crib."

Now it happened that Ruth hadn't been in bed two minutes either before she began to think:

"I expect I was real cross to Pinkie."

Then she thought some more, too:

"I don't see what good Darkey Jim's doing over there all alone by himself. I know what *I'm* going to do. I'm going to get him and put him straight in Pinkie's crib."

So both the little girls got softly out of bed at just the same time, and went carefully across the floor.

"I must be very careful so Ruth won't hear me," said Pinkie to herself.

"I must be very careful so Pinkie won't hear me," said Ruth to herself.

So they felt along the wall, and put out their hands, and ran bump against each other in the dark.

"You take him," said Pinkie.

"You take him," answered Ruth. "He's yours, you know—and I'm real sorry."

"But you gave me the peach, and I was cross," said Pinkie, holding out Jim in the dark.

And how do you think they made it all right?

Why, they both got into the same bed, and Darkey Jim slept between them.—*N. Y. Tribune.*

Humorous.

Chips.

AN old man who had been badly hurt in a railroad collision, being advised to sue the company for damages, said, "Wal, no; not for damages—I've had enough of them; but I'll just use 'em for repairs."

IN the Dog Days.—She: "The Prince Charley is again becoming a fashionable dog."

He:—"Who invents the new fashions in dogs.

She:—"Can it be the puppies?"

"YOU smoke a great deal, Gus," said a friend to Gus De Smith. "Yes," replied Gus, "particularly after dinner. I have got so in the habit of smoking after dinner that the dinner don't taste right when I eat it unless I have a smoke afterward."

AN Englishman who had published his observations during a trip to the United States concludes that the most striking and thoroughly American characters he saw were Bob Ingersoll and "Maud S." Mr. Beecher is not getting a fair show this season.

"AH! Adeliza; if you were captain of a ship in what capacity would you want me to go?" He hoped she would say, "first mate," but it was late, and she was very sleepy, and as she leaned her head against his opera spotted shirt front she murmured "as donkey—donkey pump!"

Household Hints

DELMONICO PUDDING.—A quart of new milk, three even tablespoonfuls of cornstarch dissolved in a little cold milk, the yelks of four eggs, six tablespoonfuls of sugar. Heat the milk, add the sugar, then the starch, and last the beaten yelks. Flavor, pour into a pudding dish and bake in a slow oven (the top must not brown) 30 minutes. Have the whites beaten stiff, sweeten, flavor and spread over the pudding. Return to the oven and let it just brown.

WHITE SPONGE CAKE.—In order to make white sponge cake, one has only to leave out the yelks, and use the proportion of eggs needed, entirely of whites. Take two pounds of pulverized sugar, two pounds of whites of eggs, one and a half pounds flour, and the gratings of the yellow rind of one lemon, or a drop or two of lemon oil, or a teaspoonful of lemon essence. Beat the eggs to a staunch froth, then add the sugar, then the flavor, and last the flour. Bake in buttered pans, and in a moderate oven.

PLAIN STEAMED PUDDING.—Two cupfuls of sour milk with some cream in it, three cupfuls of sifted flour, one-half cupful of finely chopped suet, a little salt and a large teaspoonful of soda dissolved in a little hot water. Stir the milk into the flour, beat until free from lumps, add the suet and salt and at the last moment beat in the soda. Steam two hours. Eat at once with a hard sauce—sugar and butter beaten together and flavored.

APPLE BAKED PUDDING.—Pare and core six tart cooking apples and place in a buttered baking dish. Pour over the following batter: A pint of milk, two beaten eggs, a little salt, two teaspoonfuls of baking powder sifted with flour enough to make a batter thicker than for pancakes.

MUSH MUFFINS.—Cold mush is not a very promising mixture to the eye, but when thinned with milk and thickened with a little wheat flour and eggs, in the proportion of four to a quart, it makes very good muffins.

PUFF PASTE.—An easy way of making puff paste is to mix the flour with three-quarters of its weight in butter, and milk enough to make it easy to roll. It should not be touched with the hands.

Health Column.

Civilization and Health.

Is the human race deteriorating, physically? In other words, is civilization a shortener of life, or otherwise? Although much may be said for the haleness and heartiness of our grandfathers' and much against the pale, slim, city-bred dyspeptic, yet we cannot but come to the conclusion that the race is not in so sorry a plight as some people would judge.

Among savages life is short, and it is the exception for a man to attain to 50 years, while long before that his powers are decayed. Then, too, in the records of English courts, from the 13th to 16th century, Sir Thomas Hardy found no instance of a man who had survived his 80th year, and the age of 70 was rarely reached, and was regarded as extreme.

The advance in medical knowledge, the spread of education and sanitary improvements have, taken together, had a great effect in adding to the average of men's lives. It is true we see certain unwelcome signs of decay, notably in the teeth of the present generation; but these are the result of local causes which, it may be hoped, will disappear in course of time. Railroads and steamships do much, indirectly, to benefit the race constitutionally, in bringing together to this country hardy representatives of other races. The intermixture of blood which is the result cannot but exert a highly beneficial result on this nation. In this matter we are, as a people, highly favored, and the time may be looked for when Americans will stand out before the world, more even than now, as one of the healthiest nations extant.—*Herald of Health.*

Women as Doctors.

At the recent commencement of the Women's Medical College in Philadelphia, some interesting facts were stated concerning the career of the graduates of that institution, which have a direct bearing on the success of women in this field of professional labor. The following are the more important of these statements: Of the 276 women who had graduated from the college in the past 30 years, 32 had died, 31 had given up their profession, and 151 were then practicing. Of the 151 in practice, the incomes of 24 were between $1,000 and $2,000; the incomes of 20 were between $2,000 and $3,000; of 10, between $4,000 and $5,000; of 3, between $5,000 and $15,000; of 4, between $15,000 and $20,000; and of 10, less than $1,000. The average income from practice was about $3,000. Sixty-six were members of medical societies; 51 were married after studying medicine, and 61 before; of 50 who were married, 43 reported that the practice of medicine had no unfavorable effect on their domestic life; with 6 the effect was not entirely favorable; with 1 it was unfavorable; 3 were prevented by practice from marrying, and 5 gave up practice on account of marriage.

These facts make an exceedingly favorable showing for the women doctors, and should be a convincing argument in favor of the practice of medicine by the sex. Indeed, the opposition to them has so materially lessened during the past few years, that it can hardly be said to have any existence since the majority of the medical societies have withdrawn their opposition.

AN ANTI-VACCINATOR'S FATE.—Possibly the bitterest opponents of vaccination may be impressed by the grim details of the story which was told and discussed by the Rothehithe Vestry on Tuesday. A person in the locality had made himself conspicuous for many years as a vehement anti-vaccinator, and had ingeniously succeeded in evading the act, so that no members of his family were vaccinated. A couple of months back one of this man's children took small-pox. No doctor was called in, but the child was nursed by its mother and recovered. Then the mother herself took small-pox and died, after which two more of the children fell victims to the disease, and three more had to be taken to the hospital. Bad though this was, there was more to come, if the story told at the vestry be true. The anti-vaccinationist borrowed from a neighbor a suit of black clothes to wear at his wife's funeral. He kept the clothes in his house a few days before returning them. Shortly after their return their owner also took the small-pox, was conveyed to the hospital and died there. Since then several houses in the same neighborhood have become infected, and some sixteen cases of small-pox have been taken to the hospital. Commentary on such a case is needless. The liberty of the individual is sacred so long as it does not infringe on the liberty of some one else. If anti-vaccinationists only did harm to themselves no one would have a right to interfere with their fancies; but when their vagaries may lead to the wholesale infection of a district and the deaths of several persons, it is time that the laws which aim at preventing the spread of contagion should be thoroughly put into force.—*London Daily News.*

BODILY HEAT.—The heat given out by an ordinary oil lamp is about six times that given out by an ordinary human body. The heat production is very inconsiderable—too small to be taken into account in this connection.

Worth Knowing.

"Rough on Rats."

In every drug store in the land are seen placards bearing the inscription "Rough on Rats." Do the people know that this preparation thus advertised is just as rough on human beings? A chemical examination shows that it consists principally of *arsenious acid*, a deadly poison. Recently we have word from New Orleans of a whole family poisoned by this dangerous substance. Druggists in most States are prohibited from selling arsenic without plainly labeling it "*Poison*," and taking great care to keep it from the ignorant and careless, but here is *arsenic* sent into every house with no precaution whatever. Is there not need of some regulations in these matters? Arsenic sells at *wholesale* at from *one* to *two* cents a pound. Rough on Rats at 15 cents an ounce. Quite a fair percent of profit.

There is another form of arsenic sold in the drug stores with no warning. It is "cobalt" or fly poison. Cobalt is only a soluble form of arsenic, and being soluble, is really more dangerous than common arsenic. But do the people know this?

Paris green is still another deadly form of arsenic, in reality a compound of arsenic and copper, both of which are poisonous. In the fluids of the alimentary canal, Paris green readily dissolves and rapidly proves fatal.

Owing to its cheapness and the brilliant colored compounds which this drug forms, arsenic is used in great quantities in hundreds of places where it would never be suspected. It is found in wall paper, paints, calico, rubber nipples, confectionery, colored crayons, glass, glazing materials, etc. Strange as it may appear, arsenic is used in some countries as food.—*Science and Health.*

TO COVER WIRE WITH GUTTA-PERCHA.—The *Mechanical World* gives the following as an easy method for covering copper wire with gutta-percha for electrical purposes: Some commercial gutta-percha cut into small pieces is introduced in a bottle containing sulphide of carbon; this bottle must be well stopped. If agitated from time to time it dissolves at the ordinary temperature. When completely dissolved it is left to stand some days, until the impure matters deposit at the bottom. It is then poured into another bottle, which is also kept well stopped and at a low temperature; for thick wire the solution must be concentrated. The wire being dipped in this solution, the sulphide of carbon, evaporating, leaves on the surface a layer of gutta-percha more or less thick. In order to operate continuously, the solution is poured into a V tube, through which the wire is passed over a wooden pulley. The distance between the tube and the bobbin upon which the wire is rolled is about ten yards. In order that the sulphide of carbon may evaporate, this operation should be carried on in the open air.

BLEACHING GUM ARABIC.—The solution of gum is first strained through linen in order to remove earthy matters, fragments of wood, etc., and is then mixed with freshly prepared hydrate of alumina, which must not be allowed to dry up. The mixture is poured upon a linen strainer, and thus a clear, colorless solution of gum is obtained, while all the coloring matters are kept back by the alumina. It is generally sufficient to pour the solution of gum through a moist layer of hydrate of alumina. The more slowly the gum water is filtered the more colorless it becomes. If perfect whiteness is to be obtained the filtration is repeated through fresh portions of hydrate of alumina.—*Muster Zeitung fur Faerberei.*

STAINING AND MATCHING.—To stain mahogany a dark color, dissolve bichromate of potash in warm water, and apply it to the parts to be stained; it can be made weak by adding water, and the learner should use it weak at first, or he may make his work to dark; when dry, paper down. A little red sanders used in the polish makes it a bright red color and improves the staining; this stain is used in matching mahogany work that has been repaired. If the work is not required to be very dark, a little red sanders mixed in the polish will be sufficient. This is likewise used for birch or any wood that is used to imitate mahogany.

OIL ON WOODWORK.—Carefully conducted experiments have demonstrated the fact that seasoned wood, well saturated with oil when put together, will not shrink in the driest weather. Wheels have been known to run many years, even to wearing out the tires. Very many dollars might be saved annually if this practice were adopted. Boiled linseed oil is the best for general use, although it is now known that crude petroleum on even old wheels is of great benefit.—*Young Scientist.*

SHEET ZINC is used to a great extent for ceilings in Germany, especially where the beams for the upper floor are made of iron. The use of wood is entirely dispensed with, and excellent decorative effects are produced by stamping, painting and gilding or bronzing a part of the ornaments.

END SPLITTING.—Logs and planks split at the ends because the exposed surface dries faster than the inside. Saturate muriatic acid with lime, and apply to the ends like whitewash. The chloride of calcium formed, attracts moisture from the air and prevents the splitting.

Indp't Order of Odd Fellows.

Grand Officers.—DAVIS LOUDERBACK, G. M., San Francisco; LEON D. FREER, D. G. M., Oroville; D. M. BURNS, G. W., Sacramento; W. B. LYON, G. Sec'y, San Francisco; H. B. BROOKS, G. Treasurer, San Francisco.

THE principal event in Odd Fellow circles since our last issue was the 27th annual session of the R. W. Grand Encampment. It convened in this city on Tuesday, Oct. 18th, and the session lasted two days. The following Grand officers were present: William T. Galloway, M. W. Grand Patriarch; R. S. Robbins, M. E. Grand High Priest; C. B. Kimball, R. W. Grand Senior Warden; Walter B. Lyon, R. W. Grand Scribe; John Hanson, R. W. Grand Treasurer; E. H. Black, R. W. Grand Junior Warden; Charles H. Randall and E. D. Farnsworth, R. W. Grand Representatives; Henry J. Applegate, Jr., W. Grand Sentinel; E. Dunker, W. D. Grand Sentinel; J. A. Brown, W. Grand Marshal. Representatives from 62 Encampments were present, and 21 P. C. R's. were instructed in the Grand Encampment degree.

The report of Grand Patriarch Galloway feelingly commenced with a touching tribute to the memory of our late President, James A. Garfield. He further says:

"I am pleased to inform the members of this Grand Encampment that I have met with no opposition in whatever suggestions I have made or instructions given for the benefit of our Order. I have been warmly received by the members of the various Encampments I have visited, and can look back on the record of the past official year as one of great pleasure. I have found the camp fires burning, some with a brighter light than others. I have offered words of encouragement whenever and wherever I thought it was needed. I cannot recall an instance, out of the 51 Encampments visited, where any of the members felt despondent after my departure, but on the contrary were more hopeful when I left them than when I found them. The new ritual has been received with favor, and I am satisfied it will make many accessions to our Order. I feel confident in stating that the new work has created a new life and given the members fresh zeal. I have examined 29 out of the 40 District Deputy Grand Patriarchs, in the unwritten work, with much satisfaction, and feel gratified in stating to this Grand Body that I found all willing as well as anxious to perform the official duties assigned to them. I have held schools of instruction to promulgate the work of the new ritual, and for the purpose of having the work as near uniform as possible. There have been two Encampments instituted, both under favorable auspices. It might be well to state that while I was anxious to have as many Encampments created during my official reign as possible, I did not lose sight of the necessity of having them meet with a healthy growth for the future; therefore was assured, before granting petitions to the charters members of the two Encampments, that they would do their utmost for the future success. Galt, No. 65, was instituted May 30th; Susanville, No. 66, July 4th. I regret that I was obliged to wait two months for an advance copy of the new ritual before I was able to continue with my visitations, which prevented me from visiting a large number of Encampments. I have had no occasion to make any decisions of importance. But one appeal case has been presented to me, which was submitted to the proper committee for action. I have found some Encampments so remote from the fountain head that it was seldom that a Grand Officer ever visited. When they did honor the members with a visit, they were warmly received and advantage taken of the short visit he had to make in acquiring as much knowledge of the work as possible. I think it would be proper to recommend to the next Grand Patriarch to visit one-half of the number of Encampments in this jurisdiction only, and give more time to each visitation, and his successor visit the other half; so that every Encampment can be visited by a Grand Officer once in every two years. Some have said: How can you expect us to have any courage to perform work when we don't see a Grand Officer once in a while to keep us posted about the working of the Order.' The neglect of a Grand Officer to visit the remote Encampments will certainly cause the members to become indifferent. My experience this last year has convinced me that it would be better for a Grand Patriarch to visit one-half of the Encampments, and make his visits a little longer, than to make the flying trips as the other Grand Patriarchs and myself have done. The labor will not be so burdensome, and the time and money will be more beneficially expended. If something of the kind is not done, the members of the Encampments will feel slighted, which will cause them to become careless of the progress of their Encampments."

Then follows an earnest advocation for an endowment institution for the Order. The report has also a record of visitations, and also the names of Patriarchs who have died during the year. The report concludes as follows: I feel grateful to the Grand officers, to the District Deputy Grand Patriarchs, and other members of the Order, for their endeavors to aid me in the promulgation of the new work, for the confidence reposed in me, and for their uniform kindness. In concluding my report, I beg to state that I have tried to live up to my obligations to the best of my ability as your executive officer. In retiring from the office, I feel confident that my successor will strive just as hard as I have done, to build up the usefulness of this branch of our Order. Trusting he will meet with your hearty co-operation, is the sincere and earnest wish of Yours, in F., H. and C.

The following is the report of W. B. Lyon, Grand Scribe, being an abstract of reports of subordinate Encampments: Number of encampments, Dec. 31, 1880, 60; number of members, Dec. 31, 1879, 3,626; number initiated during the year, 198; number admitted by card during the year, 13; number reinstated, 21; total, 3,858. Number of members withdrawn, 55; number of members suspended, 313; number of members expelled, 4; number of members deceased, 51; total, 423. Number in membership Dec. 31, 1880, 3,435; decrease in membership, 191; number of Patriarchs relieved, 397; number of weeks sickness for which benefits were paid, 2,217; amount paid for relief of Patriarchs, $13,003.75; number of widowed families relieved, 23; amount paid for relief of widowed families, $570; number of Patriarchs buried, 44; amount paid for burying Patriarchs, $1,878.50; number of wives of Patriarchs buried, 5; amount paid for burying wives of Patriarchs, $106.75; amount paid for charity, $786. Total for relief and charity, $16,345. Amount paid for current expenses, $12,781.68. Total expenses, $29,126.68. Average expense per member for relief, $4.76; average expense per member for current expenses, $3.72. Total average expense per member, $8 48. Amount of receipts, $41,802.75; average receipts per member, $12.17. Assets—Amount of money in general fund, $15,364.72; amount of money loaned and in bank, $42,006.74; par value of hall stock, $54,500.50; value of real estate, $1,950; value of furniture, $2,588.21; value of regalia, $23,208.85; value of libraries, $517.50; value of cemeteries, $740; value of other investments, $14,899.87. Total, $155,776.39. Average assets per member, $45 35. Total Grand Encampment receipts, $4,233.30. Expenditures—Printing journal, etc., $365.50; supplies, $501.17; salary of Grand Scribe (18 months), $750; rent of office (18 months), $270; representative tax, 1880, $150; representative tax, 1881, $150; traveling expenses of Lee Ellsworth, Grand Patriarch, $332.75; traveling expenses of W. T. Galloway, Grand Patriarch, $500; jewel for Grand Patriarch, $125; *New Age* advertising, $12; janitors, $20; blank charters, $15; incidental expenses, $181.20; Garfield obsequies, $23.50; portrait of Grand Patriarch, $30; Total, $3,426.12.

The following officers were elected for the ensuing year: R. S. Robbins, of Salinas, Grand Patriarch; C. B. Kimball, of Marysville, Grand High Priest; E. H. Black, of San Francisco, Grand Senior Warden; W. B. Lyon, of San Francisco, Grand Scribe; John Hanson, of San Francisco, Grand Treasurer; W. B. Davies, of Sacramento, Grand Junior Warden; Wm. T. Galloway, of San Francisco, Grand Representative to the Sovereign Grand Lodge of the United States; Lewis Soher, H. S. Winn and W. E. Lutz, of San Francisco, Trustees.

One of the best resolutions of respect to the memory of President Garfield we have yet read was presented by E. A. Davis, P. C. P. It reads as follows:

Upon the verge of the celebration of the natal day of our Republic came the sad, the awful intelligence that our beloved chief magistrate, James A. Garfield, had been shot down by the bullet of an assassin, and must die. No event in the history of our country ever transpired that so moved the great heart of the nation as did that; and when on the wings of the lightning the latter anuouncement was heralded that the accursed bullet was not true to its errand, and that the President would live, then went upward to the Great Ruler of Nations the devout thanksgivings of 50,000,000 of freemen for their hoped-for deliverance, and then the joyful anthems raised by his loving countrymen were echoed and re-echoed by all the civilized people of the world. But the joy of the nation was only for an hour. The issues of life and death were not with the loving hearts and hands that watched and tended the dying hero in his marvelous struggle for life, and after many long and weary days of suffering—in the prime of his manhood, in the zenith of his power, on the very threshold of his highest and best service to his country—his poor wasted body, no longer fit to hold his daring and sublime soul, he sunk into his last and final slumber. And now, while the nation yet rests in the shadow of the great calamity, this grand body, representing a great benevolent and patriotic organization of this commonwealth, takes occasion to record its detestation and abhorrence of the act which has deprived the nation of its great head, to express its great and unfeigned sorrow at the loss of him who so fully and completely exemplified in his life the great principles of our Order, and to tender to the family of our lamented late President our fraternal love and sympathy, and the assurance that, as he died for the nation, so shall the Republic live for them.

What more should be said of this honored dead? What tribute can we pay? What can we say of him that would be fitting and just? What pen can enroll the record of his noble deeds and of his manly christian virtues? What tongue can recite the wondrous glories of his accomplishments or speak the language which tells the seeming romance of a career so bright as his, which wrought out a character so full, so true, so complete and so perfect? Oh! that we could look to the full hight of his greatness, that we might paint in sincere words the grandeur of his example, the glory of his life. Oh! that all people of this fair land could know and feel the high, steady purpose that always guided him, the grand moral courage that never deserted him, the heroic perseverance and industry that trained up and developed his matchless intellect, and the truthful, simple and honest nature of the great man who so fully won the hearts and confidences of the nation. With what profit can we, brothers, study a character so grand? What an example does it afford to the world of struggling, ambitious humanity, what hope it inspires in the hearts of the humble youth of our land, pointing as it does, the way to them, by which intelligence, perseverence and honest endeavor in this free land may achieve the highest distinctions that worldly honors can confer. Patriarchs, we honor ourselves by recording our homage and tribute of our love to Garfield, the noble man, the brave soldier, the wise statesman, and the christian gentleman, the product of true American life.

An amendment to the constitution was passed proposing to abolish all prefixes to Grand Lodge officers' titles.

Past Grand Patriarch, W. H. Barnes, presented a report proposing an endowment plan for the Encampment branch. After considerable discussion a committee consisting of C. C. Terrill, C. O. Burton, C. W. Dannals, George A. Case, William T. Galloway and W. W. Lyman was appointed to present a report at the next session of the Grand Encampment.

Resolutions were adopted authorizing Nos. 2 and 42 at Sacramento to consolidate into one Encampment; also the same privilege to No. 31 at Los Angeles and No. 54 at Anaheim.

The per capita tax was fixed at 60 cents for the ensuing year.

Charters were ordered for the new Encampments at Galt and Susanville.

An elegant jewel, emblematic of his rank, was presented to the retiring Grand Patriarch. The presentation address was made by Wm. H. Barnes, P. G. P., Bro. Galloway feelingly responding.

WE have received a copy of the *Companion*, published at Columbus, Ohio. It is a very neat 16-page paper, and from a cursory examination seems to be well edited. S. C. Chorlton, M. D., is the editor.

Knights of Pythias.

Grand Officers.—S. L. TERRY, P. G. C., Stockton. JOHN H. HARNEY, G. C., S. F.; GEORGE CANTUS, G. Treas, S. F.; A. G. BOOTH, Grand K. of R. & S., San Francisco.

BENEVOLENCE, being one of the fundamental principles upon which the noble structure of Pythian brotherhood is founded, is the disposition to do good. Good will, kindness and brotherly love, accompanied with the desire to promote the happiness and prosperity of mankind, and of such and none other, is the true Knight of Pythias. We know that in our degree work these principles are taught, enjoined, exemplified and subscribed to by every member of the Order, and who are expected to practice them in every avocation of life; and this leads me to propound the query: Are we any better than the generality of men outside the pale of our Order? I would answer: In a general sense we are. Why? Because those who refuse or neglect to be associated with others for benevolent purposes, do not come under the influence of the associations and teachings as exemplified at our Lodge meetings—hence the dreadful scourge of society selfishness. True, selfishness is a part of poor human nature, and we are all more or less imbued with it; but by associating ourselves with others in a benevolent capacity, our evil propensities are toned down, and we become better, more useful and happier men.

These being the principles, workings and aim of all such benevolent organizations, should be encouraged and subscribed to by every good and patriotic citizen, whether rich or poor.

To our brethren and friends I would say, the work goes bravely on. Our indefatigable Grand Chancellor, John H. Harney, has been on an extended tour through the southern counties, and we are advised by him, as well as from other sources, that the Lodges throughout the Order are in more than a healthy condition, and that our Order is being extended everywhere.

We have also exceedingly flattering reports from from our enterprising and esteemed Master-at-Arms, F. M. Merguire, whose motto is "Go ahead," having been deputed by the Grand Chancellor to visit the Lodges in the northern and middle counties, and are happy to learn from him that there is a perfect boom among the brethren, that the Order of Knights are being favorably considered by all classes of good citizens everywhere; and another good feature presents itself here: that business men and men of worth, influence and stability are rapidly coming into our Order, and the Lodges throughout the State, not content with building up their own Lodges with good material, are spreading the principles of our Order throughout the community and pushing the good work into every locality where there is an opportunity of establishing a good and permanent Lodge.

It might reasonably be supposed that when our valiant Knights Grand Chancellor Harney and Grand Master-at-arms F. M. Merguire, were absent on their mission of Knights Errantry, that a partial relaxation of interest in our city Lodges would occur, but on the contrary, everything has been lively in and around the Castle Hall, lots of candidates and plenty of work; and from the fact that District Deputy Frank Mitchell, another live man, represented the Grand Chancellor during his absence, together with our honored lady assistant, Mrs. F. M. Merguire, taking charge of the duties allotted to them, everything went off with the usual vim. So prosper the Knights of Pythias. J. P.

Knights of Honor.

Grand Officers.—DAVID MCCLURE, P. G. D., San Francisco; CHAS. E. TRAVERS, G. D., San Francisco; R. H. WARFIELD, G. Treas., San Francisco; W. H. MAHONEY, G. Reporter, office St. Ann's building, cor. Powell and Eddy.

AT the last session of the Supreme Lodge, several changes were made in the Knights and Ladies of Honor, the most important of which are the following: The first is in the qualification for membership: Hereafter, any person can become a member who passes a satisfactory moral and physical examination. The membership was formerly confined to Knights of Honor and their female relatives. The vote on this proposition in the Supreme Lodge stood 36 to 8, Massachusetts and Kentucky casting 4 votes in the negative. The beneficiary department is divided into two classes—A and B. In class A $1,000 is the amount of the benefit, and $2,000 in class B. A person who desires can take one or both, thus making $3,000 as the sum total of the benefit to be derived. A Supreme Medical Examiner was appointed, to whom all medical examinations must be submitted. Elections of officers of subordinate Lodges are to be held annually. Assessment notices are to be issued by the secretaries. Dues are to be paid on the first night of each quarter. Other Lodges are to be notified of the applicants for membership. When it becomes necessary to issue a second assessment notice, 15 days more time is allowed for collection, and a fine of 10 cts. imposed. If, then, the assessment is not paid, the period of time is extended 15 more days, a fine of 25 cts. inflicted, and if not paid the member is suspended. Five members constitute a Lodge quorum. A member who has been suspended one year, on being reinstated must be assessed at the age of reinstatement. No ballot or medical examination is necessary when a member is reinstated within 30 days. Any person can become a social member. A new ritual was also adopted. The above changes will take effect from the first of November, 1881. Lodges of Knights and Ladies of Honor who wish to confine the membership to those of the parent society can do so, by simply enacting a by-law to that effect. The whole matter is left to the subordinate Lodge.

A NEW Lodge Knights and ladies of Honor will shortly be instituted at Berkeley by Dr. C. S. Haley.

A NEW Lodge was instituted at Haywards, Alameda county, October 15th.

WE have received a copy of the *Record*, a paper devoted exclusively to the Knights and Ladies of Honor. It is published at Towanda, Pa., by J. R. Kittridge, of the K. of H. *Advocate.*

American Legion of Honor.

Officers of Grand Council.—OSGOOD C. WHEELER, Grand Commander, Oakland; MRS. ABBIE E. WOOD, G. Sec'y., office room 1, Shiels' building, 32 O'Farrell St.; J. N. BESSE, G. Treas., Watsonville.

A RECEPTION was given on Friday evening, the 14th ult., at Laurel hall, 32 O'Farrell street, to Grand Commander and Supreme Representative O. C. Wheeler, on his return from the Supreme Council, which he has just attended; as also to the Grand Council, who attended in a body with him. The reception was managed and held under the auspices of Washington Council, No. 480, although all the Councils of San Francisco and Oakland, as also the officers and members of the Grand Council, were invited. It being the regular meeting night of Washington Council, an initiation of four candidates preceded the reception. The hall was beautifully decorated, and when the Grand Council entered, was well filled with members of the Order. At 8½ o'clock the Grand officers, escorted by the Commanders of the various subordinate Councils, followed by the members of the Grand Council, headed by the banner of the Order, entered the hall, the

assemblage rising and being introduced by the Marshal, W. K. Doherty, of San Francisco Council, and were welcomed by the Commander of Washington Council, C. O. Burton, who presided. The officers were then escorted to their respective positions, which were surrendered to them, the subordinate officers taking seats on their right. After a piano duet by Mrs. Weiss and Miss Mulrein of San Francisco Council, Commander Burton, in a few brief remarks, welcomed all present and introduced the Grand Commander, who entertained those present some little time in an account of his attendance upon the Supreme Council and what he had seen and what he had learned. He represented the business of the Order as being properly and judiciously administered—all its interests well guarded. He referred in the highest terms to the care and skill displayed in the management of the Supreme Secretary's office, which is held by a lady, Miss Nettie C. Mosher, with 13 assistants under her control. He also spoke of the close scrutiny of the Medical Examiner-in-Chief of all the applications for membership, thus assuring none but first-class risks; he spoke also of the rapid growth of the Order, being only 2 years and 10 months old, and now numbering over 33,000 members, and of Grand Councils in as many States. After a song by Mrs. Weiss, Past Grand Commander Bockius was introduced, who was the first Deputy Supreme Commander in the city and instituted the first Council in San Francisco. He referred to the early organization of the Order here and its rapid growth, the first Council being but a little over a year old, and the membership now numbering 3,000 in the State. After a piano solo by Miss Fisher, of San Quirco Council, the Grand Secretary of the State, who is also a lady of acknowledged ability and well qualified for the position, Abbie E. Wood, was introduced, who entertained the audience with a well-timed, sensible speech, in which she urged and enforced the claims of her sex to fill places that they were capable of doing, many of which has been heretofore closed against them because they had not had an opportunity of qualifying themselves. After the conclusion of her remarks which were well received and appreciated by those present, Companions Chapman and Benhayon of Occident Council, recited from Shakspeare the quarreling scene between Brutus and Cassius, local names being substituted for those in the text, which was a decided hit, and gave unusual satisfaction. Several other members of the Order gave short addresses with accounts of the condition of the Order which was represented as being in a most prosperous condition. At the conclusion of the exercises a beautiful star of flowers was presented on behalf of Washington Council by Commander Burton to Mrs. Abbie E. Wood, as a mark of appreciation of her official course and assistance rendered to the Committee of Arrangements. Thanks were returned to Councils and companions for their attendance and aid rendered, when the exercises were closed by singing the closing ode, thus ending one of the most pleasant and agreeable gatherings of the season, with a general wish that what had been so auspiciously inaugurated by Washington Council might be taken up by some other Council and that this pleasant and profitable meeting of the entire Order might be repeated at no distant day, and thus become one of the social and fraternal features of the Order.

Native Sons Golden West.

Grand Officers—Frank J. Higgins, D. G. Pres.; San Francisco; H. Clay Chipman, G. P., Sacramento,. George. B. Baldwin, D. G. P., Marysville; Henry Lunstedt, G. Sec'y, San Francisco.

Grand President Chipman has encouraging news from Red Bluff and Tehama as to the possibility of instituting Parlors at those places, and has, through his lieutenants, infused the proper enthusiasm into the young men in that vicinity.

The new "pass word" for the second quarter has been transmitted to the Presidents of the various Parlors, and imparted to the members of their respective Parlors by them.

Sacramento Parlor, No. 3, is enjoying prosperity as usual, and is mostly due to the untiring efforts of its much esteemed and respected President, F. D. Ryan. His thorough knowledge of parliamentary law, his tact in creating interest, and his easy, graceful manner has served to make his term one of the most prolific since its organization.

G. P. Chipman never fails to attend every meeting, and his advice and counsel has much weight with the Parlor. He is proud of the fact that he is a member of the "Banner Parlor," and hopes to see it retain that position indefinitely.

C. N. Post, the able speaker and Clerk of the Supreme Court, takes an active interest, and is a valuable addition to the young Order.

Jos. Walis, the rising young attorney-at-law, has been promoted from the ranks to Rifle Inspector First Artillery Regiment, with rank of First Lieutenant. On the 9th of September he inspected the rifle practice of the whole regiment at Camptonville, Nevada county.

Jos. Palm, a popular member, has been elected First Lieutenant Company A, First Artillery Regiment.

P. C. Jurgens, who has had a very severe attack of pneumonia, is recovering rapidly, and will be able to resume his business duties shortly.

M. A. Hamburger has removed to Los Angeles, where he is engaged in business with his father. Parlor No. 3 misses his manly form, but is partially reconciled, from the fact that he still retains his membership.

Geo. Steinmiller, an old "charter member," has also removed, and is doing business for himself at San Diego, and doing well, too.

Past President F. B. Houston is an energetic worker, and is entirely wrapped up in the advancement of the young Order. Has made the best Chaplain the Parlor ever had.

Past President H. W. Taylor is not dead yet by any means, and is playing his points for a responsible Grand Parlor office at the next session in Sacramento.

First Vice-President J. T. Stafford has missed but one meeting during the present term, and that was unavoidable. He has many friends and supporters among the Natives, and is the most popular "lady's man" in Parlor No. 3.

Wm. Fawcet is the handsomest member, and is likewise a favorite with the Native daughters.

Modesto Parlor, No. 11, was instituted at Modesto last Saturday evening. Delegations from San Francisco, Sacramento and Oakland were present. The following officers were elected: President, J. W. McCarthy; Vice-Presidents, J. S. Williams, J. C. Simmons, Jr., E. D. McCabe; Recording Secretary, B. F. Hudelson; Finance Secretary, E. F. Branch; Treasurer, C. F. McCarthy; Marshal, H. D. Bradford; Inside Sentinel, T. J. Harp; Outside Sentinel, J. W. Murphy; Executive Committee, T. A. Wells, Arthur Ray, W. D. Aske; Chaplain, L. C. Branch; Asst. Recording Secretary, J. B. Schlosser; Asst. Financial Secretary, Earnest Ray. The Parlor starts with 24 charter members.

Pacific Parlor, No. 10, will be instituted at the rooms of California Parlor, No. 1, next Thursday evening. The following officers have been chosen: President, C. L. Weller, Jr., (a son of Gov. John B. Weller); Vice-Presidents, Wm. Metzner, Geo. McPherson, H. D. Kelley; Recording Secretary, L. W. Kidd; Financial Secretary, L. W. McPherson; Treasurer, Frank Underhill; Marshal, H. Rogers; Executive Committee, Edw. McCloskey, Edw. Searing, J. P. Jones; Inside Sentinel, N. G. Learing; Outside Sentinel, W. J. Barry; Past President, J. A. Steinback.

Canadian Association.

The regular quarterly entertainment, combining musical and literary exercises with a social dance, was held at B'nai B'rith hall, on Tuesday evening, Oct. 25th. These meetings have become quite popular, are strictly invitation parties, and are usually well attended. On this evening there was a brilliant assemblage, who were highly delighted with the following programme:

Overture, orchestra; ballad, "Sing to me the Auld Scotch Song," Mr. C. T. Pidwell; Miss Viva Pidwell accompanist, Mrs. C. W. Tozer singing an answer in the distance. This piece was finely executed and loudly applauded. Recitation, little Walter Malloy. This was a great favorite, and received a hearty recall. Vocal solo, Miss Linda Hoag, who was recalled, Mrs. M. E. Hoag, accompanist. Humorous recitation, Mr. E. J. Chandler; well received, and for an encore recited a sentimental piece. Vocal solo, Mrs. Walter Malloy, Miss Lizzie Cole accompanist; an artistic performance that was loudly applauded, and the recall kindly answered. Duet, "The Fisherman," Mrs. C. W. Tozer and C. T. Pidwell. The happy blending of trained voices in this piece produced a happy and pleasing effect, and received a hearty recall. Instrumental quintette, Messrs. H. de St. George, R. H. Whitley, Julius G. Grundell, J. Neilson and A. Fine, with zither and guitar; a real musical treat that received a hearty recall. Recitation, Mr. Chas. Putnam; a humorous and sentimental piece that was listened to with close attention, and at the close received a hearty recall. Vocal solo, Mrs. C. W. Tozer; a pleasing effort, and encore, that closed a select entertainment, which was followed by a list of eight dances, in which a large part of the audience joined, and which carried the exercises up to a late hour. The executive committee, consisting of A. Barker, A. Gilliland, Chas. E. Hunt, Sam'l Beatty, J. W. Buchanan, Alfred Hogg, J. W. Gilliland and W. B. Blair, received many compliments for the able manner in which they executed their trust, especially Mr. Chas. E. Hunt, master of ceremonies.

Spartan Lodge, 36, has the honor, we believe, of the largest number of members who have sons who are also members. The following is the list: R. A. Pogue and son, E. A. Pogue, age, 25; J. Tuttle and son, Chas. K. Tuttle; E. Danforth and son, E. P. Danforth, age, 26.

Miss Grace A. Bell, daughter of Amory Bell, of Hercules, was married to Mr. C. H. Schoff, of this city, on the 25th of October, by Rev. Dr. Scott.

Grand Recorder's Department.

Headquarters of Grand Lodge, A. O. U. W., Rooms 40 and 41, St. Ann's Building, corner of Eddy and Powell, San Francisco. H. G. Pratt, G. R.

Wm. C. Flint, Esq., 216 Sansome street, S. F., is Chairman of Committee on Laws and Supervision. All By-Laws, or amendments to same, should be sent directly to him.

Several Recorders are delinquent in the matter of monthly reports. Without these reports it is simply impossible to keep the records correctly.

The square and compasses are now eliminated from our work, and are no longer either "working tools," or emblems of our Order. No visible emblems are required in their place. If a Lodge so desire, there can be no objection to placing the anchor and shield at or behind the station of the Master Workman.

It will be observed that in the assessment list last sent out is the name of one who died in 1880. This is correct. Official report was received only a few weeks since. The reason why is a tale too long to tell in this department, but suffice it to say no fault attaches to the Lodge. The brother died in New York city.

Up to the present time of writing, we have issued over 15,000 beneficiary certificates, and we have about 13,100 Master Workmen in good standing. We have lost by death about 200, a few by expulsion, and the balance stand suspended, or have gone to other jurisdictions. For everyone we lose by death we lose nine from other causes. Whether this ratio will continue in the future we can only know by statistics.

It is the intention to send out a blank for statistical purposes to the several Lodges in this jurisdiction, and Recorders are most earnestly asked to fill them at the close of the term, and forward to this office as quickly thereafter as possible. I could get at the desired information from records in this office, but it would be a work of many weeks, and with the aid of our several Recorders the labor will be divided between more than 200 persons, and but little required on the part of each. These statistics are of vital importance, and cannot be too thoroughly and carefully collected.

At the beginning of each term we experience much difficulty and annoyance from a misconception of the law in relation to and forwarding of semi-annual reports. At the time of installation of officers the report should be handed to the installing officer, that he may see that it is correctly made out, and that the proper amount of capitation tax is paid to him. This tax was fixed by the last Grand Lodge at 60 cents per annum—30 cents per term—and is to be paid on all members. The report should then be passed back to the Recorder, that he may forward the same at once to the Grand Recorder, for only by these reports do we get the names of the new officers. If no officers are to be installed, the report should be made all the same, and forwarded with the tax. A person does not cease to be a member because suspended for nonpayment of assessments unless he is six months in arrears. A Junior Workman is a member.

Clay W. Taylor.

Our esteemed brother, Clay W. Taylor, P. G. M. W., was elected Grand Master of Free and Accepted Masons of California, at the session of the Grand Lodge in October, in San Francisco. Few men in the history of our Order have advanced to such high positions in so short a time. His administration as Grand Master Workman was characterized as one that strictly followed the law and constitution, establishing precedents that will be the rule of action for coming years.

At the close of his term he was elected a representative to the Supreme Lodge, where his ability was recognized, and, through his efforts, combined with his colleagues, our ritual and working tools were changed in a manner that gave general satisfaction to all.

His election to this honorable position by an almost unanimous vote, when he had been a member of the Grand Lodge of Masons only four years, is a compliment seldom given to anyone. Although his profession and the arduous duties imposed upon him as Grand Master will take a large portion of his time, we know he will find time to visit the Workmen Lodges and give his counsel and assistance to the Order which first honored him as its chief officer.

Resolutions of Respect.

[In Memoriam.]

Hall of Memorial Lodge, No. 174., A. O. U. W., San Francisco, Oct. 24th, 1881.

To the Officers and Members of Memorial Lodge, No. 174, A. O. U. W.:

Sirs and Brothers:—Your committee appointed to draft resolutions of respect to the memory of our deceased brother, Richard Grunwald, beg leave to submit the following:

Whereas, It has pleased Almighty God to remove from our midst our late brother, Richard Grunwald; and

Whereas, It is but just and proper that this Lodge pa a tribute of respect to his memory, therefore, be it

Resolved, That in the death of Bro. Richard Grunwald this Lodge mourns the loss of a worthy member; his family, an affectionate husband and father, and the community, an honorable and useful citizen.

Resolved, That this Lodge tender his bereaved family its sincere and heartfelt sympathy in their deep affliction.

Resolved, That the charter of this Lodge be draped in mourning for 30 days.

Resolved, That these resolutions be spread in full on the records of this Lodge, and the Recorder be instructed to transmit a copy thereof to the family of our deceased brother and that a copy be sent to the Pacific States Watchman for publication.

J. H. Gyselaar, C. W. Nevin, C. S. Hoffman. } Com.

[In Memoriam.]

Hall of Triumph Lodge, No. 180, A. O. U. W., San Francisco, Oct. 11th, 1881.

Master Workmen, Officers and Members of Triumph Lodge, No. 180, A. O. U. W.:

Sirs and Brothers:—Your committee appointed to draft and report resolutions expressive of the grief occasioned by the death of our esteemed brother, A. A. Gault, most respectfully submit the following:

Whereas, The Supreme Master Workman of the universe in his wisdom has seen fit to call from our midst and remove to his eternal home, our beloved brother, A. A. Gault, while yet in the prime of life and usefulness; and believing that it is proper and right that an expression of our sorrow should be shown, therefore, be it

Resolved, That by the death of our brother, A. A. Gault, our Lodge has lost a most worthy brother, and an earnest and honest Workman in every sense of the word.

Resolved, That the heartfelt sympathy of this Lodge be extended to his bereaved family and friends in their sore affliction, and, believing that the all wise Providence will give them strength to bear this great trial and afford them protection in the future.

Resolved, That as a mark of respect for our deceased brother the charter of this Lodge be draped in mourning for the term of 30 days.

Resolved, That these resolutions be spread upon the records of this Lodge; that a copy of the same be transmitted to the family of the deceased, and a copy be presented to the Pacific States Watchman for publication.

J. Waterman, W. I. McKay, Fred Ahrens. } Com.

Bro. Frank A. Brooks, O. of Memorial, No. 174, was married on the 18th of October, to Miss Clara B. Arnold, at the residence of her mother, 106 Eleventh street. The happy affair was one of unusual brilliancy, the presents given to the young couple amounting to several hundred dollars. Mr. Frank Brooks has been in the *Mining and Scientific Press* Patent Office over five years, and we feel a proud interest in extending to him our congratulations.

Miss Linda Hoag, daughter of our reporter, J. C. Hoag, has been tendered by her many friends a benefit, to take place on Tuesday evening, November 1st, at B'nai B'rith hall, Eddy St. The young lady has often most obligingly assisted at the entertainments of the Workmen and others, and they are taking the opportunity of testifying their appreciation. A first-class programme has been arranged, and all who attend will be sure of passing a pleasant evening.

Chas. S. Hoffman, P. M. W. of Memorial, No. 174, was married on Thursday, October 27th, to Miss Hattie Perry, of St. Helena. This makes the second marriage from Memorial in two weeks. It might be suggested that if any of our young men wish to get married, it would be well to become a M. W. of Memorial, 174.

Geo. W. Brock, Receiver, and Geo. Kennedy, Financier of Vesper Lodge, have held their positions successively for three years, or since the institution of the Lodge.

We had the pleasure of meeting Bro. W. McDearmon, of Unity, No. 25, Portland, Oregon, in Harmony, No. 9. The usual word from Oregon: "Getting along finely."

A new Lodge of D. of H. is in process of formation, to be located in this city. Some of our leading Workmen and wives are joining in the movement.

The total beneficiary money received by the entire Order for the month of August amounted to $115,578.40; disbursed, $115,013.40.

And still the increase goes on with 103,612 members in the A. O. U. W.

Subscribers, if they prefer, can have the Fraternal Record instead of the Watchman, by simply notifying us by postal card or otherwise.

A. O. U. W. Directory.

Cards inserted in this list at the rate of 25 cents per month payable semi-annually in advance. If errors or omissions are noticed, please write the office direct.

CALIFORNIA.

OFFICERS OF GRAND LODGE.

CLAY W. TAYLOR, Past Grand Master Workman..Shasta
W. H. BARNES, Grand Master Workman....San Francisco

TAMALPAIS HOTEL.—This most delightful and healthy resort has this summer been refurnished and painted throughout. The proprietor, Mr. W. G. Graham, formerly of Congress springs and other leading country hotels, is well known throughout the Pacific coast for his courtesy and attention to his guests. As a caterer he is unrivaled. The beauty of the country around San Rafael, and the mild and salubrious climate render it a most desirable residence during the fall and winter months.

Mabel's first way of eating roasted mussels: "When they open their mouths, mamma, open yours, but pull the binding off them."

OFFICERS and members of the A. O. U. W. receiving a complimentary number of the WATCHMAN with this notice marked are invited to examine its merits for their support, as we expect our agent to call and present personally further information concerning our enterprise for the future. Should our agent fail to call soon in some instances, we shall be glad to have our friends favor the office directly with their response. Persons receiving duplicate copies are requested to circulate them to the advantage of our cause and the publishers.

DO NOT DELAY.—Send us your subscriptions promptly Don't let any break occur in your subscriptions to the WATCHMAN. Every live Workman needs every number of the paper, and we need his assistance to print as valuable a journal as we strive to for the special benefit of its patrons and the general good of the Fraternity. Send the cash direct, or, if more convenient, hand it in with your dues to the Financier and we will allow him for trouble and expense of remitting.

The Golden Gate Park.

A few years ago the outside lands of San Francisco, westward from Devisadero street, were often the source of fierce contention for possessory right by various parties, not unfrequently resulting in bloodshed and death to the retainers of adverse claimants. How long this state of affairs would have lasted it is hard to say, had not some far-seeing persons succeeded in having a portion of the land in question sequestered and finally, by legislative enactment, devoted to public use in the shape of parks. The property once secured, it was not long in being turned to account. With this end in view, the Governor was authorized and directed, within 30 days after the passage of the act, to appoint three Commissioners, who were to hold office for four years without compensation, each Commissioner to be a freeholder and resident of San Francisco. The first Board of Commissioners was composed of Messrs. S. F. Butterworth, D. W. Connelly and C. F. McDermot, and to them and their successors our city will ever be greatly indebted for what is now the most delightful resort on the coast. We have never heard what the gentlemen had to say on being shown their field of labor—certainly nothing could have been much more uninviting.

The grant consists of a parallelogram about three miles in length by half a mile in width, and contains in the neighborhood of 1,050 acres, of which fully three-quarters were desolate sand dunes, relieved here and there with a hill of red rock suitable for making roads. In fact, it was a miniature Arabia—there was *Stony* and *Sandy*, but the third part was lacking. Kind nature, with bounteous hand, had decked no portion of it with lofty trees and luxuriant herbage, and the lonesome traveler derived but little comfort and society from the presence of vegetable life. Out of such an allotment how nearly has been constructed Arabia Felix, may be ascertained by spending a day within its bounds. Noonday and midnight are not more opposite than

What it Was and What it Is.

It seems to be an institution created for the people, and a more cosmopolitan thing than its visitants can hardly be found. Representatives from every class and condition of society enter its portals, and the gay equipage of the millionaire often presses hard on the tattered garments of Lazarus. During the year just passed the gatekeepers have reported the entrance of the following: Carriages, 42,745; double buggies, 47,070; single, 170,302; total vehicles, 260,117; equestrians, 37,526; pedestrians, 834,863; in vehicles, 780,501; total, 1,652,993.

For the accommodation of these visitors there has been constructed (linear measurement) of drives and bridle paths, 48,682 ft., covering an area of 2,055,630 ft., and of walks for pedestrians, 10,000 ft. This does not include road making done by the Bush fund.

These walks and roads have been on every hand embelished by the gardener's art, until, in her gay attire, the park enfolds a vast variety which is pleasing to the human mind, and consequently has a tendency to tranquilize the agitated passions, exhilerate the man, and render all around him delightful. Here he who has been confined with the business of the week, toiling in the "sweat of his brows," becomes invigorated and refreshed as he takes his walk, with the happy family group about him, and marks how the desert has been made to blossom as the rose.

The Conservatories.

This structure is favorably situated on a commanding site between the main drive and the north ridge road. The building is about 250 ft. in length, covering an area of about 15,000 sq. ft., and exceeded in size only by the Government conservatory, at Washington. Oriental in style, graceful in outline and highly ornamental. The main entrance, or reception-room, is 23 ft. square, substantially furnished, and ornamented with a fountain in the center. From this room the visitor enters the rotunda—a circular room 56 ft. in diameter and about the same number of feet in hight.. An octagonal space in the center of the rotunda is occupied by several varieties of rare tropical plants; and the dryness of the atmosphere is relieved by the spray from a fountain set in the center of all.

On the right of the rotunda is the Orchid house, an arched room, 35x50 ft. There are many rare and beautiful varieties of this strange family to be found here, representing a monetary value of hundreds of dollars, principally the gift of our public-spirited citizens. The space not all being taken up by the orchids, an infinite variety of other beautiful flowers have been introduced, presenting the great difficulty of deciding which is possessed of the greatest charm; yet certainly, nothing can be much more beautiful than the collection gloxinias here assembled. The beauty of the flower steals upon one, and almost before we are aware of it, we are absorbed in admiration.

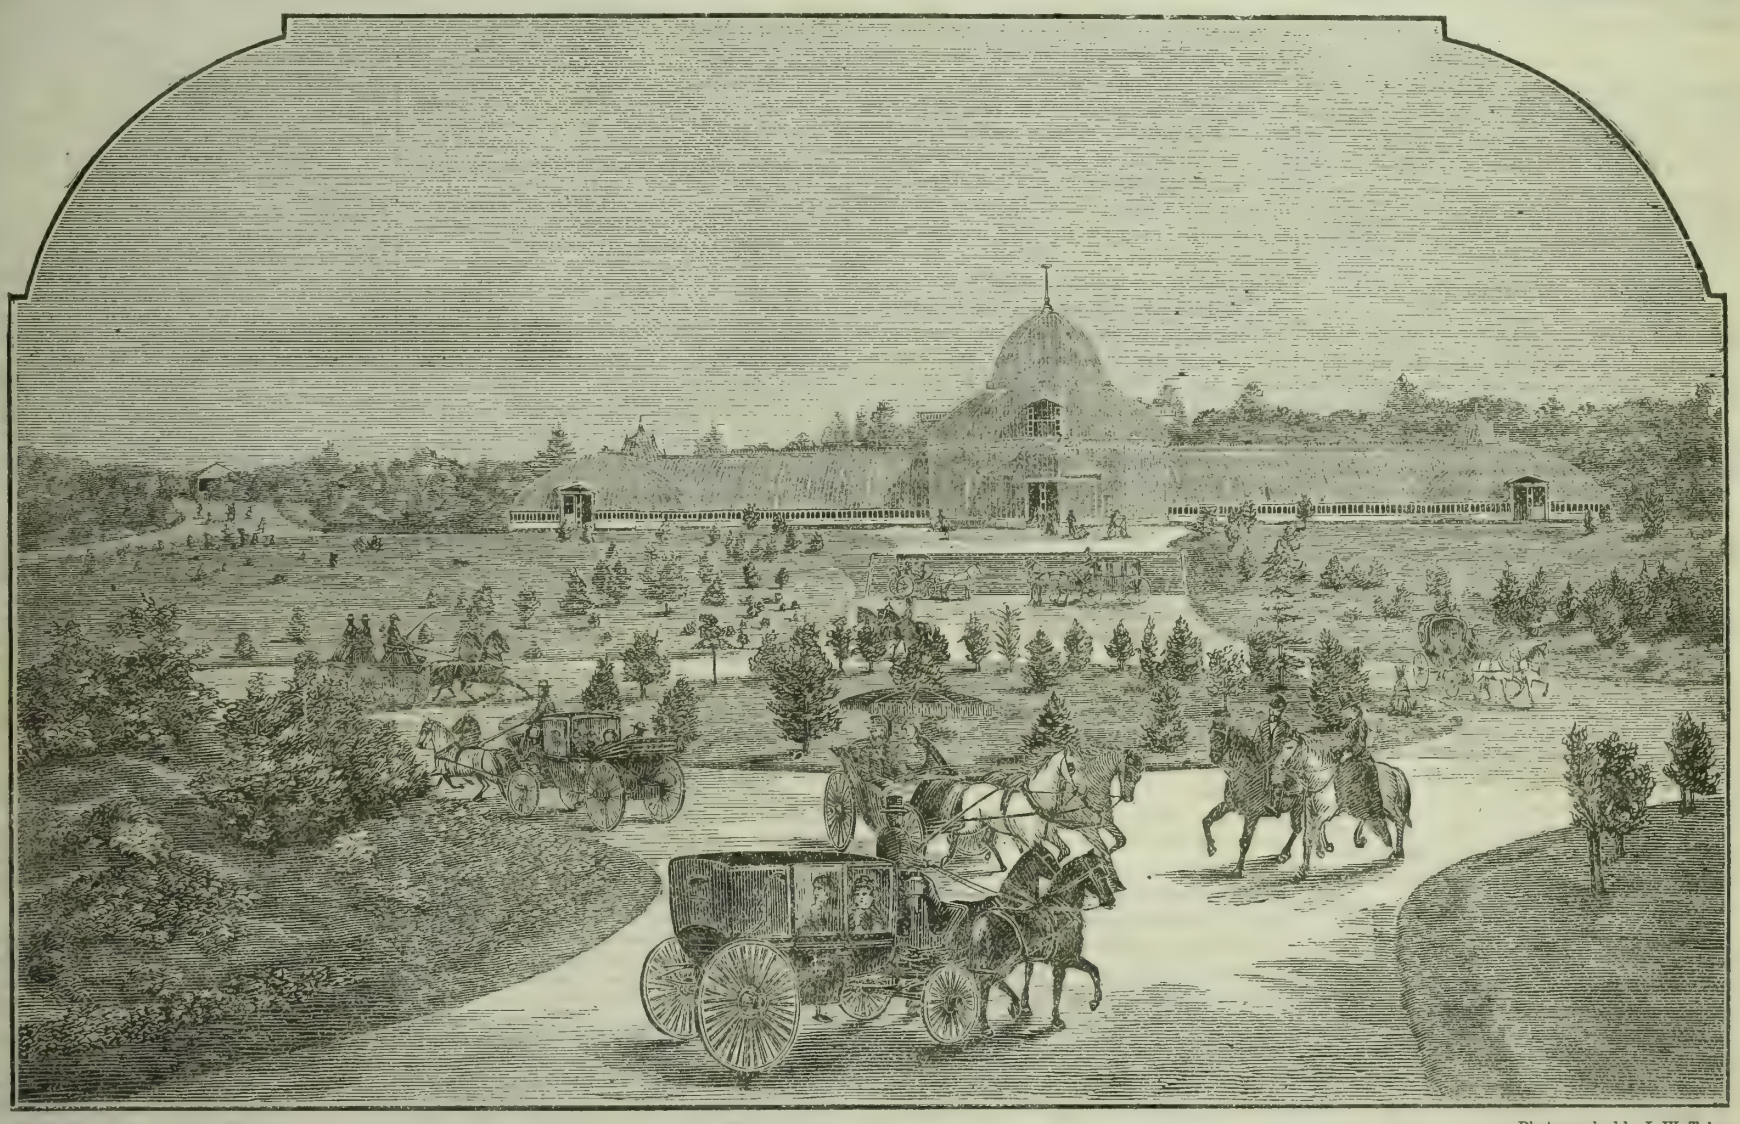
The arched room on the extreme right of the building is set apart for the cultivation of the larger and rarer aquatic plants. A circular pond, 28 ft. in diameter, has been constructed here, with the necessary heating apparatus, and the general public already know the result. In this tank the Victoria Regia lily reigned supreme, surrounded by the less pretentious, yet still beautiful sisters of her tribe.

The Ferns.

Although not confined to any one portion of the conservatory, more may be found adjoining the lily pond than anywhere else. The collection comprises all the finer varieties, such as tree ferns, staghorns, climbing ferns, adiantums, and in the more sheltered nooks the magnificent Farleyense shows how beautiful a thing may be yet bear no flowers. There is probably no form of growth that attracts more attention than ferns. Their delicate foliage causes them to be sought for cultivation, or their fronds are carefully gathered and dried by the ladies against the time when occasion offers for spatter-work. They furnish to botanists a broad and inviting field for investigation, but their greatest beauty can be brought forth only with the microscope. Thus they appeal to the scientific element of man's nature as well as to the æsthetic, and while they gratify the taste, furnish food for the intellect.

We doubt the existence of a superior floral display anywhere in the world, and a 30-year old city being the possessor of it must commend, abroad, our admiration of the beautiful, as well as the public spiritedness of our citizens.

On the left of the main building is a wing similar in size and shape to the Orchid house, in which may be found some of the choicer varieties of roses, such as Mareschal Neil, Cloth of Gold, etc., together with azaleas, lilies and a multitude of beautiful foliage plants. The Californian, having grown tired of exotics here, recognizes an old friend in our beautiful Mariposa tulip, cultivated and brought to perfection, and it is at once placed in the front rank of flowers.



The greenhouse adjoining, which corresponds in general features with the aquatic department, is intended for the growth of hard-wooded plants, such as japonicas, azaleas, etc. Here, apparently with a desire to show what may be done, the gardener has taken several heliotropes and trained them to standards, until they have attained a hight of from 8 to 10 ft., without a sign of vegetation on the stem, until the top is suddenly terminated in a magnificent umbel of flowers, as delightfully fragrant as only heliotrope can be. There is also an old-fashioned rose geranium trained in the same manner, to a hight of 18 ft. The lover of camellias will here have no cause for complaint. This room probably presents the greatest diversity of color to be found in the building, for here are stored the calceolarias. This collection (calceolaria) does not command attention so much for its beauty as for its abundance of flowers and variety of hues; among scores of plants, no two being found of the same shade. The border plant, the Alternanthea amabalis (?), being easy of cultivation, pleases everybody, and is one of the finest edging plants that can be grown.

In the rear of the building are two propagating pits, 50 ft. long by 12 ft. wide; a growing house, 75 ft. long by 25 ft. wide; and a potting-room, 30 by 30 ft.

A heating apparatus supplies the requisite warmth to all the chambers, and an admirable system of ventilation enables the keeper in charge to preserve at all times an equable temperature.

Thirty-five tons of glass and over three tons of putty were used in the construction of the conservatory.

The Commissioners have lately received from Sir Joseph Hooker some 65 varieties of Sikkim and Bootan rhododendrons, the finest and choicest of the family, many of which will have to be grown in the conservatory to be protected from the prevailing winds.

Photographed by I. W. Taber.

OUR GREAT PLEASURE GARDEN—THE CONSERVATORY, GOLDEN GATE PARK, SAN FRANCISCO.

The Baby Died at Sea.

It was in the summer of '73 that we made our first trip to Oregon. The weather was extremely hot, and the *John L. Stevens*—commanded by the lamented Captain Connor—was crowded. Among the second-class passengers on board was a family of seven, consisting of father, mother and five children. They had come from southern Missouri and were seeking a home in the Willamette valley. During their long and tedious journey the youngest child—an infant—some 10 or 12 months old, had contracted *cholera infantum*, and the first night out from San Francisco it died. The ship carpenter prepared a plain box in which the attenuated little form was placed, the whole covered with coarse canvas and prepared for burial at sea; but the poor afflicted mother supplicated so strenuously against this, that the sympathetic heart of Captain Connor was touched and he consented for it to remain on board until we should reach Astoria. At this port, while the ship awaited the incoming tide, we went on shore and gathered flowers, which we hastily formed into a wreath and cross; Capt. Connor enshrouded the little coffin in the blue field and white stars of the American flag, upon which we placed our floral offering, and thus it was given into the hands of the Masonic fraternity, of which the father was a member.

'Twas a touching sight, as the ship sped on in its course up the winding beautiful river, this stricken family, gathered in a sad group at the vessel's stern, straining their tearful eyes for one last lingering look at the store-house where, under the stars and the roses, they had left the mute form of their little one to be buried by kind-hearted strangers.—*S. K. Saxe.*

PORTRAIT OF COLUMBUS.—A most remarkable and acceptable discovery was recently made in the Spanish Colonial Office at Madrid, of a portrait of Columbus, made when the great explorer was about 40 years of age. It represents him without any wrinkles on his broad forehead, with dark, thick hair, a brilliant eye and a beaked nose. The portrait is in perfect state of preservation, and the inscription is intact. It reads: "Columbus Lygur., novi orbis repertor." The size of the portrait is about 16x20 inches.

AN old colored man saw a sign in a chemist's shop which read "Tasteless medicines." Looking in at the "pizen-mixer," as he called him, he said, "Dat am de bes' advice I eber got—taste less medicines," and then hurried away, just in time to dodge a package which was thrown after him.

PACIFIC STATES WATCHMAN.

Issued on the 1st and 15th of each month.

AT NO. 252 MARKET STREET, SAN FRANCISCO, CAL.
☞ *Take Elevator No. 12 Front Street.* ☜

Subscription (in Advance), $2 a Year.

Favorable to Advertisers.

By consolidating the large subscription lists of the *Pacific Workman* with the PACIFIC STATES WATCHMAN our advertisers gain an unusually great advantage. We doubt if any one weekly newspaper has ever been circulated to as many different readers on this coast, as have been served heretofore by the *Workman* and WATCHMAN together. It is certain that no other periodical is now patronized by a better class of industrial, professional and business men. In fact, our subscription list embraces many of the foremost business and representative men throughout the towns cities of he coast.

We have pride in making our paper "clean and handsome," and first class in all respects—to the benefit of both our readers and advertisers.

ADVERTISING RATES.

One Square (¼ inch), per issue	$ .75
One Square per month	1.25
Two Squares, per issue	1.50
Two Squares per month	2.50
Obituary notices and resolutions (with 25 copies post-paid for friends of deceased) per sq. (¼ inch)	50

☞For reading notices, extraordinary display, special advertising and choice places permanently, extra rates will be charged. Reasonable reduction will be made for large and long-continued advertisements. No extra rates for the space occupied by engravings.

OFFICIAL RECOMMENDATION.

[*Resolutions adopted by Grand Lodge of Cal., Feb. 3, 1881*]

WHEREAS, the PACIFIC STATES WATCHMAN, the pioneer A. O. U W. advocate on this coast, without official aid, has long rendered able and valuable services for the good of our glorious organization, we earnestly recommend that our Lodges and the brethren individually patronize the WATCHMAN as liberally as circumstances will justify.

Entered at San Francisco P. O. as second-class matter.

San Francisco, - November 1, 1881.

Another Decapitation.

There is another Iowa head in the basket. First it was that of J. D. Nichols, the Grand Master; then the Grand Foreman was called to assume the duties of Grand Master. He, too, refused, or neglected to execute, the Relief Law, and down comes the guillotine across the official neck of Geo. R. Miller. Now, Geo. Stahle, Grand Overseer, is called to the chief office of the jurisdiction, and, if he takes the course of his predecessors, will meet with a like fate. Next in succession, we presume, will come the acting P. G. M. W., who, we believe, is Bro. J. W. Willett, and there we may expect the work of destruction will stop, and the work of restoration begin, for we believe he stands pledged to the support of the Supreme Master in his efforts to maintain the dignity of the law and punish rebellion. We rather suspect Bro. Willett to be about the sort of man that Iowa needs in the present juncture of affairs. He is in the prime of life; 5 ft. 8 inches in hight; weighs 180 lbs., and wears a 20-inch collar. By profession he is a lawyer, and has the reputation of being a very hard man to beat. If his hand gets at the helm, we feel an abiding faith that the wayward craft will be speedily righted and wheel safely into port. But however this may be, we are overjoyed that a precedent is to be established, that shall be a warning to all who in the future would seek notoriety at the expense of broken vows and a disrupted organization.

At this time of writing we are in ignorance as to the feelings of Bro. Stahle, Supreme Overseer of Iowa. He has a right to be considered true and loyal until proven otherwise. To him is given the opportunity of making a record of glory that rarely falls to the lot of man. The conduct of those higher in office has emphasized the situation, so to speak, and correct conduct on his part will stand out in bright contrast to the black background of his predecessors. While we would like to see the reins in the hands of Bro. Willett, we should, of course, be better pleased if one is found in the person of the Grand Overseer, ready, willing and able to perform the duties of Grand Master of distracted Iowa, that right here the work of decapitation may cease, and the dawn of a new era commence.

The Old Fallacy.

It is strange with what tenacity people will sometimes stick to a fallacy right in the face and eyes of facts and sound reason. In New York, and confined to that State, is a beneficial organization known as the Empire Order of Mutual Aid. Its system is similar to that of the A. O. U. W., each member paying the same amount on an assessment; but when a death loss is settled, the beneficiary is paid in addition to $2,000, a sum equal to that paid by the member during his lifetime into the beneficiary fund. This plan, though open to serious objections, has yet the advantage of being more exactly just than any other that had ever been devised. But certain superficial thinkers in that Order believe the plan cannot be successfully carried out for a great period of years, and straightway they hold aloft the banner of that hypocritical abomination, graded assessments, based on the tables of "American experience," so called. By these tables is figured out the deceptive result that a man joining at the age of 21 years should pay only half as much on an assessment as one of 49, while the death record shows that of those who join at 21, the per cent. of loss in the Order is almost exactly the same as that of those who joined at 49. It is often asked: How can this be so, when the expectancy of a person at 21 is double that of one at 49? The fact is expectancy of life has very little to do with the matter at all. *The man least liable to die while in good standing in the Order* is the best risk, and, *per contra*, the man most liable to die in like manner is the poorest risk, and if there is any such thing as justice to be considered in this connection, the poorest risk should pay the most, and the best risk should pay the least. If the man at 21 or 30 stands an equal chance for drawing $2,000 from the society with a man of 49, he should pay as much to maintain his chance; if less, then he should pay less. But this does not explain how it is that young men are costing, not only the A. O. U. W., but kindred organizations, just about the same as the old ones, and why expectancy of life cuts but little figure in arriving at a correct conclusion. Now, this is why a man joins a life insurance company or fraternal beneficiary society, and at the date of joining, the probability is that he will remain in the organization a little less than seven years. It's no use to produce statistics to prove this. It is a fact so well known that no proof is required.

But here is a question that has never been fully determined: What is the comparative danger of death according to individual ages *for seven years after admission* to an insurance organization, whether old line, fraternal or otherwise? On the correct solution of this question hangs all the law and the profits of graded assessments, and *not* on the expectancy of life for the full period of a man's existence.

Again, tables of expectancy are made up from mankind in general, including the halt, the lame, the blind, the good, the bad and the indifferent. Fraternal societies in particular require not only a clean bill of health but a clean moral record also, and so it comes to pass that a man at 49 who can at that age pass the ordeal is by far a better risk, or has a much greater expectancy of life than the average man at the same age, and is in very little more danger of dying for the time he may be expected to remain in the organization than one of tender years, in whom perhaps the seeds of some fatal disease lie hid away from the keenest scrutiny of the examining physician only to break forth before he shall have lived out his expectancy of seven years in the Order. If anyone supposes that a man joining the A. O. U. W. at, say, 25 to 35 is less liable to call on the Order for $2,000 than he who joins at 49, he is simply mistaken so far as present statistics go to show. The middle age seems to be the most hazardous in very spite of all the expectancy tables, and the old fellows to be as good risks as the young ones. These are the facts as they exist at present. What the future may develop we have no means of knowing. In the meantime we should diligently compile statistics and as diligently fight off any effort to go back to the old exploded theories of life insurance companies, concocted and maintained for the money that was in them. We have no such object for perpetuating both a fallacy and an injustice.

THERE were seven expulsions from the Order in Illinois in August, one in Missouri, one in Iowa, two in Ohio and one in Pennsylvania.

Instructions to Medical Examiners.

Wm. C. Richardson, Supreme Medical Examiner, has, in accordance with the instructions of the Supreme Lodge at its annual session in Detroit held last June, arranged and compiled the following instructions to medical examiners of the A. O. U. W. These instructions are substantially the same as are now in use in this State, but they are so important that we think no better use can be put to the space at our command than their insertion. Dr. Richardson writes:

There are few things less subject to fluctuation than the average duration of human life. Death from old age is rare, being only 5½% of the whole number of deaths. The duration or probable expectation of life at a certain age can be calculated as follows: To the age add two-thirds of the difference between it and 80, and you will have the average duration of life; for example, let us take the age at 20, the difference between 20 and 80 is 60; two-thirds of 60 (the difference), which is 40, added to the age, 20, equals 60, or the average duration. This would not apply to a single individual, but for 1,000 persons this calculation would be correct. Should persons be admitted who have a phthisical diathesis, or any other which would terminate life at an early age, the calculation would not hold good; hence the necessity for rigid medical examinations. This illustration shows that the medical examination is the corner-stone of the life insurance feature of our Order, and upon the medical examiner's honesty and capacity depends the prosperity of the A. O. U. W.

The following table exhibits the expectancy of assured lives, based upon the large experiences of life insurance companies:

Years old.	Expectation years.	Years old.	Expectation years.	Years old.	Expectation years	Years old.	Expectation years	Years old.	Expectation years.
21	41	27	37	33	33	39	28	45	24
22	40	28	36	34	32	40	28	46	23
23	40	29	36	35	31	41	27	47	23
24	39	30	35	36	31	42	26	48	22
25	38	31	34	37	30	43	26	49	21
26	38	32	33	38	29	44	25	50	20

An exhaustive series of questions have been prepared, calculated to open up to the medical examiner the past, present and prospective condition of the applicant. The physican should see that the questions are thoroughly understood, and should also impress upon the mind of the applicant the danger of making false or incomplete statements and the necessity of full, free and ingenuous replies.

The practical questions to be finally answered by the medical examiner respecting each applicant are substantially:

1st. Shall I accept the applicant?

2d. Shall I reject the applicant?

3d. Shall I postpone and repeat the examination.

A decision on one of these questions must be reached. The first will be answered affirmatively when the application is an undoubtedly good one; the second, when it is an undoubtedly bad one; the third, when there is doubt in the examiner's mind as to the real and permanent physical condition of the applicant, and a probability or possibility that on further examination the objectional features of the case may disappear. As long as grounds for suspicion and doubt on one side and hope or possibility on the other are present, postponement may continue. The better to enable the physician, for his own reputation and the good of the Order, to reach a proper decision on the main question, the following instructions have been drawn up. These instructions are derived from physiological and pathological considerations, and from the experience of other orders and insurance companies, and condensed, arranged and applied to the wants of the A. O. U. W.

These instructions will be:

1st. General and advisory.

2d. Special and peremptory.

It is not contended that occasional applicants, whose conditions run counter to the instructions, will not live an average life, but such cases are always hazardous and unsafe, and, to prevent a collapse of the Order, should be rejected.

In considering the work of the medical examiner, it may aptly be divided into two parts. 1st. The objective. 2d. The subjective. The first embraces what the examiner himself can perceive as to the condition of the applicant; the second, what he can elicit from the subjective knowledge of the applicant through the printed and supplementary questions.

General and Advisory.

Objective.—When the applicant comes before the examiner, he should first take a general survey of the man; much may be inferred from a careful inspection. General appearance will produce a more or less favorable impression on the examiner; but he should not on that account relax his scrutiny as to particulars. Thorough examination may unexpectedly efface such an impression—sometimes in favor of, at other times against, the applicant. If he looks older than he declares himself to be, make it a point for investigation; if he states his age correctly, it is evidence of premature decay; if he looks younger, it is evidence of a good risk. His figure must be well proportioned. The figure of the model man tapers from top to bottom. He is broad-shouldered and narrow-hipped. The nearer the applicant comes to this ideal the better. The presence of large hips and narrow shoulders should argue against him. Over six ft. in hight is excessive; under five ft. is undersized; both are objectional.

There should be a certain proportion between hight, weight and circumference of the chest. The following table, assuming the person to be 30 years of age, gives the relative proportions:

Hight.	Weight.	Circumference of Chest.
5 feet 1 inch.	120 pounds.	31.06 inches.
5 " 2 "	125 "	35 13 "
5 " 3 "	130 "	35.70 "
5 " 4 "	135 "	36.25 "
5 " 5 "	140 "	36.83 "
5 " 6 "	143 "	37.50 "
5 " 7 "	145 "	38.16 "
5 " 8 "	148 "	38.53 "
5 " 9 "	155 "	39.10 "
5 " 10 "	160 "	39 66 "
5 " 11 "	165 "	40.23 "
6 " "	170 "	40.80 "

A deviation of more than 20% from this calculation is to be carefully considered.

At a greater age, great weight would be more consistent with health than at the age (30) taken, or younger.

Excessive adipose or emaciation is objectionable.

If the applicant has very thin, dry hair, which looks moth-eaten, and almost all the hairs are split at their ends, it does not show a vigorous constitution. A bald head and white hair are unobjectionable if they come in years; but if they come prematurely—if a person says he is 30 years of age, and has a bald head and white hair—it signifies early decay. On the other hand, if there is a family predisposition to gray hairs early in life, and the family history shows that the members have been long-lived, the fact of having gray hair is not objectionable.

Examine the scalp. Determine whether there are any adherent scars. Such scars will result from ulceration, and they are mostly of a syphilitic character. They may result from injuries. Adherent scars from syphilis show that the system has been affected by the poison; adherent scars from injuries lead to the suspicion that the inner table of the skull has been involved, and that subsequent trouble may be developed in the way of epilepsy. You will occasionally find gummatous swelling on the scalp, not very prominent, rather diffused, which give a slight sense of fluctuation, and are painful. Such swellings belong to the lesions of secondary syphilis.

Look at the eyes. A heavy, dull eye, without vivacity, is not at all prepossessing, and shows a sluggish constitution, unless the person is accustomed to wear spectacles. There are certain defects about the eye which are to be noted. Fatty degeneration at the upper edge of the cornea (the *arcus senilis*), if present in early age, indicates a tendency to fatty degeneration of the internal organs, especially of the heart and kidneys. If present in old people, it is not objectionable; but developed early in life, it is decidedly so. Cataracts should not influence the application unfavorably, but amaurosis and staphyloma should be regarded as objectionable. Note the difference between cataract and plastic deposit in the pupil. Cataract runs in families, and does not prevent the person from reaching old age; but the plastic deposit, which in many cases so closely resembles it, is almost always the result of syphilis, and is objectionable.

Inspect the ears. If an offensive discharge issues from the ears, the case should be examined, especially with reference to caries. If pieces of bone have appeared the risk may be declined; for, from very slight causes, the inflammatory process may be transferred to deeper parts and terminate life.

Perforation of the tympanum with offensive discharge is objectionable. Simple difficulty in hearing is but slightly objectionable; it is hereditary, but does not shorten life.

Observe the nose. If it has become depressed inquire as to how it was caused. If by injury, the fact of its existence does not shorten life; but if in consequence of syphilis, scrofula or diphtheritic ulceration, it may render the applicant objectionable. If a fetid discharge from the nose exists, you should inquire whether pieces of bone have appeared; if so, it is an objectionable application.

Simple mucous polypus of the nose is of no consequence in this connection, because it does not interfere with long life. But if polypus has invaded the antrum, it is objectionable. Polypus of the antrum, when it pushes downward the hard palate and, perhaps, raises the floor of the orbit, is decidedly objectionable, because very apt to become malignant; or, if not malignant, will necessitate an operation which may endanger life. A network of blood-vessels upon the nose of a person in middle life is to be regarded with suspicion. It is usually the forerunner of apoplexy. Epistaxis occurring in young individuals is not of special consequence; but occurring in elderly persons is decidedly objectionable; inasmuch as it is almost invariably indicative of apoplexy.

Next look into the mouth, and first at the tongue. If the tongue has ragged edges, you may assume that the applicant is subject to epileptic fits; for during these fits it is frequently wounded by the teeth. There may be evidences of old ulcerations in the throat, such as deficiency of the soft palate, etc.; and if the result of syphilis, as they are very liable to be, it must be determined to what extent the specific disease has affected the general constitution.

Decaying teeth in the mouth of a person, say 35 years of age, may have considerable signifi-

cance, especially if associated with an exposure of the alveolar process from absorption of the gums. The fact may then indicate premature decay, and, taken in connection with other conditions, may afford valuable suggestions.

If the applicant shows signs or remains of facial paralysis, the mouth being drawn to one side, ascertain the cause; if it is the ordinary facial paralysis, which has its origin in the peripheral or local nerves, it is not objectionable; but if the person has lost power in other portions of the same side, the cause has been central, and makes the application extremely objectionable.

A short, thick neck indicates liability to apoplexy. See whether there are any scars from old ulcerations. If there are, they probably point to a scrofulous diathesis. If marks of a seton, or scars from cupping or venesection, are found on the neck or other parts of the body, ascertain for what purpose the seton, the cupping and venesection were brought into requisition. It is probable the applicant has suffered from some grave diseases, and full inquiry should be made concerning the matter.

Glandular swellings of the neck in scrofulous subjects are objectionable, indicating, as they do, the possibility of future phthisis.

Examine the post-cervical glands. If they are enlarged, it is an indication of secondary syphilis.

Ascertain if the skin carries moles, wens warts or swellings of a non-glandular character. They indicate the sycotic constitutional dyscrasia, which furnishes the soil most favorable for schirrous, cancroid and cancerous growths.

Examine the back. See whether there is any positive curvature of the spine, either angular or lateral. Angular curvature almost always excludes the application. Lateral curvature excludes only when the curvature is sufficient to displace, and thus disturb the action of the heart. In many persons the right shoulder is a little higher than the left, in consequence of a light bend in the dorsal vertebræ. This is not seriously objectionable. Certain deviations from the straight line are brought on by occupation. For example, among carpenters the right shoulder is considerably higher than the left; but such a deviation has no special significance.

Examine the thorax. It should be well formed. Ascertain to what extent the chest expands. In health the ordinary expansion is one inch, and the chest should be capable of being expanded two inches with a forced inspiration. If it does not do that there is something wrong. Note the dimensions of the thorax. The circumference of the chest should be double the distance from the tip of one shoulder to the other. The circumference of the chest should be four times the antero-posterior measurement made at the lower part of the sternum. The distance between the nipples and the antero-posterior measurement is equal; hence the circumference of the thorax is four times the distance between the nipples. There should be no sinking of the chest-wall under the clavicles, and the expansion should be nearly equal upon both sides, the right side normally expanding a little more than the left. With forced inspiration, the respiratory capacity of a well-developed man, 5 ft. 8 inches in hight, should be 230 cubic inches; although in the ordinary inspiration and expiration rarely more than 20 cubic inches of air are changed. The capacity of the lungs in a healthy man 5 ft. 8 inches in hight being 230 cubic inches, it should increase 8 inches for the addition of every inch, so that a man 5 ft. 9 inches in hight should have a respiratory capacity of 238 cubic inches. The proportion holds good from 5 to 6 ft., and any great deviation from this ratio (say 15% to 20%) would be sufficient ground for rejection.

Examine the thorax with reference to resonance. The most important question to be decided is whether the resonance is perfectly good just above and below the clavicles; for that is the predilection seat of tubercular deposit. If there is considerable deviation from the normal upon either side of the chest, postpone the examination or reject the applicant. A slight diminution of resonance at the lower part of the thorax should warrant careful consideration. It is not the purpose here to teach the means through which the condition of organs within the thorax is ascertained. The medical examiner must be familiar with the normal sounds of the heart and lungs, and the prognostic meaning of all abnormal deviations therefrom. All such deviations, if permanent or likely to be so, should lead to rejection; if curable, a postponement commensurate with the time required should ensue.

As to the abdomen, determine whether there is any increase or diminution in the size of the liver, spleen and other organs, and whether there are present any abnormal growths. Determine whether hernia is present. A simple reducible hernia is not objectionable, providing the person wears a truss. An irreducible hernia, an umbilical hernia and a ventral hernia are, in the order mentioned, increasingly objectionable. It is questionable if, under any circumstances, an applicant with either umbilical or ventral hernia should be accepted.

Ascertain if scars and swellings in the groin are present. If so, past or present bubo may be presumed, and constitutional syphilis suspected.

If an examination of the urine for sugar or albumen is advisable, satisfy yourself that the urine presented is not that of another than the person himself. It may be thought advisable to have the urine passed in the presence of the examiner.

Examine the extremities. Tremor therein evinces a nervous temperament or chronic alcoholism. Observe any marks of cupping, leeching, or general blood-letting. Look for varices or varicose ulcers. See if the joints of the fingers or toes are enlarged from rheumatic or gouty deposits. Examine the nails. If they are convex in the longitudinal axis, it is decidedly objectionable, and especially so if the extremities of the fingers are also bulged. These signs are indicative of central trouble. If the nails are malformed, discolored, and covered with thick ridges, it may indicate secondary syphilis. On examining the feet and ankles, determine whether there is œdema. If present, it indicates impairment of the circulation; it it may be from a general weakened condition of the system; possibly in consequence of recent illness, or of central disease affecting the kidneys or heart. Decided œdema over the anterior surface of the tibia indicates secondary syphilis. Enlargement of the knee-joint is decidedly objectionable.

Subjective—To what the examiner may learn by objective work will be supplemented that which may be ascertained from the subjective knowledge of the applicant. While an occasional item of the

Special and Peremptory

instructions may be found above, the main portion will naturally follow after the final facts have been reached through the printed and extempore questions.

On taking up the printed questions, the medical examiner will see that the applicant for examination signs the agreement at the top of the blank in his presence. See that all questions are perfectly answered and all blanks properly filled. It has happened that invalids desirous of insurance have induced healthy substitutes to personate them with the examining physician, and thus fraudulently secured an insurance otherwise unattainable. The signature will not only aid in exposing the fraud attempted upon the Order, but attest a knowledge of responsibility on the part of the applicant as one of the contracting parties. If the information attained through the printed questions is not satisfactory, supplement them by others. Ask the applicant as to his *family* history. Learn the age to which various members of the family have lived; a knowledge of the age to which the parents attained is of great importance. Without any special reason, some families have a strong tenacity of life, and resist noxious influences and diseases which would destroy others. Study the family history as bearing upon the tendency to hereditary diseases, such as consumption, insanity, epilepsy, gout, rheumatism, cancer, and the like; the frequency of their transmission from one generation to another, etc. If such diseases manifest themselves decidedly in the family history, they make the applicant objectionable.

Again, if the family history throws any suggestion in a certain direction, examine the applicant carefully in that direction; for example, a man presents himself with a flat chest and high shoulders; you think he has weak lungs; you find, however, upon inquiry, that both parents reached an advanced age, none of the family have died of consumption; possibly the father is alive and has a similar chest. This conformation of chest would be peculiar to that family, and would not impair the risk. On the other hand, such a conformation of chest, with traces of consumption in the family history, would certainly reject the applicant.

Inquire into the individual history of the applicant, what diseases he has had, whether he has suffered from diseases liable to leave behind them serious results or recurring relapses. Suppose he has had acute articular rheumatism; be very careful about the examination of the heart. If it has a rapid action, although no morbid sounds are present, it is better to reject the applicant. Were it not for the rheumatic history, you might ascribe it to excitement, exercise, etc., and so pass him. If there is evidence of albuminuria or diabetes, you should reject the applicant.

If he is an athlete, and has undergone training for extraordinary efforts of walking, rowing, etc.; if a stone or marble cutter, or baker; if a butcher and very fat, if a saloon-keeper or member of the liquor dealing or manufacturing class, he is likely to be short-lived. The latter often die of Bright's disease. If he is a student and neglects muscular exercise, dyspepsia and other life-shortening diseases may arise. If a member of the learned professions, he is likely to have a good average duration of life.

Loss of weight within the year previous should be investigated carefully. If connected with other symptoms of incipient consumption (as rapid pulse, dry, hacking cough, etc.), the applicant should be rejected. If the loss is *marked and rapid*, even if unconnected with phthisical symptoms, the examination should be postponed or the applicant rejected.

Rapid increase of fat should be looked upon with suspicion. Fat persons sweat easily, take cold often, are predisposed to apoplexy, gout, and dropsy. Accumulations of fat at the surface augur accumulations interiorly, and while fat at the surface draws upon the vigor and power, and adds burdens to the general system, fat interiorly, in addition, is likely to produce serious effects by pressing upon vital organs or tissues. If attended by slow or hesitating pulse, atrophy or fatty degeneration of the heart may be feared. Such applicants should be rejected.

Both marriage and acclimation should be in favor of an applicant. A new comer to any State or Territory should be unquestionably sound, or his case should be postponed or rejected. This is all the more important in view of the fact that many change their residence on account of previous ill-health, and the family and personal history cannot be well ascertained.

Respiration should not exceed 20 nor be less than 15 per minute. The annexed table gives about the normal relations between the age and pulse; any marked deviation therefrom is undesirable.

Age.	Medium Pulse.
10 to 15 years	83
18 to 20 "	77
20 to 25 "	78
25 to 30 "	74
30 to 35 "	73
35 to 40 "	73
40 to 45 "	75
45 to 50 "	70

The pulse must not be more than 88, nor less than 56 per minute. Applicants permanently exceeding these limits should be rejected unhesitatingly.

The relations between the respiration and the pulse should be noted. There should be about four pulsations of the heart to one act of respiration. Should the ratio vary much from this, it would afford good ground for rejection.

It is positively required that the candidate be examined privately, that the chest be stripped by the removal of all starched and other clothing, such as might interfere with the recognition of disease of the thoracic viscera, and that careful auscultation and percussion of the thorax be made, and the result stated in full. Two measurements at the extremes of expiration and inspiration must be taken. The expansion is ordinarily two inches; less than that should awaken suspicion.

There are various organic diseases of the heart. The examiner must thoroughly inform himself respecting them. When incipient, they postpone; when established, they positively reject. An applicant whose heart intermits, or is in any way irregular in its action, should be postponed. If the same condition exists on subsequent examinations, he should be rejected as too hazardous a risk.

If in the family history consumption or other hereditary disease is found to have occurred among the ancestry or relations of the applicant, he is to be regarded as ineligible under the following circumstances:

If both parents have died thereby, not eligible. If the disease has caused the death of but one parent and no other relative, not until forty years of age. If one parent and a number of brothers and sisters, or other relatives, have been affected thereby, not until the age of thirty-five; and in *neither case*, even at these ages, *unless* the condition of the applicant and his conformation at the time of examination are unexceptional, and the appearances are that they will probably remain so.

If the applicant resembles the deceased ancestor or ancestors, the case would be stronger against him than if he resembled the unaffected parent.

If the applicant has had hemorrhage from the lungs, he is not eligible until seven years thereafter.

The applicant is to be considered ineligible if he has had asthma within three years, except that produced by external causes, similar to rose or hay asthma, or by employments which have been permanently relinquished.

If he has had gravel or calculus within five years, or after the age of forty, he should be rejected.

If he has had undoubted attacks of heptic or nephritic colic within five years, or painter's colic occurring more than once, and the applicant still remains a painter, he should be rejected.

If he has had fistula or any large ulcer, the first should have been healed three years, the second thoroughly cured.

If he has had apoplexy, epilepsy, hereditary insanity, symptoms of softening of the brain, habitual cough, convulsions of any description, organic disease of the liver, kidneys, or lungs, within seven years, or after the age of forty, rejection should ensue.

Important tumors, disease of the spine, well-marked (and active) secondary or tertiary syphilis, permanent strictures, amputations at the shoulder joint or above the knee after the age of forty, should reject.

If double hernia or single incarcerated hernia exists, it rejects. Single reducible hernia, where a truss can and will be worn, is not objectionable.

If varicose ulcers are present, or varices of limbs, extending above, or of unusual size up to the groin, postponement or rejection should follow.

Paralysis, if of any extent or duration; *rheumatism* or *gout*, if of frequent occurrence, or *chronic* or *hereditary*; also *tonsilitis*, if frequent, especially if connected with constantly enlarged tonsils, *reject*.

Deafness or loss of sight, if complete or nearly so, relect.

Hemorrhoids, so vascular as to debilitate by hemorrhage, or which will probably require surgical interference; skin diseases, if extensive or formidable, or likely to impair general health, especially if connected with or resting on constitutional or hereditary dyscrasias, should cause rejection.

Dropsy, if symptomatic of, or connected with, any organic or chronic disease of a general character, any injury which seriously impairs locomotion, or has disturbed the functions of the brain or other important organs, reject. The profound and lasting effects of concussions or injuries are too often overlooked by the examining physician.

If an applicant has been intemperate, the necessary period of reform must be determined by the physician. The reform must be well established and affirmatively proved in favor of applicant, or rejection ensue. A reformed drunkard may have laid the foundation of organic disease previous to reformation; if his countenance is pallid, his face a little puffy, and hand tremulous, reject.

If applicant daily and habitually uses malt or alcoholic stimulants (except as prescribed, for a limited time, by his family physician), merely for the excitement of the stimulus, as a beverage or for pleasure of companionship; if he is a member of the liquor manufacturing or selling class, among whom the temptation for excessive drinking is always present, *immunity from intemperance must be proven*. The physician in such cases will postpone, giving time for proof to be brought forward. If it is not forthcoming, the applicant must be rejected.

Excessive use of tobacco affects the secretions, impairs the nervous system and curtails longevity. In many instances it should be deemed sufficient cause for rejection. So with the habitual use of opium or other narcotics, which (unless prescribed by a physician and used for a limited time) should cause rejection.

Present illness of any kind postpones. Recent illness, especially if of prolonged or severe character, involving the liver, stomach, intestines, bladder, kidneys, heart, brain, or lungs, should postpone examination until the permanent results of such illness (if any) are made manifest.

It has been observed that the longevity of men above forty or forty-five years, living in malarial districts and suffering from malarial fevers, is seriously affected. Such applicants may often be postponed to advantage, and sometimes rejected. The examining physician must decide each case on its own merits. If such applicants are affected by the sycotic dyscrasia, indicated by the presence of warts, wens, moles, and non-glandular swellings, a strong presumption would thereby be raised against their acceptance.

So far as medical examinations can, the foregoing instructions, if fully observed, are deemed sufficient to protect the Order from extraordinary risks, and to preserve it for lasting usefulness.

Let medical examiners keep especially in view two facts, viz: that consumption and intemperance lead to more deaths than most other causes combined; and applicants likely to come under the influence of these prolific destroyers of human life should be kindly but firmly turned aside.

Let them make the examinations with judgment and discretion; but with the special object in view as to the probabilities of the applicant living the average duration of human life. Guard against deception, as every applicant desires to pass a satisfactory examination, and will conceal anything likely to be objectionable or prevent his acceptance. Be always guided by the strictest honesty, and reject all parties, no matter what their influence or necessities may be, who are not physically sound and possessed of the vitality likely to give them the average duration of life.

Finally, as they are examining for the protection of the Order against impaired lives, they are to consider themselves in all cases, as the officers and employees of the Order, and should give the Order, rather than the applicant, the benefit of all doubts.

Bro. McWilliams, of Vallejo Lodge, No. 75, was present at the meeting of Olympic, No. 127, on Tuesday evening, October 18th. Owing to the absence of the Overseer, our visiting brother was requested to assume the chair. One candidate received the J. W. degree, the work being performed in good style by the Overseer, Foreman and Master Workman. The Master Workman degree was conferred on two, when Bro. McWilliams was requested by Bro. Rossbach, P. M. W., to deliver the charge of the P. M. W., which he done in a grandly impressive manner. The evening was quite profitably spent, the visiting brother contributing in no small degree to the pleasure of all present.

Bro. A. D. Jordan of Noe Valley, one of the charter members, and a very useful and prominent member, has removed to Sacramento city. We commend him to the kindly courtesies of our brothers in Sacramento.

The Valley of Death.

The Fate of Immigrants on its Burning Sands.

The Valley of Death, a spot almost as terrible as the prophet's valley of dry bones, lies just north of the old Mormon road to California—a region 30 miles long by 30 broad, and surrounded, except at two points, by inaccessible mountains. It is totally devoid of water and vegetation, and the shadow of a bird or wild beast never darkens its white, glaring sands. The Kansas Pacific railroad engineers discovered it, and some papers, which show the fate of the "lost Montgomery train," which came south from Salt Lake in 1850, guided by a Mormon. When near Death valley, some came to the conclusion that the Mormon knew nothing of the country, so they appointed one of their number a leader, and broke off from their party. The leader turned due west, and so, with the people and wagons and the flocks, he traveled three days, and then descended into the broad valley, whose treacherous mirage promised water. They reached the center, but only the white sands, bounded by scorching peaks, met their gaze. And around the valley they wandered, and one by one the men died, and the panting flocks stretched themselves in death under the hot sun. The children, crying for water, died at their mother's breasts, and with swollen tongues and burning vitals, the mothers followed. Wagon after wagon was abandoned, and strong men tottered and raved and died. After a week's wandering, a dozen survivors found some water in the hollow of a mountain. It lasted but a short time, when all perished but two, who escaped out of the valley and followed the trail of their former companions. Eighty-seven families, with hundreds of animals, perished here, and now, after 22 years, the wagons stand still complete, the iron works and tires are bright, and the shriveled skeletons lie side by side.

COMPRESSED gunpowder experiments have been made with compressed gunpowder, made to fit the drill holes and cut into short lengths. It was found to possess many advantages over loose powder, among which is a saving of 40% in powder.

A WESTERN editor appeals to his delinquent subscribers by saying: This week we have taken in potatoes and cucumbers on subscription. Now, if you will bring in some vinegar for the pickles and some wood to roast the potatoes, we can live till artichokes get big enough to dig.

DEWEY & CO.'S

Scientific Press

Patent Agency.

[ESTABLISHED 1860.]

Inventors on the Pacific Coast will find it greatly to their advantage to consult this old experienced, first-class Agency. We have able and trustworthy associates and Agents in Washington and the capital cities of the principal nations of the world. In connection with our editorial, scientific and Patent Law Library, and record of original cases in our office, we have other advantages far beyond those which can be offered home inventors by other Agencies. The information accumulated through long and careful practice before the Office, and the frequent examination of Patents already granted, for the purpose of determining the patentability of inventions brought before us, enables us often to give advice which will save inventors the expense of applying for Patents upon inventions which are not new. Circulars of advice sent free on receipt of postage. Address DEWEY & CO., Patent Agents, 252 Market St., S. F.

ENGRAVING BY ELECTRICITY.—M. Plante has succeeded in obtaining engravings on glass by the following process: The glass is laid in a horizontal position in a shallow vessel and covered with a concentrated solution of nitrate of potash. A platinum wire is dipped in a horizontal position in the solution along the edges of the glass. The platinum wire is in communication with one of the poles of a secondary battery of 50 to 60 elements. The lines are traced by hand with the point of an insulated platinum wire, which is in communication with the other pole of the battery. The parts of the glass covered with the alkaline solution become engraved when touched with the end of the platinum wire, however rapidly this is moved, the thickness of the lines varying with the thickness of the wire. The current from either pole can be led into the writing wire; that from the positive pole requires, however, a stronger current.

LIQUID SUGAR.—Messrs. Sachenroeder & Gottfried, of Leipsic, have lately patented a process for obtaining liquid sugar which does not crystallize. Raw sugar with a high polarimetric power is clarified with a sugar solution, then passed through the Boegel turbine, and in this apparatus it is again clarified with steam, its polarization being brought to about 100°. The pure product thus obtained is dissolved in a boiler heated by steam, then passed through a system of charcoal filters, in which it becomes perfectly clear. In the vacuum apparatus the solution is reduced to 40° B., after the addition of one-fourth to one-fifth per cent. of chemically-pure crystallized citric acid or crystallized tartaric acid. The acid combines with the sugar, and deprives it of its tendency to crystallize.

MAGNESIA FROM SEA WATER.—M. Schlvesing extracts magnesia from sea water by the following method: The magnesia is precipitated from the sea water by means of lime. One cubic meter of water, when thus treated and left to rest for one day, gives about 16 gallons of gelatinous precipitate of magnesia. If this precipitate is mixed with a weak solution of phosphoric acid, a precipitate of tribasic phosphate is obtained, which settles when left to rest, and can be filtered and used for the precipitation of ammonia from sewage by the methods already known.

TO REMOVE INK-STAINS OR TO BLEACH WOOD. Oxalic acid dissolved in warm water and applied to the parts stained will remove the stain, or bleach wood that is too dark to match any other part.

A Peculiar Property of Gutta-percha.

It is a well-known fact that when gutta-percha is placed in water having a temperature of 60° to 70° C., it becomes very plastic, and may be used to receive very delicate impressions. Not so well known, however, is the information that the softened gutta-percha becomes very elastic toward severe shocks, that it will bear blows from large hammers, and allow itself to be thrown against a strong wall without showing any indication of the result, while at the same time it is so susceptible to gentle pressure that it is capable of receiving the slightest of impressions.

This peculiar property is possessed by other plastic bodies though in a less degree, as, for instance, freshly kneaded bread. It is considered as resulting in consequence of the occluded air contained in the substance.

The following simple experiment demonstrates the correctness of the above suggestion: Two spheres of equal weight are made of gutta-percha which has been softened in water at 70° between the palms of the hand. One of these is placed on a card, and the air removed from the sphere by exhausting it under the receiver of an air pump; the other is retained for comparison. Both spheres, from their weight, will assume the form of round cakes, but the one under the air pump will swell considerably and exhibit a wrinkled surface. The increase in volume often more than doubles its original size. If the swollen piece is permitted to harden under the receiver of the air pump and then broken with a chisel, its cross section will appear honeycombed like the interior of a loaf of bread, while the fracture of the other piece will only show small cavities. Very dense gutta-percha does not swell under the air pump, but if placed under mineral oil and made empty a voluminous evolution of air from the gutta-percha will take place.

After the air is again admitted under the receiver it will be found on examining the gutta-percha that it has lost the property of hardening on cooling. It has become like tough, greasy leather. A voluminous evolution of air was also observed when clay, putty and kneaded bread were examined under oil in vacuo similar to the above described treatment of gutta-percha.

The same phenomenon was observed when a sample of gutta-percha, which had been softened in an air bath, was treated as above; in this case a longer time is required for the heating, as the heated air is very slow in giving the amount of required heat.

With some bodies the enclosed air plays an important part in affecting their mechanical properties—thus clay, for instance, may be somewhat compressed by means of a piston in a cylinder; but as soon as the pressure ceases, it resumes its former volume.

The densest clay, when placed under the air pump, will become covered with numerous fine crevices (small as hair), which close up when the vacuum is sufficiently reduced.—*Dingler's Polytechnis.*

COLORED PHOTOGRAPHS.—How photography of colors may be accomplished by dying layers of coagulated albumen was lately explained to the French Academy of Science by C. Cross and J. Carpentier. They submitted two photographic proofs of a painting in water colors along with the original, showing the exact reproduction of the details and colors. Three photographs of the original were taken—one through a liquid orange screen, another through a liquid green screen, and a third through a liquid violet screen. For the image obtained through the first screen, a red color bath was employed; for that produced through the second screen, a blue bath; and for that effected through the third screen, a yellow bath. In this process there is evidently no direct photographic reproduction of objects with their natural colors.

WOMEN AS LEGISLATIVE OFFICIALS.—The following note from Washington Territory has points of interest: The Territorial Legislature convened at Olympia, W. T., on Monday of last week, and elected the following officers: Council—President, Horace F. Stratton; Chief Clerk, Ross G. O'Brien; Assistant Clerk, John Detiere; Enrolling Clerk, A. W. Engle; Engrossing Clerk, Miss Louisa McMillan; Sergeant-at-Arms, Louis McMillan; Doorkeeper, W. A. Leonard; Messenger, Frank E. Moore; Watchman, H. H. Morgan; Chaplain, Rev. J. R. Thompson. House—Speaker, George Comegys; Chief Clerk, E R. Burke; Assistant Clerk, William Hughes; Enrolling Clerk, Miss C. Newton; Engrossing Clerk, Miss Lizzie Ferry; Sergeant-at-Arms, L. P. Berry; Doorkeeper, W. H. Johnson; Watchman, George D. Forbes; Chaplain, Rev. D. Bagley.

THE Mormons are building a big temple at Logan, 100 miles north of Salt Lake City. The Salt Lake City Temple will cost $15,000,000 or $20,000,000 when finished; at Manti they have another one under way, and at St. George they long ago completed a fine one.

Visitation California No. 1 and Occidental No. 6, to Myrtle, 42.

On Saturday evening, October 22d, our Oakland brethren of California, No. 1, and Occidental, No. 6, with preponderance of the Occidentals, numbering over 50, visited Myrtle, No. 42. At an early hour in the evening the delegation arrived, and were received with honors and a neat speech from Bro. M. L. Sanborn, a significant feature of which was, when the word "Welcome" was pronounced, the whole number repeated the word with pleasing effect. A recess was had, and the usual social feast indulged in for a while, after which the Lodge was closed and an adjournment made to the large hall or banquet-room where, through the length of the hall, were two tables, on which was spread a collation, made up by the voluntary contributions of members of Myrtle, and gotten up in a style of grandeur that was a surprise to all. Fruits, turkey crab salad, sandwiches, ornamented cakes, French candies and large bouquets graced the tables, while over each cup for the coffee was a Japanese napkin, on which was printed "Myrtle 42, A. O. U. W., welcomes her brothers and friends." A staff constituting the P. M. W. and handsome brethren of Myrtle, were appointed by Bro. C. C. Gilmore, P. M. W., to wait on the guests and the ladies who were seated all around the room. It was one of the best spreads we have seen, and was indulged in with gusto. Among many pleasing devices was a mammoth cake, on which were the words, "Myrtle No. 42, A. O. U. W., compliments of Keva Falk." After the feast came a literary programme opened with a piano solo by Professor Charles S. Hoffman, P. M. W., followed by a vocal solo by Miss Frances Lincoln, sister of Bro. Harry Lincoln of Myrtle, that was loudly encored. Brother J. J. Schutz, M. W. of Occidental, made a neat little speech that was listened to with close attention. Recitation, Bro. E. T. Dewey, of Myrtle, a humorous piece, which caused much merriment. Song, Bro. Charles E. Baker, P. M. W., Prof. Hoffman accompanying on the piano, and at the close received a hearty encore. Recitation, Mrs. Jas. L. Fields, that convulsed her hearers and won a hearty recall. Reading, "The Jiner," Bro. George Berdan, Foreman of California No. 1, well rendered and pleasantly received. Vocal solo, Bro. J. N. Bogart, Organist of Myrtle, who is always interesting and pleasing, and certainly came up to his usual standard as he was heartily encored. Remarks, C. S. Haley, Medical Examiner, whose pleasant duty was to present Bro. M. L. Sanborn with the shinbone of a defunct mammoth, and his wife, Sister Sanborn, with a large and beautiful bouquet. Bro. Sanborn happily responded. Vocal solo, Wm. H. Voorhees, P. M. W., a patriotic song that was finely executed and enthusiastically received. Speech, J. H. Barry, P. M. W., a happy effort that was well received. Humorous speech, H. F. Morris, Fin., who convulsed his hearers, with his humorous hits and oddities. Vocal solo, Miss Linda Hoag, which was well received. It being now time to take their departure, Bro. Sanborn, on behalf of Myrtle, presented a beautiful bouquet to Bro. J. J. Schultz, M. W. of Occidental, which was happily responded to. This was one of the most enjoyable evenings we have witnessed for some time, and reflected great credit on the brethren of Myrtle, for the fraternal and regal manner they entertained their guests.

Burns' Monthly Social.

On Thursday evening, Oct. 27th, the usual monthly social was one of the best of the season. The Lodge-room was well filled with ladies and gentlemen and the little folks. W. K. Doherty, as master of ceremonies, called the following programme: Reading, Dr. Rodgers; instrumental music, Messrs. Tilton, Gaffon and West; a pleasing effort and recall. Piano solo, Miss Katie Preston; recitation, Bro. T. C. Maher, and for a recall recited "Roger and I;" extracts from the new paper, which we shall name "Burns' Monthly," by Wm. C. Flint, P. M. W.; very interesting and witty. Vocal solo, Mrs. E. Bray; recitation, Mr. Lovejoy; humorous vocal solo and encore, Bro. Gus Pohlman; scene from "Julius Cæsar," Messrs. Chapman and Benhayon—adapted to Burns Lodge and her past officers; a fine performance that was loudly applauded. Piano solo, Miss Bessie Soles; vocal solo, Mrs. J. F. Bolts, Mrs. C. Joost accompanist; an artistic and pleasing performance that was heartily encored and kindly answered; Scottish dance, Prof. West; humorous recitation, Prof. H. C. Eastman, and for a recall sang a piece, Prof. Rhind accompanist; reading by Dr. Doherty, caricature on Julius Cæsar; recitation, Bro. G. Lamont, of Bernal, a fine effort that was loudly applauded; reading from the paper "Burns' Monthly," Past Master Workman Flint; piano solo, Mrs. C. Joost; Wm. H. Barnes, G. M. W., who called in at this time, by request made a few stirring remarks and sang a song which closed a pleasant and well spent evening.

Harmony, 9.

We note under the present administration of Harmony, good progress. On Saturday evening, Oct. 15th, two applications—one elected to receive the degrees, and five received the M. W. degree. There membership is now 200, and it is believed by the leading members that it will be increased to over 250 at the meeting of the next Grand Lodge.

Magnolia, 41.

Magnolia, one of our brightest subordinates, is growing in interest and members. One person received the J. W. degree, on Monday evening, Oct. 17th. The work was given by Bros. H. P. Terry, O., John Tyler, F., M. Warshauer, M. W., in a very correct and dignified manner. As the Grand Master observed who was present, "the work was letter perfect." A case of distress coming before the Lodge, the sum of $20 voted for his relief. Under the head of Good of the Order Wm. H. Barnes, G. M. W., delivered a short address, dealing principally in the present status of our Order. A few of them we give. He said: "We have now over 13,000 M. W. on our roll; we have established ten new Lodges since January 1, 1881; within the last three weeks I have sent out supplies for four new Lodges; our average increase is over ten per day, and this is only the advance guard of an army that shall gather in its folds in a short time 25,000 good men. Let our Lodges be a family gathering for each other's good, to educate and improve our lives for future happiness and usefulness. His interesting talk was listened to with marked attention and satisfaction.

Noe Valley, 185

This Lodge had a very interesting meeting at its last session. The J. W. degree was conferred on two candidates, the work being performed in a very impressive manner. A. A. Egleston, D. D. G. M. W., was present and assisted. When "Good of the Order" was reached, the Master Workman vacated the chair and called on J. D. Thompson, P. M. W., to exercise the duties of presiding officer. The programme was opened with a horn solo, after which was announced that the third degree would be conferred. Refreshments were then served in abundance. Bro. Welborn proposed the health and happiness of the guests, which was responded to by Bro. Frederick Blight, of Harmony, No. 9, in a few well-chosen remarks. Bro. McIver, P. M. W. of Myrtle Lodge, No. 42, proposed the toast, "Noe Valley Lodge, long may it live," which was responded to by District Deputy Egleston of No. 14, who, during the evening, made a stirring address which all that heard will long remember. On behalf of the Baby Lodge, Brother Caraw, after a fraternal speech, tore down the flag which hid something on the wall over the Master Workman's chair. This proved to be a splendid portrait of J. D. Thompson, P. M. W., when it was presented to the honored P. M. W. He was very much taken by surprise and feelingly thanked the brothers for their kindness. Bro. E. H. Watson proposed a sentiment from Shakespeare which was responded to by Bro. Mayo with a sentiment from Hamlet which was finely rendered and well received. C. V. Thompson, For., proposed the three cardinal virtues of our Order: Charity, Hope and Protection, which was ably responded to by G. W. Lawton. W. C. Dudley, Rdr., proposed the sentiment, "temperance," being responded to by A. V. Thompson, M. W., in a temperance speech which would have gratified the Good Templars and all who are engaged in the great work of promoting temperance. Bro. Curry, of No. 14, also made some remarks on the subject. Bro. Coon, of No. 14, was called upon and made some humorous sayings. Bro. Ruthroff, of Excelsior, and other brothers also made remarks, which closed a pleasant evening gathering. It is hoped that more of these socials will be the order, and that those magic letters, A. O. U. W., will be over many doors.

Myrtle, 42

Myrtle, No. 42, is not a whit behind her sister Lodges in the steady progress she is making. On Oct. 15th, two applications received, and the M. W. degree given to two. After the work was done, as is always the custom, voluntary literary exercises were the rule. Several brethren made interesting remarks, interspersed with the usual voluntary singing and recitation.

Olympic, No. 127.

An official visit was paid to Olympic Lodge, No. 127, on Tuesday evening, October 25th, by Wm. H. Barnes, G. M. W., and E. F. Loud, D. G. M. W. The J. W. degree was conferred on two candidates, the Grand Master Workman giving the unwritten work. After which, by dispensation, the same two brothers were advanced to the M. W. degree, the G. M. W. again giving the unwritten work of this degree. It is needless to say that it was finely done, and that the initiated brothers were exceedingly fortunate in having the G. M. W. illustrate to them the ritualistic principles of the A. O. U. W. The usual business of the Lodge was then dispatched, and when Good of the Order was reached E. F. Loud, D. G. M. W., gave a concise and logical address. The fact was that the worthy Deputy seemed to be in a speaking mood, and the manner in which he spoke seemed to greatly please his brother Workmen. The G. M. W. then followed in a short address, which was remarkable for its solid facts and sound reasonings. He gave statistics showing how the average age of a society always remains the same. He alluded to the fraternal regard which the older societies manifest for the A. O. U. W. He also told how, when visiting small interior towns in the State, the members of the Lodge often travel 10, 20, and even 30 miles, to pay their respects to the Grand Officers and to hear the principles of the Order. No State in the Union, said the G. M. W., can approach California in the enthusiasm and earnestness of the brethren of California. Here the officers are required to perfect themselves in the work, and the result is that we have good Lodges and good officers. After cautioning the Lodge to sacredly guard its portals, and always hold in fond memory the living principles of the Order, our G. M. W. closed his address amid loud applause. Bro. Adge, M. W. of Sugar Loaf Lodge, No. 157, Iowa Hill, was present and addressed the Lodge briefly and well. The veteran Past Master Workman, Geo. W. Dixon, was then called upon and spoke of the unity and harmony of the members of Olympic, which a personal knowledge compels us to substantiate. The Master Workman, E. P. Fish, was then called upon by one of the brothers, who acknowledged the call in a few well chosen words. After which Adley H. Cummins gave a short exposition of the success and fraternal feeling which has characterized No. 127, and also of the glorious possibilities of the A. O. U. W., if it is true to its mission and purposes. The Grand officers then took their departure, shortly after which the Lodge was closed in due form. Olympic has been very successful this term. There has been one or more initiations on nearly every evening. Ninety-five members are at present on the roll, and it is confidently expected a round 100 Master Workmen will be secured before the end of the year, which will entitle the Lodge to two representatives to the Grand Lodge.

Friendship to Valley, No 30.

The largest Lodge in this jurisdiction, and the second in the United States, has commenced her regular winter boom. There were 8 applications handed in at their meeting on the 19th of October, and six received the J. W. degree. The work was given in a very correct manner, as is the practice in Valley, No. 30. The young Lodge, Friendship, called in force and were received with honor, and a short welcome. Dr. Jewell, P. M. W., was called on for a few remarks, which resulted in a fine speech, full of telling hits and interesting thoughts, followed by B. Broughton, Overseer of Friendship, after which a recess was had and a short social season spent. E. F. Loud, D. G. M., made a short address that was full of suggestive thoughts and valuable information, followed by Bro. I. G. Mysell, in a few quaint remarks that were listened to with strict attention. Bro. T. H. Macdonald, P. M. W., recited a humorous piece that caused much fun. These fraternal visits are a feature of our Order that should be encouraged, as they have been productive of great good.

Spartan, 36.

No. 36 is increasing her membership and making her meetings of more than ordinary interest. On Oct. 14th there were two applicants and eight received the M. W. degree. The work was performed by the regular officers, Bros. Smith, G., Alexander, L. W., Jordan, F., and Prevost, M. W., in such a perfect manner as is seldom seen in any Lodge in this jurisdiction. A gratifying feature of the evening was that Bro. E. Danforth, P. M. W. of Spartan, administered the rites to his son, E. P. Danforth, and to E. A. Pogue, whose father is also a member of Spartan. After the routine of business Bro. Wilson, one of the new members, performed on the piano, and E. P. Danforth recited to the satisfaction of his hearers a speech of Mark Twain, after which E. Danforth passed the word along the line to increase the membership of Spartan immediately with the same class as was introduced on this evening.

Sts. John, 72.

Sts. John's monthly social was a pleasant one. The following programme was given: Song, Prof. H. C. Eastman, Organist; Reading, J. O. Jephson, P. M. W.; solo, J. N. Prather, M. W.; humorous reading, W. B. Marshitz, Rdr.; Hindoo poem, Sam. J. Fletcher, F.; Reading, Bro. Eastman; remarks, H. G. Prince, P. M. W.; Reading, A. K. Kipps. The brothers had a pleasant evening.

Presentation.

The third anniversary of Washington, No. 60, was made interesting on their last meeting. Bro. H. B. Schunhoff, the sitting P. M. W., was presented with a magnificent solid silver set, Henry Wolfsohn the first Past Master Workman, making the presentation speech. The silver was accepted, and in evident surprise the accepting speech being happily conceived, R. S. Lindsey, P. M. W., Bros. Roth, Morganstein and Knight, made short congratulatory speeches, after which J. Meredith Davies, P. M. W., of Iowa, but whom we claim as our own, made one of his happy, earnest and interesting speeches.

Silver Spray, 3.

The members of Silver Spray, D. of H., held a very good meeting on Monday evening, October 23d. There were four applications received, and the degree conferred on three—two ladies and one gentleman. After the business of the Lodge was over, a short season was pleasantly spent in sociality and tripping the light fantastic, etc. Under head "Good of the Order" Bro. Rafferty, of Magnolia, Sister Halloway, J. Davis, P. M. W., Bro. B. Austin, Henry Hoeber, P. M. W., made pleasant remarks that were well received.

Yerba Buena, 14.

This pioneer Lodge has made a record in promoting the principles of our Order second to none. Her membership is now nearly 200, having paid sick benefits at the rate of $10 per week, and now has on hand over $3,000 in her "Sick Benefit Fund." As a Lodge constituting, so to speak, a large family, where fraternity, sociality and cordiality exist, we may find here a true exemplification. At their meeting on the 21st of October two petitions were received and the J. W. degree given to one. It is always pleasant to call on the brethren of Yerba Buena, No. 14.

Lodge Locals.

Grand A. O. U. W. Entertainment at Stockton.

EDITORS WATCHMAN:—On Friday, Oct. 21st, under the auspices of Stockton Lodge No. 23, a grand social re-union and musical entertainment was held by the brothers of the five different Lodges in San Joaquin Co. Many of the members came a distance of from five to 15 miles at the request of J. M. LaRue, D. D. G. M., that they might see the exemplification of the secret work of the Order rendered letter perfect, and to enjoy a social feast. At seven o'clock the doors of their Lodge room were thrown open, the brothers with smiling faces and glad hearts entered, and all were received with kindly greetings. Promptly at 7½ o'clock J. W. Payne, M. W., called the Lodge to order. After the regular order of business had been disposed of, the Master Workman stated that J. W. Watson, P. M. W., was present by the request of Wm. H. Barnes, G. M. W., to exemplify the secret work. At this announcement Bro. Watson was called for, who responded by saying that he would endeavor to give them a perfect rendering of the work, and then in a clear, distinct manner gave the work of both degrees. Many questions were asked in relation to the work, and all promptly answered. The Recorder, Bro. Lehe, stated that as the District was well represented, he would like to hear from the visiting brothers. Hence, as the name of each Lodge was called, some brother responded, giving a brief sketch of the prosperity of the Order with them. The Master Workman then stated that ample provision had been made elsewhere for farther and more complete enjoyment. At the closing, Stockton Lodge, with her invited guests convened at Mozart Hall, in open session. Here the brothers met their wives and families. The hall was provided with seating capacity and table room for some 300 people. Long tables, four in number, extending the length of the hall, loaded with all the luxuries of the season, presented an inviting appearance. Music was furnished by the orchestra of Professors Schmidt and Dreyfous. District Deputy J. M. LaRue acted as master of ceremonies. The entertainment was opened with music by the orchestra, followed with a song by a quartette composed of Messrs. Waterman, Baird, Houghton and Phelps. Bro. S. D. Waterman then delivered an appropriate address of welcome. J. W. Watson, P. M. W., of Oakland, was then introduced, who gave an outline of the inception of the Order, its objects, aims and principles. Both of these gentlemen were heartily applauded at the close of their remarks. The company were then invited to the supper, and when all were seated, Bro. Lehe, in a humorous presentation speech, gave Bro. Delano, chairman on Committee of Entertainment, a custard pie as part compensation for his excellent services. When all had partaken of refreshments, the tables were quickly cleared and removed, and the hall put in order for dancing. At a late hour the social was brought to a close. The entertainment from beginning to end gave perfect satisfaction, and certainly reflected much credit to the Lodge and her Committee of Arrangements. Yours in C. H. and P., OBSERVER.

Eden, 204.

EDITORS WATCHMAN:—Allow me to introduce you to a new born. On Saturday evening, Oct. 15th, 1881, in Willow Hall at San Lorenzo, Alameda Co., a scene was enacted long hereafter to be remembered by those who participated, it being the organization of Eden Lodge, No. 204, A. O. U. W. Seventy-five visiting Workmen from different Lodges in the district had gathered to assist and honor us with their presence by instituting this new Lodge, and 50 charter members helped, swelling the ranks to 125 good and true Workmen, and by appearance as fine a body of men as ever convened at this place at any time previous. D. D. G. M. William Sanderson officiated, assisted by Wm. Seymour, J. A. Forbes, R. J. Cox, John Jablonsky, George Lovegrove, and last but not least our Grand Receiver, C. H. Haile, acting as Recorder pro tem. The following members were elected and installed as officers for the ensuing term: P. M. W., Edward Hathaway; M. W., James McCoy; Foreman, H. W. Meek; Overseer, J. H. Conley; Recorder, Henry Dopman; Receiver, A. Preston Crane; Financier, E. O. Webb; Guide, John C. Sabine, Jr.; Inside Watchman, John C. Geercke; Outside Watchman, James Anderson; Henry Marlin, Wm. Mendell and Wm. Roberts were elected Trustees, and Dr. C. S. Coleman Medical Examiner. Under the head of Good of the Order, a charming surprise was in store for us, by the rendering of some sweet vocal and instrumental music by Bro. J. A. Forbes; also Bros. Johnson and Morgan of San Leandro Lodge delighted us with their songs, after which appropriate remarks were made by several brothers belonging to different Lodges in the district. Finally we were reminded that a collation had been spread,

and that before parting every brother there present was expected to do his level best to these final ceremonies. On the eve of dissolving Bro. Sanderson proposed three lusty cheers as a send off for the new Lodge, which were given with a will. This compliment was returned by giving three hearty cheers for the Grand Officers and all visiting brothers, by the members of Eden Lodge, No. 204, A. O. U. W. HENRY DOPMAN, Recorder.

Honcut, 205.

On Saturday evening, Oct. 15th, Frank F. Carnduff, D. D. G. M. W., of Butte Co., instituted a new Lodge at Moore's Station, (Honcut). Eleven charter members were duly initiated, after which the following officers were elected for the ensuing term: D. P. Merrill, P. M. W.; C. Shillman, M. W.; J. E. Marston, F.; S. Bennet, O.; M. W. Burgan, Rdr.; John Keitle, Rec.; V. E. Burdick, G.; J. C. Gnisler, I. W.; J. E. H. Hazelbush, O. W.; Dr. O. C. Hawkins, Med. Ex. C. Spillman, D. P. Merrill, J. Keitle, Trustees. After the officers were installed, and the Lodge regularly instituted, it was appropriately christened Honcut Lodge, A. O. U. W., after which all adjourned to D. P. Merrill's store, where a collation was spread and ample justice done to the fare. It being a stormy afternoon and evening, the delegations of officers and members expected from Nelson, Biggs, Gridley, Live Oak, Oroville and Marysville did not put in an appearance, and the District Deputy Grand Master had only the assistance of Dr. O. C. Hawkins, of Oroville, a member of Biggs Lodge, No. 102, who acted as P. G. M. W. If the weather had been favorable this new Lodge would have had a grand send off upon its mission of Charity and Protection. This new Lodge gives promise of prosperity and a rapid increase in membership. In fact, on Saturday, the 29th, the District Deputy will visit Honcut Lodge, and expects to install 10 new members. The above facts are taken from the Biggs *Recorder*.

Newark, 169.

The Grand Master Workman paid a visit to Newark, No. 169, on October 24th. There was a goodly number in attendance. The work was exemplified, the revised unwritten work being given. Speeches were made by P. M. W. Dusterberry, and Reading, Bro. Wolfe, of Brooklyn, No. 3, and Wm. H. Barnes, G. M. W. The doors were thrown open, and ladies and gentlemen soon filled the hall. Dancing and a fine collation concluded the evening's exercises.

Vesper Lodge, of Livermore.

An official visit of the Grand Master to Livermore on October 18th drew a large number in their fine hall. Over 60 had gathered in their Lodge-room awaiting the arrival of their guests from the city. The usual routine of business was quickly passed and the Lodge closed, when all hied away in line of march to the town hall, where were a large audience of ladies and gentlemen and wee' folks. Bro. L. Horton, D. D. G. M., in a very neat speech introduced William H. Barnes, G. M. W., who delivered an address of one hour, that was full of solid facts and humorous hits, interesting, instructive and pleasing. After which E. M. Reading, P. M. W., made a few practical remarks that were well received. At request the Grand Master amused his audience by a vocal solo and comic recitation, fairly convulsing his hearers with mirth. The hall was cleared and a fine band discoursed good music with the assistance of Miss Susie Morrell (daughter of Bro. R. B. Morrell, Foreman) as accompanist on the piano. Spirited dancing and real sociability was the order, interspersed with some specialties from the Grand Master in character singing, given at the earnest solicitation of his friends. At twelve o'clock a good number marched a few doors to a restaurant where a collation was in waiting, while the balance went on with the dance. This exchange of places and occupation was kept up until nearly three o'clock, the only regretful feature in the business was that those who came at the eleventh hour found the process of absorption of food had gone on to an alarming extent by those that had preceded them. Take it all in all it was a pleasant re-union, and awakened a great interest in the Order in Livermore. The guests constituting the principal part of the audience were a select company, showing refinement, intelligence and good taste.

Vallejo, 75.

EDITORS WATCHMAN:—As it has been so long since I undertook to write a letter, I fear my attempt at this time may prove a miserable failure, as there is so little to write about of interest to your paper. Vallejo Lodge, No. 75, still lives and continues to slowly gain in membership, having now 97 Master Workmen in good standing, and all in good health. We have lost one member by transfer, and *one* by accidental death. We hope to reach an even 100 very shortly. We quite often see members of our sister Lodges of San Francisco at our Lodge meetings, and are very glad to meet them there. To all brethren who may chance to be in Vallejo on a Friday evening, an invitation is extended to meet with us. On the receipt of the news of the death of our martyred President, this Lodge passed the following resolutions:

WHEREAS, The sad announcement is made that the reaper of death has gathered our brave and beloved President, James A. Garfield, from amongst us, struck down in the proudest moment of his pure and useful life by the hand of a cowardly assassin, filling all hearts with sorrow and anguish, therefore be it

Resolved, That the members of this Lodge with profound sadness mourn the death of our great and good President, whom we recognized as the first representative of American citizenship, and whose name and memory will be cherished in the hearts of all true lovers of our country.

Resolved, That we tender to the aged mother, the stricken wife and the bereaved children of our departed Chief Magistrate our heartfelt sympathy, and our earnest prayer is that the God of the fatherless will sustain and comfort them in this hour of sorrow.

Fraternally, in C. H. and P.,
WM. R. COX, JR., Recorder.

Arizona Lodge, No. 1.

EDITORS WATCHMAN:—The following are the names of officers of our Lodge: Henry Buchman, M. W.; M. E. Holbrook, P. M. W.; A. M. Bragg, Foreman; Phil. Schreiber, Overseer; B. Heinemann, Recorder; J. M. Berger, Receiver; Samuel Baird, Financier; William H. Lewis, Guide; F. Miltenberg, Inside W.; Rudolph Jand, Outside W. Yours, in C. H. & P., B. HEINEMANN, Recorder. [Our directory being printed on the first form, the above was received too late to make the necessary changes—ED.]

NELSON GEORGE.—The obsequies of our late brother, Nelson George, who lost his life in the recent disastrous fire, were held in Pythian Castle, on Sunday, the 16th ult. A large concourse of citizens, together with a very large delegation of K. of P. and about 70 of Workmen, assembled in the hall, where, under the auspices of the K. of P., the funeral ceremonies were conducted, Bro. C. E. Baker presiding as master of ceremonies. The religious services were conducted by the Rev. J. Woodbridge. On the part of the K. of P., Bros. Geo. Hepp, A. R. Tobey, E. S. Niles and Carl Kleson acted as pall bearers, and Bros. P. Veasey, Frank Hill, H. C. Dodge and J. L. McKee on the part of the Workmen. A large procession was formed at the hall by the several Orders, and marched to Geary street, opening ranks alternately, allowing the hearse to pass through, followed by a large number of carriages. At the vault in the Odd Fellows' cemetery, John M. Verdinall, Past Grand Chancellor, performed the impressive ceremonies of the Knights of Pythias, each brother Knight depositing the sprig of myrtle.

FIFTEEN deaths to be paid for in the Supreme Lodge jurisdiction for October. They were furnished by the following States: Ohio, 9; Kentucky, 1; Maryland, 2; Georgia, 1; Colorado, 1; West Virginia, 1. Eight of the above deaths in Ohio occurred in Cincinnati. Ohio has proved a grievous burden to the Supreme Lodge jurisdiction.

THE popularity of the new Workman diploma is such that the first edition is sold. The new edition is now ready for delivery. Copies can be seen at Purdy's jewelry store, 16 Fourth St. Over 200 copies have been ordered for the Eastern States, and the favorable mention of the Eastern press cannot fail to gratify the enterprising publisher and proprietor, Bro. C. H. M. Curry, P. M. W. of Yerba Buena, No. 14.

BRO. FETHERSTON & Smith have opened a finely equipped cigar store in San Jose near the Auzerais House. As this place is the general rendevous for Workmen, sojourning brethren would do well to call and get a fine cigar and be introduced to the brethren of San Jose. Bro. Geo. Fetherston, P. M. W., is one of the pioneers in our Order, having been one of the first Grand Officers.

THE INDIANA CHAIR MANUFACTURING CO.—This enterprising firm has added several large rooms for the display of an increased stock of goods of their own manufacture, as also those received from the original house. They have now in stock a full line of goods to furnish a house complete. It is always a pleasure for Bro. Rentchler to show their merchandise and give bedrock prices to their customers.

WE observe unusual activity in the industrial and mechanical interests in this city. On a recent visit to the Mission iron foundry, at the northwest corner Noe and Twenty-fifth streets, we found our genial brother, Wm. Axford, crowded with a class of work heretofore done at the East—fine, light and difficult castings.

THE recent cold snap reminds us that winter is close at hand. The fuel, coal or wood, can be had in quantities to suit at bedrock prices by applying to Bro. John Henderson, Jr., P. M. W., 117 O'Farrell St.

FROM personal experience we can recommend Bro. John Horner, 1,300 Folsom St., N. W. corner of 9th, as one of the best in this city from whom to procure men's, boys', ladies', misses and children's boots and shoes, or to have repairing neatly and promptly done.

BRO. JOHN TYLER, Foreman of Magnolia, has opened a fine restaurant at 1007 Market street, near Sixth. As a caterer and restaurateur he is favorably known, and he has properly named it Tyler's Restaurant.

THE Palace bakery, 1523 Mission street, between Eleventh and Twelfth, is one of the popular bakeries. Bro. Robert Matthey, the proprietor, is extending his business, and runs his wagons to all portions of the city.

BRO. I. E. ALEXANDER has removed his carpenter shop to 616 California street, near Kearny.

Two assessments in the Supreme Lodge jurisdiction for the month of October.

WORKMEN GUARANTEE FUND

ASSOCIATION.

Paying $1,000 as Directed in the Policy.

Only for Members of the A. O. U. W.

Average cost to each member about $8 a year. Endorsed by Past Grand Masters Jordan, Barnes and Taylor, who are members of the Association. Send for application. Address or apply to

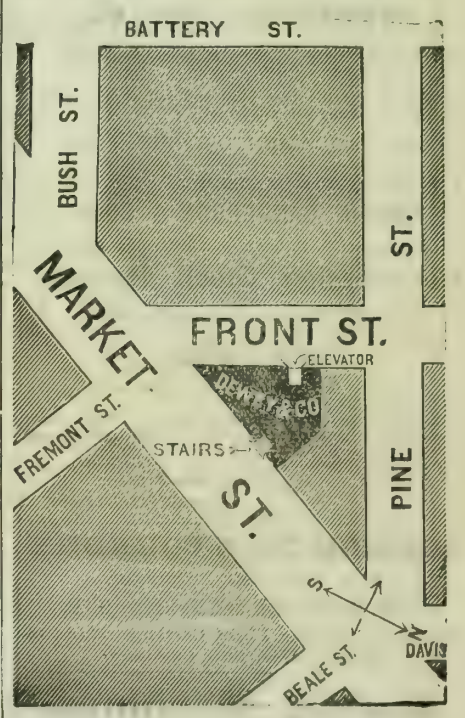
Attend to This.

Our subscribers will find the date they have paid to printed on the label of their paper. If it is not correct, or if the paper should ever come beyond the time desired, be sure to notify the publishers by letter or postal card. If we are not notified within a reasonable time we cannot be responsible for the errors or omission of agents.

Our Agents.

OUR FRIENDS can do much in aid of our paper and the cause of practical knowledge and science, by assisting Agents in their labors of canvassing, by lending their influence and encouraging favors. We intend to send none but worthy men.



G. W. MCGREW—Santa Clara county.
M. P. OWEN—Santa Cruz county.
J. W. A. WRIGHT—Merced, Tulare and Kern counties.
JARED C. HOAG—California.
B. W. CROWELL—Yuba and Sutter counties.
D. W. KELLEHER—San Joaquin, Amador and Calaveras counties.
A. C. KNOX—State of Nevada.
C. E. WETMORE—Alameda county.
E. A. WEED—California.

THE WORKMEN GUARANTEED FUND ASSOCIATION has established itself in the favor and confidence of the members of the A. O. U. W. by a systematic course of prudence, economy and promptness. It has promised nothing that it has not fulfilled. Its management has been based upon strict business principles, and each application undergoes the closest examination. Though the Association is for the exclusive benefit of those belonging to the A. O. U. W., and paying $1,000 additional to the $2,000 pledged by the Order, its system of checks against imposition, for prudential reasons is not public and therefore is more valuable to its membership. We recognize in this Association much merit and cordially recommend it to all members of the A. O. U. W. who desire more insurance for their families. This additional $1,000 can be carried for about $8 a year, and is worthy the consideration and support of the brothers throughout the State.

THE rule adopted by Fidelity Lodge, providing that the initiation ceremonies shall be confined to the first and second meetings of the month, has worked to a charm. A circular was recently issued by Frank J. Symmes, M. W., to each member, requesting that they bring in one candidate, and the result has been that 25 applications have been received, and it is expected that the Lodge will number 500 members at the time of the next Grand Lodge session. By having initiations only twice a month, greater time is had for social intercourse, but making the meetings of much more interest. Fidelity is a live Lodge, and we are glad to hear of its prosperity.

Business and Patent Office Removal.

After October 29th, our friends and patrons will find the business offices of Dewey & Co. removed from No. 202 Sansome St., to No. 252 Market St., on the northeast corner of Front and Market Sts. We have secured the entire upper floor of Nos. 250 to 252 Market St, and No. 12 Front St., where we shall have permanently more spacious and pleasant rooms for the accommodation of our increasing business. Our apartments will have two main entrances as shown in the following engraving, viz:

OUR STAIRWAY, No. 252 MARKET ST.
OUR ELEVATOR, No. 12 FRONT ST.

The building we have now occupied between four and five years is to give place to a new one, which fact causes our removal.

Old and new friends are cordially invited to give us an early call in our new quarters.

VALLEY No. 30 will give a literary and musical entertainment November 30th. At their last meeting the following committee was appointed: Walter B. Lyon, P. M. W.; George A. Case, P. M. W.; Daniel McLeod, P. M. W.; Henry Hoeber, P. M. W.; E. F. Loud, D. G. M. W. We may expect a grand time.

SILVER SPRAY, No. 3, D. OF H. will give an invitation party at Ixora Hall, on Friday evening, November 4th. It promises to be a grand affair.

THERE were 100 applications received at the Grand Recorder's office for beneficiary certificates on October 24th. Pretty good day for certificates.

Traveling Agents.

We want several canvassing agents who will make it their business to solicit subscriptions and advertising for our first-class progressive newspapers. Men of ability and experience can secure good pay and permanent employment. Send references and state your past occupation, etc., to the publishers of this paper.

Stealing Specimens.

The Nevada *Transcript* says: Most mining companies whose ledges contain what is known as "specimen ore" sustain heavy losses through the tricks of dishonest employes. Numerous cases are reported here in Nevada county where miners working for $3 a day, and supporting large families, have accumulated wealth with such remarkable rapidity that in a very few years they have been enabled to retire from the field of active labor and live on the fat of the land, and this when it was positively known they had not been dealing in stocks.

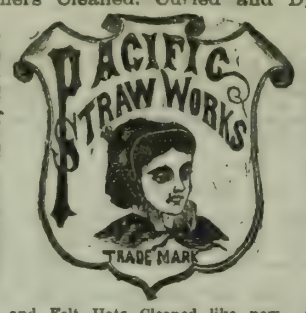
The "tricks of the trade" are numerous, and in view of recent happenings it may not be amiss to describe some that are connected with the history of gold mining in this locality.

One trusted employe of a well-known company that frequently developed "pockets" in the course of its operations had a practice of lighting his tobacco pipe every time he was coming off shift, and enjoying a smoke as he rode to the surface and walked homeward. The pipe had a bowl that held almost a handful of tobacco, but despite this extravagance the man, in addition to having a snug bank account, lived in good style, dressed his family nicely and gave his children quite an expensive education. How he could do so much on $3 a day was a mystery for several years. Finally, one morning, as he stepped into the dry-room after ascending to the surface, the bowl of his pipe separated from the stem and fell to the floor. The Superintendent of the mine happened to be there, and it rolled to his feet. He courteously stooped to recover it for the owner. As he did so he observed it was very heavy, and turned it over in his hand with curiosity. The miner saw the motion and got nervous. The Superintendent noticed the peculiar action of the miner, and a ray of suspicion entered his not over-astute mind. He walked out of the room with the pipe, leaving the miner in a greatly excited condition. When he got to his office he made an examination. In the bowl he found a rich specimen covered by a thin layer of tobacco. The smoker never worked in that mine again.

A miner who had always enjoyed a spotless reputation for being upright and industrious, went to a Grass Valley physician some years ago to be treated for what the patient claimed was "blind piles." An examination of the case showed that the patient's only chance for recovery was to submit to a surgical operation. The operation was performed, and a ragged chunk of gold was found in the anus. The man died, thus paying the penalty of his dishonesty.

Another instance was where a miner, who was regarded as eccentric because he let his hair grow nearly to his shoulders, used shoemaker's wax to fasten specimens close to the roots of the hirsute covering, and he is supposed to have carried on the robberies for some years before being detected.

Another was the object of frequent jests because of the size of his nose in the vicinity of its bridge. The nostrils were contracted at the outlet, and expanded as they went upwards. It was not until some one finally detected him in smuggling nuggets out of the mine by putting them in his nostrils that the advantage of such a nose was appreciated by his fellow-workmen.



A dentist in this city had a call from a miner who was suffering with the toothache. While examining the offending ivory, which was a hollow one, he pried out a small piece of quartz heavily charged with gold. He accepted it as pay for his work and considered himself well remunerated. It is probably unnecessary to add that the quartz was not put there by a dentist.

GLASS WINDOW BLINDS.—It is not so very long since glass windows were first used, and now comes an inventor who proposes to make window blinds of glass; and why not? They can be made of any kind, colored, plain or engraved, and never need painting. They will serve to exclude vision from the outside, yet admit more or less light, which is softened or diffused so as to prevent injury to the eyes or to delicate carpets and upholstery.

PEOPLE should avoid, as far as possible, being run over by railroad cars. An empty platform car weighs 18,000 lbs.; an empty box car, 20,000 lbs.; a passenger car, 36,000 lbs. and sometimes more; and an average locomotive, 80,000 lbs.; a single pair of car wheels, 500 lbs.

A SHIPWRECKED sailor said they were out of provisions in an open boat for twenty days. "How did you live?" "Sure, sir, we dined on one of the officers. It was the first mate we'd had in a month!"

Names of Steel.

To the ordinary reader, the numerous names applied to steel are simply bewildering. He reads articles discussing the qualities of this most useful material, and encounters name after name which, conveying no definite idea to his mind, serve to increase his perplexity. They often leave him in doubt upon important points. It is true that writers occasionally stop to define a term, or describe the peculiar qualities and nature of the steel to which a certain name is given, but at the next moment they employ terms, by way of comparison or enumeration, which they assume the reader knows, because they have been before the public for a considerable period. This leaves him almost as badly off as though none of the names had been explained. The truth of the matter is, that owing to the numerous new processes and improvements in the manufacture of steel which have been introduced recently, the vocabulary has become greatly extended. The terms which were common a few years ago have become practically obsolete, or if now used are employed in a different sense from that to which our older mechanics became accustomed when learning their trades. A brief account of some of the most common names in use at present will be of service.

Blister steel is made by causing the carbon of charcoal to penetrate iron in a heated state. German steel is blister steel rolled down into bars. Sheet steel is made by hammering blister steel. Double shear steel is made by cutting up blister steel and putting it together and hammering again. Crucible steel is made by melting in a pot blister steel and wrought iron or unwrought iron and charcoal and scrap. Bessemer steel is made by blowing air through cast iron, burning out the silicon and carbon. Open hearth steel is made by melting pig iron and mixing wrought iron, or scrap steel, or iron ore to reduce the silicon and carbon.—*Blacksmith and Wheelwright.*

THE VALUE OF SCIENCE.—Mr. J. D. Cox, ex-Secretary of the Interior, in the course of his address of welcome to the American Association for the Advancement of Science, at its late meeting in Cincinnati, remarked as follows: "Science is not without interest to all classes, and has a natural relation to business centers and economics. Science must be sought for its own sake, as all that is valuable in knowledge goes to complete the man. Since the first meeting of this association, more wonderful revolutions have taken place in the history of progress than ever in the same period before, and the triumphs of science are more marked. A scientific association is not for the profit of a business venture or for personal aggrandizement. The true fire of scientific zeal will rise into the domain of devotion, a devotion to science for its own sake, to an object worthy of its labor and higher than the accumulation of wealth. Some one has said, 'There is a natural tendency to give too much importance to a special department in science.' We need to concentrate all that makes intellect broad and ennobles soul-life."

COMPOUND OXYGEN — NOT A DRUG

A NEW TREATMENT for Consumption, Asthma, Bronchitis, Catarrh, Dyspepsia, Headache, Debility, Neuralgia, Rheumatism, and all *Chronic and Nervous Disorders.*

ACTS DIRECTLY upon the great nervous and organic centres, and *cures by a natural process of revitalization.*

HAS EFFECTED REMARKABLE CURES, which are attracting wide attention.

HAS BEEN USED BY Rt. Rev. John J. Keane, Bishop of Richmond, Va., Hon. Wm. D. Kelley, T. S. Arthur, and others, who have been largely benefited, and to whom we refer *by permission.*

IS STRONGLY ENDORSED: "We have the most unequivocal testimony to its curative power from many persons of high character and intelligence."—*Lutheran Observer.* "The cures which have been obtained by this new treatment seem more like miracles than cases of natural healing."—*Arthur's Home Magazine.* "There is no doubt as to the genuineness and positive results of this treatment."—*Boston Journal of Commerce.*

THE OXYGEN HOME TREATMENT contains two months' supply, with inhaling apparatus and full directions for use.

SENT FREE: a Treatise on Compound Oxygen, giving the history of this new discovery and a large record of most remarkable cures. Write for it. Address

ADMINISTERED BY INHALATION. Drs. STARKEY & PALEN, 1109 and 1111 Girard St., Philadelphia, Pa.

Depository on Pacific Coast.

WE HAVE ESTABLISHED A DEPOSITORY OF OUR COMPOUND OXYGEN HOME TREATMENT at San Francisco, Cal. This will enable patients on the Pacific Coast to obtain it without the heavy express charges which accrue on packages sent from Eastern States.

All orders directed to H. E. MATHEWS, 606 Montgomery street, San Francisco, Cal., will be filled on the same terms on which we fill orders sent directly to our office in Philadelphia.

Patients ordering from our depository in San Francisco, should, at the same time, write to us, and give a statement of their case, in order than we may send such advice and direction in the use of the Treatment as their special disease may seem to require.

DRS. STARKEY & PALEN, Nos. 1109 and 1111 Girard Street, Philadelphia, Pa.

A Colorado Lake.

Among the many beautiful views which the photographer accompanying Prof. Hayden's expedition to Colorado has made it possible for us to admire is one of Upper Twin lake in the Sawatch range of mountains. An engraving on this page gives an idea of the placid loveliness of the lake and its romantic surroundings, as seen by the artist and transferred to paper by the aid of his camera.

The crest of the divide at the head of the south branch of the Little Platte, says Prof. Hayden, presents a fine view of the valley of the Arkansas toward the west, with the grand range of the Sawatch on the west side like a gigantic wall, with its wilderness of peaks, upward of 13 000 and many of them 14,000 feet. Nestled at the base of the Sawatch, at the mouth of the Lake Creek gorge, are the beautiful Twin lakes, separated from each other by a belt of morainal deposit only about 200 yards wide, with a small stream flowing from one to the other, 20 feet wide. The upper lake is one mile in length and half a mile in width. The greatest depth found by sounding was 76 feet.

UPPER TWIN LAKE, COLORADO.

To the southeast may be seen distinctly the ranges about the San Luis valley, with Ouray and Uncompahgre peaks rising far above all the rest. To the east we have the South Park full in the foreground, looking like an immense meadow. The ridges which run across it in different directions are softened down by the distance. Pike's peak, with the ranges of mountains on either side, shuts of the vision from the broad plains beyond; it rises so far above the rest that it becomes a most important landmark for a radius of 50 or 80 miles in every direction.

To the northeast and west is the splendid group of peaks of which Mt. Lincoln is the crowning one; while to the northwest are the sources of the Arkansas with the Tennessee pass and its associated ranges of mountains. The Blue River range can be seen dimly beyond. Such are the geographical features of this remarkable region, and I describe them from time to time, to convey to the reader the fact that the variations are kaleidoscopic, and from every important mountain peak a fresh and equally grand view may be obtained.

THE LAW'S PHRASEOLOGY.—Have any of our readers seen a copy of the indictment of Guiteau? It is certainly unique, and for legal nonsense takes the palm. Here is a portion:

"The said Charles J. Guiteau, with a certain pistol of the value of $5, then and there charged with gunpowder and one leaden bullet, which said pistol he, the said Charles J. Guiteau, in his right hand then and there had and held, then and there feloniously, wilfully and of his malice aforethought, did discharge and shoot off to, against and upon the said James A. Garfield, and that the said Charles J. Guiteau, with the leaden bullet aforesaid, out of the pistol aforesaid, then and there by force of the gunpowder aforesaid, by the said Charles J. Guiteau discharged and shot off as aforesaid, then and there feloniously, wilfully and of his malice aforethought, did strike, penetrate and wound him, the said James A. Garfield, in and upon the right side of the back of him, the said James A. Garfield."

Now, it does seem that this mass of iteration and reiteration could be done away with in this day. It looks like reading an indictment of the 18th century instead of the 19th.

THE Relief Committee have charge of two brothers in the German hospital, who are being taken care of by the Committee. Several brethren have received material aid lately at the hands of this auxilliary.

THE following appointments of District Deputies have been made: J. E. Prewell, of Dutch Flat, of District No. 3, of Placer county, Vice C. B. Patrick resigned, and J. T. Sullivan, of Tulare county, Vice C. F. Hall resigned.

BRO. S. EHRMAN, P. M. W., of Mission, No. 56, reports prosperity in Mission Lodge. Their increase the last month has been three.

San Francisco.

Our city has made rapid progress in material prosperity during the last 30 years. The little village of the sand dunes of early days has grown year by year until now we rank the ninth city in the United States in point of population. The gold and silver mines of California and Nevada have been the prime factors in establishing the onward march of the Bay city. The proceeds from their hidden treasures have erected most of our stateliest private residences and public buildings. In other large centers of population this upbuilding has been caused by men who have won fortunes in business, and in mechanical and manufacturing industries. Without attempting to discuss which of the two systems are the best for a community, it will be only necessary to state that the future prosperity of San Francisco lies in the direction of an extension of its trade and the development of manufacturing industries.

The peninsula on which this city is situated affords unrivaled advantages in the way of location for establishments seeking to manufacture at home those articles which we at present import from the East.

The greatest drawback that manufacturing establishments have heretofore encountered, has been the high rate of interest demanded for money, and also the onerous rate of local taxation. But this cannot always be kept up. The quick communication which will soon be established between this city and the Eastern States will bring new blood and capital to our city, eager to engage in any legitimate enterprise that will afford a fair remuneration for the labor. We also seem to be entering upon a new era as regards local taxation, and the profligate waste of the old days is likely to give place to that rigid economy which the times demand. When capitalists could obtain a high rate of interest for their money, of course they would not invest in manufacturing enterprises. They looked not beyond the cent.-per-cent. policy which insured them a handsome interest on their loaned capital without the risk and bother of investing it on their own account. In the East men were willing to place their money in some manufacturing industry, stick by it, and be content with small profits until such time as the business would expand. Here, in a great majority of cases, a different line of policy was pursued, money was loaned to the struggling manufacturer, a high rate of interest exacted, and if not promptly paid, the sheriff was called in. Of course such a line of action has been ruinous to our manufacturing industries, for they could not possibly stand up under the exactions imposed upon them. But, as we said before, there is hope that all this will be changed, now that connection with the East will be more rapid and the ways of going hither and thither more numerous.

The fact is there has been a little too much of the old pioneer spirit among many of our business men. They were rudely shaken up by the construction of the C. P. R. R., and those that are left will receive a further awakening when the four or five lines of railroad now pushing their steel bars across the continent reach San Francisco. It will not do to sit in back offices and wait for the arrival of a customer. They will have to enter into the race with all the vim and energy of the new arrivals, or else retire as gracefully as they can before they are compelled to.

With this new life infused into our business circles, it would seem that San Francisco will soon occupy a rank second to no city in the country. Her fine harbor, excellent climate and the many advantages of location render this almost certain. It only needs dash and enterprise to assure her future greatness.

A WORD TO WIVES.—It has come to our knowledge that two of our late brothers were induced to join our Order at the earnest solicitation of their wives. What is worthy of note in each case is that their death was the result of accident and they had been members but a short time.

AT the last meeting of Valley, No. 30, the anticipated literary and musical entertainment that was to take place this month, was indefinitely postponed.

BRO. I. HORTON, D. D. G. M. W., reports progress in Livermore. Two J. W., at the last meeting, and four M. W. received the degree.

Home Miscellany.

The Planting of the Apple Tree.

Come, let us plant the apple tree,
Cleave the tough greensward with the spade;
Wide let its hollow bed be made;
There gently lay the roots, and there
Sift the dark mold with kindly care,
And press it o'er them tenderly;
As 'round the sleeping infant's feet
We softly fold the cradle-sheet,
So plant we the apple tree.

What plant we in this apple tree?
Buds, which the breath of summer days
Shall lengthen into leafy sprays;
Boughs, where the thrush, with crimson breast,
Shall haunt and sing, and hide her nest;
We plant upon the sunny lea
A shadow for the noontide hour,
A shelter from the summer shower,
When we plant the apple tree.

What plant we in this apple tree?
Sweets for a hundred flowery springs
To load the May-wind's restless wings,
When, from the orchard row, he pours
Its fragrance through our open doors;
A world of blossoms for the bee,
Flowers for the sick girl's silent room,
For the glad infant, sprigs of bloom,
We plant with the apple tree.

What plant we in this apple tree?
Fruits that shall swell in sunny June,
And redden in the August noon,
And drop when gentle airs come by,
That fan the blue September sky;
While children come, with cries of glee,
And seek them where the fragrant grass
Betrays their bed to those who pass,
At the foot of the apple tree.

And when, above this apple tree,
The winter stars are glittering bright,
And winds go howling through the night,
Girls, whose young eyes o'erflow with mirth
Shall peel its fruit by cottage-hearth,
And guests in prouder homes shall see,
Heaped with the grape of Cintra's vine,
And golden orange of the line,
The fruit of the apple tree.

The fruitage of this apple tree,
Winds and our flag of stripe and star
Shall bear to coasts that lie afar,
Where men shall wonder at the view,
And ask in what fair groves they grew;
And sojourners beyond the sea
Shall think of childhood's careless day,
And long, long hours of summer play,
In the shade of the apple tree.

Each year shall give this apple tree
A broader flush of roseate bloom,
A deeper maze of verdurous gloom,
And loosen, when the frost-clouds lower,
The crisp brown leaves in thicker shower.
The years shall come and pass, but we
Shall hear no longer, where we lie,
The summer songs, the autumn's sigh,
In the bough of the apple tree.

And time shall waste this apple tree.
Oh, when its aged branches throw
Thin shadows on the ground below,
Shall fraud and force and iron will
Oppress the weak and helpless still?
What shall the tasks of mercy be,
Amid the toils, the strifes, the tears
Of those who live when length of years
Is wasting this little apple tree?

"Who planted this old apple tree?"
The children of that distant day
Thus to some aged man shall say;
And, gazing on its mossy stem,
The gray-haired man shall answer them:
"A poet of the land was he,
Born in the rude, but good old times,
'Tis said he made some quaint old rhymes
On planting the apple tree."

—*William Cullen Bryant.*

The Fifty-Dollar Bill.

Mrs. Dean sat alone in her little kitchen. She never used her parlor. There was the extravagance of an extra fire to be considered—the fact that the best rag carpet, woven by her own skillful hands, must not be worn out too recklessly, the dread possibility of sunshine fading out these chair covers. Mrs. Dean was an economist. She believed in making everything last as long as it possibly could. And so she made the kitchen her headquarters, and sat there knitting, with her feet comfortably balanced on the stone hearth, the saucepan of apples bubbling softly away at the back, and the sound of her husband's ax ringing from the back shed as he cut and split the kindling wood, piled up there in well-seasoned logs.

She was a little, wrinkled-faced woman of 50, with stiff ribbon bows to her cap, hair that seemed dried up instead of silvered, and keen, blue eyes that twinkled as if they had discovered the secret of perpetual motion. To save money was her chief end and aim in life. The very mittens she was knitting were to be sold at the village store in exchange for tea, sugar, spices and all necessary groceries. "A penny saved is as good as a penny earned," was the golden rule by which she shaped her life.

"I'm glad I took that money out of the savings bank yesterday," said Mrs. Dean to herself as the bright needles clicked merrily away; "people say it isn't quite safe. And one can't be too careful. But then, again, there's the danger of burglars—though, to be sure, no burglar," she added, with a complacent inward chuckle, "would ever think of looking in the folds of the old *Clinkerville Clarion* newspaper in the pocket on the wall. It's the bureau drawers, and the trunks, and the locked-up chests that they aim for. A fifty-dollar bill! a clean, crisp, new fifty-dollar bill! And all savings, too, out of the house money."

Just then there sounded a knock at the door, and in came old Dr. Bridgman, rubicund with the touch of the March wind, and muffled up in the furs of the wild animals which, from time to time, he himself had shot.

"Good day, Mrs. Dean, good day!" said he.

"No, thank you; I can't sit down. I'm a deal too busy for that. But I heard yesterday that you took $50 out of the savings bank?"

"Yes," said Mrs. Dean, her face involuntarily hardening, "I did!"

"We are taking up a subscription to get little lame Dick Bodley a cart and donkey, so that he can go around peddling tinware," said the doctor. "It's pretty hard for any one afflicted as he is to get along, and if you can help us a little——"

"But I can't," interposed Mrs. Dean, breathlessly. "The money was an investment. I don't propose to cut it up into little bits."

"It's a deed of charity, Mrs. Dean," said the good old man, "to help lame Dick Bodley."

"I dare say," said Mrs. Dean, a little irritably. "But I never pretended to be a charitable character."

The old doctor went away, and the next visitor was Helen Hurst, a rosy girl of 18.

"Excuse me for interrupting you, Mrs. Dean," said she, "but Larry Johnson was at the bank yesterday, and he tells me that you drew out your money!"

"Was all creation there?" thought Mrs. Dean.

But she said nothing, only knit away until her needles seemed to glance and glitter like points of fire.

"I am trying to get a boarding place at Mrs. Swipes'," added Helen, coloring, "so as to be near the district school, where I am to teach this spring. But Mrs. Swipes requires payment in advance by the month, and, unfortunately, we have used up all our slender means in providing my outfit. A teacher, you know, must be dressed decently to command the respect of her pupils. But if you would kindly lend me $10——"

"I never lend," said Mrs. Dean, curtly.

"I will be sure to pay it up when I receive my first quarter's salary," pleaded Helen. "And I don't know of any one else to go to."

"It's altogether against my principles," said Mrs. Dean, with her face as hard as if it had been carved out of hickory.

Helen Hurst crept out, feeling humiliated and disappointed beyond all expression.

Mrs. Dean chuckled at her own shrewdness; but she hardly had time to stir up the apples in the saucepan, before Mrs. Graham entered with a little leather-covered memorandum-book and pencil.

"I am looking for charitable people, Mrs. Dean," said the Squire's wife, with a laugh.

"Then you've come to the wrong place," said Mrs. Dean, frigidly.

"Poor Patrick O'Hara was killed yesterday, in the machinery of the rolling mill," said Mrs. Graham, ignoring her neighbor's response. "He has left a wife and eight children, totally destitute."

"And whose fault is that?" said Mrs. Dean.

"Will you not contribute something toward relieving their destitute condition?" urged Mrs. Graham, opening the book and holding the pencil ready for use.

"Certainly not," said Mrs. Dean. "I've no money to spare."

"But I was told——"

"Oh, yes—about the money that was drawn out of the savings bank!" said Mrs. Dean. "But I intend to keep that money for myself, Mrs. Graham."

"He that giveth to the poor lendeth to the Lord," softly spoke Mrs. Graham.

"Yes, yes—I know!" said Mrs. Dean. "But nobody interprets the Bible literally, nowadays."

Mrs. Graham took her departure, acknowledging within herself that her errand was a failure; and Mrs. Dean, left to herself at last, indulged in a nap, with the knitting-work in her lap—a nap wherein she dreamed that the fifty-dollar bill had taken to itself legs and was running away from a crowd of pursuers, herself among the number.

When she waked up, roused by the noise of coal being poured upon the stove, a candle was burning and Mr. Dean was laughing at her.

"Why, Betsy," said he, "I thought you never were going to wake again. Here you sat with the fire dead out, and I've had to kindle it up again."

"Bless me!" said Mrs. Dean. "I must have been asleep quite awhile. But"—as she started up she saw that the old wall-pocket, opposite, was empty—"where is that old number of the *Clinkerville Clarion*!"

"It was last week's paper," said Mr. Dean, calmly. "We had both of us read it, so I just took it to kindle the fire."

"You burned it up?"

"Yes," said Mr. Dean; "I burned it up. Why shouldn't I?"

For half an hour Mrs. Dean sat silent and never spoke a word. Her first utterance was:

"It's the Lord's judgment upon me!"

Mrs. Dean was a resolute woman, full of character. She went to her table-drawer, took out a sheet of paper and wrote to Dr. Bridgman, inclosing a dollar toward lame Dick Bodley's cart and horse. She sent another dollar to Mrs. Graham for the poor little O'Haras, and promised to donate a barrel of russets, a bushel of potatoes and some of her husband's cast-off clothes to cut over for the children. And she sent for Helen Hurst to come and see her.

"I can't lend you $10, my dear," said she, "because I haven't got it. But I'll tell you what I will do. I'll let you make your home here as long as you please. There's a nice spare room, and it's an eighth of a mile nearer than Mrs. Swipes' to the district school."

"O, how very, very good you are!" said Helen, her eyes swimming with grateful tears.

"Good!" cried Mrs. Dean. "I'm just beginning to see what a selfish, greedy creature I've been all my life. But you're welcome, my dear, and your board shall not cost you a cent."

She opened her parlor, shook out the curtains and built a fire in the air-tight wood-stove.

"Dean likes the parlor," said she, "because it has such nice south windows, and I don't see why we shouldn't enjoy it."

She baked a fresh batch of gingerbread, and sent a loaf to old Mrs. Mudge; she took out a basket of hickory nuts for poor little Harry Jones, who was trying to crack dried-up pignuts on the stone by the roadside; she renewed her subscription to the church charities.

"I can't be very liberal," she said; "but I am determined to do what I can."

"That's right, my dear,—that's right!" said her husband. "We shall be prosperous, never fear. I'm awfully sorry about burning up your fifty-dollar bill; but, if it's going to open your heart like this, it's the best thing that could have happened to us."

Mrs. Dean was sweeping out the kitchen. She looked around with a smile as she moved the wide-leaved table which always stood under the wall-pocket, and took down the pocket itself, a rude structure of splints, lined with red cambric and tied with cords and tassels of red worsted, to dust it out.

"Yes," she said, "I am afraid I was getting to be a little miserly, and——why, what's this?"

Mr. Dean stooped and picked up a slip of crumpled, dark-green paper, which had fallen out from the wall-pocket as his wife turned it upside down and tapped her finger against it to remove all possible dust.

"It's the fifty-dollar bill!" said he, with mouth and eyes opening in unison. "It must have slipped down from the folds of the newspaper and lodged here."

"The Lord has sent it back to us," said Mrs. Dean, reverently; "and He has sent a lesson, wise and merciful, with it."

"Well," said Mr. Dean, after a moment or two of silence, "there's a lesson in almost everything He does, if we did but know it."

And all the theologians in the world could not have improved upon the faith of this simple, unlettered old farmer.

THE PARALUNE.—The latest freak of fashion is the paralune. Visitors at the French beaches during the last summer were surprised at seeing many ladies while wandering in little groups on the sands under the moonlight carrying their parasols, not rolled up and used as walking canes, but expanded over their heads as though to protect them from the rays of the moon. Great was the surprise to learn that they were not really parasols, but paralunes. The paralune, as its name indicates, performs a similar office to that of the parasol—the one guards against the sun, the other against the moon. The inventors of the paralune assert the effect of the moon's rays on the complexion is very disastrous. The plumpest faces, they say, will grow thin and the delicate peach bloom of the cheek will pale and become yellow when long subjected to the action of the moon's rays. Not alone will the face lose color, it is said, but it will also become dry and shriveled. The only device to prevent this is, of course, the paralune. The paralune resembles the common parasol, except that it is covered with a thin, transparent silk gauze of the color best suited to the wearer's complexion. Those most commonly used are pink, as the color lends a soft tint to the complexion, which loses its natural color under the pale light of the moon. The framework is light, as a wind has not the same fatal effect on the gauze as on a solid silk web. The handles are light and delicately carved. The casings are generally made of silk, similar in color to that of the paralune. They were high priced last season, as but very few were made.

SEWING.—It is not the unmitigated evil we sometimes think, this overflowing sewing-basket. It is a very good anchor sometimes for girls who would otherwise put in the time in a giddy, trifling way, neither giving or receiving good. Better a quiet sewing hour at home than a handkerchief flirtation in the street. Where the women of the family sew together for an afternoon or evening, it is often the pleasantest portion of the day. I know families where one reads an interesting book while the others sew, thus beguiling the time and taking from it all sense of weariness. The reading time is looked forward to as real entertainment and much profitable information is thus obtained and idle, gossiping talk is kept from creeping in. Such a system tends to bind in harmony mother and daughter, and is "a tie of home" that will look always dear in the retrospect.

A RECENT article in the New York *Tribune* says that the oleander is such a deadly poison that a horse which had eaten a bunch of its leaves died in a short time. Persons picking and eating its blossoms have also died from the effects. The branches divested of bark and used as skewers have poisoned the meat roasted on them and killed seven out of 12 persons who partook of it.

"WHAT a beautiful thing, my dear, is a rosy cheek!" "Yes, husband, but how great the contrast when the blush settles on the nose."

To Young Women.

O, young woman, cultivate your mind, shun frivolous reading, poor, weak, silly books, sentimental books. Read for knowledge some hard book which demands attention, memory, thought; master one good book, no matter what; geography, arithmetic, astronomy, history, what you will; but study it and know it well; understand one thing certainly.

Read also for beauty, what fills the imagination, fills it with handsome shapes and wakens noble thoughts. There are poets, our own and those abroad, who can do this; some of the present generation, some long passed by. Read also for the reason—something that gives you general laws, universal views. Read for inspiration. You may be poor and have little time, or rich and have much. Still, there is one humanity and one womanhood in the idle and in the active, in the rich and in the poor, and the same noble book will speak to each and to all; and so is America favored and blessed that the poorest, the most active, can find the book, and the time also to read it, if she will.

Next, reverence your own moral instincts. Ask your conscience, is it right, as well as your hearts, is it kind? Man is more likely to go astray through self-love; you, through the opposite path. Keep your individuality sacred. Surrender not to priest, nor husband, nor father, nor mother, nor lover, nor child. Look to your own moral sense for approbation, not to man nor to woman, but—

> As that pronounces lastly on each deed
> Of so much praise, in heaven expect your meed.

Cultivate religious faculty, develop the instinctive religious feelings; have reverence for God. Let it light your conscience and give you a general moral rule whereby to find your path. Let it beautify your intellect and stimulate your understanding, imagination, reason. Let it correct that poor temptation to frivolity, peevishness, vanity, discontent.

Remember that all the little every-day duties of woman's life are just as much means to help you as the rougher discipline of man is to aid him in his course. The little cares, sorrows and joys, the vexations of the household, the perplexities of those careful and troubled about many things, these are elements to form the noble woman; only she must have a noble idea, a noble will.

So the artist takes the little chips of many colored stone and constructs his grand mosaic of creative skill, a queen, a Madonna, an angel, and the dead stone becomes a living oracle, a moral prophecy of nobleness to come. Grandeur of character is not easy to young women or men. God be thanked, it is possible to both! And one noble woman, she is parent of many more; in her spiritual image and likeness she shall create women and men to the end of time! Aye, people eternity with noble souls, beautiful in life, and welcome unto God.—*Theodore Parker.*

The Glorious Sunshine.

How California is blessed with continual sunshine during the summer months, we, who have lived here and enjoyed her glorious climate so long, almost fail to realize. In Merry England, so called, as in Ireland and in other parts of the world, the lack of sufficient sunshine is the greatest drawback to prosperity, and in consequence the crops the past season have been a failure. We are brought to these reflections by the perusal of a published letter of the Hon. John Bright, of England, who is one of the best friends of the poor on earth, and who is ever ready to do what he can to ameliorate their condition. In this letter, addressed to complaining tradesmen and mechanics, Mr. Bright says:

"Prices are high enough and good enough; what we want is sunshine and more heat, and about that there is no remedy. But if the want of sun and genial summer affects and impoverishes the farmer, it is the impoverishment of those connected with land that causes a general falling off in our home trade, and depression, more or less severe is felt through almost all the industries of the country. It is not foreign tariffs, it is not commercial treaties, it is not what resists or is being done by foreign governments, which is now or has recently been doing us harm; it is the diminution in the wealth of the country, owing to the reduction in the produce of the soil, and this only, which is the cause of the depression that has prevailed here during the last four or five years. The best authorities calculate that during the harvests of the last three years a sum of not less than £200,000,000 sterling has been lost to the country as compared with the result if we had the blessing of genial summers and of average harvests."

THE ENGLISH LANGUAGE.—It is stated that a larger number and greater variety of ideas can be conveyed with more exactness in a given number of words in the English language than most any other. This is strikingly shown in the matter of telegraphy. It has been demonstrated that for all telegraphic purposes, the English language is from 25% to 33% cheaper than the French, German, or any other language.

SURGERY IN THE MIDDLE AGES.—Dr. Lyman, writing in the *Popular Science Monthly*, refers to the low condition of surgery when it was in the hands of the barbers, and when surgeons were called "skinners." He quotes a passage from Sprengel, saying that in Germany no artisan would employ a young man as an aprentice without a certificate that he was born in marriage of honest parents and came of a family in which were found neither barbers, bathers nor skinners.

For our Boys and Girls.

Our Puzzle Box.

Numerical Enigma.

I am composed of sixteen letters.
My 16, 15, 12, 9, is an animal of rather irregular motions.
My 3. 2, 7, 8, is a woman's name.
My 10, 15, 4, 13, is a numeral.
My 1, 13, 11, 5, 6, is a city in France.
My 6, 2, 14, 16, 5, are much used in war times.
My 1, 7, 13, 9, is a poet.
My whole is a part of Wolsey's advice to Cromwell.

E. H. B.

Transpositions.

1. Transpose a period of duration and form a portion of an account.
2. Transpose a pipe for conveying water and form a covering for the foot.
3. Transpose an English nobleman and form genuine.
4. Transpose to devour and form a plant.
5. Transpose a part of the body and form to injure.
6. Transpose a boy's name and form a falsehood.
7. Transpose a measure and form an entrance.

F. J. B.

Cross-Word Enigma.

My first is in beach, but not in shore;
My second is in much, but not in more;
My third is in birch, but not in maple;
My fourth is in lock, but not in staple;
My fifth is in watch, but not in time;
My sixth is in eagle, but not in dime;
My seventh is in song, but not in ditty;
My whole is a large western city.

Leo. P.

Floral Acrostic.

I've a message first for thee,
'Ere thy transient beauty fade.
Sweets to the sweet we freely give
For friendship's sake, sweet maid.
Now your blush has won my heart,
Cruelty pray do not use.
But come down to me sweet maiden,
And my chaste love don't refuse.
Will you pledge me, fairest lady,
As my love I offer thee?
Thy health and truth I'll ever cherish,
And solace in adversity.
My initials you will see,
Show I attach myself to thee.

Jennie.

Conumdrum.

Why is the letter G like a great noise?

Jerry.

Numerical Enigma.—Intoxicating liquor.
Hidden Rivers.—1. Obi. 2. Lena. 3. Dwina. 4. Ural. 5. Oxus. 6. Don.
Problem.—Add one to nine and ten (X) is the result; take X from IX and I is left.
Cross-Word Enigma.—North Carolina.
Floral Bouquet.—1. Mar-i-gold. 2. Lie-lac (lilac). 3. Verb-e'en-a (verbena). 4. Chrys-an-the-mum.

Aunt Louisa's Pudding.

"One, two, three, four, five! O what beauties! Which biddy do you think laid 'em? I'm almost certain sure it was dear old Fluffy. Bless her heart! isn't she just the darlingest—"

"Whew, Mill! You quite take my breath away. But have a care; those eggs are not cobblestones!"

The warning came too late. Crash! went the eggs gathered in Milly's white apron. She had, without thinking, leaned against the barrel that held the nest, in her effort to discover additions to her store.

"O, Lenny! do you think Aunt Sice will scold awful?" exclaimed Milly, looking ruefully down at her apron. The yellow fluid was already oozing through the pretty barred muslin.

"I daresay you'll catch it," Lenny replied. There was not a spark of sympathy in his tones, yet Lenny was not a bad boy.

Milly did not quite understand what her cousin meant when he said she would catch it, but she felt that it was something to be dreaded. Two great round tears gathered in her eyes.

"I wish—papa would come and fetch me home," she cried. "Who would ever think the nasty eggs would mash so easy! O, dear! what shall I do?"

Just then the pleasant voice of Aunt Louisa was heard at the kitchen door, calling, "come, dears, be quick! I'm waiting for the eggs. The pudding will be spoiled if you don't make haste."

"And I do so love Aunt Sice's puddings!" cried little Milly. Choking back a sob, she answered, "I can't come Aunt Sice! I'm awful!"

She had dropped her apron, and its sticky contents were streaming down to her very toes. The soft laugh that greeted her as Aunt Louisa discovered the woful plight she was in, at once reassured her and put her at her ease.

"Am I not a funny pudding, Aunt Sice? I hope you won't get frightened and give me to the beggarman, like Mrs. Tom Thumb did, you know!"

"Run Lenny," her aunt cried playfully, "and see if there happens to be a beggar passing!"

Then she caught Milly up in her big calico apron and ran with her to the house. There she was made as clean and sweet as ever. Lenny found a new nest of eggs, and Aunt Louisa's pudding turned out a famous one.—*Our Little Ones.*

A young lady admitted to her mother that her beau had kissed her on the cheek. "And what did you do?" asked the old lady, in a tone of indignation. "Mother," said the young lady, "I cannot tell a lie; I turned the other cheek."

A little boy, disputing with his sister on some subject, exclaimed: "It's true, for ma *says* so; and *if* ma says so, it is so, whether it is so or not!"

Humorous.

Chips.

In Russia "hello" is rendered "Tzijakanfitkranjanzski," hence the telephone can never be introduced into that country.

A new book asks: "Can she atone?" A more important question to the marrying men is: "Can she bake?" or "can she sew on shirt buttons?"

We know a man who is such a fanatic in the belief that continual progress is essential to his happiness that he will not drink milk because he thinks it is going back to "first principles."

"Beauty is ever young," sings the poet. It is—it is. Look at us. Only 23 thirty years ago, and not a bunion to-day. Photographs for sale at all the principal news depots and drug stores.

"Domestic bliss—kissing the maid of all work." We have forgotten the exchange that is so far out of the way as to make the above remark. Bliss forsooth? Is being "snatched baldheaded. What he calls bliss?"

"Is there an opening here for an intellectual writer?" asked a seedy, red-nosed individual of an editor. "Yes, my friend," replied the man of quills; "a considerate carpenter, forseeing your visit, left an opening for you; turn the knob to the right."

The following "notis" was pasted on the door of a Virginia blacksmith shop: De copartnership here to fore resisting betwix me and Mose Skinner is hereby resolved. Dem what owes de firm will settle wid me, and dem de firm owes will settle wid Mose.

A Scotch preacher, who found his congregation going to sleep one Sunday before he had fairly begun, suddenly stopped and exclaimed: "Brethren, its nae fair. Wait till I get alang, and then, if I'm nae worth listening to, gang to sleep; but dinna gang before I get commenced. Gie a mon a chance."

A Newly-Acquired Habit.—"Look heah, Uncle Mose, you fooled me wid dat ar horse I buyed from yer last week. He jest drapt dead in his tracks." "He nebber drapt dead in his tracks or anywhar else as long as I had him, goin' on 20 years."

Household Hints

Hints.

A correspondent of the Germantown. *Telegraph* says that the following are a few of the things she has learned in her own house:

That if we wish to prolong our lives we should put one day between washing and ironing.

That a tough beefsteak may be made eatable by mincing it pretty fine with a chopping knife and cooking quickly in a pot with a close cover, to prevent the steam from escaping.

That salt pork will be as nice nearly as fresh, if soaked in sweet milk and water, equal parts.

That clabbered milk is better than water for freshening salt fish.

That half a cup of vinegar in the water will make an old fowl cook nearly as quickly as a young one, and does not injure the flavor in the least.

That liver should be thrown into boiling water after being sliced thin, and then fried in lard or dripping.

That piecrust will not be soggy if it is brushed over with white of egg before the fruit is put in.

That a piece of cork is better than cloth for applying brick dust to knives.

That ripe cucumbers make a good sweet pickle.

That apples which take a long time to bake should have a little water in the pan.

Baked Pears.—To bake small pears, pare them but leave the stems on and do not core them. Put them into a deep dish with fresh lemon or orange peel. Strew over them some brown sugar or molasses; pour on them a little water and cover them quite tight. Set in a moderate oven and bake until tender throughout. The best pears for baking are the large late ones usually called Pound pears. Pare them, cut them in half, and take out the cores. Lay them in a deep white dish, with a thin slice of fresh lemon peel in the place from which each core was taken. Sprinkle them with sugar and strew some whole cloves or some powdered cinnamon among them. Pour into the dish some port wine; to a dozen large pears allow one pound of sugar and a pint of wine. Cover the dish with a large sheet of brown paper tied on; set it in a moderate oven and let them bake until they are tender through, which you may ascertain by sticking a broom splint through them. They will probably be done in an hour, but you must not leave them in long enough to have them go to pieces. In cold weather they will keep a week.

Compote of Sweet Potatoes.—Select fine, large sweet potatoes, all as nearly of a size as possible. Boil them well and then peel off the skins. Then lay the potatoes in a large baking dish, put some pieces of fresh butter among them, and sprinkle them very freely with powdered sugar. Bake them slowly till the butter and sugar form a crust. They should be eaten after the meat, and will be found very good. This is a Carolina dish.

Health Column.

Death from a Tarantula Bite.—The Louisville *Courier Journal* of Oct. 12th, says: Oliver C. Waddell, who recently removed to this State from Texas, settling along White river, in Stone county, was bitten yesterday by a tarantula. He was on a hunting expedition in the mountains, and had camped under a large pine tree. Some time during the night the insect crawled in between the blankets which enveloped him as he lay before the fire and bit him twice, once on the finger and again on the arm near the elbow. He was awakened by a tingling sensation in that part of his body, and rousing himself, discovered the cause and succeeded in killing the tarantula. It was as large as the hand of an ordinary man. Waddell's hand and arm began to swell rapidly, and before he could get to the nearest house, some four or five miles away, the poison had spread apparently to all parts of his body. It was some time before he could get medical skill, and when the physician arrived Waddell was found to be beyond hope. He lingered sometime, however, dying in the afternoon. The case is a singular one, from the fact that it proves that the tarantula is capable of inflicting a death wound.

A New Malarial Disease.—The Boston *Herald* shakes in anticipation of a great danger which menaces that city. It says: "A terrible foe is marching upon New England. His name is Malaria. This mysterious disease is still a puzzle to medical science, and no satisfactory cause can be assigned for its origin, although various theories are advanced. But we must face the alarming fact that the danger is upon us. It is now acknowledged that, year by year, the malarial zone is steadily spreading northward. Every summer it has attacked new districts whose sanitary conditions were hitherto unquestioned, and thus far it has seemed to come to stay. At the time of the Centennial it made its appearance at Philadelphia and scored its victims by hundreds. Nearly all of New Jersey is now a den of malaria. It has intrenched itself along the Hudson and crossed into western Vermont. New York City and the shores of Long Island sound are fearfully inflicted. The past summer its advance line has appeared in the Berkshire hills and in the Connecticut valley, Lenox and Springfield being especially marked. It has even come as near as Rhode Island, making its appearance in several districts of that State this season. Therefore it is time for us to be alive to the danger before us."

Wood-Splitting as a Remedy.—Some years since, the wife of a wealthy Tennessee banker, after trying a variety of remedies for dyspepsia and other ailments, consulted a physician noted for plain common sense and small doses of physic. He told her if she would split the wood for the family it would cure her. Woodhouses are unknown in Tennessee, or were at that time, and of course the wood-splitting must be done in the open air. The lady procured an axe suited to her hand, and applied herself to the task, beginning with a few sticks each day, and increasing the number as she grew stronger. Gradually her ailments all disappeared, and her health became exuberant. When we knew her 25 years ago, with a house full of servants, and practically unlimited wealth at command, she still did all the wood-splitting for the family, and bid fair to double the half century in age she had already attained. Doubtless, taking her exercise in the open air had quite as much to do with her recovery as the mere muscular labor had.—*N. Y. Tribune.*

Treatment of Nervous Shocks.—The true way in all cases of shocks, whether from hurts or frights, is to unloosen every bandage that could obstruct circulation, lay the person in an easy position, see that the feet are warm, the room well ventilated; let them lay (it may be) for hours or even days, and "balmy sleep, Nature's sweet restorer," will do its work better than all the stimulants in creation. If, when consciousness return, there is sickness or headache, as the case generally is when the shock occurs soon after a meal—because it suspends digestion—the contents of the stomach ferment and sour, to prevent which a good drink of tepid water, and sometimes, the finger placed at the back of the tongue, will produce a vomit and the souring mass thus prevented from vitiating all the fluids. Let this be followed by another sleep. If inflammation occurs, it can be stayed by a wet cloth, properly regulated as to temperature and duration to meet the case—the sense of comfort being the rule of right.

Comparative Longevity.—The Director of the Bureau of Statistics at Vienna has made some interesting researches concerning the longevity of women and men in Europe. He finds that out of 102,431 individuals who have passed the age of 30 years, 60,603 are women and only 42,628 are men. In Italy 241 alleged centennarian women are found for 141 men of that age.

A Good Disinfectant for the Mouth.—Permanganate of potash and binoxide of barium, of each 24 grains, are to be rubbed up into a mass, with sugar and glycerine, and divided into 144 lozenges. It is said that the use of these will remove all disagreeable odor from the breath.

Worth Knowing.

Seasoning Timber.—With the increasing scarcity of timber, experimenters and inventors appear to be constantly at work devising ways and means for preserving it from decay when put to practical use. The latest improvement in this direction is that introduced by Mr. C. Rene, pianoforte maker, of Stettin, Germany, who utilizes the property of oxygen, particularly of that modified by the electric current, to produce the desired result. It is very well known that wood seasoned for years is much more suitable for all purposes than if used soon after it is thoroughly dried. Several artificial means of seasoning have been introduced, but no system at present appears to be largely adopted; and if a cheap and simple process were discovered, it would no doubt tend to improve woodwork generally, which is now too often finished in a defective manner, owing to the damp state of the timber used. This is often noticeable in the doors and windows of newly built houses. Mr. Rene introduces his process particularly for musical instruments, though there seems no reason why it should not be used for many other purposes also. Instruments thus treated are said to possess a remarkably fine tone, and are not likely to deteriorate, but improve with age, as did the famous violins of the old Italian masters.

A New Wood-Preserving Process has been invented in France by M. Jacques. He first impregnates the timber thoroughly with a simple solution of soap, mixed with an acid—preferably phenic acid. This causes the fermentation, in a few days, within the wood, of a fatty acid, which is insoluble in water, and impregnates the remotest fibers. The reaction of the acid on the soap does not take place until a portion of the water has evaporated. It is claimed that more perfect impregnation can be had in this way than with creosote, and that there is no danger of the washing out of the preservative from the exposed surfaces, as when sulphate of copper is used. The Government Commission on technical railroad operation in France is said to favor this process.

Under-water Lamps.—A new method of illuminating the tanks at the Royal Aquarium, Westminster, was lately shown by means of the "Faure" electric battery, and which, so far as it went, was of a successful character. The lights shown were, to the number of six, submerged in the tank with excellent effect, showing up every fish and plant with great distinctness, a result impossible to attain under the old system of gas illumination. One of the great advantages of the electric over the gas lighting system is, that the fish do not seem to mind in the least the close proximity of the incandescent lamps, while at the same time they do not suffer from the noxious emanations evolved during the combustion of gas.

Hard Putty.—The *Carriage Monthly* gives the following for a hard putty that will dry in one day: Take the whitening, mash all the lumps out on the stone, and mix it into a stiff paste by adding equal parts of japan and rubbing varnish; then add as much keg-lead as you think will make it work free with the knife; then add the rest of the whitening until you have it to suit you. This will sand-paper good with one day's drying. If you want putty that will dry quicker, take dry white lead and mix with equal parts of japan and varnish, to which add a few drops of turpentine. This is very soft for putty, but can be sand-papered in from two to three hours, it becoming perfectly hard in that time.—*The Leffell Mechanical News.*

The cracks in common mortars and cements are due, according to the investigations made by M. Decourneau, to the uncombined quicklime which they contain. In order to neutralize the lime and overcome the difficulty, he employs a compound formed by mixing very fine silicious powder with the diluted nitric acid. By this means, mortar is obtained having a much greater as well as more uniform and lasting resistance than those hitherto in use. The application of this method, it is stated, has given excellent results, especially in the new forts at Paris, and the stones made by such process may be sawed and chiseled like natural stone.

To Detect Adulteration in Ground Coffee.—Place a few grains in a saucer and moisten them with a little cold water. Chicory will very soon become soft, while coffee will take a long time to soften. Again, fill a tumbler full of water and gently drop a pinch of the coffee on the surface. Pure coffee will float some time, while chicory or other soft roots will soon sink, changing the water to a brownish or yellowish color.

A cheap paint is made for brick walls by simply mixing up good hydraulic cement in water, and applying with a whitewash brush. The natural tint is neutral and pleasing, but may readily be varied. This paint cannot be washed off by storms nor peeled off by the sun.

Asphaltum and India Rubber Varnish.—Dissolve India rubber in a small quantity of refined spirit of tar. It takes about six hours to dissolve. Asphaltum dissolves in the same vehicle in about the same time. This is preferable to the old plan with mineral naphtha.

MASONIC.

Officers Grand Lodge.—CLAY W. TAYLOR, Shasta, G. M.; JOHN QUINCY ADAMS, Vallejo, D. G. M.; MOSES HEILNER, G. Treas., S. F.; A. G. ABELL, G. Sec'y, S. F.

Tucson Lodge, No. 263

Monday, Oct. 31st, says the *Arizona Journal*, was a great day among the Masonic fraternity of Tucson, for, as a result of the labors of Past Master J. T. Alsap, Tucson Lodge, No. 263, which has heretofore been working under dispensation, was instituted. A large number of guests from various parts of the Territory were in town to attend the ceremonies. At 3 o'clock J. T. Alsap, acting as Deputy Grand Master, opened the Grand Lodge of California. The following officers were present: J. T. Alsap, M. W. G. M.; C. E. Holbrook, R. W. D. G. M.; F. A. Shaw, R. W. S. G. W.; Mr. White, R. W. J. G. W.; B. M. Jacobs, V. W. G. Tr.; M. P. Freeman, V. W. G. S.; G. G. Hamburg, V. W. G. C.; T. Cordis, W. G. M.; O. S. White, W. S. G. D.; John Hart, W. J. G. D.; W. F. Kitt, W. S. G. S.; A. A. Green, W. J. G. S.; Moses Katz, W. G. O.; J. W. Callahan, W. G. T.

After appropriate remarks by the Grand Master, the Grand Lodge of Tucson, No. 263, F. A. & M., was instituted with the following officers:

Ansel Mellero Bragg, W. M.; George James Roskruge, S. W; Abraham Marx, J. W.; Chas. Tanner Etchell, Treasurer; Henry Bueman, Secretary; Wm. Downie, S. D.; James McCandless Elliott, James Albert Zabriskie, J. D.; C. M. Strauss, Chaplain; Adolph George Buttner, S. S.; Albert Steinfeld, Jun. S.; Henry Davis Ressill, Tyler.

The meeting then adjourned to meet at the Lodge-rooms at the Grand hotel, for the purpose of conferring the third degree upon a member. In the evening, a banquet, consisting of good things from all the earth, was served up at Levin's hall. Genial Paul Jenicke, of the Mint Exchange, was manager of the banquet, and it is unnecessary to say that the cuisine was perfect and the wines unsurpassed. It was a thoroughly enjoyable time, and over the rich, sparkling champagne, the jolly Masons chatted and smoked and drank each other's healths. Care was thrown aside, conventionalities discarded, and a regular carnival of good feeling reigned. Everybody's health was drunk, and everybody responded happily. In the way of response, especially happy hits were made by A. T. Alsap, Moye Wicks, C. M. Strauss, J. A. Whitmore, Judge Van Voorhies, and several others, whose names we did not learn.

Altogether, it was a time long to be remembered, as well on account of the genial expressions of fellow-feeling, as on account of the prestige and privilege which the Tucson Lodge gained thereby.

Masonic Landmarks.

There are some landmarks about which no Masonic doctors—we mean LL. D's.—will disagree. Let us name them:

(1) The belief in a Supreme Being, the Grand Architect of the Universe.

(2) The division of the Craft into three degrees.

(3) The presence of the Book of the Law (in English-speaking countries, always the Holy Bible) as an indispensable part of the furniture of a Lodge.

(4) The government of every subordinate Lodge by a W. Master and two Wardens.

(5) The equality of all Masons when they meet "upon the Level."

(6) The secrecy of the work of Masonry.

(7) The fundamental points in the making, passing and raising a Mason.

(8) The legend of the Third degree.

(9) The supremacy of the W. Master in the Lodge.

(10) The right of every Mason to appeal to the Grand Lodge.

(11) The representation of every Lodge in the Grand Lodge.

(12) The government of the entire body of the fraternity in the State or Nation by a Grand Master, elected, directly or indirectly, by and from the craft.

(13) The right of the Grand Master to preside in every subordinate Lodge in which he is present in his jurisdiction.

(14) A belief in a resurrection to immortal life.

(15) The connection of speculative Masonry with operative Masonry, as practiced in the middle and remote ages.

CAPT. ARCHIBALD CAMPBELL, of the steamship *Ethiopia*, was presented with an apron made of lambskin and silver, by Judge Gedney, of New York City. The following is the presentation speech:

"The lambskin or white apron is the distinguished badge of a Mason. It is a gift of the fraternity at large, and unites you to that ancient mystic Order whose votaries are found in every clime, and who hail each other on every sea. You are a part of that unseen cable reaching around the world, each link a brother's love. The apron is the insignia of a Mason. It is more ancient than the Golden Fleece or Roman Eagle, more honorable than the Star and Garter.

"In the land of your birth it is worn proudly, as one of his highest honors, by the heir to England's throne, and in this land he, whom every son of America reveres as the father of his country, and whom mankind claims as a brother—Washington—wore with distinction the badge of a Mason.

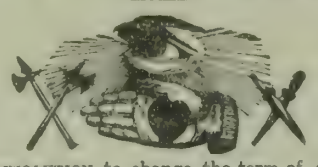
"With it comes a benediction, a blessing from every true Craftsman. While the All Seeing Eye is upon you, may you be ever reminded that He who watches the lonely sparrow's flight will take note of your life voyage.

"May that thought cheer you in the silent watches of the night, and when thinking of the dear faces pressed against the window panes peering into the storm which sweeps across the Gareloch, may you remember the brethren here and everywhere whose hearts are beating with theirs.

"When danger walks over the deep and the snow and the sleet drive in your face, when the post of honor becomes the place of grave responsibility, and the good old ship groans and strains in the grip of giant billows, and all look to you to lead them into peaceful bays, may it serve then as a talisman to hold you and them safe and *secure amidst perils.*"

BRO JOHN F. BURRILL, Grand Secretary of the Grand Lodge of Illinois during the last eight years, resigned his office September 1st ult., and Bro. Frank Hudson, Jr., of Springfield, Deputy Grand Secretary, was immediately appointed to the place by the Grand Master, Most Worshipful Bro. Wm. H. Scott.

NEW YORK has 73,000 Masons more than any other State in the Union. Illinois comes next with 36,000; Pennsylvania third, with 35,000, and Ohio fourth, with 29,000. There are 545,887 Masons in the United States, the proportion being a little over 1 to every 100 inhabitants.



MASONRY will soon flourish in Spain, where not long ago its patrons were persecuted and imprisoned. Signor Segasta, Prime Minister, is Grand Master.

THE centennial exercises at Yorktown, Va., occupied four days, from 18th to 21st of October, inclusive. The Masonic Order laid the corner stone of the monument, and over 5,000 of the craft were present.

AMONG the decisions of Grand Master McGrath, of Michigan is the following: "A brother sells to another brother a quantity of grain at a stated price, for future delivery, prices advance and the seller refuses to deliver, is the seller amenable to charges?" "*Answer:* No. A Masonic Lodge is not the proper place to settle controversies of this character, whether they arise in the ordinary marts of trade, or bucket shops."

Indp't Order of Odd Fellows.

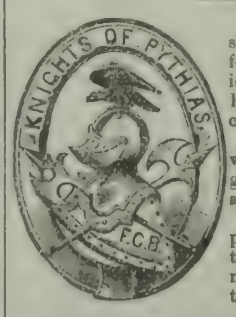
Grand Officers.—DAVIS LOUDERBACK, G. M., San Francisco; LEON D. FREER, D. G. M., Oroville; D. M. BURNS, G. W., Sacramento; W. B. LYON, G. Sec'y, San Francisco; H. B. BROOKS, G. Treasurer, San Francisco.

A RESOLUTION to change the term of subordinate Lodge offices from six months to one year, in the Grand Lodge of New York, was lost by a vote of 335 ayes to 512 nays.

THOS. N. FORD, representative to the S. G. L. from Washington Territory, received $368.70 as mileage and per diem, that being the largest amount received by any one representative.

A LODGE in Indiana has paid sick benefits to one brother for a period of 20 years, amounting to $6,500.

THE Home for Aged and Indigent Odd Fellows in Pennsylvania is progressing favorably. A year ago it was $10,000 in debt; now it owes but $3,600, and this will canceled by January next.



THE total revenue of Ohio Lodges amounts to $323,433.59 annually.

LAST year 42,544 men joined the I. O. O. F. in the United States.

16,159 members is our net increase in Odd Fellowship in 1880.

Knights of Pythias.

Grand Officers.—S. L. TERRY, P. G. C., Stockton; JOHN H. HARNEY, G. C.; S. P. GEORGE CASTLE, G. Treas., S. F.; A. G. BOOTH, Grand K. of R. & S., San Francisco.

THE railroads are stirring the fraternal feeling up in New Mexico. Three Lodges of K. of P. have been recently instituted there.

KANSAS done very well last year, having gained seven Lodges and 317 members.

THE Uniform rank is progressing well throughout the country, new sections being continually added.

THE Order throughout the United States is in a very satisfactory condition.

THE report of the Grand Keeper of Records and Seal gives the following as the increase or decrease in membership of the Cincinnati Lodges during the past six months:

Cincinnati, No. 2, decrease, 6.
Damon, No. 8, increase, 4.
Schiller, No. 14, decrease, 10.
Ivy, No. 16, increase, 5.
Lincoln, No. 17, increase, 4.
Columbia, No. 18, increase, 15.
Douglass, No. 21, increase, 16.
Ohio, No. 31, increase, 4.
Texas, No. 34, even.
Crescent, No. 42, increase, 5.
Golden, No. 70, even.

JAMES A. GARFIELD Lodge, No. 131, was instituted last Saturday, at Rendeville, Perry Co., Ohio. The new Lodge gives every promise of success, the members being young enterprising men.

THE first Grand Lodge, Knights of Pythias, of Oregon, elected the following officers: Past Grand Chancellor, C. B. Golden, of Marshfield, Coos county; Grand Chancellor, C. E. Buchanan, of Portland; Vice-Grand Chancellor, John O. Basearth, of Astoria; Grand Prelate, Rev. A. S. Nicholson, of Vancouver; Grand Keeper of Records and Seal, Ward Stevens, of Portland; Grand Master of Exchequer, John Holmes, of Portland; Grand Master-at-Arms, W. B. Mays, of Pendleton; Grand Inner Guard, Sam. Baer, of Baker City; Grand Outer Guard, S. Larsen, of The Dalles; Supreme Representatives, E. D. Curtis, of Astoria, and H. G. Clark, of Albany. There was a parade of about 200 mounted Knights, and their fine appearance attracted much attention.

Knights of Honor.

Grand Officers.—DAVID MCCLURE, P. G. D., San Francisco; CHAS. E. TRAVERS, G. D., San Francisco; R. H. WAKEFIELD, G. Treas., San Francisco; W. H. MAHONEY, G. Reporter, office St. Ann's building, cor Powell and Eddy.

THE Knights and Ladies of Honor have adopted the principle of the Workmen in the matter of issuing assessment notices. Hereafter all assessments will be issued on the 1st of each month, and not as heretofore on any date of the month as the treasury required. This is a wise and sensible arrangement, as the members will know whether they are to be assessed for each current month, and also the fact that when an assessment is issued it will not be likely to escape the memory, on account of the uniformity of issue.

NEW YORK is the banner State in point of membership. It has 12,000 members, and is gaining at the rate of two per cent a month.

Report of the Supreme Treasurer.

SUPREME LODGE KNIGHTS OF HONOR,
Office of the Supreme Treasurer,
SPRINGFIELD, Ky., Oct. 1, 1881,

EDITOR K. OF H. JOURNAL—*Dear Sir and Brother:* Your Supreme Treasurer begs leave to submit the following report of all moneys received and disbursed by him from May 1, 1881, to date:

WIDOWS AND ORPHANS' BENEFIT FUND.

Balance on hand, per Supreme Lodge Report..	$ 96,709 86
Amount received from May 1, 1881, to date...	756,202 39
	$852,912 25
Total amount disbursed from May 1, 1881, to date.....	743,994 45
Balance cash in Treasury.....	$108,917 80
Less 34 $2,000 orders already drawn and unpaid	68,000 00

American Legion of Honor.

Officers of Grand Council.—OSGOOD C. WHEELER, Grand Commander, Oakland; MRS. ABBIE E. WOOD, G. Secy., office room 1, Shiels building 32 O'Farrell St.; J. N. BESSE, G. Treas., Watsonville.

Official Circular, No. 1

OFFICE GRAND COMMANDER,
GRAND COUNCIL A. L. OF H.,
1653 GROVE ST., OAKLAND, CAL., Sept. 25 '81

To the officers and members of the American Legion of Honor, wherever dispersed around the globe:

COMPANIONS—It is pleasing to announce to you, that the Grand Council of the State of California was duly organized on the 8th day of August, 1881, at San Francisco, by D. S. C., C. G. Bockius, assisted by P. C., J. L. Fields, Acting Grand Secretary; and that the following officers were duly elected and installed:

Grand Commander O. C. Wheeler, of 192, 1653 Grove street, Oakland; Vice Grand Commander, G. W. Alberti, of 122, Yuba City; Past Grand Commander, C. G. Bockius, of 187, San Francisco; Grand Orator, Geo. W. Knox, of 272; Grand Secretary, Abbie E. Wood, of 674, 32 O'Farrell street, San Francisco; Grand Treasurer, John N. Besse, of 541; Grand Guide, A. P. Murgotten, of 474; Grand Warden, L. Ehrlich, of 548; Grand Sentry, John Landis, of 652; Grand Representative to Supreme Council, O. C. Wheeler, of 192; Alternate, A. P. Murgotten, of 474.

The Constitution of the Supreme Council gives to this Grand Council the general supervision of the Order in this State, wherefore the following orders are hereby promulgated:

1st. All questions pertaining to the Constitution, laws and usages of the Order, which require interpretation or construction, and all appeals from subordinate Councils, must be submitted in writing, to the Grand Commander.

2d. All orders for supplies, within this State, must be made to the Grand Secretary, who will promptly furnish the same at prices fixed by the Supreme Council.

3d. Any change in the offices of Commander or Secretary of a subordinate Council must be promptly reported to the Grand Secretary.

4th. All commissions of Deputy Supreme Commanders in this State, are void from and after the institution of this Grand Council. But Deputy Grand Commanders will be appointed by the Grand Commander, in his discretion, upon proper application.

5th. This Grand Commander and Grand Secretary will officially visit any Council which may desire and request such visit, so far as it shall be in their power.

6th. The desired progress of the Order can be secured only by the cheerful and vigorous co-operation of its members; wherefore it is earnestly enjoined that every member of the Order make all laudable effort to induce every eligible man and woman in the State to unite with us in our noble effort for the common weal.

Given under my hand and the seal of the Grand Council of the State of California, on the day and year first above written.

OSGOOD CHURCH WHEELER,
Grand Commander.

Attest: ABBIE E. WOOD, G. Sec'y.

LAST Tuesday the lower hall of the Masonic Temple was filled with members of the American Legion of Honor and their friends, the occasion being the reception of Union Council of Brooklyn by Oakland Council, No. 192, of this city. About 50 of the visiting Council put in an appearance and were cordially welcomed by their entertainers, who had made every possible preparation for their amusement and comfort. The following programme was well presented: Trio, vocal, "Ye Shepherds Tell Me," Messrs. Palmer, Farrington and Crabtree; piano solo, Edgar S. Kelly; song, "The Message," Blumenthal, Miss M. Melvin; recitation, "An Order for a Picture," Holton Webb, of San Francisco; cornet solo, "Silver Stream," polka, C. L. Crabtree; scene from "School for Scandal," Mr. Gray and Mrs. Abbie Wood, of San Francisco. After the exercises the guests proceeded to the banquet hall where a fine repast was served. Commander W. H. H. Hussey presided in an able manner, well supported by Vice-Commander, Mrs. E. D. Farrington. After supper dancing was enjoyed and all left well pleased with the reception.—*Oakland Tribune.*

Official Circular No. 2

OFFICE GRAND COMMANDER,
GRAND COUNCIL, A. L. of H.,
1653 GROVE ST., OAKLAND, CAL., Sept. 25, '18.

To all Councils and Companions, A. L. of H., under the jurisdiction of the Grand Council of California:—First—By a decision of the Supreme Council, held in August last, the use of the ritual as published by the Supreme Council is made obligatory in all cases, without omission, addition or substitution of any kind. Hence the paragraph at the bottom of page 15, giving liberty to vary the ritual, is abrogated.

Second—It is necessary that all charters issued to subordinate Councils since the organization of this Grand Council, August 8, 1881, should bear the signature of the Grand Commander and Grand Secretary. Therefore, all charters that have not been signed by the above-named officers, should be at once forwarded to the Grand Secretary that they may be thus signed.

Given under my hand and the seal of the Grand Council of the State of California on the day and year above written.

OSGOOD CHURCH WHEELER,
Grand Commander.

Attest: ABBIE E. WOOD, Grand Secretary.

COUNCILS are at present located in 36 States, in the provinces of Ontario and New Brunswick, Canada; the Sandwich Islands and the District of Columbia.

THE issuing of assessment notices on postal cards is prohibited by Article VII, Section 2, of the Supreme Council constitution. See action of Supreme Council proceedings, 1880, page 39, report of Special Committee. The only legal form of assessment notice is that furnished by the Supreme Council.

THE following is a pen picture of Nettie F. Mosher, Supreme Secretary: An active, intelligent woman, about 22 years of age, and of very pleasing manners and fine address. Though not what a connoisseur of beauty would call a handsome woman, still she is quite prepossessing in appearance, and a charming conversationalist. She has bright blue eyes, a high, wide forehead, is about 5 ft. ½ inch high, and a thorough business woman.

JAKE ABRAHAM has been appointed agent for the PACIFIC STATES WATCHMAN, a splendid semi-weekly paper, published at San Francisco, in the interests of the A. O. U. W. All members of the Order should subscribe for it.—*Globe Chronicle, A. T.*

Native Sons Golden West.

Grand Officers—FRANK J. HIGGINS, P. G. Pres.; San Francisco; H. CLAY CHIPMAN, G. P., Sacramento,; GEORGE B. BALDWIN, D. G. P., Marysville; HENRY LUNSTEDT, G. Sec'y, San Francisco.

A New Parlor.

Modesto Parlor, No. 11 was instituted Saturday evening, October 29th, by Grand President, H. Clay Chipman, S. L. Terry, Acting Deputy Grand President, Past Grand President, F. J. Higgins, Grand Secretary Lunstedt, assisted by John H. Grady, of San Francisco, W. Y. Showler, F. B. Heuston and F. D. Ryan, of Sacramento, and Grand Lecturer, A. F. Jones, of Oroville. The initiatory work was exemplified by Bros. F. D. Ryan, President; F. B. Houston, P. P.; A. F. Jones, Vice-President; S. L. Terry, Marshal. Grand President, H. Clay Chipman, then installed the following officers: President, J. W. McCarthy; First Vice-President, J. S. Williams; Second Vice-President, J. C. Simmons, Jr.; Third Vice-President, E. D. McCabe; Rec. Secretary, B. F. Hudelson; Financial Secretary, E. F. Branch; Treasurer, C. F. McCarthy; Marshal, H. L. Bradford; Executive Committee, Arthur Ray, J. W. Murphy, David Lewis; Passed President, L. C. Branch.

The charter of Modesto Parlor embraces 28 names comprising in intellect and in social standing the worthiest of Modesto's population, "The flower of the Roman army." Young, talented and ambitious, they will find a niche in their State's temple of fame.

After the interesting ceremonies had been satisfactorily conducted the Natives had a banquet—an indispensable feature of a new Parlor—of which we will let A. E. Wagstaff, of the Modesto *Herald*, who was "thar," speak.

At half-past 11 o'clock they marched to Backer & Casebolt's restaurant, where a magnificent collation awaited them, and a few others who were honored with an invitation. After being properly seated, the President of Modesto Parlor, J. W. McCarthy, who was properly constituted master of ceremonies, announced the order of exercises. Of course, oysters of the Eastern persuasion led off, done up in any style the appetite craved, followed by a general onslaught upon the excellent dishes which were spread out before the company. We have not space to name the dishes which made up the bill of fare. In fact, we believe there was nothing omitted which the market could afford or a cook prepare, sandwiched with claret of the best brand. Having satisfied hunger, the next thing was the usual regular toasts and responses, supplemented with the never-failing Heidsic, which sharpened wit and crystalized otherwise crude ideas. We were given a prominent seat at "the other end" of the table, facing the President, and we could not refrain from seeing his eye twinkle with gratification at the success of the enterprise. The first toast—

Our Guests—Was responded to by Hon. L. C. Branch, who was "totally unprepared" for the occasion, but who evidently impressed upon his hearers the fact that he was equal to any emergency. He gave the guests a royal welcome in a speech of about 10 minutes, which was the time allotted each orator by the presiding genius. The next was

Our State—Which was taken charge of by Mr. McCabe, who was also unprepared for the duty assigned, but who presented the matter in a very masterly manner, and paid an eloquent tribute to California and her native sons. The third toast was

Stanislaus County—Which received a glowing panegyric from B. F. Hudelson, who seemed to be much surprised at being called upon to respond. He was quite eloquent, and proved himself equal to the task. The fourth,

The Legal Profession—Was responded to by S. L. Terry, of Stockton, who has his own way of doing things. The facial expressions carry with them a world of meaning and of mirth, and we see a vein of humor running through his speeches which provoke us to irrepressible laughter.

The Press—Was responded to by H. L. Bradford in a few brief but well-chosen remarks. It is one of the old toasts of the world, and always demands due consideration. We never knew of a banquet that did not provide a toast for the "press."

The Press of Modesto—Was responded to by A. E. Wagstaff, of the *Herald*, who was so annoyed by two of the Native Sons that he was cut short, and all because he was an Ohio man, and a stray sheep among wolves.

The Medical Profession—Was responded to by Dr. W. J. Wilhite in a very happy manner.

California Parlor, No. 1—Was responded to by Frank Higgins, of San Francisco, who was one of the charter members of the first Parlor organized. He presented the aims and objects of the Order, and gave a resume of its progress to the present time.

The Future of Our Order—Was responded to by A. F. Jones, of Oroville, who exhibited a great deal of zeal in the future grandeur of the Order, and proved himself an orator of no mean caliber.

Sacramento Parlor, No. 3—Was represented and responded to by Frank D. Ryan, who claimed to belong to the Parlor having the largest membership of any in the State. His remarks were received with considerable applause.

Old Tuolumne—Was responded to by John H. Grady, lately elected Tax Collector of San Francisco. He said that he loved Old Tuolumne, but was sorry to say he had not visited the county of his nativity since he was 12 years of age.

Our Parents—Received a eulogy from J. C. Simmons, Jr., who was particularly happy in his theme, which was woven together in beautiful and touching language. His mother was a woman, and who can forget a mother?

The Ladies—Generally such a theme inspires a young man to glowing words and valorous deeds, but our young friend J. S. Williams is so bashful, and withal so impressible, that he could only respond in that delicate manner which is a "give away" to one in the meshes of some enchanting damsel, and he was courteously excused.

The Pioneers of the Order—Was responded to by Henry Lunstedt, of San Francisco, who is Grand Secretary of the Order. He paid a glowing tribute to the young men who resolved to institute the Order, and closed with a beautiful peroration.

The Capital City of the State—Was responded to by T. B. Houston, of Sacramento.

The President of Modesto Parlor—Was proposed by S. L. Terry, and responded to by J. W. McCarthy, in his happiest manner.

While enjoying the hospitality of the occasion we could not but reflect upon the scene before us. Here were about 35 young men—native sons of California—who were probably the correct representatives of the average white natives of California. We asked ourself: If this be true, from whence comes our hoodlum element? They were all fine-looking young men, fit to be called the worthy sons of noble sires. Perhaps the hoodlum element is but a small factor in the make-up of the Native Sons, and probably the larger portion are importations. At least those present on this occasion are lively types of honorable manhood; and may they live long and prosper.

After humorous recitations from Terry, Bradford and Ryan, and comical stories from Jones, Grady and Terry, in which they are inimitable, Pres. McCarthy adjourned what was one of the most intellectually enjoyable banquets the Native Sons ever have had.

A Successful Entertainment.

B'nai B'rith hall was filled with a large number of our best people on Tuesday evening, November 1st, the occasion being a musical and literary entertainment, with tableaux, tendered to Miss Linda Hoag, daughter of our reporter, J. C. Hoag. The programme was opened with a piano solo by Prof. Yanke, which served to put the audience in good humor, and whetted the appetite for the good things that followed. Mrs. A. W. Baldwin sang a selected song with good precision, and was encored for her fine effort. Prof. B. F. Bean was then brought forward by the master of ceremonies, and his violin obligato showed a thorough acquaintance with the instrument. Mrs. Susie F. Neil was next with a recitation, which pleased her audience, as an encore was demanded. Then the fair beneficiary was introduced, and the manner in which she was received and the applause which followed her effort, showed what a strong hold she had on the effections of her audience. The young lady has a good voice which, with age, will become more mellow, and her gestures are given with rhythmic grace. Then there flitted on the stage a bright little fairy, Retta Hentrich, who danced the sailor's hornpipe, with all its accompaniments, in a manner that would have delighted the jolliest tar that ever lived. Mrs. Baxter in a vocal solo then followed, and was rewarded with a double encore for her finished effort. Recitation, Miss Joh. Drucker, which was given with splendid dramatic action. Miss Bernie Hentrich then gracefully danced a fancy dance, using the tambourine. The first part of the programme was closed with song and musical specialties by Frank Stewart. All of the performers were encored, and the ladies presented with handsome bouquets.

Part second was opened with cavatina ("Robert le Diable") by Mrs. A. W. Baldwin, Miss Cora Baldwin accompanying on the piano. Then Prof. Bean gave his musical specialties. It looked as if the Professor was to be kept playing all night, his audience so enthusiastically encored him. After he had appeared seven times, the quarrel scene from Julius Cæsar was given by Messrs. Benhayon and Chapman; then the curtain was drawn and the preparations for the tableau commenced. The idea sought to be conveyed by the tableau, was the influence which an inordinate use of strong drink has upon society. The first picture was called "High Life," in which was grouped a number of ladies and gentlemen, the calcium giving a wierd beauty to the scene. Mrs. Baldwin wore a black silk and velvet with train; Mrs. Baxter, black silk; Miss May Stanton, pink satin; Mrs. Neil, black silk; Miss Jessie King, light blue satin; Miss Elva Elder, black satin; Miss Drucker, black silk; Linda Hoag, light buff, painted with flowers; Bernie Hentrich, light gold silk; Bertie Hentrick, light gold silk; Etta Wood, blue, with white lace overdress. The picture presented by this scene was truly magnificent.

Then the next tableau was prepared, and represented "Debt." Descending on the downward scale, "Poverty" was next shown, and lastly, "Murder and Insanity," when the father, having lost his reason, has slain his wife, and stands before his only child with uplifted knife, being crazed with drink, is about to send her soul into eternity—the whole concluding with an earnest, thoughtful song by Miss Linda Hoag, to walk the straight road of sobriety.

Thus closed an entertainment which was exceedingly well arranged, and the large number in attendance showed that the efforts of the beneficiary in lending her services to the Workmen entertainments, and others, were appreciated.

The Veterans Home.

A commendable movement is now in progress to raise funds to establish a Veterans' Home, where the helpless survivors of the war may be housed and cared for during the remaining days of their pilgrimage. It is proposed to locate the Home upon a farm where it may be made self-sustaining after the land and buildings are paid for. The project will commend itself to patriotic men in all parts of the State, and we doubt not all who can contribute to the cause will be glad to do so. The following circular will explain the need for the Home and what is required to secure it:

The Executive Committee of the Veterans' Home Association beg to present the following.

1st. We have the names and postoffice addresses of about 7,000 veteran soldiers and sailors resident in California, who served under our country's flag in past wars; and we know there are many more on the Pacific coast.

2d. One hundred of these are in public almshouses of California, and a much larger number, by reason of old age and infirmities, are being surely drawn to them.

3d. Patriotism, humanity, and even public interest demand that these suffering relics of our country's defenders should be provided with a home where they may live in decency and respect, and, dying, escape burial in paupers' graves.

4th. Many States of the Union have built such homes for their disabled soldiers and sailors, and our remoteness from the national center makes it necessary that there should be such a home on this coast. Our Veteran Home Association now appeals to the generous and patriotic people of California to furnish money to buy an ample tract of productive land, enough to establish it on a self-sustaining basis.

5th. Sixty thousand dollars will do to start it and give a home to the maimed and helpless, while those who cannot obtain employment or do full work, will there have shelter, food, books, newspapers and companionship, by the aid of their own labor, and such help as may be reasonably expected from the Federal and State Governments.

W. S. ROSECRANS,
Chairman of Executive Committee.
Headquarters, Nucleus Building, S. F.

GONE TO 'FRISCO.—Dr. H. C. Sheets left with Mrs. S. last evening for San Francisco, where he proposes to locate and practice the dental profession, at the corner of Bush and Kearny streets. Dr. Sheets has made an excellent record here in his profession, and leaves behind him that of a gentleman. Carson loses a good man, but as the field is larger at the Bay City, a dentist of his ability cannot be blamed for leaving so quiet a mountain town as Carson. The *Tribune* wishes the doctor and wife all the success and happiness they can expect for themselves, and commends Dr. Sheets to the denizens of the Bay City and elsewhere, to their kind consideration, and as a man entirely *au fait* in his profession.—*Carson Tribune.* Dr. Sheets has entered into a co-partnership with Dr. J. N. Prather, M. W. of Sts. John, 73, long and favorably known as one of the most skillful and conscientious practitioners in the dental profession in this city.

THE Chicago and Northwestern railway now has on its line between Chicago and Council Bluffs an institution which has become very popular in the West of late years—namely, dining cars, not like those of the Pullman Co., in which meals are served *a la carte*, and you pay for what you order, but cars in which a full meal is served at a fixed price (which fixed price, by the way, in all of these cars, so far as we know, is 75 cents). That is, these traveling hotels are conducted on the "American plan," and not on the "European plan," like the Pullman hotel cars, which are properly restaurant cars. Bro. J. Meredith Davies is the General Agent for the Pacific Coast.

THE art of building large organs successfully for churches and cathedrals has only been developed in a few persons in any country. We, as Californians, have a pride in Bro. John Bergstrom, who has constructed so large a number here that he may be justly styled "the organ builder of this coast." He is now constructing two for Portland, Oregon, of similar style to those he built in this city, one of which is the Three Manual in Kalloch's church on Fifth street. His address is 29th and Mission streets.

THE Young Men's Christian Association is engaged in a very praiseworthy work, that of forming classes for instruction in French, Spanish, elocution, phonography, vocal music and bookkeeping. The long winter evenings are now at hand, and as time hangs heavily on many persons, they should avail themselves of the opportunity for instruction here offered. Full particulars can be had of the Secretary of the Association, H. J. McCoy, at their building, 232 Sutter street.

SISTER SUSIE NEAL and Miss May Favor have opened a Decorative Art School at No. 14 Geary St., room 17. Their line of instruction will be oil and water color painting, household decorations, fancy needlework, Kensington embroideries, macrame lace, crochet, etc. Their terms are reasonable and their reputation as artists and instructors good.

Removal of Patent Agency and Newspaper Offices.

October 29th the patent agency and newspaper offices of Dewey & Co, were removed to the northeast corner of Front and Market Sts., occupying a large space on the upper floor, where we have spacious and pleasant rooms for the accomodation of our increasing business. Our apartments will have two entrances as shown in the following engraving: Our stairway, **No. 252 Market St.**, and our elevator, **No. 12 Front St.**

☞ Take the Elevator at No. 12 Front St.

Visitors will find it better to step around the corner from Market St., to the elevator rather than ascend the stairs. Old and new friends are cordially invited to give us an early call in our new quarters.

Resolutions of Respect.

IN MEMORIAM.

HALL OF YOSEMITE LODGE,
No. 171, A. O. U. W.,
Nov. 1st, 1881.

WHEREAS, For the second time in the history of our Lodge, death has invaded our fraternal home and bereft us of an honored brother, R. D. Enright.

Resolved, That we, the members of Yosemite Lodge, No. 171, A. O. U. W., feeling keenly the loss sustained in his death, desire to pay merited tribute to his memory. In the early vigor of a warm-hearted, generous manhood, Bro. Robert D. Enright enlisted as a helper in the great work of our beloved Order, and by his fidelity to its sacred tenets, enjoyed our fullest confidence and esteem. A respected citizen, an exemplary brother and a faithful son were combined in his generous nature, and stood prominent in his daily life. While we humbly bow to the decree which has deprived us of a brother, and a grief-stricken household of a son, we tender to his afflicted parents the sympathy born of true Charity; bid them Hope for the great future, and commend them to the Protection of the Supreme Master of the Universe.

Resolved, That a copy of this, our humble tribute to the memory of our late brother, Robert D. Enright, be spread in full upon the records of this Lodge; that a copy, properly attested, be forwarded to his bereaved parents, and that our charter be appropriately draped for the space of 30 days in respect to his memory.

A. J. PEDLAR,
W. J. BROWN,
H. C. WARNER.
} Com.

IN MEMORIAM.

HALL OF HERCULES LODGE,
No. 53, A. O. U. W.,
SAN FRANCISCO, Nov. 4th, 1881.

WHEREAS, On the 13th day of October, 1881, through the instrumentality of the devouring elements, our late brother, Nelson George, while in the discharge of his duty, fell a victim to the power of death, and was called to spheres beyond the empire of this life; and,

WHEREAS, The members of Hercules Lodge, No. 53, A. O. U. W., recognizing the many social and moral virtues of our deceased brother, are thereby better enabled to join in full sympathy with his kindred and friends in mourning his departure. Therefore, be it

Resolved, That this Lodge extends to "Her," who has been the partner of his joys and sorrows, his hopes and fears, their full and heartfelt sympathy, as also to all, who with us, cherish and respect his memory.

Resolved, That as a slight outward token of our feelings the charter of the Lodge be draped in mourning for the period of 30 days.

L. M. MANZER,
H. W. MILLER,
P. E. HILTON.
} Com.

CHAS. MERSFELDER, JR., Recorder.

HYMENIAL.—Of late we notice our Workmen of San Francisco have been quite fortunate in securing wives. This is as it should be, and shows the appreciation that Workmen are held in by the ladies. Our latest, Bro. J. Joseph, of San Francisco, No. 4, was married to Miss Belle Simon, sister of Bro. J. Simon, of Franklin, 44. Then another is that of Bro. H. Reinhart, of Memorial, 174, to Miss Lena Hoffman, daughter of Bro. S. Hoffman, of Franklin, 44.

IXORA HALL.—This favorite resort for balls and parties under its present management, is gaining popularity. The ventilation is good, the accessories ample and convenient and the floor is considered the best one for dancing in this city. The management will not allow meetings in this hall to any questionable parties, it being their desire to make this the resort for the best class in this city.

PORTRAITS, ETC.—We call attention to the card of H. Hellwegen's art gallery in this issue. It will be remembered that his collections in the late Mechanics' Fair art gallery, was noticed generally and favorably.

THE employment firm of Rice, Ewer & Co.—male department, 626 Clay; female department, 116 Geary—is a reliable one. This firm is well and favorably known. We recommend these gentlemen to those seeking employment.

A. O. U. W. Directory.

Cards inserted in this list at the rate of 25 cents per month payable semi-annually in advance. If errors or omissions are noticed, please write the office direct.

DO NOT DELAY.—Send us your subscriptions promptly Don't let any break occur in your subscriptions to the WATCHMAN. Every live Workman needs every number of the paper, and we need his assistance to print as valuable a journal as we strive to for the special benefit of its patrons and the general good of the Fraternity. Send the cash direct, or, if more convenient, hand it in with your dues to the Financier and we will allow him for trouble and expense of remitting.

BY TELEPHONE.—Subscribers, advertisers and other patrons of this office can address orders, or make appointments with the proprietors or agents by telephone, as we are connected with the central system in San Francisco.

OFFICERS and members of the A. O. U. W. receiving a complimentary number of the WATCHMAN with this notice marked are invited to examine its merits for their support, as we expect our agent to call and present personally further information concerning our enterprise for the future. Should our agent fail to call soon in some instances, we shall be glad to have our friends favor the office directly with their response. Persons receiving duplicate copies are requested to circulate them to the advantage of our cause and the publishers.

LETTER STAMPS.—The ingenuity of mankind in

The Panama Canal.

We give on this page a panoramic view of the Panama canal as planned by M. De Lesseps. The general principles of the plan are now so well known as to need no detailed description, and the engraving will give a much better idea than columns of figures would. It shows the course and the relative positions of the rivers. It also shows the location of the big dam which is to turn the Chagres river.

A great deal of preliminary work is now being done at the canal in the way of surveying, boring, etc. They are also studying a way to dispense with a lock at Panama. The high tide at Panama is 32 ft., and on the Atlantic side it is only 1 ft. 6 inches. The problem presented by these differences is now being studied. They think the current will be very small, and that it will present no difficulties to be overcome.

These facts we gain from Mr. Prosper Huerne, an architect of this city, who has just returned from Panama, where he remained several months, superintending the construction of buildings in one of the villages on the line. There will be 15 or 16 of these villages on the line. The first one Mr. Huerne laid out at Gabun, and at the next station to that place. All the material for the building was procured in this city and shipped down there ready to be put together. The mill work, etc., was all done here. Mr. Huerne took about 40 American carpenters with him. Another village station will soon be established. Each village has for buildings, a large shed, store houses, lodging houses, an engineers' cottage, hospital, workmen's kitchen, dining rooms, foreman's lodgings, bakery, water tank, ice house, etc. The villages are arranged precisely alike. Every possible means has been provided to keep the men in good health. The buildings are well ventilated, and all the sanitary requirements are well cared for. The design of the buildings and the general plans were by Mr. Huerne, and were adopted without any demur. Water is brought to all the dwelling houses and they are all properly sewered.

In the panoramic view, Figs. 1, 2, 3, 4, 5 and 6 show stations in the canal where vessels turn out to let others pass. Fig. 7 is the dam for controlling the waters of the upper Chagres; length, 1,500 meters; breadth, 960 meters; hight, 45 meters. Figs. 8, 9, 10 and 11 are valleys inundated by the rivers Chagres, Chilibre, Pegueni, Gatuncillo, hight of the inundation, 38 meters; volume of the water, 1 milliard cubic meters. Fig. 12, lower Chagres, separated from the upper by the levees of the canal. Fig. 13, discharging ditch formed by the bottom of the levees. Fig. 14, cut of the Calebra, hight, 87 meters; length of the canal, 74 kilometers, 49 being in plains, 28 in the rocks; breadth, bottom 22 inches in plains, 24 meters in rocks; water level, 50 meters in plains, 28 in rocks; depth, 8 meters, 50 in plains, 9 meters in the rocks; shortening of distances by the canal from 1,400 leagues to 4,800 leagues.

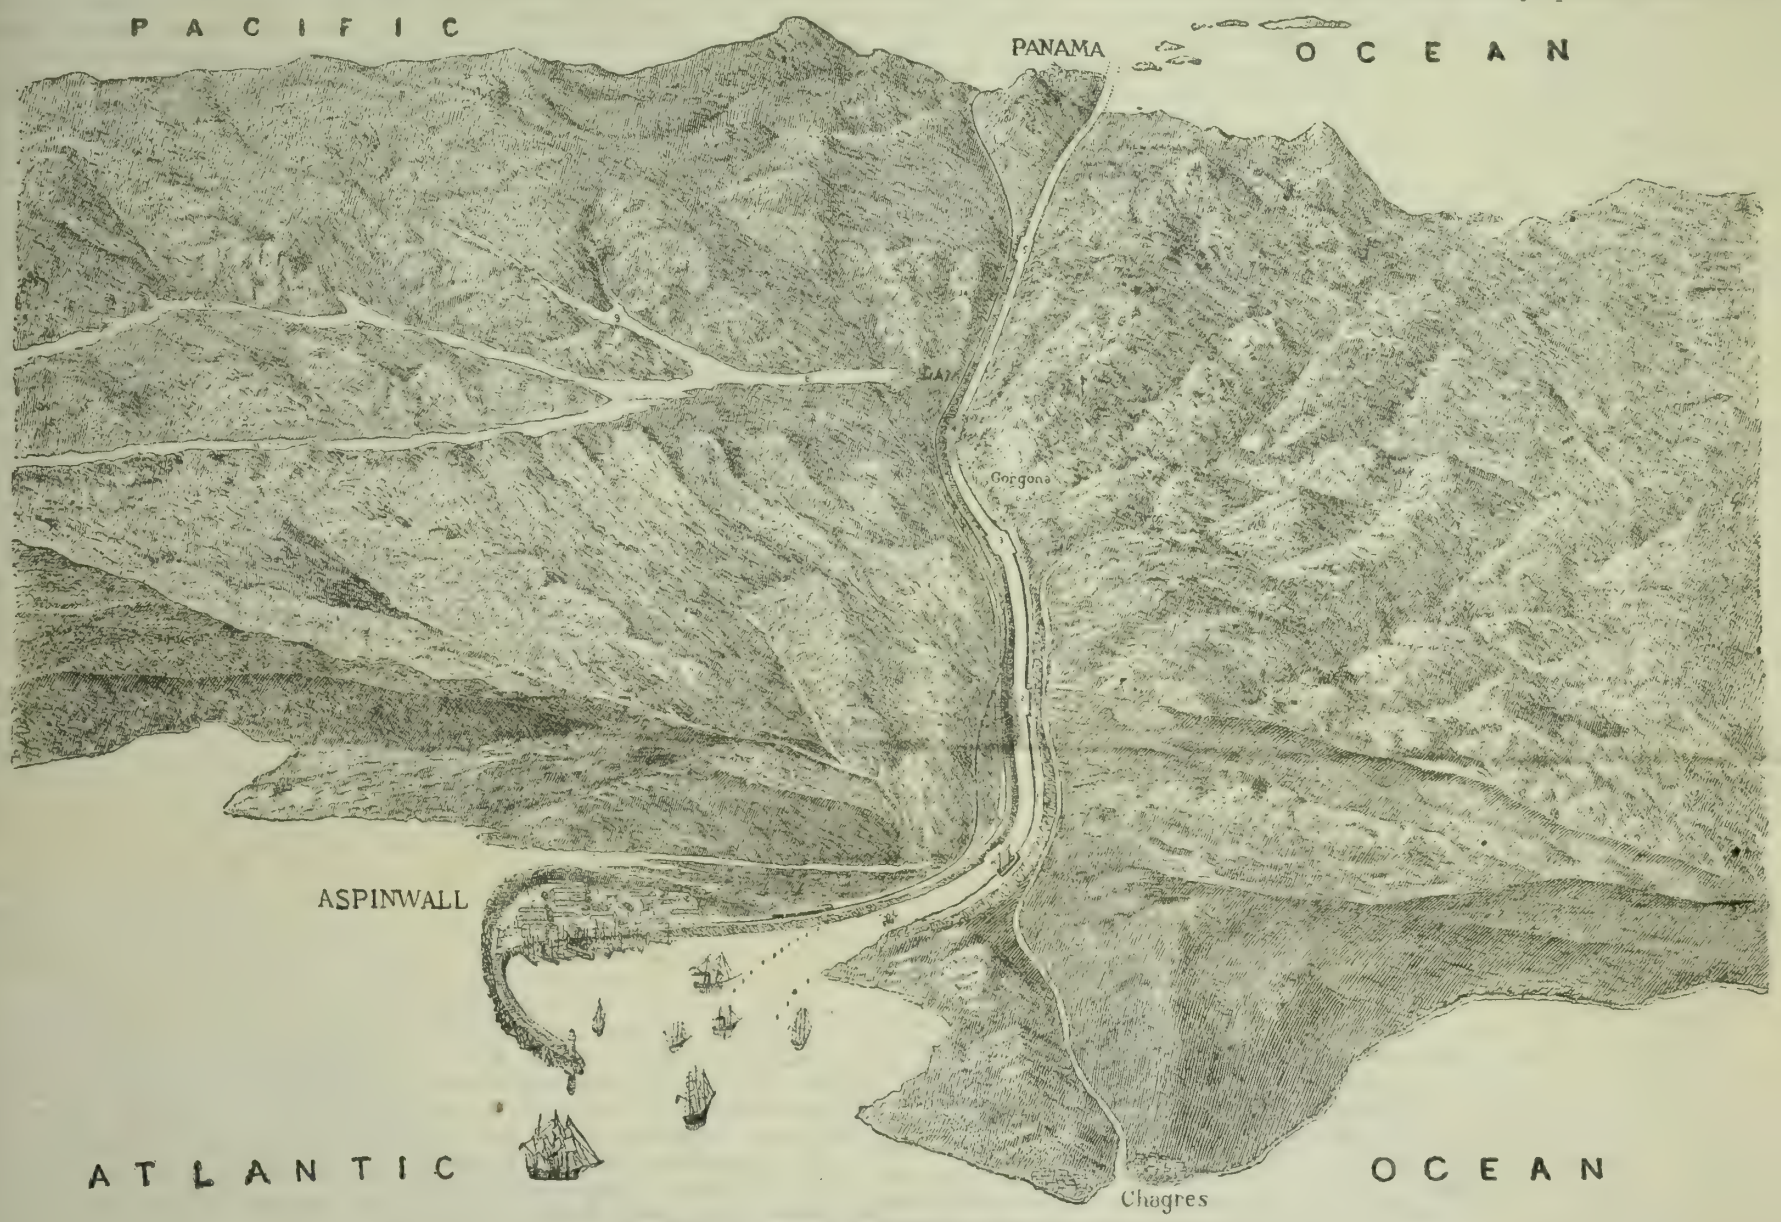
The survey and staking of the line of canal has been accomplished by two corps, which has employed a large number of natives. The check surveys and leveling of the railroad have been finished from Colon to a point beyond Pedro-Miguel on the Pacific side. The bench marks of the leveling have been engraved on the abutments of the railroad bridges, and also on the mile-stones at the necessary points.

The leveling of the longitudinal section of the large canal and likewise the cross sections already laid out, have been connected with the line of the railroad which serves as a base, the level of which commences at the ocean, and which was determined by the first observations made by the hydrographic corps.

The staking out of the work in the mountain regions is nearly completed. There still remains, however, a small amount of leveling of ditches between Obispo and the Chagres river and the crossing of the neighboring summits, the timber from which has been cut down in order to facilitate triangulation. Two corps are at work on the survey of the dam for the reservoir at the head of the upper Chagres.

A corps has been organized to run a line across the mountains by way of Upper Obispo and the river Pedro-Miguel, although the reconnoissance made of this district last year seemed to show that this passage was not as favorable as that by Calebra. The engineers consider that it is necessary to verify this by correct level in order that no possible economy may be overlooked in the definite staking of the canal. Another line is run from the mouth of the canal near Panama to an embouchure on the Rio Grande.

Instruments will be placed on the Chagres at Gamboa for the purpose of observing the velocity of the current and the rise and fall. Similar observations will be made on the Gatuncillo and the Obispo, affluents of the Chagres, and on the Rio Grande. At Colon surveys are being continued in order to determine the mouth of the canal, and also works for the protection of the harbor.



About 1,500 soundings have been taken in the immediate neighborhood of the line of projected mouth of the canal. Samples of the bottom are taken with each sounding, with a view of determining its hardness. The bottom of Colon bay is covered with mud, which is in certain places mixed with sand; and near the shore, pure sand is found, mixed with small shells. The rest of the bay is bordered with a belt of coral. The softest mud is at the mouth of the Folkes river. This deposit was originated by the stoppage of the current around the island, owing to the construction of the railroad embankment. It can be dredged out, however, if it is decided to make there a harbor of refuge for deep-water ships and coasters.

The temperature varies in Colon between a maximum of 30° C. and a minimum of 21° 9′ C. The daily averages are between 29° 4′ and 26° 2′ C.

These meteorological observations have been regularly made at Colon at the mouth of the Rio Janeiro (Pacific) and at Gamboa (the central point on the Chagres). Borings have been made along the line of the canal across the Calebra to determine the character of the ground. Six shafts have been sunk between kilometric points 51 and 56. The deepest, which is 50 meters deep at station 51, struck hard rock at 43 meters. The next one, at station 52, at 23 meters, struck a bench of very hard rock, of two meters and more in thickness. Then it ran into a conglomerate; and then a second bench of very hard rock was struck. Finally they passed through a very thick bench of hard rock, which they struck at 31 meters.

The other shafts have only indicated an argillaceous conglomerate. Finally to determine the character of the ground at Emperador, a large shaft having a sectional area of 10 meters, has been sunk. At a depth of eight meters, they came across angular pieces of dolorite imbedded in a mass of colored sand.

The shafts are timbered, and have two compartments. Six houses have been built at Emperador for the corps of miners. A large carpenter shop, blacksmith shop, etc., have been put up for convenience in the shaft work. The frame-work and machinery for the sinking to 100 meters have been received and housed in. At some of the shafts palm roofs only have been put up to protect the men from the rain and the rays of the sun.

PANORAMIC VIEW OF THE PANAMA CANAL.

Compared with the laboring classes of Europe, those of California have no cause to complain. With the richest native soil, capable of producing anything that will grow in the temperate zone, almost continual sunshine, every condition the agriculturist and horticulturist could desire more favorable than elsewhere—under such circumstances we ought to be the happiest people under the sun. But still we have some who are discontented. We wish they could go to Europe and see the difference. They would never, never growl again.—*Yolo Democrat.*

"LONGFELLOW wears his frock coat buttoned to the chin." The question now is, who sewed that button on the poet's facial extremity.

Town and Country in England.

The more we can draw our people out of our towns and villages into the country and employ them on our soil, the sooner we shall wean them from these two national vices—thriftlessness and intemperance—vices which have made us a very *byword* among the nations of the world. The effect of the land laws, the establishment of free trade, the encouragement of commerce and the neglect of agriculture, have one and all tended to draw our people from the land into what are termed those "hives of industry," to inhabit crowded streets and squalid homes, and labor in the close atmosphere of factory and workshop. Our excise laws then facilitated and encouraged the multiplication of public houses and gin palaces in these towns to five times the number either *required* or *demanded*. Our people are then afterward bitterly taunted that they have become a nation of drunkards. We daily pray the Almighty: "*Lead us not into temptation;*" but do *we* act up to the spirit of that prayer when we draw our people from the soil to live in crowded cities, and place the temptation of public houses and gin palaces at every turn and corner?—replenishing our revenue, it is true, but at what a cost? At the cost of impoverishing the homes of our people, filling our asylums, our jails and our workhouses.

Thus we read in the writings of Mr. Baghot de la Bere, concerning the condition of industrial affairs in England. Of course his lesson there is that the city operatives should be allowed to acquire rural property, though it be but the smallest area into which a man can plunge a spade and plant a seed and enjoy the growth thereof. His remarks are true: If the overcrowded towns and cities could be emptied into the vacant country, there would be an incalculable reduction of crime and vice.

In England it is hard to acquire property in land, both because of the price at which it is held and the indisposition of owners to reduce their estates. In this country it is quite different. There is plenty of land, and it is a happy reflection that the city people are going out upon it. The breaking of the idols of stock gambling is having a most salutary effect upon the tastes and desires of the people, especially those of moderate means, whose small earnings were erstwhile thrown to the Moloch of the stock market. We are often surprised at the people who come to ask us about the wisdom of investment in the country and the planting of trees and vines. Porters, clerks, housekeepers and others, whom one would never think had a thought beyond the routine of their daily lives, come to speak of soils and exposures and the varieties of orchard fruits. Some already have purchased little corners of land here and there, from the tides to the clouds; others are looking for a corner into which to put their earnings. We count this most fortunate for the State. The reign of the gambler and his exactions from the intoxicated masses of devotees are swept away. The temple of industry o'ertops the shrine of chance. It is well to go to the country. California is going.

PACIFIC STATES WATCHMAN.

Issued on the 1st and 15th of each month.

At No 252 Market Street, San Francisco, Cal.

☞ Take Escalator No. 12 Front Street. ☜

Subscription (in Advance), $2 a Year.

Favorable to Advertisers.

By consolidating the large subscription lists of the *Pacific Workman* with the Pacific States Watchman our advertisers gain an unusually great advantage. We doubt if any one weekly newspaper has ever been circulated to as many different readers on this coast, as have been served heretofore by the *Workman* and Watchman together. It is certain that no other periodical is now patronized by a better class of industrial, professional and business men. In fact, our subscription list embraces many of the foremost business and representative men throughout the towns cities of the coast.

We have pride in making our paper "clean and handsome," and first class in all respects—to the benefit of both our readers and advertisers.

ADVERTISING RATES.

One Square (¼ inch), per issue	$ .75
One Square per month	1,25
Two Squares, per issue	1.50
Two Squares per month	2.50
Obituary notices and resolutions (with 25 copies post-paid for friends of deceased) per sq. (¼ inch)	50

☞ For reading notices, extraordinary display, special advertising and choice places permanently, extra rates will be charged. Reasonable reduction will be made for large and long-continued advertisements. No extra rates for the space occupied by engravings.

OFFICIAL RECOMMENDATION.

[Resolutions adopted by Grand Lodge of Cal., Feb. 3, 1881]

Whereas, the Pacific States Watchman, the pioneer A. O. U. W. advocate on this coast, without official aid, has long rendered able and valuable services for the good of our glorious organization, we earnestly recommend that our Lodges and the brethren individually patronize the Watchman as liberally as circumstances will justify.

Entered at San Francisco P. O. as second-class matter.

San Francisco, - November 15, 1881.

A Good Deed.

It was a kindly act and nobly done. The case was a sad one as will appear from the narrative. A few years ago there came to Oakland an excellent and industrious man and his family, consisting of a wife and two children, a girl and a boy. He had enough money to buy him a little home and until such time as he could determine how best to apply his means for such purpose, he deposited his fund in Duncan's bank in this city. A few days afterward the bank failed and all was lost. He began life anew, as it were, bought a lot in Oakland, and mortgaged it to build a house. By dint of industry, good management and economy the mortgage was gradually reduced month by month, till only $500 indebtedness remained. Then came the crowning calamity. The brain of the toiler yielded to paralysis and he became an inmate of the asylum at Napa. There was a possibility that the family could support themselves, but the mortgage! There was no hope that it could be raised, and the little home, all that was left, must be swept away. But the unfortunate man was a member of the I. O. O. F. and A. O. U. W. Here was a case to arouse and call forth the fraternal feelings of these Orders. At once they struck hands in the good work of relief. Grand Master Barnes was appealed to for assistance, and such appeals he never permits to go unanswered. An entertainment was gotten up under the joint auspices of the two Lodges of which our friend and brother was a member. All expenses were donated. Bro. Barnes managed the affair as only he can do it, and the result was a clean balance of $411 to the credit of sweet charity. Then was seen the holder of the mortgage, who in the kindness of his heart donated two months' interest and $30 of the principal. Sixty dollars remained yet to be provided for, and kind friends (we suspect the Grand Master knows more of this than he would care to tell) made up the balance and took up the terrible mortgage. Then one evening, on an hour's notice, there gathered some 20 friends, and delivered the canceled nightmare that hung over the home of a worthy man and brother. There was mingled joy and sadness, and smiles and tears. Is there nothing of fraternity in our societies but empty words? Let this incident answer.

The proposed reception of Ivy Lodge, No. 4 D. of H., will take place on Thursday evening, November 17th.

The A. O. U. W. Universal.

The membership of the A. O. U. W. in this jurisdiction is of a character that, in point of moral excellence, may safely challenge comparison with that of any other society of any kind whatever. Go where you will, and it will be found that the men who gather around the Workmen's altar are the picked men of the locality—the best, mentally, morally, physically and socially, amongst their fellows. It follows that, under our commercial conditions, many go out from here to foreign countries, some temporarily, some to remain. These men, loving the Order, and cherishing a fond remembrance of the pleasant associations formed in our Lodge-rooms, have an ardent desire to see the honorable standard of Workmanship set up in their new homes. Frequent calls come for some authority to establish Lodges in Europe or in the islands of the ocean. In answer to these appeals, our representatives presented to the Supreme Lodge, at its last session, a scheme by which this desire might be gratified, but for some inexplicable reason, it did not find favor in the eyes of that body. It will not, it cannot, always be so. The time will come when these appeals will be heard and the light which we have for ourselves will not be hid under a bushel, but will shine out to illuminate the whole civilized world.

That there are difficulties in the way of extending the Order into foreign countries may be freely admitted. Each country would for palpable reasons have to be in a great measure independent from all others in all matters pertaining to the pecuniary affairs of the Order. They would have to manage their own beneficiary departments with no responsibility resting the one on the other, or on the Supreme Lodge, lest a war or some other great calamity should bury the whole structure in irretrievable ruin. Besides, close proximity of Lodges is an absolute necessity for the successful working of any beneficiary plan fashioned after that on which the A. O. U. W. is founded. Even in our own country we find it difficult, if not impossible, to work satisfactorily any plan that combines widely diversified States under one general head. This difficulty led to the separate beneficiary system adopted by the A. O. U. W., and must eventually lead to the adoption of something similar or equivalent by every other fraternal assurance organization, or to their final overthrow altogether.

It is believed that all these difficulties in the way of spreading the Order in foreign countries are fully provided for in the scheme before alluded to, and which we copy below. No doubt if our Grand Lodge at its next session should urge this matter upon the attention of the Supreme Lodge, and charge our representatives to use their utmost endeavors to effect its adoption, another glorious chapter would be added to the legislation for the good of the Order, originating with this jurisdiction, and then would come the dawn of the long hoped for day when the A. O. U. W. would become not only a great national but a universal organization whose beneficence should cover with blessings the civilized people of all the earth. We extract the following proposed amendment to the S. L. Constitution, from the published proceedings of the Supreme Lodge session of 1881:

AMENDMENT TO SUPREME LODGE CONSTITUTION.

Add to Art. 4, Sec. 1, the following:

The Supreme Lodge shall also have power to charter Lodges to be known as Superior Lodges in countries foreign to the United States and Dominion of Canada, the same as Grand Lodges are chartered under the direct supervision of the Supreme Lodge. Such Superior Lodges shall be independent powers within their respective prescribed jurisdictions, and exercise all the prerogatives of this Supreme Lodge, except in the following particulars and in accordance with the following restrictions, which shall in substance be set forth in their respective charters, to-wit:

First—This Supreme Lodge shall be acknowledged as the supreme head of the Order.

Second—The Beneficiary Department of such Superior Lodges shall be totally separate and independent the one from the others and from that of this Supreme Lodge, and no obligation of any one shall in any manner be binding upon any other, but such department of Superior Lodges shall be conducted on the same general plan as that adopted by this Supreme Lodge.

Third—The Supreme Lodge specifically reserves to itself the right to give and prescribe the ritualistic and secret work of the Order, and also the signs, tokens, passwords and emblems, and to change the same as provided in its Constitution, and Superior Lodges shall not at any time alter or repudiate them.

Fourth—Subject to these regulations and requirements, Superior Lodges shall have power to establish, charter and control subordinate and grand lodges in their respective jurisdictions the same as such lodges are chartered, established and controlled by this Supreme Lodge.

Any Superior Lodge shall have the right to be heard in Supreme Lodge through a duly qualified and accredited representative, the expense of such representative to be paid by the body sending him. H. G. PRATT.

There are over 4,000 Workmen in San Francisco.

Medical Examinations.

It will be incumbent upon our Grand Lodge at its next session to provide for a chief medical examiner or an examining board, to whom shall be referred all medical examiners' reports on applicants for admission to the Order before the degrees can be conferred on such applicants, except in case of new Lodges. It is, therefore, a matter for grave consideration what plan we shall adopt in regard to this matter. If it be determined to have a chief examiner, certain things should be provided for both in the interest of economy and celerity of action. To pay postage on every application sent to the medical examiner, then postage to return the same, and then postage again to transmit the paper to the Grand Recorder, would be in itself no trifling expense to the organization—say $600 a year. It would not be less. Then some of our Lodges are remote, and a week is required to reach this city by mail. Now a man is proposed and examined. On an average, a week must elapse before his application can get into the Lodge; another week will be consumed in geting it to the chief medical examiner; another in returning it. Then some time must necessarily pass before the paper gets into the Lodge, when it can be acted upon. Then a committee of examination must be appointed, who will consume another week before reporting, so that a ballot can be had. Four weeks from the time of examination till a vote can be had on an application, will not be far from the average time consumed under favorable circumstances, unless some plan can be devised to avoid this circumlocution arrangement. A medical board would not obviate this difficulty, but might aggravate it. We mention these matters that they may receive due consideration on the part of our membership. There is no question but that our unexampled prosperity has been and is owing in a large measure to the celerity with which we have been able to do business under our present system, and it is doubtful if any other can be devised which shall so happily combine both celerity and safety, but then it involves the necessity of conferring the J. W. degree before the fitness of the candidate is finally passed upon. This is to a degree objectionable, and yet very little trouble comes of it in actual practice. There is a doubt, however, whether this system is allowable under the Supreme law, which provides that the degrees of the Order shall not be conferred till the Medical Examiner's report shall have been passed upon favorably by a Chief Medical Examiner, or an Examining Board. A liberal construction, we believe, would admit of the J. W. degree being conferred, but not of both it and the M. W. degree; and if so, then our present system could in all essential particulars be adhered to, making the G. M. W., G. R., and, if thought desirable, a physician such a board as the law requires, whose approval of all reports should be necessary before the candidate would be eligible for the M. W. degree. Whatever shall be done, and whatever plan adopted, should be made a constitutional provision, so that no trouble might arise as to the law governing the case; and it is high time something for such purpose were put into the hands of the Committee on Amendments, that it might receive that careful attention which the importance of the subject demands.

In our last issue we gave considerable space to the instructions to medical examiners, issued by Dr. Wm. C. Richardson, Supreme Medical Examiner. It is to be hoped that they will receive the earnest attention of all subordinate medical examiners. In this State every medical examiner's blank is examined by the G. M. W. and G. R., still the local examiner who sees the man and judges of the fitness for membership can best tell whether he is qualified for membership. A sound, healthy organization can only be had by the utmost care on the part of the physicians of the Order, and all doubtful cases should be rejected. No matter how warm our hearts or generous our inclinations, justice demands that all applicants should be closely scrutinized.

The Order is in such a prosperous condition in Missouri and such zeal manifested for the good of the Order, that they expect to have a membership of 10,000 within the next year. The present membership is about 8,000.

The Success of the A. O. U. W.

It is no doubt very gratifying to the membership of the A. O. U. W. in this State, and particularly to those who first nursed the young stranger, stood by it, and guided its way through devious courses to its present magnificent strength and power, to witness the continued prosperity of the Order. This success has not been achieved through mere luck. Of course there was an opening for such a society as ours—in fact a pressing need for its institution—but it would have failed as many other good things have, had it not been for the superior qualifications of the officers who manage or managed its financial and executive business. Bros. Pratt, Jordan, Taylor and Barnes, are preeminently men whom any Order would be fortunate in securing as its chief officers, and the success of the A. O. U. W. can only be attributed to their wise guidance of the affairs of the society. Passing over the term of H. G. Pratt, when he was Deputy Supreme Master Workman, and the struggles of the young Order to obtain public recognition, and also of the terms of Past Grand Master Workmen Jordan and Taylor, we come down to the present, as more likely to show the status of the Order, when Grand Master Workman Barnes assumed the honorable position of head of the Order in this State. It was thought by many that the maximum strength of the Order had been reached, or that if it would increase it would be so slowly as to be almost imperceptible. The figures, however, of the last nine months tell a different tale. We show an increase of 376 Workmen for February, 310 for March, 311 for April, 321 for May, 267 for June, 210 for July, 256 for August, 237 for September and 287 for October. This makes a grand total of 2,575 *new* Workmen added to the rolls of the Order during the last nine months, being an average of 286 per month.

Now, it must not be supposed that this increase for three-quarters of a year has been attained without any extra exertion on the part of the Grand Lodge officers. As showing how the brothers of subordinate Lodges have been encouraged in the work, and also of putting the Order in a favorable light before outsiders, we give a few more figures: For the nine months beginning with February and up to November 1st, Grand Master Workman Barnes has made 86 official visits, and in these visits has met 139 subordinate Lodges. He has also delivered 45 public addresses, and traveled 7,122 miles.

There's the record, brethren of the A. O. U. W. It shows that our Grand Master Workman has worked to some advantage, and that the indomitable energy of the man has proved a source of fruitful good to the A. O. U. W.

Then that poor child—that unacknowledged offspring—the Degree of Honor, has received his earnest attention; and from Nos. 6 to 10 inclusive have been added to the roll of subordinate Lodges, in all of which the G. M. W. has been the instituting officer. Arrangements will be perfected by the next meeting of the Grand Lodge, whereby this degree will be placed on a permanent basis, and then our wives and female relatives will share with us that protection which is at present guaranteed by the A. O. U. W.

The increase in the number of subordinate Lodges of the A. O. U. W. has also been steady. From Nos. 194 to 208 inclusive have been added, the G. M. W. instituting one, the Deputies the rest.

Thus does the A. O. U. W. continue its beneficent march, gathering within its folds the picked men of the State, and throwing around the homes of its members its protection. Misery and want will not be known among the families of Workmen when the provider has gone hence, for over 13,000 Workmen are pledged to each other to pay the sum named in the beneficiary certificate, and also nearly 300 new members a month are added, thus certifying that the Order holds first place in the affections of the people as a fraternal beneficiary organization. May it ever continue to prosper.

It is very gratifying to note that all the journals published in the interest of the Order are clear-cut in their expressions as to the sad mistake committed by the Grand Master Workman of Iowa in the matter of the Relief assessment. They all condemn the course pursued by that officer.

The Grand Master Workman will visit Stockton Friday, Nov. 18th, and Folsom Dec. 2d.

Grand Recorder's Department.

Headquarters of Grand Lodge, A. O. U. W., Rooms 40 and 41, St. Ann's Building, corner of Eddy and Powell, San Francisco. H. G. PRATT, G. R.

WM. C. FLINT, Esq., 216 Sansome street, S. F., is Chairman of Committee on Laws and Supervision. All By-Laws, or amendments to same, should be sent directly to him.

BLANK reports for Financiers and Receivers can be had on order from this office—10 cents each. It would be well to send in orders early, if the blanks are desired.

OUR number of M. W. in good standing is now about 13,200, with an average increase over all losses, of about 250 per month. There have been issued 15,180 beneficiary certificates.

BY the first of January next, we expect to contest with Pennsylvania the honor of being, next to New York, the largest jurisdiction of the Order. Then we will be ready to start after New York, and will overtake her, too, unless she redoubles her energy. We are now increasing much more rapidly than she.

AT the present time of writing, the chances are that one assessment will be all that will be required for December. This will make 14 for 1881, two less than for 1880, or an average of 15 for the two years. Under ordinary circumstances, we may expect the future will give us just about the same average. Experience proves that the death rate of the Order does not increase, all prognostications to the contrary notwithstanding.

IT frequently happens that some member fills the blank on the back of his beneficiary certificate, thereby making, as he supposes, a change of direction in payment. This does not follow, unless the beneficiary certificate be transmitted to the Grand Recorder, that he may cancel the same and issue a new one in its stead. This is the law, and it was framed so that no transfer could be made except on the books of the Grand Lodge. The necessity for such a regulation needs no argument to anyone acquainted with the business of associations of this character.

A Thought.

If some kind friend should offer to give you, for the use and behoof of your wife and children when you shall have gone to that "undiscovered country from whose bourne no traveler ere returns," a piece of real property, worth $2,000, on the sole condition that you should pay the taxes thereon, and you should refuse the offer, what excuse could you give for so mean an action? And yet, $2,000 in coin can be secured to meet such a want, or, more likely, such a necessity, more cheaply than in the case supposed above; and payments can be made so easily—a little month by month—and so little that the cost of useless luxuries is to almost every person fourfold more. The cost of one cigar a day is more than enough. If need be, throw tobacco to the dogs, and protect your family. The road over the hills to the poor house is never open to the wives or children of good Workmen, nor does the wolf of want stand with gleaming teeth before their doors.

A CASE has recently occurred in Oregon, which has occasioned considerable correspondence in that State. It seems that when the present Grand Recorder assumed office he found a number of applications awaiting action, one of which bore on its face evidence of being an unsafe risk. In the meantime, however, the candidate had been initiated and received the two degrees, and the Lodge held that nothing could be done in the matter. The Grand Master Workman took a different view and decided that it was his duty to refuse the issuance of a beneficiary certificate when the applicant is morally or physically disqualified, notwithstanding the applicant may have been elected by a Lodge. In this case he found, from the applicant's medical examination, that he was physically disqualified and therefore held it as his duty, and also the Grand Recorder's, to refuse to issue a beneficiary certificate in all cases where the Medical Examiner's certificate showed upon its face—as it did in this case—that the applicant was physically disqualified, no matter as to whether or not the applicant had been elected and received the degrees.

CAMPTONVILLE LODGE, No. 122, will give a ball on Thanksgiving night. It is expected that a delegation from Downieville, No. 123, will be present.

From Grand Master Workman.

OFFICE OF GRAND MASTER WORKMAN,
SAN FRANCISCO, November 10th, 1881.

To the D. D. G. M. Workmen of California:

DEAR SIRS AND BROS:—Although the term will not close until the meeting of the Grand Lodge on the first Tuesday of April, 1882, yet I should be pleased to hear from you, officially, as to the progress of the Order in your district to date, its status, prospects, etc. A supplemental report can also be made next March, to close up the fiscal year.

Report particularly as to the knowledge of officers of Lodges in the written and unwritten work. The net gain of the Order for 1881, thus far, has been about 250 members per month, and we have great reason to be thankful for the wonderful prosperity and success vouchsafed to us.

Elections and installations will soon be in order. When you cannot personally install the officers of a Lodge, deputize some competent P. M. W. to do so. Be careful that *the entire number* of rituals belonging to the Lodge are placed in your possession at installation. You will deliver them to the newly installed M. W., take his receipt for same, and forward said receipt to the Grand Recorder.

Examine the reports and collect the pro-rata tax at installation, forward said pro-rata tax to the Grand Recorder immediately, but return the reports to the Recorder of the Lodge, to be forwarded by him to the Grand Recorder.

In forming new Lodges notice particularly Section 10, Article 12, Const. of G. L.

Lodges in your district wishing to use the name or wear the regalia of the Order for public purposes, such as balls, parties, anniversary or other entertainments, where the public is admitted, must apply to you for a dispensation or permission for same, which you will grant, whenever in your judgment the circumstances and surroundings are such as will be creditable to the Order. Read carefully the former circulars to Deputies issued from this offie.

Any suggestions as to what you may consider for the advantage of your district will be gratefully received, and any assistance or aid I may be able to render, will be willingly bestowed. With sincere wishes to all, and trusting that our united efforts may win continued prosperity and success, I am, fraternally yours,

WM. H. BARNES, G. M. W.

In a Nutshell.

If every man who joins an Order should stay in until he died, and if tables of expectancy of life were made from lives selected solely from the organization, then a system of graded assessments based on such expectancy would approximate equity; and if every member should live out his full expectancy and no more, then absolute equity might be realized, but when we make a table of expectancy from population in general, and then base a system of graded assessments on that, shutting our eyes to the fact that of all the persons who join assurance companies or associations not more than one-fifth die in such organizations, we commit a folly for which men of sense have no excuse. When we get a table of expectancy that shall show the probability of a person dying within the seven years next succeeding his admission to the Order, then we can know whether assessments ought to be graded, and if so, just how it should be done. But no such table has ever been made, nor any attempt looking to it that we are aware of, except that began by our Grand Recorder last year. If other Grand Recorder's would adopt the same plan, not many years would elapse till we should have statistics more valuable for assurance purposes than the world has ever known.

NELSON LODGE, No. 202, Butte county, will give a grand ball on Thanksgiving evening. It gives promise of being the most successful and enjoyable gathering that has assembled in Nelson for a long time. A good band will furnish music, and a good supper will be furnished those who attend.

AT a special meeting held by Fidelity, No. 136, on Wednesday evening, Nov. 9th, it was unanimously resolved that a committee of three be appointed to purchase a "Henry F. Miller" piano at a cost not exceeding $375. The committee selected comprised G. R. Sanderson, P. M. W.; E. M. Reading, P. M. W., and J. F. Curtis.

A BALL will be given at Ixora hall on the 19th inst., in aid of the Veteran's Home. This worthy object deserves the fullest encouragement from all.

WE must say that the *Protector*, of Maryland, is making a noble, manly and intelligent effort to have that jurisdiction set apart as a separate beneficiary. It is to be hoped its effort are appreciated by the membership.

Assessment Notice.

The following are the deaths occurring in the Order in this State. Five deaths will be paid from assessment No. 12, the remainder, from No. 13, now in process of collection:

Death No. 70.—Bro. Oscar Rein, of Olympic Lodge, No. 127, San Francisco, died Nov. 17, 1880, of fever, aged 38 years. Joined the Order Jan 6, 1880. Payment from surplus.

Death No. 71.—Bro. John Keating, of Oak Leaf Lodge, No. 35, of Oakland, died July 23, 1881, at sea, of double pneumonia, aged 43 years. Joined the Order Feb. 21, 1881. Payment from surplus.

Death No. 72.—Bro. Alexander A. Gault, of Triumph Lodge, No. 180, San Francisco, died Aug. 16, 1881, of hemorrhage of the lungs, aged 34 years. Joined the Order Feb. 1, 1881. Payment from surplus.

Death No. 73.—Bro. J. H. Talken, of Brooklyn Lodge, No. 3, died Sep. 19, 1881, of consumption, aged 44 years. Joined the Order March 11, 1880. Payment from surplus.

Death No. 74.—Bro. Ambrose S. Niles, of Lincoln Lodge, No. 83, died Sep. 25, 1881, from suicide, aged 51 years. Joined the Order May 6, 1879. Payment from surplus.

Death No. 75.—Bro. Geo. R. Smith, of Reliance Lodge, No. 93, Alvarado, died Sept. 27, 1881, from boiler explosion, aged 31 years. Joined the Order May 13, 1879.

Death No. 76.—Bro. Christian Mossman, of Anaheim Lodge, No. 85, died Sept. 27, 1881, of malarial fever and congestion of the lungs, aged 49 years. Joined the Order March 6, 1879. Payment from surplus.

Death No. 77.—Bro. Joseph Rosenthal, of Washington Lodge, No. 60, San Francisco, died Oct. 3, 1881, of dropsy of the heart, aged 49 years. Joined the Order April 22, 1880. Payment from surplus.

Death No. 78.—Bro. Richard Grunwold, of Memorial Lodge, 174, died Oct. 7, 1881, of affection of the throat, aged 38 years. Joined the Order June 19, 1880. Payment from surplus.

Death No. 79.—Bro. Nelson George, of Hercules Lodge, No 53, San Francisco, died Oct. 13, 1871, by being burned in planing mill, aged 47. Joined the Order April 29, 1881. Payment from surplus.

The A. O. U. W. in Utah and Montana.

EDITORS WATCHMAN:—I instituted a Lodge of the A. O. U. W. with 15 charter members in Park City, Utah, on the 1st of this month, and have just instituted a Lodge in this city with 35 charter members. There is every reason to believe that Butte Lodge, No. 1, will have over 100 members by the 1st of the year. From here I go to Helena, Deer Lodge and Missoula in the interest of the Order. I find that Montana will be a good field for the A. O. U. W., and it will here grow rapidly when once introduced. All the new members have expressed themselves as being more than pleased with the Order. D. F. Fox, D. G. M. W.

Butte, Montana, Nov. 3d.

[We are glad to hear of the extension of the Order in these Territories. It will prove welcome news to the Grand jurisdiction of Nevada, under which these Territories will work. Bro. Fox is a live and energetic propagator of the principles of the A. O. U. W., and can place the Order before the people there in its proper light. We would like to hear from the different Lodges, and hope the brothers will write often. We can say further to these new children in the cause, develop the fraternal and social principle as much as possible. Give entertainments, etc., and have your families and friends as the audience.—ED.

WASHINGTON TERRITORY.—A correspondent writing from Seattle, W. T., under date of November 1st, gives the following news: Last night I visited Columbia No. 10, where I found a good attendance, the brothers earnest, and everything running smooth and harmonious. One thing I could not fail to observe, namely, the order in which the balloting was proceeded with. After the M. W. and the For. had deposited their ballots the members started from the right of the M. W., taking their turn in balloting. This is a good rule, as it insures a full ballot in most instances, but few declining to vote, it seemed as if it were a duty which no one desired to shirk. To-night I shall visit Alki No. 33.

BROS. HENRY HOEBER, P. M. W., Wm. H. Lyon, P. M. W., and W. F. Norcross, proprietor of the *New Age*, made a flying trip to Eureka, Humboldt county, last week. While there, they visited Bay City Lodge, and found our brethern there in force, and in a prosperous condition. As there was no work on hand, a pleasant evening was spent in fraternal speeches and sociality.

Grand Recorder's Statement for October

We condense from Grand Recorder Pratt's Financial Statement for October the following leading figures:

WARRANTS ISSUED.

No. 303, Contingent, Wm. H. Barnes, G. M.		$100.00
304, Expense, David Farquharson		50.00
305, Salary, H. G. Pratt, G. Rdr		291.66
306, Contingent, C. H. Haile, G. Rvr		25.00
307, Supplies, Supreme Lodge		2.50
308, Postage, H. G. Pratt, G. R		18.50
308, Expense, H. G. Pratt, G. R		29.50
308, Supplies, H. G. Pratt, G. Rdr		8.50
310, Supplies, F. Kroger, & Co		62.50
Total amount warrants issued, G. F		$ 588.16

SERENADE.—Bro. Chas. S. Hoffman and his newly made bride were made the recipients of a fraternal visit on Monday evening, Oct. 31st, from his brethren of K. of P. and Workmen. At the close of the meeting of Memorial, A. O. U. W., some 20 Workmen formed in line of march, and with the addition of a number of Knights, marched to Bro. Hoffman's residence on Post street. This large company was soon followed by a quartette of professional vocalists, who heralded their arrival by discouraing fine music. The whole company were invited to the dining-room, where a cold collation, with the sparkling wine, etc., was provided in abundance. Toasts, songs, character and sentimental, speeches and congratulations were indulged in until a late hour. Mr. W. H. Bodfish, Senior Past G. Chancellor and Supervisor elect, Mr. T. J. Duffy, C. A. Howland, J. Roos, J. Graham, and a number of the leading members of Memorial were present, and by their wit, humor and song, contributed largely in making the evening a pleasant one to Bro. Hoffman and wife and their guests.

THE remarkable progress of the Workmen in all parts of our jurisdiction is a subject of general congratulation in every Lodge room. Not only as Workmen proper, but our D. of H. is gaining rapidly, and especially the Workmen's Guarantee Fund, which as an auxillary to those Workmen who wish an additional $1,000 insurance, is advancing in numbers beyond precedent. There has been nearly 1,500 certificates written and are now coming into the office of the Secretary, St. Ann's Building, at the rate of 8 or 10 a day.

WE had the pleasure of meeting Bro. W. H. Leminger, of Valley Lodge, Salem, Oregon, who is just on the point of departure East, in the interest of his patent elastic draft whiffle-tree. He has disposed of the right to manufacture in all the Pacific States, and is now introducing it in the East. We wish him success in his laudable enterprise.

PALMER'S,

726, 728 and 730 Market Street, S. F.

FURNITURE.

H. Schellhaas' auction and commission house, Eleventh street, Odd Fellows' building, Oakland, Cal.

SUBSTITUTES FOR TIMBER. — The growing scarcity of timber appears to be attracting the attention of visitors everywhere to the importance of devising substitutes. It is now stated that a house could be built of glass blocks about as cheaply as of granite blocks. Some glass manufacturer should make the demonstration. But people who might live in such houses should be careful not to throw stones. It is also claimed that fire-proof houses can be built of cotton and straw. In preparing these materials, raw cotton of inferior quality, the scattered refuge of plantations and sweepings of factories, are mixed and converted into a paste, which becomes hard as a stone, and then is called architectural cotton. It may be made in large slabs, whereby the building of a house would be rapid in comparison with the practice of laying brick after brick, and at about one-third the cost. For the other part, wheat straw is treated in a way already known, and converted into pasteboard. The sheets thus prepared are soaked in a solution, which hardens the fibers, and are then compressed under enormous power into beams and boards of any required size, and the effect of the soaking is said to render them difficult of combustion.

UNDERGROUND TELEGRAPH WIRES. — The growing necessity for placing telegraph wires underground in cities, is eliciting much discussion in regard to some cheap and yet desirable method of insulating the wires. A new material has recently been brought to the attention of the public, which is said to be only about one-sixth the weight of iron. It is composed almost wholly of pure carbon, in what form is not stated, and so is indestructible; does not rust nor change by exposure, whether in the air or underground, as is not affected by frost. But the chief virtue claimed for it in connection with underground wires is that it is a perfect insulator. It is said, too, that the pipes need not be buried very deep in the earth, as they may be of a semi-elastic character, adjusting themselves to the slight upheaval and depression of the ground through the action of frost or other disturbances.

THEY begged him to play a little. He seemed to feel bashful at first, but after a while began to paw the ivories vigorously. "What power!" said a listener to the owner of the piano. "Yes," exclaimed the latter in alarm, "he seems to have considerable muscle; but he ought to know that this isn't a gymnasium."

THE winnings of the American horses in England and France this year amount to about £30,000.

SECURE PATENTS

Through Dewey & Co.'s Scientific Press Patent Agency.

OUR U. S. AND FOREIGN PATENT AGENCY presents many and important advantages as a Home Agency over all others, by reason of long establishment, great experience, thorough system, intimate acquaintance with the subjects of inventions in our own community, and our most extensive law and reference library containing official American and foreign reports, files of scientific and mechanical publications, etc. All worthy inventions patented through our Agency will have the benefit of an illustration or a description in the MINING AND SCIENTIFIC PRESS. We transact every branch of Patent business, and obtain Patents in all countries which grant protection to inventors. The large majority of U. S. and Foreign Patents issued to inventors on the Pacific Coast have been obtained through our Agency. We can give the best and most *reliable* advice as to the patentability of new inventions. Our prices are as low as any first-class agencies in the Eastern States, while our advantages for Pacific Coast inventors are far superior. Advice and Circulars free. DEWEY & CO., PATENT AGENTS.

The Influence of Telegraph Wires on Lightning.

Some interesting facts in the above connection have recently been brought out by M. Montigny through observations along a railroad telegraph line in Belgium. It appears that the wire for a considerable distance passes along extensive lines of poplar trees, while the road rises gradually from a plain to an elevation of about 200 ft. A close examination shows that along this route only about 1% of the trees have been struck by lightning on the plain, and on the slope about 25%, while upon the highest portion of the line not less than 64% of the trees show evident marks of injury from lightning.

M. Montigny distinguishes three kinds of injuries: First, the bark torn and detached on a limited part of the trunk; second, a furrow, straight or (rarely) spiral, made on the tree, from near the wire, down to the ground; third, a peculiar oval wound, with longer axis vertical and lips colored light brown. The furrows, which are probably due to the most violent discharges, are relatively most frequent on the upper and western slope, which the storms usually reach first. M. Montigny is of the opinion that the lightning, while provoked by the wire, does not strike that first and then the tree, but strikes the tree directly.

His conception of the process is to the following effect: Suppose a thunder cloud charged with positive electricity. A long telegraph wire under it, though insulated, may acquire as great negative tension in the nearest part as if in direct communication with the ground; and the tension is greater the nearer to the cloud. While the inductive influence affects the wire most, objects that are near, such as trees, share in the influence according to their conducting power. The lightning is attracted in the direction of the wire, yet does not strike it; the insulating cups present an obstacle to its prompt and rapid escape to the ground. It finds a better conductor in a neighboring tree wet with rain.

ACID BURNS.—The *Bulletin de Therapeutique* says that acid burns can be cured by the application of a soft paste of calcined magnesia and water, in a layer about two millimeters in thickness. The magnesia requires to be renewed in 24 hours; but patients, after recovery, retain no marks of the accident

MINERAL OIL LUBRICANTS.—It is asserted that mineral oils are not to be recommended as lubricants, since they attack any India rubber with which they may happen to come in contact.

The Moon and the Weather.

M. De Parville has published in the *Journal des Debats*, a paper on the temperature of the present year, which, at Paris, has risen to a hight exceeding all previous authentic records. In the course of the article he raises the question as to whether the dryness of the present summer could have been foreseen, and answers it in the affirmative. Having then referred to the influence of solar action on the atmosphere, he says: "A very long series of observations has also shown that the moon, which passes every month from one hemisphere to the other, influences the direction of the great atmospheric currents. The changes in those currents, in consequence of the prevailing moisture or dryness, are intimately connected with the relative position for the time being of the sun and moon.

The distance of the moon from the equator, that is, the inclination of the moon's path to the plane of the equator—varies every year, passing from a maximum to a minimum limit; and the meteorological character of a series of years appears to be mainly dependent upon the change of inclination when these extreme limits have been touched. Observations prove that the rainy years, the cold winters and hot summers return periodically, and coincide with certain declinations of the moon. In our latitudes the rainy years occur when the moon's declination has touched its extreme limits of 28°, 26° or 18° respectively. They are separated from each other usually by periods of about three years, and then six years." M. de Parville then gives a list of rainy years running back to 1783, the most recent being 1879, 1876, 1866, 1859, 1856 and 1853, in each of which the moon's declination was either 28°, 26° or 18°, beginning with 26° in 1879 and running back in the order named. The severe winters, he says, coincide as a rule within a year of the same declinations. The dry summers come naturally in the middle of the period which divides two wet years. The next wet year ought to coincide with the declination of 18°, therefore, with the year 1884, as the last was 1879 with the declination of 26°. Between the two years comes the period of maximum dryness, and it may be expected, therefore, that the year 1882 will be another dry year.

LONG TELEPHONE CIRCUIT.—The telephone has been successfully worked over a distance of 350 miles between Buffalo and Patterson in New York and New Jersey States. The voice could be recognized, but owing to the sputtering and snapping caused by induction (the wires were close to the ordinary lines), the words could not be distinguished.

IVY POISON REMEDY.—A correspondent of a contemporary says: "My boys have been great sufferers from ivy poison, one of them to an extent beyond description, and visited by many physicians two or three times a day without any apparent relief. An old Quaker hearing of the case, called to see him, and promised to cure him in 24 hours. He gathered a handful of 'life everlasting,' which grows in abundance in every pasture and roadside in the country. A strong tea was made of it, small quantities given from time to time as a drink, and the body freely bathed with it and kept wet. The relief was wonderful, and no one was more surprised than the doctor. In two days the body of the boy had recovered its natural proportions, and the fever and itching gone, and recovery fully established. It is claimed for this herb that it cures ivy poison so that no return of it is to be dreaded.

FIRES FROM ELECTRIC WIRES.—The possibility of fires from electric wires is occasioning no little uneasiness among the insurance companies, but, as would appear, without reasoning. True, cablegrams assert that the fire occurring a few days ago at the Paris electric exhibition, was due to some wires put up by the Fox Electric Light Committee of England, but the chairman of a committee appointed by the Board of Underwriters some time since, to investigate the whole subject, is authority for the statement that the committee are fully convinced that if the wires are properly insulated there is less danger from fire from electricity than from leaky gas mains and kerosene oil, and it is their intention to so report.

INSECT LIFE.—It is estimated that there are five times as many kinds of insects as there are species of all other living things put together. The oak alone gives shelter and support to 450 species of insects, and 200 kinds make their home in pine trees. In 1849, Alexander Von Humboldt estimated that the number of species preserved in collections was between 150,000 and 170,000, but scientific men now say that there must be something like 750,000 species.

BEARS are said to be more abundant in Butte county than at any time for 20 years. Deer are also working their way to the lower ranges, which is accepted as a sign of a hard winter.

FINELY powdered glass, mixed with soluble silicate of soda will be found to make an excellent acid-proof cement.

Harmony, 9.

The present administration thus far for this term has been an unqualified success. Her present officers are always at their posts, and take an interest in the work which has been considerable this term, having swelled their number above the 200 mark, with a lively expectation that they will reach 250 at the sitting of the next Grand Lodge. Bro. Wm. Decker, M. W., is an uncompromising disciplinarian and setting the example himself, requires the strictest observance of the rules and regulations of his Lodge, especially in relation to the sick and distressed, even going so far as to visit sick brethren regularly, when residing out of our city. This Lodge pays sick benefits, besides giving generous donations to needy brethren; when the scroll is unrolled that contains the record of a helping hand given by Workmen, that of Harmony, No, 9, will stand out, in our judgment, as bright a page as any one Lodge in the history of our Order in this State. They have secured the services of Prof. Eastman as organist, and with good music, a good attendance—the best as a rule of any Lodge in this city—their meetings are always attractive and elevating, the only objectionable feature in it being that sometimes the talkers persist in a species of oratory, when they speak nothing interesting to their hearers. At their last monthly social the following programme was given: Song (How Fair Thou Art) Prof. Eastman; recitation, (Henry VIII to His Troops), Bro. S. S. Johnson; song (Michael Schnyder's Party), Bro. Wilton; Reading (Magdalen), Bro. F. Blight; song (The Old Sexton), Bro. M. Thackeray, P. M. W.; reading, Bro. Barry; song (Trundle Bed Song), Bro. Webster; reading (Mr. O'Loughlin's Mistake), Bro. Cohan; song (One More River to Cross), by the club; recitation (17 O'Clock), Bro. Eastman; song (Dublin Bay), Bro. Wm. Thackeray; reading (What Ailed Ugly Sam), by M. W. Bro. Decker.

Excelsior, 126.

The regular meeting of Excelsior, 126, on November 3d, was one of pleasure and profit. There was a good attendance, and the business of the Lodge was transacted with quick dispatch. A part of it was the receiving of two petitions, making appropriations to enlarge their library, and the final report of the hall committee on Nov. 10th, it being the intention of this enterprising Lodge to build a hall for its own use. The usual literary feast was opened by H. H. Mayhew, D. D. G. M. W., who delivered an elaborate and exhaustive essay on the "Sponge," with the different specimens lying on a table before him. Each class and its locality and the manner of procuring and curing was fully exemplified and explained. This learned lecture was listened to with close attention, interspersed with witticisms, and at the close a number of questions were asked by the different brethren and intelligently answered by Bro. Mayhew. A large steel engraving showing the manner of taking the sponge was exhibited, which at recess was examined with much interest, as well as the specimens of sponge on exhibition. During a short recess, a real fraternal sociality was indulged in, while the Librarian, Bro. Silas A. White, was checking out books. Under head "Good of the Order," Bro. Mayhew received a vote of thanks for his able essay on the "Sponge." Silas White, J. F. Jenness, Sam Booth, P. M. W., A. R. Gunnison and others made short speeches, interspersed with intellectual hits and pleasant retorts from the pleased listeners. In the course of their remarks, Bros. White and Gunnison paid the PACIFIC STATES WATCHMAN a high compliment. Excelsior Lodge is known as the literary Lodge of our city, in which we fully concur, as there is no Lodge of Workmen in this jurisdiction who have so valuable a library, or who secure, periodically, scientific lectures free to all in their Lodge-room, prepared and delivered by their own membership, as a rule. The general interest taken in our organization is evinced in the history of Excelsior Lodge. Being on the outskirts of the city, in a neighborhood, so to speak, by themselves, they have enrolled 160 of the best citizens, have a fine library, periodically scientific lectures, and literary and musical Lodge-room entertainments that anyone can well afford to pay an admission fee to hear. These literary exercises are the voluntary and unpaid contributions of their own members.

Fidelity, 136.

Wednesday evening, November 2d, was the night of initiation in Fidelity, 136. Twelve candidates were introduced and received the J. W. degree, with the following officers acting: Frank J. Symmes, M. W.; Chas. E. Wilson, O.; J. W. Belden, For.; in a manner that was dignified, and the secret work given letter perfect. Of the personnel and character of these 12 candidates, it is enough to say that they are all well known as leading and prominent citizens of San Francisco. From the organization of this Lodge, there has been a studied purpose to admit none that would dishonor their membership. An examination of their by-laws, wherein the names and occupation of their members are printed, will afford conclusive evidence that Fidelity, 136, has a membership that is not excelled by any Lodge or organization (sociable, charitable or beneficiary) in this State. The quiet, generous and unobtrusive manner in which this Lodge of Workmen respond to charities and in assisting their own members in the battle of life, as also Workmen not members of Fidelity, is worthy of mention and should receive recognition and commendation from her sister Lodges. Their general fund is larger than any Lodge in this State, which is held for charitable purposes, and paying extra assessments when two come in one month. All entertainments and celebrations are carried out by individual subscription. A unity of purpose, a cordiality and fraternal feelings exhibited to their own members and to visitors. They are exemplifying the possibilities for good, in the association of thinking men, in this great fraternal organization. As yet they have not lost a member by death, and no brother has been dropped from their roll for non-payment of assessments, because he was short in funds. Having in view fitness, moral worth and reputation in building up their Lodge, rather than numerical strength, Fidelity, No. 136, A. O. U. W., will be recognized as one of the brightest stars in the diadem of Workmen.

Friendship, 179.

This young Lodge, termed in this city as one of our baby Lodges, is in a fair way to manhood. At their meeting on Wednesday evening, Nov. 9th. There were four applications received, and the M. W. degree given to two J. W. A significant feature was a number of our well-known and leading business men. The membership is now 85, and is certain to reach 100 soon. To the few over anxious Workmen, who anticipated it as an unreasonable task to build this Lodge up, we can say they can dismiss their fears, as Friendship, No. 179, with her enthusiastic Workmen is an established fact, and will soon rival some of our older Lodges in numbers and material. On a vote as to the time of meeting, it was settled at for eight o'clock. Bro. Dixon, P. M. W. of Olympic, at the close of business, made pertinent remarks that were well received, after which a number of the brethren of Friendship volunteered to say a few words, each pledging their fealty to their Lodge, Friendship.

Myrtle, 42.

Myrtle, No. 42, is marching side by side with our city Lodges in increase of membership and general interest in their regular meetings. The meeting of November 5th was well attended, and the J. W. degree given to two candidates and the M. W. to two J. W. Workmen. A provision was enacted that is meeting with much favor, and practiced by several of our Lodges, with slight variations as to the detail of action connected therewith. This regulation is substantially this, viz.: At the end of each month, if any of the members are delinquent in their assessment, the Lodge pays it from their general fund, and charges 25 cents for the first month, and 50 cents for the second month, which, if not paid before the third assessment falls due, are allowed to be suspended. From what we have seen of the results of this provision, it would seem to merit the attention of all our subordinates.

Memorial, 174.

This young Lodge is quite active at present in making Workmen. On Nov. 7th the J. W. degree was conferred on two candidates, and the M. W. on three. There was a good attendance and the officers performed their work in a manner that was pleasing and correct. After the business of the Lodge had been finished there was a surprise for Bros. Chas. S. Hoffman, P. M. W., and Frank A. Brooks, O. Bro. C. W. Nevin, P. M. W., charged Bros. Brooks and Hoffman with bringing in two members clandestinely and requested them to appear before the altar, when Bro. J. H. Gyselaar, P. M. W., in a humorous and fraternal speech of marked excellence and with pleasing effect, presented each a token of remembrance from the brethren of Memorial. The souvenir was a pair of solid silver napkin rings, on each one of which was engraved the word "Memorial." Bros. Brooks and Hoffman happily responded and acknowledged themselves guilty and pleaded to the soft impeachment by saying they had a use for an extra napkin ring, as their family had doubled within the last 30 days and they hoped the bachelors of Memorial might have use for an extra napkin ring very soon. After a short recess and kindly rejoinders the Lodge business was resumed, and Bros. Cohen, of Magnolia, Vice, of Myrtle, Johnson, of Golden Gate; Gyselaar and Nevin, of Memorial, made short speeches that ended a happy Workmen meeting and a very pleasant evening.

Washington, 60.

The third anniversary social of Washington, No. 60, was held in Cosmopolitan hall, B. B. building, on Thursday evening, Nov. 10th. The Lodge business was brought to a close at half-past eight o'clock, when a large audience of ladies and gentlemen soon filled the hall. I. Birnbaum, M. W., made a few facetious remarks, and called R. A. Lindsey, P. M. W., to preside as master of ceremonies. J. M. McDonald was asked to favor them with a recitation, which was done in an artistic and masterly manner. Solo, Bro. Geo. A. Knight, whose professional ability as a fine vocalist was evidenced, and at the close received a hearty recall. Reading from "Mark Twain," Bro. W. Porter. Solo, German song, Bro. Chas. Zinkind, which so pleased his audience that he received a hearty encore. Recitation, J. F. Roth, subject, "When You Are Flush and When You Are Full"—a humorous piece that called for an encore. Sentimental song, solo, Mrs. H. B. Schunhoff, wife of Bro. Schunhoff, P. M. W. This lady has a sweet and cultivated voice, and her effort was loudly applauded. Quartette, E. Carlsen, P. M. W., and Mrs. E. Carlsen, Bro. Geo. A. Knight (organist) and Mrs. Geo. A. Knight. A real pleasing effort. A farcical and comical lecture on philosophy, R. Livingstone, which proved the hit of the evening, and who kindly answered an enthusiastic recall. The Chairman, Bro. Lindsey, then made a few pertinent remarks requesting the audience to arise and sing the closing ode of our Order, which was done in good style. The mutual congratulations on the success of this informal reunion proved such a treat, that we are assured that they will be continued.

Silver Spray, No. 3.

The third anniversary party of Silver Spray, No. 3, D. of H., was held at Ixora Hall on Friday evening, Nov. 4th. There was a large and select assemblage and a real brilliant affair. The popular hall was in its gayest dress, flags, streamers, hanging evergreens and flowers, with golden letters across the hall, viz., "Silver Spray Lodge, No. 3, Degree of Honor, A. O. U. W." Coggin's band of six pieces discoursed the best music and a well arranged programme of 14 dances, one of which was a "Fan Quadrille," kept a very happy and congenial company in the gayest festivity until the "wee sma' hours." There seemed to be no words of dissatisfaction expressed throughout the entire evening, except by a few enthusiastic dancers who wanted to commence before nine o'clock, at which time the grand march was commenced, with Bro. John Thompson and his sister Miss Nettie Thompson, who is W. S. of H. of Silver Spray, leading the procession in which were a large number of ladies dressed in the finest costumes. We accord to Silver Spray the name of giving the finest parties in the past, and this one was equal to any or better than those given heretofore. The sisters and brothers who arranged and carried out so successfully the programme of the pride of our city "Silver Spray," are given below: Committee of Arrangements—Mrs. Herbert Jones, Mrs. Daniel McLeod, Mrs. T. H. MacDonald, Mrs. Mathew Lindsey, Miss Nettie Thompson, Mrs. Robert Caldwell, Miss Lucy McNear, E. H. Black, James M. Camp, Robert Mayow. Reception Committee—Mrs. B. C. Austin, Mrs. C. H. Evans, Mrs. H. Lincoln, Henry Hoeber, W. F. Norcross, W. C. Cody, Miss Isabella Lyle. Floor Manager—John Thompson. Floor Committee—Mrs. W. B. Lyon, Mrs. H. Wehser, Mrs. A. S. Peterson, Miss Lizzie Kerr, Miss Margie Carter, H. J. Lask, Fred. Vaughan, C. C. Terrill, Wm. Sanson, G. W. Lamont.

Golden Dawn, No. 10, D. of H.

A new Lodge of D. of H. was instituted on Saturday evening, Oct. 30th, in Mayberry Hall, at the Mission, with 21 charter members. The name adopted was Golden Dawn. The following officers were elected and installed by Wm. H. Barnes, G. M. W., assisted by E. F. Loud, D. G. M.: Mrs. Mary Hall, P. W. S. of H.; Mrs. Clara E. Poland, W. S. of H.; Mrs. Annette L. Jenness, S. of H.; Mrs. Minnie F. Hollis, S. of C.; Miss Ella Booth, S. Sec.; Mrs. Lizzie P. Gunnison, S. Treas.; Miss Effa Gunnison, S. Usher; Mr. E. L. Bacon, I. W. The Advisors appointed were Dr. S. H. Hall and Sam. Booth to W. S. of H., Mrs. T. H. Griffith and Mrs. C. N. Payson. After the new Lodge had been instituted a short recess was taken, and a short time spent in sociability. It was agreed to meet on the 2d and 4th Saturday evening of each month at Mayberry Hall. There was a feeling of satisfaction among those present when the Grand Master announced that Golden Dawn, D. of H., No. 10, was one of the subordinates of the A. O. U. W. This young Lodge is composed of leading Workmen and lady members of their families, at the Mission, principally, and bids fair to soon have 100 members.

Oakland Lodge Locals.

California, 1.

A district meeting was held in the Lodge-room of California, 1, on Tuesday evening, Nov. 10th. There was a good force in attendance of the members of California, which was swelled to the full proportions of the Lodge-room by the members of Occidental, 6. The petition of one candidate was received and the M. W. degree conferred on one Junior Workman in an admirable manner by the Grand officers. The large delegation from Occidental were received with honors and addresses of welcome, as also the members of the Grand Lodge, consisting of Wm. H. Barnes, G. M. W.; E. F. Loud, D. G. M. W., and H. G. Pratt, Grand Recorder. After a short and interesting recess, the usual speech meeting was opened by Bro. H. G. Pratt, G. Rdr, followed by E. F. Loud, D. G. M. W., in practical, congratulatory and interesting remarks, after which he illustrated the secret work of both degrees, which was pronounced by the Grand Master as letter perfect. The Grand Master was then requested to say a few words. Among many things he said was: I have visited 87 Lodges and expect to see more, and of what I have seen I am prepared to say that the A. O. U. W. has a class of warm-hearted and generous men who might be termed nature's noblemen, and that no other organization has been able to enlist in their ranks as yet, and never will, such material as we have. Wherever I have been, I have seen the "Promethean fire" of love—the warm-hearted greeting from a select class whom, in the gratitude of my heart, I never can repay. In the course of his very earnest and eloquent speech, he alluded to the report of the committee of California, No. 1, who had reported on this evening, "The mortgage is paid." As Bro. Barnes depicted the scene—the home mortgaged, the father in the insane asylum, and when the visiting committee, of whom the speaker was one, went to that humble home and presented the heart-stricken wife with the canceled mortgage, there was not a dry eye in that little home. After which he pictured, as only our Barnes can, several cases of accidental, unexpected deaths, that brought tears to the eyes of many. He then paid a complimentary tribute to the pioneer Lodges of this coast and the pioneer Workmen of California, whom he said will live in the remembrances of a great organization that was destined to outnumber any Order on this coast. It was a good meeting and a grand speech. The suggestion was made that there was some part of the programme which would be neglected if not attended to soon, whereupon the Lodge was closed and an adjournment made to the room below, where a collation and pleasant conversation was indulged in until the arrival of the last train for the city. It is always agreeable and interesting to meet the "old guards"—California, No. 1, and Occidental, No. 6, in which we find the best type of Workmen.

Lodge Locals.

Healdsburg, 31.

The evening of October 27th was the date set apart for a grand reunion of the members of No. 31. Owing to the inclement state of the weather, the programme was somewhat interfered with. The G. M. W. was to have delivered a public address, but missed the boat, and consequently was not present. However, Powell's theater, where the public exercises were held, was well filled with the families of the brethren. Members of the string band, under the leadership of Arthur Mulligan, were pressed into service, and a social dance was inaugurated in lieu of speaking. At an early hour the company was summoned to refreshments. The tables were loaded with tempting viands prepared by the good wives of the brethren. Upward of 80 couples were seated, comprising the beauty and elite of the town; but there was a great sufficiency for all, enough and to spare. L. A. Jordan, P. M. W., acting as master of ceremonies, announced the following toasts: "Healdsburg Lodge," response by A. G. Burnett, M. W.; "Our Order," responded to by H. H. Pyne, P. M. W.; "Sister Fraternities," responded to by Bro. D. C. Clark; "The Ladies," responded to by Bro. H. K. Brown; "Good of the Fraternities," responded to by J. S. Bell, P. M. W., and Bros. A. Wright, J. Luedke, L. A. Jordan; "Visiting Brothers," Bros. Jack Sibbald and C. F. Montgomery. Bro. Burnett, M. W., delivered the speech of the evening. Other responses, although short and unpremeditated, were happy and felicitous, and the occasion was enjoyed by all present. The affair was a pleasant success in every respect, and one that is to be long remembered.

Industry, 63.

The third anniversary of Industry, No. 63, Pleasanton, was celebrated in grand style on Friday evening, Nov. 11th. The members with visitors met in their Lodge-room, which is a large new hall, elegantly furnished and equipped, and Wm. H. Barnes, G. M. W., exemplified the secret work, when a procession was formed, and all marched to Rose hall, where a large audience was in waiting. Bonfires were built in the main street on the line of march, and it seemed the town was given over to the Workmen for this night. The public hall was tastefully festooned, with the word "welcome" over the platform. The master of ceremonies, C. E. Merwin, M. W., introduced Wm. H. Barnes, G. M. W., who carefully analyzed the workings of our Order, and by comparison with other organizations, conclusively proved that our system of beneficiary life policies will be kept up without any increase of expenditure beyond the present. As compared with life insurance, the Workmen pay less by half, but the difference is all they do pay goes directly to our beneficiaries. These great fraternal societies are making and molding the character of this great country, and the chief men of our nation received their first inspiration to become statesmen in the Lodge-room. His speech was interspersed with humorous hits and anecdotes, and listened to with the closest attention. E. M. Reading, P. M. W. and Secretary of the Guarantee Fund, made a short speech that was well received. This department was closed by the Grand Master in selections from his store of musical and literary specialties to an over delighted audience. The beautiful hall was then cleared and Blum's band discoursed sweet music to gay and festive dancers. At 12 o'clock the company marched to the dining-room, to a magnificent banquet that did honor to the Rose house of which Maj. C. L. Packard is proprietor. The bill of fare was first-class. Ice cream, oranges, etc, were served in profusion to a company of nearly 200, who expressed themselves as highly pleased with their feast. The members of Industry were assiduous in extending courtesies to their guests, of whom there was a good number in attendance from Livermore, Mission San Jose, San Ramon, and elsewhere. The beautiful town of Pleasanton, with a delightful climate and refined population, will be-

come one of the resorts for our city people. Already her enterprising citizens are making preparations to entertain them. Our genial Bro. Herman Deitjens, proprietor of the Dietjen hotel, is prepared to entertain his friends, and the Rose house, Major C. L. Packard, proprietor, is in condition to please our weary and overworked population.

Official visit to Elmira.

On Thursday evening, Nov. 10th, Wm. H. Barnes, G. M. W., paid an official visit to Elmira Lodge, No. 89. The exercises consisted of a public address in the Town hall, by the Grand Master and a few remarks by E. M. Reading, Secretary of the Guarantee fund. There was a full house of ladies and gentlemen, and the remarks of the speakers were well received. After the adjournment the brethren proceeded to the Lodge-room where the secret work was exemplified.

Sacramento, 80.

From some notes which our correspondent at Sacramento sends us we infer that this Lodge scarcely cares whether school keeps or not. They have a membership of 172 and on the night of his visit 11 members only were present. There was a total absence of the social feature. Nothing but business, and very short at that. It would seem as if the members were in a hurry to get out from the cheerless hall, for two minutes after the gavel fell only four persons were in the hall, including our reporter. The Lodge meets in the same hall as Union, No. 21. The Master Workman and officers are courteous, affable gentlemen, but the trouble is not with the officers, they have not the right kind of backing on the floor. Now brethren of Sacramento, No. 80, do you not feel ashamed to have such a report as this of your large Lodge. Supposing every Lodge in California was to do likewise, or if the few that are faithful in attendance at your meetings were to stop at home, how would it be? No quorum, no meeting, surrender of charter and final collapse of an Order which protects your families to the extent of $2,000 each. What blind fatuity must possess you to thus endanger your wives' and children's interest in the beneficent organization of which you are members. Let us hope you will see your duty, act energetically upon it, and fulfill the obligation which you cheerfully took when you were created Master Workmen.

Union, 21.

Our Sacramento correspondent sends us a few notes of this Lodge. Saturday evening is the night of meeting. The membership of the Lodge is 287, with an average attendance of 40. He reports the meetings as interesting. The principal questions before the Lodge were, obtaining employment for the unemployed brothers and attention to the sick. He says that the Master Workman, Bro. H. J. Norton, is a very popular and good officer, well posted, and the right man in the right place. The Lodge occupies a fine hall—Red Men's—corner Sixth and K streets. They have not adopted a system of volunteer entertainments as yet. He says many of the members look upon the Order as simply an insurance organization, nothing more. Granted, but we can assure those lukewarm brethren that their insurance would not amount to the value of the paper it is written upon if the fraternal spirit is not exemplified. It is singular how some men act so carelessly in such a vital matter. Our correspondent says that those who do the Lodge work of No. 21 appreciate the moral, mental and social part, and are choice spirits. He was cordially received, and reports the Lodge as growing slowly.

Valley View, 208.

Dr. A. J. Pedlar, Deputy, instituted Valley View Lodge, No. 208, at Selma, Fresno county, on the 22d ult., with 22 charter members, and installed Geo. B. Sargent, P. M. W.; S. L. Hogue, M. W.; J. E. Whitson, F.; B. W. Simpson, O.; J. Taft, Recorder; J. Fry, Rvr.; R. Balding, Fin.; P. F. Peck, G.; E. J. Henderson, I. W.; A. Barlow, O. W. Fresno county has done well. The first of last year there was only one Workman in the county; now there are three good Lodges.

Arizona, 1.

We learn from the Arizona *Journal* (Tucson), that the first social of Arizona Lodge, No. 1, was given Wednesday evening, Nov. 2d. At an early hour the *elite* of Tucson assembled, anxiously awaiting the rendition of the musical and literary programme. The *Journal* says: Mr. Henry Buehman, M. W., acted as president of the occasion, and introduced Moye Wicks, P. M. W., who made the "opening remarks." It is needless to say that the "remarks" were opening, not that they opened the door and drove the audience out, but that they served to open up an era of good feeling and universal joviality that expressed itself in a general and hearty applause. The object of the organization was sketched, a number of "hits" made, after which the orator retired amid the plaudits of the listeners. A piano solo followed, rendered by that versatile musician, Mr. Moses Katz. A double quartette then rendered "Die Capelle," and filled the room with an entrancing melody. R. C. Hopkins read a beautiful and appropriate poem entitled "Charity." Miss Mamie and Herbert Tenney gave a beautiful cornet and piano recital. A solo followed by Miss Esther Hancock which won an encore. Miss Louisa Brown then read a poem which was really a rythmic gem. "Music in the Air," followed, by the Tucson Glee Club. It was a creditable performance. Mrs. S. Ainsa gave a piano solo that secured her an encore. Mrs. Ainsa is a veteran musician, her execution is bold and her *technique* exquisite. Miss Marie Hittinger sang "The Grave on the Heath" with wonderful sweetness and simplicity. "Shamus O'Brien," that patriotic tale of the days of '98, was then retold by Willis P. Haynes, and told so well that the audience insisted upon his coming out again. Miss Josie M. Shrieber, Messrs. J. A. McFadden, H. C. Kiesel and G. W. Brown sang "Going to the Cotton Fields," after which the seats were removed from the hall and coffee served. As dessert to the intellectual feast, a social dance concluded the exercises, and the dashing blades and blushing maids tripped the light fantastic to their hearts' content. H. Buehman, J. George Hucke, Philip Schreiber and Dr. C. E. Holbrook were the very efficient floor managers.

List of U. S. Patents for Pacific Coast Inventors.

From the official list of U. S. Patents in DEWEY & Co.'s SCIENTIFIC PRESS PATENT AGENCY, No. 252 Market St., S. F.

FOR THE WEEK ENDING OCTOBER 25, 1881.

248,630.—TOILET ARTICLE — Arment & Scott, Dayton, W. T.
248,565.—APPARATUS FOR AMALGAMATING ORES—M. P. Boss, Oakland, Cal.
248,633.—HEADER—Ira H. Bradshaw, San Leandro, Cal.
248,664.—ARTESIAN WELLS—Benj. R. Norton, Alameda, Cal.
248,787.—ROCK DRILLING MACHINE—H. F. Parsons, S. F.
248,605.—ADDING MACHINE — Wm. Perry, Santa Barbara, Cal.
248,791.—QUARTZ MILL—A. E. Redstone, Oakland, Cal.
248,805 —COMBINED BLOWER, LIFTER AND GAS LIGHTER—R. W. Silvey, S. F.
248,683.—DERRICK WAGON—W. H. Worth, Petaluma, Cal.
248,642.—WATER JACKET FOR SMELTING FURNACE— Geo. W. Fogg, S. F.

NOTE.—Copies of U. S. and Foreign Patents furnished by DEWEY & Co., in the shortest time possible (by telegraph or otherwise) at the lowest rates. All patent business for Pacific coast Inventors transacted with perfect security and in the shortest possible time.

BOOKSELLERS, STATIONERS, ETC.—Messrs. Payot, Upham & Co., No. 204 Sansome Street, are one of the oldest, most enterprising and reliable firms in the book and stationery trade in San Francisco. Scientific, industrial and foreign publications are a specialty with them. They are also noted for their first quality of blank book and fine stationery line of goods.

OUR COMPLIMENTS are due Heald & Banks, machinists and model makers, No. 514 Commercial street, for the substantial manner in which they have made fast our sign in a difficult position.

Our Agents.

OUR FRIENDS can do much in aid of our paper and the cause of practical knowledge and science, by assisting Agents in their labors of canvassing, by lending their influence and encouraging favors. We intend to send none but worthy men.

G. W. MCGREW—Santa Clara county.
M. P. OWEN—Santa Cruz county.
J. W. A. WRIGHT—Merced, Tulare and Kern counties.
JARED C. HOAG—California.
B. W. CROWELL—Yuba and Sutter counties.
D. W. KELLEHER—San Joaquin, Amador and Calaveras counties.
A. C. KNOX—State of Nevada.
C. E. WETMORE—Alameda county.
E. A. WEED—California.

Attend to This.

Our subscribers will find the date they have paid to printed on the label of their paper. If it is not correct, or if the paper should ever come beyond the time desired, be sure to notify the publishers by letter or postal card. If we are not notified within a reasonable time we cannot be responsible for the errors or omission of agents.

Traveling Agents.

We want several canvassing agents who will make it their business to solicit subscriptions and advertising for our first-class progressive newspapers. Men of ability and experience can secure good pay and permanent employment. Send references and state your past occupation, etc., to the publishers of this paper.

COMPOUND OXYGEN
NOT A DRUG
A NEW TREATMENT for Consumption, Asthma, Bronchitis, Catarrh, Dyspepsia, Headache, Debility, Neuralgia, Rheumatism, and all Chronic and Nervous Disorders.
ACTS DIRECTLY upon the great nervous and organic centres, and cures by a natural process of revitalization.
HAS EFFECTED REMARKABLE CURES, which are attracting wide attention.
HAS BEEN USED BY Rt. Rev. John J. Keane, Bishop of Richmond, Va., Hon. Wm. D. Kelley, T. S. Arthur, and others, who have been largely benefited, and to whom we refer by permission.
IS STRONGLY ENDORSED: "We have the most unequivocal testimony to its curative power from many persons of high character and intelligence."—*Lutheran Observer.* "The cures which have been obtained by this new treatment seem more like miracles than cases of natural healing."—*Arthur's Home Magazine.* "There is no doubt as to the genuineness and positive results of this treatment."—*Boston Journal of Commerce.*
THE OXYGEN HOME TREATMENT contains two months' supply, with inhaling apparatus and full directions for use.
SENT FREE: a Treatise on Compound Oxygen, giving the history of this new discovery and a large record of most remarkable cures. Write for it. Address
Drs. STARKEY & PALEN,
ADMINISTERED BY INHALATION. 1109 and 1111 Girard St., Philadelphia, Pa.

Depository on Pacific Coast.
WE HAVE ESTABLISHED A DEPOSITORY OF OUR COMPOUND OXYGEN HOME TREATMENT at San Francisco, Cal. This will enable patients on the Pacific Coast to obtain it without the heavy express charges which accrue on packages sent from Eastern States.
All orders directed to H. E. MATHEWS, 606 Montgomery street, San Francisco, Cal., will be filled on the same terms on which we fill orders sent directly to our office in Philadelphia.
Patients ordering from our depository in San Francisco, should, at the same time, write to us, and give a statement of their case, in order than we may send such advice and direction in the use of the Treatment as their special disease may seem to require.

A NOVEL FISHING DEVICE.—A new and very destructive fishing device is reported from the Columbia river, Oregon. It consists of a jetty of rocks built out from a point on the shore of the river, outside of which is a planked sluiceway, in which an undershot wheel with large tank buckets revolves. The sluiceway is built when the river is at its lowest stage of water, and the wheel is hung so that it can be raised or lowered as may be desired according to stage of water. The instinct of the salmon is to run up the river alongside of the banks, instead of mid-channel. By this the fish can take advantage of the eddies below jutting points of land. On these projecting points the Indians have, from time immemorial, taken salmon in large numbers by using dip nets. The jetty, built out from the point, makes a larger and longer slackwater behind it, and the salmon rounding the point rush into the sluiceway to get up the river. In the sluiceway the wheel, which revolves in the current, is guaged so as to sweep within a foot of the bottom, and the salmon are scooped up in the buckets, which latter let out the water as they ascend. On the wheel descending the fish are thrown out into a trough or gutter leading to a pen below, where they remain until taken away to be canned. The arrangement of the sluice, wheel, etc., is a most successful one, the catch of salmon running from 1,500 to 4,000 per day. There is virtually no expense in taking the fish, save attending to the pen. A fatal objection to this device arises from the fact that it scoops up and kills little fish as well as big ones, and as yet no provision is made in connection with it for the escape of the former. Unless the the threatened wholesale killing of salmon too small for canning is prevented the supply will be entirely cut off, and the entire canning industry destroyed, if the wheel comes into general use.

STORAGE OF POWER.—The invention of the French electrician, Faure, for the storage of electricity, seems to have opened up a new field for inventors. Our own electrician, Brush, has already presented to the world a device for storing electricity, which, it is claimed, is much superior to that of Faure. Various devices for the production and storage of electricity by wind power, by ocean wave power, and by tidal power, have been suggested, and are now engaging the attention of inventors.

WEARING QUALITIES OF ALUMINUM.—The *Manufacturer and Builder* furnishes the following useful information under the above head: There is no objection to aluminum for such domestic uses as spoons and the like, on the score of its wearing qualities, which are comparatively very good. This fact has been experimentally verified by Herr Winkler, a German chemist. To test in practice the wearing qualities of aluminum, this chemist had made a number of spoons, respectively of silver, pure aluminum and German silver. A spoon of each of the metals above named was accurately weighed on February 1, 1876, and all were put into use under precisely similar conditions for the period of one year. They were placed in the same soups, sauces, sour salads and the like, and the servant whose duty it was to wash them, was given strict orders to clean them each in the same manner. The cleaning consisted substantially in wiping them with a woolen cloth, washing them in hot water, and then rinsing them in cold. Soda was often put into the hot water, and the spoons were thus daily subjected to hot acid and alkaline solutions. The color of all the metals altered in time; the aluminum lost its luster and became of a dull, bluish-gray color; the German silver also degenerated to a grayish yellow tint; the silver lost only in color, but its luster was not impaired. As regards mechanical abrasion, no marked difference was perceptible, although after a year's use the aluminum showed distinct traces of wear at the edges. By accurately weighing the spoons at the end of the period named, the fact was established that the loss of weight suffered by the spoon of silver was 0.403%; by the aluminum spoon, 0.630%, and by the German silver spoon, 1.006%. From the above facts, it appears for such domestic articles as spoons, aluminum stands wear very well, though not so well as silver.

TO BORE HOLES IN PORCELAIN.—It is some times necessary to bore one or more holes in porcelain, but the usual way of doing this is not easy. If, however, an ordinary drill be hardened and kept moist with oil of turpentine, it will easily penetrate the porcelain. The drill commonly employed in connection with scroll-cutting machines answers very well.

CARBUNCLES.—It is recommended to treat carbuncles and boils with pure carbolic acid, injected hypodermically in sufficient quantities to thoroughly saturate the swelling.

IMPROVING THE SAN JOAQUIN.—C. E. Rhodes, a civil engineer attached to the United States Engineer Corps in this State, has completed a survey of what is known as the Devils Elbow, on San Joaquin river, and reported to Colonel Mendell. The object of the survey was to furnish the latter named officer with data to enable him to obtain the necessary appropriation to cut a navigable channel through the bend next year. Two bends in the river have already been cut off, and steamers ply daily through the new channels. The first is at the Lone Tree bend, and the second at the bend above Wakefield. These cuts are each 100 ft. wide, and are dredged to a depth of 10 ft. at the lowest low water during the season. Mr. Rhodes has had 109 snags removed from the San Joaquin river, between Grayson and San Joaquin City, and has built several wing dams to rectify the channel, and has thereby increased the depth of water in places from one to five ft. On Monday next he commences an examination of the Mokelumne river from Woodbridge westward to ascertain what improvements are needed, to insure the uninterrupted navigation of that stream.

TO PREVENT FROST ON WINDOWS.—A British Columbia subscriber inquired last week how he could prevent ice forming on the inside of his windows in cold weather. A druggist of this city says if saucers or other shallow vessels, containing sulphuric acid, are placed in various places in the room, the acid will absorb nearly or quite all the moisture from the atmosphere, leaving none to condense upon the windows.

SOAP BUBBLE BALLOONS.—M. Delon, of Paris, produces miniature balloons by means of ordinary gas conducted through a caoutchouc tube and clay pipe to glycerine soap solution. A small disk of thin paper, with fine wire from its center to a little paper car with aeronaut figures, is connected to the bubble when it begins to swell, the disk being attached by capillarity to the part where the drop forms. The detached bubble rises with its car.

THE PANAMA CANAL SCHEME.—The reports in regard to the prospects and progress of the Panama canal scheme, are quite unsatisfactory and somewhat conflicting. There seems to be abundant preparation, but very little actual work. At one time we are told that the cost of excavation will greatly exceed the estimates, and then again we read that recent soundings show immense deposits of clay, where hard rock was supposed to exist, thus greatly reducing the original estimates. And now we are told that "the Brussels excavators employed, work expensively, except in soft mud, and that the excavation at one of the new villages is found to cost actually $1.25 per cubic yard, instead of three cents, as originally estimated." At a recent date, 70 of the total number of workmen had already died, and there was a great demand for hospital accommodations. This latter convenience was being largely extended, including graveyard conveniences. Altogether, it would seem that the prospects of this magnificent engineering scheme are anything but brilliant.

IMITATION AMBER.—Considerable quantities of beautiful objects of artificial amber are now being produced in Vienna. The substance employed in its manufacture is chiefly colophony, or resin, obtained by decomposition of turpentine, though several other ingredients are used to give it the requisite qualities. The imitation is said to be perfect, and the production has even the electric properties of amber. Ingenious manufacturers have even introduced into the substance foreign bodies, insects, etc., to make the similarity more striking. Natural amber requires a temperature of 285° to 287° C. to fuse it, while the imitation becomes liquid at a much lower temperature.

TO PROTECT LEAD PIPE from the action of water, form on the inside surface an insoluble sulphide of lead, by filling the pipe with a warm and concentrated solution of sulphide of potassium or sodium. In 15 minutes pour out the solution and allow the pipe to dry.

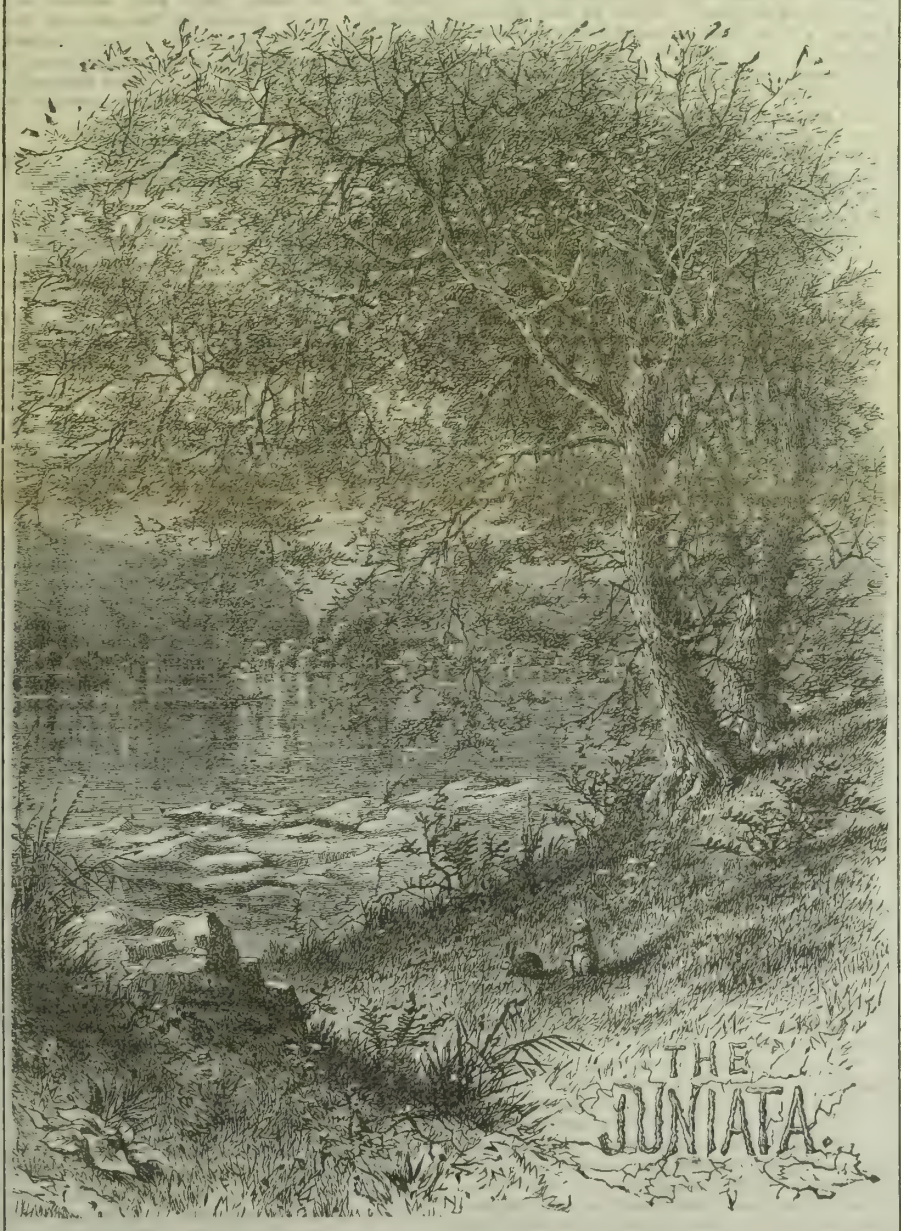
The Juniata.



Many a school-boy of the last generation will find his ear ringing with schoolhouse songs at the thought of "The Blue Juniata." Our illustration fitly portrays one of the many entrancing scenes along the gentle river. The location is on the line of the Pennsylvania railroad, and travelers on that line can recall the landscape. Massiveness, softness of outline, and variety, are the distinguishing peculiarities of the Juniata scenery. The miniature river, in its course of 100 miles through the numerous outlying mountains, has apparently overcome the obstacles in its way by strategy as well as by power. At many places it has dashed boldly against the wall before it, and torn it asunder; at others it winds tortuously around the obstructions—creeping stealthily through secret valleys and secluded glens. At some points the mountains seem to have retired from the attacking current, leaving numerous isolated hills standing, as sentinels, to watch its progress. But the severed mountains, the towering embankments, and the sentinel-like hills, are all toned into form and molded into shape by the action of the elements and the foliage of nature, leaving no abrupt precipices and but few naked rocks to mar the uniform beauty. The valleys and many of the hills are brought under cultivation, and some of the latter rise in the distance, presenting alternate squares of yellow, green and brown, showing the progress of agricultural industry, while their summits are crowned with clumps of forest trees, indicating the luxuriance of the growth before the march of civilization invaded it. Every hour of the day—every change of the season—gives new tints to these mountains and valleys. The morning mist often shrouds them beneath its veil; and as this is penetrated and dispersed by the sun, cloud-like forms sail away toward the sky, pausing at times amid the higher summits as if to rest before taking their final flight to join their sisters in the illimitable firmament. The tints of evening spread over them golden and purple halos, while deep and dark shadows sink into the water and creep up the wooded embankments. Spring clothes the entire landscape in a tender green. Summer deepens this into a darker tint, and intersperses it with the yellow of the ripening harvest. Autumn scatters its gems over all, lighting up the forests with many bright hues of changing foliage; and winter brings its pure mantle of white, over which tower the ever-verdant pines, or repose dark beds of rhododendrons.

BRO. JOHN D. LUDWIG, M. W. of Anchor Lodge, No. 12, Mason Valley, Esmeralda county, Nev., writes us that the Lodge is growing in numbers, and the best citizens of the Valley are becoming members. All that join are well pleased with the Order.

Two assessments in the Supreme Lodge jurisdiction for the month of November.

A Defect in the School System.

In the Nov. number of the "Pacific School and Home Journal," Dr. Walter Lindley, a member of the Los Angeles Board of Education, contributes an article entitled "A Defect in the School System of California." The Doctor holds that it is wrong to place children who are bad in morals and manners among those who are not. It often happens that teachers

who are kind of heart, and also owing to the solicitations of the parents of incorrigible boys and girls, admit them when it is positively harmful to the other children's morals to be their associates. What is the teacher to do? If the boy is left to roam the streets, he joins the army of hoodlums, and the end is easily forecasted. The girl also sinks rapidly in iniquity. As a remedy for this the Doctor suggests a State reform school. He would have the State secure two tracts of land where boys and girls from 10 to 15 years of age could be sent by the school trustees, and Justices of the Peace, when such children were proved to be injurious to the morals of a school or community. In the girls' reform school could be taught the rudiments of an English education, physiology, botany, industrial drawing, cooking, sewing, and, if they showed a special talent, gardening, bookkeeping, butter-making and raising of poultry. In the boys' reform school could be taught all the above, the cultivation of fruit trees and the vine, having shops where each pupil could learn the trade to which he appeared especially adapted. One of these schools could be run for $3,400 per annum, and in the course of time would be self-supporting, as many in the Eastern States are. It would be a great blessing if we could send the vicious youngsters of a community who loaf on our streets, haunt disreputable houses and contaminate younger children to a home where they could be given a good English education, taught good morals and a means of learning an honest livelihood.

ELECTION OF OFFICERS.—As the time approaches for the nomination and election of officers, we feel it our duty to call the attention of our brother Workmen to the necessity of attending to this important duty and see that none but those who are qualified and whose business will admit of their attending Lodge meetings regularly are put in the important positions as officers of a Workman Lodge. We shall take occasion, from time to time, to recognize efficient service as an officer by publishing the same in the WATCHMAN.

Crime and Criminals.

The late convention held in this city for the purpose of devising or suggesting means for a reform in the system of conducting the prisons of this State has served to draw public attention to this important matter. The various ladies and gentlemen who read papers before the convention evidently had prepared their articles with some care, many of them particularly showing a profound knowledge of that science which is called penalogy. It is to be hoped that out of the mass of opinions offered something of real benefit will accrue. That what is good in the several articles as written by their authors will be carefully selected and then incorporated into that which will serve to not only protect society from the evil-inclined, but also when caught and punished, to lead to a reformation by showing the futility of pursuing a course which is contrary to law, good morals and the welfare of society.

Once a criminal always a criminal seems to be the rule with a great many people. The present spirit of the age has considerable to do with this. When the prison bars close behind a culprit, all hope is left behind, for he knows that when his term has expired and he again seeks to win his way in the world honestly, the stinging term of convict is likely to be flung in his face, thus crushing out all desire to be a respected member of society. It is only a man endowed with extraordinary moral courage who can stand up under the attacks he will be subjected to. The brand of degredation is upon him, every man's hand is against him, he retaliates and is again placed in the company of felons, to return again still more hardened and waging a relentless war against what he terms the injustice of society, who would not allow him a chance to be a good man.

There are others who view lightly a term within the prison walls of this State. They are well fed, well housed and enjoy many privileges which makes their term of incarceration one simply of no punishment at all. They are, so to speak, "the guests of the State," and right honorably does the State treat them. There is no reform about the matter. On the contrary in nearly all cases they come out more accomplished in all arts of villainy. And it is this very fact which creates a distrust among respectable people to trust anybody who has ever been within the prison walls. It is so hard to distinguish between the good and the bad that all are classed alike. Those who desire to reform are mistrusted—all are placed in the same category. Now if a prison was a place where there would be an honest attempt on the part of its conductors to reform the life of the convict; where no favoritism would be shown—all treated alike; where the good would be separated from the bad, the young from the old; where close confinement should be the general rule—then there might be some change in public sentiment, and those wishing to become respected members of society would be aided to do so. But while the present state of prison discipline is maintained there is no hope of ever changing the current of public thought, and have society extend to the discharged convict a helping hand.

It seems evident that something good to society will result from the late conference, and it is to be hoped that whatever action is taken will be wise and just. There is a pressing need for improvement.

Home Miscellany.

Twilight Musing.

The toil of the day was ended,
And I turned for a little rest,
But a feeling of sadness lingered
Like a pall o'er my weary breast;
The thought that my lot was a hard one
Came up—but I turned it aside,
While I groped in the dark for the promise
That in some way the Lord would provide.

With burdens so great and so many,
And the strength of a broken reed,
I asked, in my anguish of spirit,
O how can a mortal succeed?
I knew that to groan was not manly,
To distrust, I knew was a sin,
Yet still the dark billow came o'er me
With naught to resist it within

O'erwhelmed with a sense of my weakness,
I ventured to lift up my eyes,
Through the mist that was gathering o'er them,
To the glorious light of the skies.
The sun had passed over the summit,
That stands by the western main,
The foothills, all draped in the shadows,
Stretched out like a vail t'ward the plain.

The mountains encircling the valley,
Enrobed in their purple and blue,
Proclaimed as of old the sweet promise,
That God to his people is true.
"His righteousness like the great mountains,"
Came down, as it seemed, from the hight
Where the last ray of daylight lingers,
And the dawning first heralds the light.

In silence I gazed at the wonders
Displayed by the changing light,
As the earth beneath grew darker,
And the heavens above grew bright,
Till filled by the inspiration,
As upward it bore me along,
Till the pall from my heart was lifted,
And my groaning was tuned to a song.

—G. W. McGrew, Los Gatos, Cal.

The Mistake About Hamp See.

"Hamp See a dunce! Well, maybe so; but arter what I seed, it 'ud take a smarter schoolmaster than you to make me think so."

It was old Riley Vaughn who spoke, and although old Riley had no education, his hard sense and sound judgment were respected by all the men who sat there in the village postoffice waiting for the mail. He had grown prosperous by dint of hard work and good judgment, and his neighbors were accustomed to ask for and respect his opinions.

"I did not say precisely that, Mr. Vaughn," replied Mr. Penruddock, the schoolmaster. "I only said that my best efforts to educate the boy were rendered futile and nugatory by reason of his inexplicable inability to grasp and retain so simple a thing as the accidence of the Latin verb."

"That means in plain English that he ain't got no grip on what you teach him, don't it?" asked Riley.

"Yes, that is what I mean," replied the schoolmaster, with something like a shudder at old Riley's English. "But I will make an honorable exception in the matter of mathematics. He seems instinctively to grasp arithmetical principles."

"Yes," drawled old Riley, "one o' your boys told me Hamp could figger out how long it 'ud take fer a cistern to get full ef there were three pipes o' different sizes a-runnin' into it, an' two others o' still different sizes a-runnin' out."

"Yes, he is an expert in the practical applications of arithmetic; and yet even in arithmetic his standing is not good, because he seems incapable of mastering the exact terms of the formulæ and rules."

"Well, now, look here," said old Riley, rising and striking the counter with his big fist; "it's jest come to this here; the boy ain't got no grip on your words an' things, but he's got a good grip on the idees an' principles, an' its my belief that's the inside o' sense. I don't want to be unnecessarily offensive, but you and all schoolmasters like you ought to teach parrots. They don't want idees; they just want the words, an' that's your notion o' learnin'. That's the trouble o' this here country down here; men learn words an' kin make speeches, but they can't do nothin'. Now I have seed that boy Hamp See do what nary a man in this country could do. I bought the fust reapin' machine as was ever seed in these parts, an' when it come it was all to pieces, an' packed in boxes. I sent one arter another for all the blacksmiths an' wheelwrights an' carpenters hereabouts to set the thing up, an' I'm blest ef one of 'em could make out which end o' the thing was foremost. Not one on 'em could put any two pieces together. That 'ere boy hung around all the time, with his forehead creased up like, an' finally he says to me, says he, 'Mr. Vaughn, let me try.' 'Well, try,' says I; 'an' ef you get her together I've got a five-dollar bill fer you.' Maybe you won't believe it, but afore noon that very day, that there reaper was a-reapin' wheat like a dozen hands. The boy just seed right into the thing. Now I say ef he's a dunce, the sooner most people in these parts loses their senses an' get's to be dunces, the better 'twill be for all concerned." And with that old Riley stalked indignantly out of the postoffice.

Notwithstanding all that old Riley could say, however, public opinion was against Hamp See. It was certain that he was dull in his lessons. He could not keep up with Mr. Penruddock's classes, and instead of studying his Latin verbs, he was perpetually interrupting the school by asking Mr. Penruddock to explain things like thunder and lightning, and the presence of shells in the rocks on the mountain, and the curious way plants have of taking care of themselves—things which had no relation to the work of the school. It was agreed that Riley Vaughn could not know anything about education, because he was not himself educated. It was even said—and this came to Riley's ears—that he was prejudiced against education. Even Hamp's mother was discouraged. Hamp was always "pottering," she said, instead of attending to his books.

"Why," she said, "he's been fooling with a spring on the hill back of the house the whole season through. He's laid pipes to bring the water down here, and now he's turned the whole house into a mill." Then she would show her visitor what Hamp had done. He had constructed an ingenious water-wheel with which to make the most of the power afforded by the spring, and had set it at a variety of tasks. A stretch of line shafting passed under the floor of the house, and bands passed through the floor to the churn, and the sewing machine, and even the sausage chopper could be attached at will. "I don't deny that it's handy, and saves work," said his mother. "And now he's made a sort of fan in the dining-room, and has set that going, too, so that it keeps the flies off the table. If we had a baby in the house, I believe he'd make the water rock the cradle. But it's discouraging about his studies. Mr. Penruddock is in despair, and says he don't know what is to be made of the boy."

The summer proved to be a very dry one, and the gardens especially suffered for water. When the people began to complain Hamp had an idea. He always had an idea when an emergency arose. He went into his mother's garden and worked all the day, digging a trench down the middle, and making little trenches at right angles to the main one, so that each bed was surrounded by them, and the larger beds crossed as well. He was very careful to keep all these trenches on one level. When he had finished, he laid a drain from his water wheel to the main trench, so that the waste water, after turning the wheel, was carried into the garden and emptied into the trench. Little by little the main trench filled; then the water trickled into the smaller trenches, and as the spring from which it came was a never-failing one, the garden was well supplied with water throughout the dry, hot summer, and such a garden nobody in that region had seen that season.

People said that Hamp See certainly was a handy sort of boy; but they were sure to add, "It's a pity he is so dull."

One day old Riley Vaughn was offering extravagant prices for horse, mule or ox teams to haul stone. He had taken a contract to supply from his quarry the stone for the railroad bridge over Bushy Run, and now the time for delivery was near at hand, and no teams could be had. All the horses were at work on the crops, and it began to appear that old Riley must either lose money on the contract by hiring horses and mules and teamsters at ruinous prices, or forfeit the contract itself. He tried in every direction to get mules and wagons, offering twice the usual wages, but still he could get very few. He was in real trouble, with a loss of several thousands of dollars threatening him.

One day, Hamp, who knew what trouble Riley was in, went down to the creek, and cutting several twigs began setting them up at a distance from each other, and sighting from one to the other. The few teamsters who were at work watched him curiously, but could not make out what he was doing. He went up the creek with his sticks, moving one of them at a time, and always sighting from one to another, or rather, from one over another toa third. In this way he worked up to the quarry, which was immediately on the creek, nearly a mile above the point where the bridge was to be built. When he had done he walked back, examining the banks as he went. Then he presented himself before Riley Vaughn.

"Mr. Vaughn," he said, "I've an idea that will help you out of your difficulty."

"Will it hire teams to haul stone?" asked Riley.

"No; but it will enable you to haul stone without teams."

"If it will—Well, let me hear what it is," said Riley, changing his purpose while speaking.

"Raft the stones down," said Hamp.

Now, look a here, Hamp See," said old Riley, "I've stood up for you, said you wan't no dunce when everybody else said you was; but this here looks as ef they was right an' I was wrong. How in natur kin I raft down a creek that ain't got more'n six inches o' water in it, a-bubblin' around the stones of the bottom."?

"Well, you see," said Hamp, "I've leveled up from here to the quarry, and there's only two ft. fall or a little less, and the banks are nowhere less than five ft. high; and so, as there is a good deal more water running down in a day than anybody would think, it's my notion to build a temporary dam just below the bridge—you've enough timber and plank here to do it with two hours' work of your men, building it, say six ft. high, there where the banks are closest together. Before noon to-morrow, the water will rise to the top of the dam, and run over. When it does you'll have six ft. of water here and four ft. at the quarry, and your men can push rafts down as fast as they can load them."

"How do you know there's only two foot fall?" asked old Riley, eagerly.

"I've leveled it," said Hamp.

"That is, you figgered it out with them sticks?"

"Yes."

"Are you sure you've got the right answer?" asked the old man, with eagerness.

"Perfectly sure. You see it's simple. I plant my sticks———"

"Never mind about how you do it; I can't understand that ef you explain it; but look me in the eyes, boy. This thing means thousands of dollars to Riley Vaughn ef you've got your answer right. I kin understand that much; an' ef you've worked out this big sum right for me; I'll choke the next man who says you're a dunce jest kase you don't take kindly to old Penruddock's chatterin' sort o' learnin'. I'll do it or my name ain't Riley Vaughn, an' that's what I've been called nigh onto fifty-five year now."

Old Riley was visibly excited. He called all his men to the place selected, and set them at work building the dam, while Hamp looked on, and occasionally made a suggestion for simplifying the work. The dam was finished at 3 o'clock in the afternoon, and at 6 o'clock the water had risen two ft six inches, while the back water had passed the quarry.

"There!" said Hamp, "that proves my work. The water is level, of course, as far up as back water shows itself, and we have six inches of back water at the quarry, and two ft. six inches at the dam; so the fall is two ft."

"It looks so," said Riley, who was watching the rise of the water. The workmen had gone home, all of them convinced that this attempt to back the water a mile up the creek was the wildest foolishness; but old Riley and Hamp waited and watched.

"It doesn't rise so fast now," said Riley.

"That's because it has a larger surface; but it still rises, and the surface won't increase much more now, as there's a steep place just above the quarry, and it can't back any further up."

The two waited and watched. Midnight came, and the measurement showed three ft. six inches depth at the dam. Still they waited and watched. At 6 o'clock in the morning the depth was four ft. two inches. Then Riley sent a negro boy to his house with orders to bring "a big breakfast for two." At 7 o'clock the breakfast arrived, and the measurement showed 4 ft. 3½ inches.

"It's risin' faster again," said Riley.

"Yes; the level is climbing up the bluff banks now, and not spreading out as it rises," said Hamp.

At nine o'clock the depth was four ft. eight and a half inches, and the men at the quarry had a raft ready and were beginning to load it. Ten o'clock brought four ft. 11 inches of water and at noon there were five ft. four inches.

"I've missed it a little," said Hamp. "I said the water would run over the dam by noon, and it has still eight inches to rise before doing that."

"Well, that sort of a miss don't count," said Riley. "You've worked the sum out right, anyhow, an' the water is deep enough for raftin' an' still a-risin'. It'll go over the dam in two or three hours more, an I'll do what I said; I'll choke any man what says John Hampden See's a dunce or anything like it. An' that ain't all," said the old man, rising and striking his fist in the palm of his hand. "They've been sayin' that ole Riley Vaughn didn't valley edication; now I'll show 'em. I'm goin' to make this dam a permanent institution. I'm goin' to build Vaugn & See's foundry an' agricultooral implement factory right down the creek there, an' put a big lot of improved machinery in it; an' I'm a-goin' to send my pardner, John Hampden See, off next week, to get the rest o' his edication, where they sell the sort o' edication as is good for him—not a lot o' words, but principles an' facts. You tell your mother you're a-goin' to New York right away, boy, an' 'at ole Riley Vaughn's a-goin' to foot all the bills outen your interest in the comin' factory. You'll study all sorts o' figgerin' work an' machine principles in the big school in New York what's called the school o' mines, an' then you'll go to all the big factories an' things."

This scheme was carried out. Hamp spent three years in study, and returned an accomplished mechanical engineer. He went into the factory as old Riley's pardner, and his work has been to improve machinery and processes. The firm own many patents now on things of his invention, and the factory is the center of a prosperous region, in which Hampden See is an especially respected citizen.—*George Cary Eggleston.*

A Natural Death.—Natural death is to die sweetly, without a sob, a struggle or a sigh. It is the result of a long life of uninterrupted health; of a long life of "temperance in all things," and such a death should be one of the ends and aims of every human being, so that we may not only live long, but in that long life, be able to do much for men and much for God. The love of life is a universal instinct; life is a duty; its peril or neglect a crime. We are placed on earth for a purpose; that purpose can be none other than to give us an opportunity of doing good to ourselves and others; and to be anxious to be "off duty" sooner than God wills, is no indication of true piety. The good man has one ruling, ever-present, desire, and that is to live as long on the earth as his Maker pleases, and while living, to do the utmost he can to benefit and bless mankind, and to accomplish a long, active and useful life. The study how to preserve and promote a high degree of bodily health is indispensable. And it seems to have been ordained by a Providence both kind and wise, as a reward of a temperate life, that such a life should be largely extended; that its decline should be as calm as a summer's evening; as gentle as the babe sleeps itself away on its mother's bosom.

Girls as Gardeners.

A correspondent of the London *Garden* writes the following: It has often struck me as a real waste of physical power to see a six-foot man sitting on a bench sponging plants, or pricking out seedlings, or putting in cuttings, or doing, in fact, many things that girls or women could do quite as well, and in some cases better. For instance, in handling small seedlings their generally taper fingers could manipulate them much better than the often unwieldly paws of the stronger sex, and most assuredly where plant-cleaning is in question, their touch would be gentler and progress quite as rapid. This is no new theory, but one which has been practiced here for a long time. I use a large amount of female labor here; in fact, everything that can be is performed by them. I have one girl who for six or seven years has had sole charge of a house 100 ft. long. In this house the bulk of the indoor propagating is done. She puts in all and makes most of the cuttings, and she pots off all, having a little boy to help her. Not only does she pot off small plants with rapidity and in good style, but pots on to specimen size, mixes her own soil, waters, and does all the work of the house of every kind. I have no one here who can surpass her at rapid potting, nor do I see any difference between the general style and appearance of the plants in this house and in those under more muscular supervision, unless, indeed, that it is rather the best of all.

Hints to Men and Women.

In a recent lecture in San Francisco, Dr. Anna M. Potts explained how men and women suffer by violating the laws of their muscular system. She also treated with humorous satire many of the absurdities that women adopt in dress, for fashion's sake, sacrificing health for a stylish appearance. The question with ladies now is not "Who am I?" or "What am I?" or "What am I for!" but "How do I look?" To the habit of wearing their hats and bonnets in church, at lectures or at the play, as well as out of doors, weighing themselves down with masses of false hair, big enough for a hen's nest, and tying their bonnets down close to their heads with the pressure equal to five lbs. in weight, she attributed the headaches that so many of the ladies complain of every day. She said that gentlemen are in a great measure responsible for the absurdities in female fashion, as they encouraged the women in adopting and adhering to them, and it was the work of the gentlemen to reform them.

Some papers are not of much account as to appearance, but I never took one that did not pay me, in some way, more than I paid for it. One time and old friend started a little paper away down in southwestern Georgia and sent it to me, and I subscribed just to encourage him, and after a while it published a notice that an administrator had an order to sell several lots at public outcry, and one of the lots was in my county. So I inquired about the lot, and wrote to my friend to attend the sale and run it up to $50. He did so, and bid me off the lot for $30, and I sold it, in a month, to a man it joined for $100, and so I made $68 clear by taking that paper. My father told me that when he was a young man he saw a notice in a paper that a school teacher was wanted away of in a distant county, and he went there and got the situation, and a little girl was sent to him, and after a while she grew up mighty sweet and pretty, and he fell in love with her and married her—now, if he hadn't taken that paper, what do you reckon would have become of me? Wouldn't I have been some other fellow, or may be not at all?—*Lowell Courier.*

A New Feminine Necessity.—Among the latest Parisian novelties is the advent of the paralune as a supplement to the parasol. The rays of the moon are quite as dangerous as those of the sun, say the chroniclers of the novelty. One can be moonstruck just as one can have a sunstroke. If the sun browns the skin, the moon dries and wears it out, just as it affects the surface of stone. Therefore, the ladies who are staying at country houses where long country walks at night are often arranged, that one may enjoy the moonlight, should remember to secure one of the dainty paralunes made in gauze, lined with red silk, which are declared to be the last effort of fashion.

Observations About the Baby—The baby does not belong to the animal kingdom; the animal kingdom belongs to him. He is a king. In fact, he is always aching. However, a baby is often spoken of as "this wheat creature," which is why they cradle him. You can't shock him. He is not a creature comfort. The baby is sometimes called an infant, in fanciful allusion to infantry, which he is thought to resemble, because he is generally found with arms about him. Bless the baby!—*Boston Transcript.*

An officer of an army relates that upon one occasion after a charge upon the enemy's works, a fierce encounter and a fall back for reinforcement, a bright young Irish soldier was found to have a rebel flag captured from the foe. Approaching him he said: "I'll send that to the rear as one of our trophies; give me the flag." "Sure, I'll not give it ye," said Pat; "if ye are wanting one, there's plinty av 'em behind that ridge over beyant where I got this; sure ye can go and get one for yerself."

For our Boys and Girls.

Our Puzzle Box.

Numerical Enigma.

I am composed of sixteen letters.
My 8, 2, 15, 7, 14 is one of the United States.
My 6, 13, 12, is anger.
My 1, 9, 15, 11, was a murderer.
My 16, 5, 10, is a division of time.
My 3, 14, 2, 4, is a kind of fuel.
My whole is the name of a distinguished novelist.
LEO P.

Decapitations.

1. Behead a testament and leave sick.
2. Behead a kind of fuel and leave to consume.
3. Behead part of the head and leave water falling in drops.
4. Behead slang speech and leave an insect.
5. Behead a period of time and leave a personal pronoun.
F. E. M.

Hidden Towns.

1. Sleep is necessary to health.
2. He sent Mr. Day to Newbury after stock.
3. Well, sir, what would you have?
C. B. A.

Cross-word Enigma.

My first is in hammer, but not in drive;
My second is in struggle, but not in strive;
My third is in six, but not in four;
My fourth is in latch, but not in door;
My fifth is in iron, but not in stone;
My sixth is in talk, but not in tone;
My seventh is in flake, but not in snow;
My eighth is in wind, but not in blow;
My ninth is in gravel, also in sand;
My whole is a far distant land.
THEODORE.

Curtailments.

1. Curtail a heavy weight and leave a preposition.
2. Curtail a market and leave to injure.
3. Curtail a portion and leave of equal value.
4. Curtail a beverage and leave to achieve success.
5. Curtail possessing heat and leave a contest.

Answers to Last Puzzles.

NUMERICAL ENIGMA.—Be just and fear not.
TRANSPOSITIONS.—1. Time, item. 2. Hose, shoe. 3. Earl, real. 4. Eat, tea. 5. Arm, mar. 6. Eli, lie. 7. Rood, door.
CROSS-WORD ENIGMA.—Chicago.
FLORAL ACROSTIC.—Iris
Night-blooming cereus;
Daphne odora;
Ivy;
Azalea;
Nettle;
Jacob's ladder;
Acacia;
Side-saddle flower;
Myrtle;
Iceland moss;
Nightshade;
Evergreen thorn.
CONUNDRUMS.—Because it is always in the midst of fight.

To Sis.

Come here, Sis, and sit down beside me, and let me give you a little talking to. Sit clear to the other end of the sofa; it makes more room for my gout and corns, besides being a good habit for a young lady to become addicted to. Always pander to this habit, and you will in time find yourself walking through green meadows and beside the still waters of self-respect. You may be walking alone, to be sure, but you will have fewer lawn dresses to do up Monday mornings. I wish to speak to you for your mother. It may be you have noticed a careworn look on her face lately. Of course, it has not been brought there by any act of yours, still it is your duty to chase it away. I don't mean for you to run at it, and shake your skirts and tell it to "Shoo," as you would a hen, nor do I expect you to get on the other side of the fence and throw old oyster cans and pieces of barrel staves, as you did at the cow yesterday. But I want you to get up to-morrow morning and get breakfast, and when ma comes down and begins to express her surprise go right up to her and kiss her on the mouth. You can't imagine how it will light up her dear old face. Besides, you owe her a kiss or two. Away back, when you were a little girl, she kissed you when no one else was tempted by your fever-tainted breath and swollen face. You were not as attractive then as you are now. And all through those years of childish sunshine and shadow she was always ready to cure by the magic of a mother's kiss the little dirty, chubby hands, whenever they were injured in those first skirmishes with this rough old world. And then the midnight kisses with which she has routed so many bad dreams, as she leaned over your restless pillow, have all been on interest these long, long years. Of course, she is not so pretty and kissable as you are, but if you had done your share of the work, during these last ten years, the contrast would not be so marked. Her face has more wrinkles than yours, far more, and yet if you were sick that face would appear to be more beautiful than an angel's, as it hovered over you, watching every opportunity to minister to your comfort; and every one of those wrinkles would seem to be bright wavelets of sunshine chasing each other over the dear old face. She will leave you one of these days. Those burdens, if not lifted from her shoulders, will break her down. Those rough, hard hands—that have done so many unnecessary things for you—will be crossed upon her lifeless breast. Those neglected lips—that gave you your first baby kiss—will be forever closed, and those sad, tired eyes will have opened in eternity; and then you will appreciate your mother, but it will be too late. There, there, don't cry; she has not left you yet. She is down in the kitchen stringing beans for dinner, and, if you feel so badly, you might go down and finish them and let her change her dress and rest half an hour before dinner. And after dinner you might do up the dishes while she takes a little nap. Then you might take down her hair and do it up for her. You need not wind it over your finger, and fuss to make little spit curls, as she used to do with yours, but give it a good brushing and wind it up gently and tenderly, as though you enjoyed doing it for her. The young man down in the parlor can wait until you have performed these duties. If he expresses any impatience, you may explain to him that you feel under more obligation to your mother than you do to him. If this does not seem to satisfy him, ask him how many times he ever got up in the middle of the night to warm peppermint for you when you were dying with the colic, or how many hours he has carried you up and down the room just because you would not be quieted in any other way. Ask him to repeat Mother Hubbard backwards, and, if he is unable to do it, it will be proof positive that he is not the one who has repeated and explained it to you seventeen hundred times. Catechise him to find out if he is the one who gave you the black silk dress, and sat up nights to make it, while you were off having a good time. Corner him up, and make him admit that he went without a new bonnet last winter that you might enjoy a $12 one that you admired so much. Wring from him a confession that he has a stitch in his side, brought there by doing up your finery, week after week. Then show him out of the back door, put on a calico apron and go out and help your mother pick currants for jelly, and I guarantee you will think more of yourself, the world will think more of you, and you will be happier and better for having done so.—*Stockton Independent.*

Humorous.

Chips.

THE acme of politeness was reached by the Nevada mining superintendent who posted a placard reading: "Please do not tumble down the shaft."

JONES says his wife is the most thrifty woman he ever knew. "Why, sir," he says, "she has made 10 bedspreads during the last two years; made them herself, sir, out of the samples she collected in her shopping tours during that time."

THE train-robbers have opened the fall season in Arkansas by robbing a train near Hope. As the robbers wore masks and could not be identified, several prominent members of the legislature have come out in cards declaring their ability to prove satisfactory alibis.

A QUESTION OF MILEAGE.—Jones held an execution against a farmer, and when he called for a settlement the agriculturist took him out into a big pasture, and pointed out a wild steer as the particular piece of property that should be levied upon. Jones chased the steer around for a while, and then sat down, and taking out his book began to write.

"What are you doing there?" asked the granger.

"Charging mileage," replied the constable, without looking up.

"Do I have it all to pay?" gasped the rancher.

"You bet."

"Then take this tame heifer here, I can't stand any such game as that.

Household Hints.

TO RAGOUT A DUCK WHOLE.—After having emptied and singed a duck, season it inside with pepper and salt and truss it. Roast it before a clear fire for 20 minutes, and let it acquire a nice brown color. Put it into a stew-pan with sufficient well-seasoned beef gravy to cover it; slice and fry two onions, and add these with sage leaves and lemon thyme, both of which should be finely minced, to the stock. Simmer gently until the duck is tender; strain, skim and thicken the gravy with a little butter and flour; boil it up; pour over the duck and serve. One and a half pints of young peas, when in season, added to the gravy improves the ragout immensely.

A CARROT DISH.—Trim a quantity of the smallest young carrots that can be obtained, and boil them in salted water. When done drain off the water; add a piece of fresh butter to the carrots, some parsley finely minced, a dash of pepper, a little powdered sugar and a squeeze of lemon; moisten with a little stock free from fat and serve very hot.

TOAST.—Put a spider over the stove half full of milk and cream; add a lump of butter and a little salt. Toast the bread evenly on both sides without burning it, and put it in the milk. When the bread is soft enough remove to a dish and put in some more, and so on till you have enough; pour the gravy over it and eat while hot.

OLD-FASHIONED BAKED APPLES.—Take juicy apples, pare, and core whole; use a large corer. Put side by side in a baking pan, and fill up centers with brown sugar; pour into each a little lemon juice and into each a long piece of lemon evenly cut; put enough water in the pan to prevent the apples from burning, and bake gently until done.

CREAM-OF-TARTAR CAKE.—Half a cup of butter, two cups of sugar, three and a half cups of flour, three eggs, two teaspoonfuls of cream-of-tartar, one teaspoonful of soda dissolved in one teacupful of milk, one teaspoonful of flavoring. Mix together quickly and bake in a quick oven.

Health Column.

The Diphtheria Plant.

In an address delivered a few weeks since before the Academy of Natural Science at Philadelphia, Prof. Horatio C. Wood announced as the result of recent investigations, that diphtheria was propagated "by a microscopic plant or fungus, existing in all human beings, especially in the mouth and throat, but lacking the power of reproduction until given increased vitality by those disordered conditions of the mucous membrane which attend sore throat when caused by a cold."

The investigations were made at the instance of the National Board of Health, and were extended over considerable time and in diverse localities. Prof. Wood proceeded to state that in all blood there are two kinds of corpuscles—the red or color giving, and white. By careful study and experiments, both in human beings and the the lower animals, it was found that this infinitesimal plant fastens upon the white corpuscles and multiplies its cells, altering their character, until with the interior destroyed they burst, and the plants, set loose in an irregular mass, separate and go off individually, to continue the destructive work on other corpuscles. Thus increased, they poison the blood, choke the vessels and are found in myriad numbers in the spleen and bone marrow, where the blood is manufactured. Prof. Wood's investigations show that the false membrane supposed to invariably indicate the presence of diphtheria, may be caused by ammonia, Spanish fly, or any other irritating influence in the throat, so that its presence is not infallible as indicating the existence of this disease. But in any case, the false membrane is built up by this parasitical plant, which grows and multiplies upon its inflamed surroundings, whatever may be its cause. It is when the plants grow strong enough to extend to the blood, either poisoning it themselves or carrying the poison with them, that diphtheria sets in. The little plant is exactly the same as found upon a coated tongue.

When Prof. Wood put plants such as found on a healthy tongue, in sterilized water, they failed to grow. On the contrary, plants from the throat or blood of persons affected with diphtheria multiplied rapidly. The practical result of the investigation pointed out, was the possibility that diphtheria, if existing theories prove good, may be prevented by artificial vaccination. In the case of splenic fever, caught from animals, which has been proved to originate in a somewhat similar plant, Pasteur has found that the plant, when exposed a sufficient time to the air, by the action of oxygen loses its poisonous character, and when then introduced into the system makes the animal sick, but is no longer fatal. The deduction is, that this diphtheric plant, scientifically known as "micrococi," may in time be cultivated so that when inoculated with it the system will no longer be subject to the disease in its fatal form.

To Avoid Epidemics.

In a state of health there is a certain degree of *excitement* in the system. This is, the pulse beats a certain number of times every minute, averaging about 68. If, during the cholera or any other ordinary epidemic, the pulse does not go below that, and the general system is in good working order, the disease does not attack the person, nor will it as long as he remains in that condition. Nor will he be likely to suffer from the epidemic if he keeps the system steadily above the natural excitement. But the very moment the pulse is below par in rapidity and vigor, that moment is the individual more liable to disease in proportion to the deficiency. A person in good bodily condition, then, is at par, and is not likely to be attacked by any ordinary epidemic disease; and if in that condition he take a glass of brandy, he is less liable still, until the exciting effects of the liquor have subsided, when he falls below the natural standard, just as far as he was a while ago above it, and is in proportion more liable to the disease then if he had taken no brandy at all. Therefore, having commenced taking brandy, he must keep it up day and night, never letting the system go below par, or he is a lost man. Hence it was that men who were always full of liquor escaped cholera in numerous instances, and the report went forth that brandy prevented cholera; thus multitudes were introduced into the wretched habit, and perished in a drunkard's grave.—*Journal of Health.*

VACCINATION.—It is strange that so many persons declare their want of faith in the virtues of vaccination, when volumes of proof might be produced to prove its efficacy in preventing the attacks of small-pox. The greatest mortality from this disease has always been found in localities where vaccination was refused or neglected. In Chicago it is stated that 40 % of 359 cases since January 1st have proved fatal, and a large proportion of the fatal cases have occurred among the populations who resist vaccination with violence. Eighty-one out of 108 deaths from small-pox in September were in a ward where there are 40,000 persons who have not been vaccinated. This is but the repetition of a story that has often been told with much more melancholy details. Vaccination costs little or nothing, but as it is well established that it is, in a large majority of cases, an effectual preventive of small-pox, those are to blame who refuse to try it.

Worth Knowing.

CLEANING OLD ENGRAVINGS.—If brown spots and rings of mildew have not made their appearance, float the engraving face downward for 24 hours on a large quantity of water, in a vessel, perfectly free from grease and soil of all kinds. Lift it from the water on a perfectly clean sheet of glass, drain, transfer to blotting paper without touching it, then transfer to fresh blotting paper, dry, rub with bread as is done in drawings, and iron. If the stains are bad, or are not removed by this plan, place the engravings in a shallow dish, and pour water over them until perfectly soaked. Carefully pour off the water and replace it with a solution of chloride of lime (1 part liq. calcis chlorate to 39 parts water). As a rule the stains disappear as if by magic. If not, pour on the spot pure liq. calcis chlorate; if that does not succeed, add a little acid nitrohydro-chlor. dil. As soon as the stain disappears, wash the engraving carefully with successive portions of water until all the chlorine is removed. Then steep it in a weak solution of glue and gelatine, which may be colored with coffee grounds, to give the engraving a yellow color. Then dry between blotting paper, under a weight, and iron with a sheet of clean paper between the iron and the print. Small grease spots may be removed by putting powdered French chalk over them, a piece of clean blotting paper over the chalk, and a hot iron over that. If the stains are larger, benzine must be used, applying it in a circle around the stain before touching the stain itself.

SHAMPOOING.—When the barber kindly informs his patient that his hair is very badly filled with dandruff, and proposes to shampoo it as a remedy, it is safe to say "No," most positively; the majority of barbers use as a shampooing liquid, either solution of "salts of tartar" alone, or mixed with borax. They are probably not aware that "salts of tartar" is but a name for purified potash. When a solution of this is put upon the head it combines with the natural oil of the hair and scalp, and forms a soap which makes a dense lather in the hair; this is washed out, and while it effectually removes the dandruff and dust, it has also removed the oil which is needed to keep the hair in a healthy condition. Avoid all such shampooing. A teaspoonful of powdered borax in a quart of water forms a safe shampooing liquid, but still better is the yolk of an egg, worked thoroughly into the hair, applying a little at a time, and then wash it out. The egg will leave the hair surprisingly clean, and the scalp soft and free from dandruff.—*American Agriculturist.*

THE BLUE COLOR OF MILK.—Herr Hansen, an authority in such matters, explains in a recent foreign scientific journal, the cause of the blue color in milk. He has discovered in milk which has become blue, a peculiar microscopical organism, known as *bacteria*, which multiplies with very great rapidity, and in so doing produces a peculiar blue matter similar to aniline. Milk which is kept in such a manner as to prevent the access of these organisms does not become blue. In view of these facts, it is evident that blue milk is unfit for food; and, although it may be eaten with apparent impunity by adults with vigorous digestive powers, it should never be given to children, whose weaker stomachs would be unable to resist the tendency to decomposition which such milk possesses.

NICKEL TABLE UTENSILS.—Since the process of making malleable nickel has been perfected, many articles made of this material, and especially nickel table utensils, are coming into extended use. They are manufactured in large quantities in Prussia, and are much preferred to similar articles of other materials. The hardness of the metal renders it capable of acquiring a high polish, which is not readily injured by friction; grease or dirt does not adhere to it firmly on account of the smoothness of its surface, and the cleaning requires very little exertion. It does not tarnish when used frequently, and has, moreover, the advantage of possessing about one-half its original value when worn out.

STOVE POLISH.—The fine polish given stoves by those skilled in the art, is produced as follows: Have a thin mixture of black varnish and turpentine; apply this with a paint or varnish brush to a portion of the stove; then with a cloth dust this over with pulverized British luster or stove polish; then rub with a dry brush. The stove must be perfectly cold. The stove dealers buy the pulverized stove polish, which is carburet of iron, in 25-lb. packages. The process conducted in this manner is quite brief, but gives beautiful results.

TO MAKE CISTERNS AND TANKS WATER TIGHT.—Paint thickly on the inside with a mixture of eight parts of melted glue and four of linseed oil, boiled with litharge. In 48 hours it will be so hard that the tank can be filled with water.

RED ANTS.—The judicious use of oil of turpentine will effectually exterminate red ants. It may be injected into cracks and crevices in closets and elsewhere from an ordinary sewing machine oil can.

MASONIC.

Officers Grand Lodge.—Clay W. Taylor, Shasta, G. M.; John Quincy Adams, Vallejo, D. G. M.; Moses Heller, G. Treas., S. F.; A. G. Abell, G. Sec'y, S. F.

A Masonic Bilk and Fraud.

Editors Watchman:—All Lodges of Free and Accepted Masons, and all Masonic brethren on the Pacific Coast are hereby warned against one Emil Buttrowsky, who was suspended by Mt. Morish Lodge, No. 2, Utah, for gross un-Masonic conduct, June 16th, 1873. Within the last four years the fellow has victimized Lodges from Washington Territory to Arizona, everywhere claiming to be a member in good standing of Mt. Moriah Lodge, Utah, knowing that in so doing he told a lie. He is one of the hardest cases outside the prison wall, and brothers coming in contact with him are requested to assist in bringing him inside the wall. He is a German by birth, speaks the English language with a German accent, stands about five ft. five inches, fair looking, generally dresses well, walks erect, and claims to be a barkeeper, bookkeeper and barber, but is neither. If there is a bilk anywhere it is Emil Buttrowsky.

Christopher S. Diesl, Grand Sec'y, Gr. L., Utah.

The recent celebration at Yorktown has been written about in almost every phase conceivable, yet there are a few Masonic facts connected with that event that are of general interest to old Masons. There were present the following distinguished Masons: Peyton S. Coles, M. W. Grand Master of the Grand Lodge of Virginia, assisted by M. W. Bro. Horace S. Taylor, Grand Master of New York; M. W. Bro. John S. Tyson, Grand Master of Maryland; R. W. Bro. Hon. Samuel B. Dick, Grand Master of Pennsylvania; M. W. Bro. Samuel C. Lawrence, Grand Master of Massachusetts; M. W. Bro. Josiah J. Wright, Grand Master of Georgia; P. G. M. Bro. Hon. Beverly R. Welford, Grand Orator, P. G. M. Bro. Oscar M. Marshall, Grand Treasurer; Bro. Wm. B. Isaacs, Grand Secretary, and other Grand officers. The assemblage present was a very large and brilliant one, including His Excellency, the Hon. Chester A. Arthur, President of the United States, members of his Cabinet, Hon. David Davis, President of the U. S. Senate, and leading officers of the National and State Governments.

The corner stone was laid with the usual formalities of the craft, Grand Master Coles officiating with the following assistance: Golden Vessel, with Corn, borne by the Most Worshipful Bro. Samuel C. Lawrence, Grand Master of Massachusetts.

Square, Level and Plumb, borne by Most Worshipful Grand Masters Bros. Horace S. Taylor, of New York; John S. Tyson, of Maryland; and Hon. Samuel B. Dick, of Pennsylvania.

The Golden Vessels, with Wine and Oil, by Most Worshipful Bro. Josiah J. Wright, of Georgia, and Bro. Joseph W. Martin, of New Jersey.

Right Worshipful Bro. Oscar M. Marshall, Grand Treasurer, and Right Worshipful Bro. W. Bryan Isaacs, Grand Secretary.

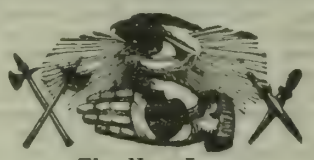
Tuscan and Composite Orders of Architecture, by the Worshipful Masters of Lodges Nos. 19 and 18 of Virginia.

Doric, Ionic and Corinthian Orders, by the Worshipful Masters of Lodges Nos. 15, 14 and 13, of Virginia.

One Great Light, by the Worshipful Master of Lodge No. 10, of Virginia.

Holy Bible, Square and Compasses, by the Worshipful Master of Lodge No. 5, of Virginia.

Two Great Lights, by the Worshipful Masters of Lodges Nos. 4 and 3, of Virginia.



The chair occupied by the Grand Master was the one which Lord Bottetourt, when loyal Governor of the Old Dominion, presented to the Grand Lodge of Virginia, and in which George Washington sat when Grand Master of Virginia Masons. The sash and apron worn by Grand Master Peyton S. Coles, were worked by Mrs. Lafayette, and presented to Washington in 1774, at Mount Vernon. The gavel was made from a portion of the quarter deck of the United States frigate *Lawrence*, flagship of Commodore Perry, at the battle and victory of Lake Erie, Sept. 10, 1813. This gavel was used by the Grand Master of the Masons of New Jersey in laying the corner stone of the monument on the battlefield of Monmouth, June 30, 1878. It was also used to lay the corner stone of the Egyptian obelisk in Central Park, New York city, Oct. 9, 1880. Bro. Judge B. R. Welford, of Virginia, the Grand Orator, made an eloquent address, at the conclusion of which the ceremonies ended.

St. Andrew's R. A. Chapter of Boston, Mass., has on its records this minute, under date of Aug. 28, 1769: Wm. Davis was accepted and "made, by receiving the four Steps, that of an Excell^t, Sup. Excell^t, Roy^l Arch and K^t Templar," and these are in subsequent records alluded to as "the four Degrees of a Royal Arch Mason." This was probably the first time the degree or order of Knight Templar was conferred in America.

Within the next week, beginning with Dec. 1st, nearly all the Lodges and Chapters in this jurisdiction will elect their new set of officers for the ensuing year. Saturday evening, Dec. 3d, being the Saturday, on or before the full moon, there will be more than one-half of the Lodges elect on that single night.

Indp't Order of Odd Fellows.

Grand Officers.—Davis Louderback, G. M., San Francisco; Leon D. Freer, D. G. M., Oroville; D. M. Burns, G. W., Sacramento; W. B. Lyon, G. Sec'y, San Francisco; H. B. Brooks, G. Treasurer, San Francisco.

The New Law.

Editors Watchman:—We are told that after the 1st of July, 1882, the Lodges of the Independent Order of Odd Fellows shall hold their sessions in the third degree for the transaction of business—that is, none but third degree members will be eligible to take part in any of the proceedings of the Order. All others will be debarred the privilege of social intercourse, voting, filling minor offices, visiting the sick, relieving the distressed, or of performing any of the duties incident to a membership in our great fraternity. Although not officially promulgated as yet, it is pretty generally known wherever an Odd Fellows Lodge exists. Perhaps it may seem somewhat premature to discuss the matter at such an early stage, but it is already, and has been for some time, actively discussed among the members of the Order generally, and by the various society organs throughout the United States.

This enactment is a "new departure"—a radical change—a reversal of the policy upon which the Order has grown and flourished for more than sixty years, or ever since it was founded in America. That it is a questionable policy, no one of broad, liberal views can look upon without a feeling of distrust. There was no cause for this change. The Order is flourishing everywhere. Since 1819 it has increased from a mere handful to say 6,000 Lodges, and about 600,000 members. It has grown rich and powerful. It has surmounted envy, detraction, obscurity and all the other evils incident to the establishment of such organizations, and has attained a prominence second to none other. It has been called by a great journalist "the grandest organized charity in existence."

It is, and always has been, fulfilling the noblest mission of which humanity is capable. And if this is true, if it has accomplished all what is claimed for it by its most earnest adherents—why in the name of Friendship, Love and Truth, disturb the relations that have so long existed?—why not "leave well enough alone?" This change bears the semblance of hasty, ill-digested legislation. Very little can be said in favor of it. The principal argument is that it will force a great many to take the higher degrees that have heretofore refrained from doing so. This species of argument is coercive in its character, and I think its advocates will find themselves much mistaken in their premises.

Let us see how the matter stands. It is said that there are over 100,000 Odd Fellows who have not attained the highest degree; and that by denying them the privileges they have heretofore enjoyed, they will perforce be induced to make the requisite advancement. This is a mere surmise, and is more likely to prove fallacious than real. Good judges of human nature have ever held that coercive measures are nearly always failures. Men do not like to be driven. The very fact of this measure provoking such widespread opposition and unfavorable criticism, *proves* it to be unsound and impolitic legislation. It will cut off from the Order many honest, worthy men, whose only reason for not taking the degrees is their inability to do so. And any legislation is to be deprecated which has a tendency to drive from an organization good members, by making them victims of circumstances. Even in a pecuniary point of view, it will prove to be mistaken judgment. Those members whom it is designed to coerce into becoming full members, now pay into the treasury of the Order as much every month as do an equal number of those entitled to "all its rights and privileges." Granting this to be the case, if this new law results in the alienation of any considerable number (as it undoubtedly will), does it not follow that a large portion of its revenue will be cut off?

I will advance the following propositions: First, that this change of policy will not attract a single *new* member to the Order; Second, that it will drive away a great many who are now members; Third, that it will decrease its revenue; Fourth, that it will "cause heartburnings and divisions" among the brotherhood; Fifth, that the benefits accruing to the Order will be greatly overbalanced by the disadvantages resulting from it; Sixth, and last, that this legislation was unwise, unnecessary and uncalled for.

There should never be any change in a settled policy that works well, unless there are cogent reasons for such change. It is not a good move to disturb old landmarks, or to destroy old associations unnecessarily. Conservatism is sometimes as desirable as progression. One of the greatest evils attendant upon human society is too much legislation. A little less law and a little more love is what is most needed. And if you cannot make men fulfill their duties by a proper application of the principles upon which our Order is founded, you cannot do so by any species of legislation.

Wood.

Order Eastern Star.

Officers Grand Chapter.—Edward S. West, Gr Patron, Santa Cruz; Frances E. Ryder, Gr. Matron, Oakland; Mrs. Abbie F. Wood, Grand Secretary, San Francisco.

Idlewild Chapter, No. 19, Santa Cruz, had a public installation of its newly-elected officers on the evening of Nov. 16th, E. S. West, G. W. P. acted as installing officer. The stations of the officers were beautifully decorated with flowers, and the W. M.'s station was literally hidden amid the festoons and bouquets which bedecked it. The ceremonies were very interesting, and all of the officers who assisted at the installation acted their parts without a mistake. Mrs. S. I. Morris presided at the organ and played a march as the officers were escorted to their different positions. After the installation was over the members and their friends adjourned to DeLamater's Hall, where three hours were whirled away in Terpsichorean delights.

Annie E. Briggs, P. W. M., has been presented by the members of Athena Chapter, No. 46, Hollister, with a beautiful Past Matron's jewel—a hollow five-pointed gold star, enameled; in the center a gavel was suspended, from which sparkled a brilliant diamond. This Chapter was organized July 7, 1880, and its work has been very successful.

We are pleased to learn that Chas. L. Thomas, Past Grand Patron of the Grand Chapter of Cal., O. E. S., has been elected Recorder of Golden Gate Commandery, No. 16, Knights Templar, of this city.

Knights of Pythias.

Grand Officers.—S. L. Terry, P. G. C., Stockton; John H. Harney, G. C., S. F.; George Cantus, G. Treas., S. F.; A. G. Booth, Grand K. of R. & S., San Francisco.

Maine.—Bro. Joseph J. Chute, G. K. of R. & S., of Maine, shows the net gain in membership for the last term amounts to 271. There being 27 lodges, this shows an average of 10 to each lodge. Nineteen lodges show an increase, 4 a decrease, and 1 held its own. Three new lodges report an aggregate of 166 members. One of the oldest lodges, No. 4, shows the greatest decrease, 10. The other 3 lodges showing a decline, are No. 7, 2; No. 12, 7; and No. 13, 1; a total in the 4 lodges of 20. There have been initiated during the term, 301; admitted by card, 22, and reinstated, 10. The total membership, June 30, amounted to 2,103.

A Good One on Michigan.

A woman of Bay City, Michigan, disguised herself as a man and clerked in a store for a year, and then applied for a membership in the Knights of Pythias and was initiated. During the work of the third degree her sex was discovered. It seems that in the third degree they have an India rubber rat and a celluloid snake, which run by clock work inside, and which were very natural indeed. The idea is to let them run at the candidate for initiation to see if he will flinch. When the snake run at the girl she kept her nerve all right, but when the rat tried to run up her unmentionables she grabbed her imaginary skirts in both hands and jumped into a refrigerator that was standing near, which is used in the work of the fourth degree, and screamed bloody murder. The girl is a member of the Order, however, and there is no help for it. This affair may open the eyes of the members of the secret societies, and cause them to investigate. It is possible that quite a number of the Odd Fellows, Masons, Knights of Pythias, etc., are women, and no one will ever know it. One Lodge, there, we understand, takes precaution against the admission of women by examining carefully the feet of applicants. If the feet are cold enough to freeze ice cream the candidate is blackballed. The temperature of the feet is considered an infallible test.

Grand Chancellor Harney reports the Order to be in a most flourishing condition in every portion of the jurisdiction. New Lodges are being petitioned for, and the present organized Lodges are adding rapidly to their membership. On the 13th of this month the Grand Chancellor expects to organize a new Lodge in the western addition of this city, to meet in Hamilton Hall, corner of Geary and Steiner streets. If that body when organized thrives as well as King Solomon's Lodge of Masons and Hercules Lodge of Workmen which meet in that Hall have, they will soon be in a prosperous and healthy condition.

Excelsior Lodge, No. 12, of this city, that is presided over by that prince of good fellows, Charles E. Baker, is having a very prosperous season. Not less than 35 new names will have been added to their list this term.

Grand Army of the Republic.

Officers of the Department of California.—C. Mason Kinne, Com., San Francisco; W. F. Ellis, S. V. C., San Jose; J. M. Davis, J. V. C., Oakland; W. A. Robinson, A. A. Gen., San Francisco; O. B. Culver, A. Q. M. Gen., San Francisco; J. W. Staples, Inspector, San Francisco.

Headquarters Dep't Cal., G. A. R.,
Ass't Adj't Gen'l's Office, 320 Sansome St.,
San Francisco, Nov. 15, 1881.

General Orders No. 10.

I. The annual Encampment of this Department for 1882 will be held in January next at San Jose, Cal. Posts are entitled to representation based upon the report of members in good standing Sept. 30, 1881, as follows: For each 25 members 1 delegate, and 1 delegate for a final fraction of more than half of 25. Any Post not having 25 members is entitled to 1 delegate. The delegates and an equal number of alternates *must* be elected at the time the Post officers shall be elected, the *first* meeting in December; immediately after the elections credentials will be sent to this office signed as required by Sec. 3, Art. II., R. and R.

II. The following appointments on the Staff of the Department Commander are hereby announced.

To be Assistant Inspectors:

Phil Sheridan Post, No. 7—Orrin Tabor, vice Comrade Welch resigned.

Joe Hooker Post, No. 11—N. B. Dunning.

Canby Post, No. 18—David L. Butler.

R. L. McCook Post, No. 26—J. S. Kidder.

Garfield Post, No. 28, Portland, Or.—M. V. Spencer.

McPherson Post, No. 30—Wm. N. Phillips.

They will receive instructions from the Department Inspector. Other appointments will be made in special orders.

III. The Commanders of Posts must see that all reports for fourth quarter, 1881, are ready immediately after Dec. 31st, for the staff officers must have the reports on hand at the earliest possible date in January, in order that their reports may be completed in time for the January encampment. Posts in arrears for per capita tax must forward at once.

The following have made no report for third quarter:

Halleck Post, No. 19.

Ellsworth Post, No. 20.

IV. The attention of Post officers and comrades throughout this department is called to the Veterans' Home Association, and the circulars that have been issued in the interest of the work. Every comrade should consider it his duty to do all in his power to assist in this great work. Posts should at once take steps to organize a thorough system to aid in the collection of funds, and to create an interest in the measure in their respective localities. For any information, communicate with this office, or to the Secretary of the Veterans' Home Association, Nucleus building, San Francisco. Go to work at once, as the necessity for action is urgent.

V. Orders for annual inspection will be issued by the Inspector, and Post Commanders will give the Assistant Inspectors all the aid in their power in becoming familiar with the ritual and unwritten work.

VI. Make requisition for supplies in time.

By command of C. Mason Kinne,
Department Commander.
W. A. Robinson, Ass't Adj't Gen'l.

Knights Golden Rule.

Editors Watchman:—R. H. Warfield, P. M. W., of Healdsburg Lodge, No. 31, A. O. U. W., and Grand Treasurer of the K. of H., has been commissioned Grand Commander for California of the Knights of the Golden Rule. He instituted a Castle at Healdsburg, Cal., on the 27th of October, with 73 charter members. The Castle was named "Invincible." Tuesday evening, November 22d, he, assisted by W. G. Swan, D. C., instituted "Excelsior" Castle, at Cloverdale, Cal., with 33 charter members. In addition to the D. C. already named, G. C. Warfield has commissioned Hon. T. W. Hudson and Prof. D. C. Clark, as District Commanders. Several other Castles are under way.

The Knights of the Golden Rule was established in 1879. The Order has some distinctive features, which may be stated briefly, as follows: Benefits are not paid on suicides; ladies are admitted to full membership, thus introducing the refinements of social life into Castle meetings; it is not necessary that the ladies shall have male relatives as members of the Order to entitle them to admission; the jurisdiction is general, like that of K. of H., etc.; the one grade assessment of the Workmen is retained, but a plan of equalizing the cost of assessments has been adopted, which is accomplished by simply adding the amount

paid by a member on assessments to his death benefit, ample provision having been made for that purpose; insurance is classified so that a member can insure for from $500 to $6,500. This applies to all except those between 50 and 60 years old, and ladies. The former can insure for only $2,000, and the latter for $3,000. Assessments in the classes are kept separate.

G. C. Warfield and his deputies expect to make an active campaign. It is felt that there is room for the K. G. R. The advantages of fraternal insurance are now generally conceded. There are billions still handled by ordinary life insurance companies, often unsafe and always very expensive, which, if used by fraternal insurance societies, having no element of speculation or profit in them, would give insurance to the people at large, that is both safe and economical.—W. G. Swan.

ROYCBIV
CHOSEN FRIENDS

Grand Officers.—Chas. W. Bryant, G. C., San Francisco; James M. Baird, G. A. C., San Francisco; John W. Shaffer, G. Treasurer, S. F.; S. Danielewicz, G. Recorder, office 601 California street, San Francisco.

The Supreme Treasurer forwards the following statement in calling for Assessments No. 13 & 14. The same being for fiscal year ending October, 1881:

GENERAL FUND.

Overpaid cash receipts Oct. 20, 1880, per last report..	$642 23
Paid warrants during the fiscal year.....	29,323 37
Total.....	$29,965 60
Deduct amount received from Supreme Recorder	26,182 05
Amount overdrawn cash received Oct. 1, 1881.....	$ 3,783 55

RECEIPTS DURING THE YEAR—RELIEF FUND.

Balance on hand, as per last report, Oct. 19, 1880, $	119 75
Received on Assessment No. 1.....	67
" " " " 2.....	4 54
" " " " 3.....	4,902 29
" " " " 4.....	5,126 48
" " " " 5.....	6,563 34
" " " " 6.....	9,410 56
" " " " 7.....	9,913 86
" " " " 8.....	10,659 93
" " " " 9.....	10,435 17
" " " " 10.....	11,143 93
" " " " 11.....	10,341 79
Total receipts from Assessments Nos 1 to 11...	$78,622 31
Deduct orders paid from Nos. 2½ to 34 (inclusive)..	70,526 78
Balance on hand.....	$ 8 095 53

For full and complete statement of amount paid by Councils, see appendix in back of proceedings.

Balance on hand third annual report.....	$ 8,095 53
Rec'd during month of Oct. from Assess't No. 12..	9,630 11
From Assessments 5 to 11 (inclusive).....	2,128 45
Total to date, including balance.....	$19,854 09
From which deduct the following deaths—	
No. 35—Joel Pomerene, Charity 7, Millersburg, O.	$ 3,000 00

Enough deaths are on file in the Supreme Recorder's office to consume all of Assessment No. 13 and a considerable amount of 14. Assessment No. 12 will net about $2,000 more than any previous assessment. See my report at third annual session of Supreme Council for particulars of death No. 34, which was paid Sept. 30, 1881. If you desire to learn the cause of death, etc., call upon the Recorder of your Council. Respectfully submitted in F., A., P., Emi Kennedy, Supreme Treasurer.

Ben'lent Pro'tive Order of Elks.

At a regular communication of California Lodge, No. 12, B. P. O. Elks, the following officers were elected for the ensuing year: L. Reynolds, E. R.; J. Redican, Est. Lead. Kt.; F. J. Klatze, Est. Loy. Kt.; H. Blankenstein, Est. Lect. Kt.; Chas. E. Baker, Sec'y; A. Perrier, Treas.; T. E. Finley, Tyler; Trustees, W. H. Bogle, J. Whalen, A. M. Gray. We hope to hear more from this society. Items of news sentiment, progress, etc., will be at all times acceptable. A good plan would be to appoint a Lodge editor, who would keep us informed of all current happenings.

Canadian Association.—The monthly social of this society was held on Tuesday evening, Nov. 22d, at B'nai B'rth hall. The attendance was not as large as usual but the evening was made quite enjoyable by a programme of 13 dances with extras. These monthly socials are a prominent feature in our city and are always well regulated and pleasant entertainments. The following well known citizens had the honor to form the executive department: Executive Committee; A. Barker, Chas. E. Hunt, J. N. Buchanan, Alfred Hogg, A. Gilliland, Samuel Beatty, W. J. Gilliland and W. B. Blair. Reception Committee; R. S. Falconer, W. H. Hutchinson, John Elder, J. M. Camp and E. L. Cutten. Floor Manager; W. J. McCormick. Floor Committee; Jas. Harris, Dr. W. Botsford, Dr. D. McMillan, Dr. H. G. Trueman, John Dinsmore, J. W. Disbrow and D. G. Fraser.

Outside Watchman.

The duties of Outside Watchman are onerous, laborious, and oftentimes difficult, and as such should receive a fair compensation, and none but patient, affable and genial brothers should be assigned to this important position. A number of our Workmen who have particularly distinguished themselves in this thankless position, are Bros. Richard Roach, of Harmony, No. 9, who has held his office for several consecutive terms, and who is always courteously polite and accommodating to visitors and members.

John Lauer, of Washington, No. 60, has been re-elected several terms, and is just the man for this Lodge.

Bro. H. P. Beck, of Unity, No. 27, has been at his post for five consecutive terms.

Bro. R. Young, of Myrtle, 42, has guarded the door of his Lodge for several years, and his efficiency is such that he will be continued, we hope.

Bro. Mayo, of Valley, 30, has been in office from the institution of this Lodge, and the place cannot be filled better.

A Fine Wedding.—Miss Rosa Davis, daughter of Wm. Davis Esq., and sister-in law of Bro. G. Winehill, P. M. W., was married to Herman Keiser, of Arizona, on Tuesday afternoon, Nov. 22d. The marriage ceremony, according to the Jewish custom, was very impressively delivered by Rabbi Vidaver, at the residence of Bro. Winehill, 317 Leavenworth street, before a large circle of invited guests representing the solid men and elite of our city. The bride, a beautiful blonde, was dressed in an elegant white satin brocade, en train, with veil and orange blossoms. The groom, a young gentleman of pleasing manners and fine physique, in plain black. The house was gaily trimmed with evergreens and floral decorations, and the room set apart for the bridal presents presented a gorgeous appearance, as over $2,000 in value of presents were tastefully arranged. After the solemn rites and ceremonies had been performed the blue silk canopy under which the marriage took place, was folded, followed by exuberant congratulations and expressions of joy, which were kept up with feasting on what might be termed a choice light lunch wherein champagne and icecream and other choice things were sandwiched in with toasts until 5 o'clock, when the young couple started on a bridal tour.

Presentation.—Bro. J. T. Caruthers, P. M. W., who has been chief agent of the baggage department of the C. P. R. R. Co., foot of Market street, for a number of years, was the recipient of a fine testimonial at the hands of his friends Thanksgiving day. The souvenir was a small, solid gold trunk finished in fine style, with lock, handles and silver cords worked around it. On the inside cover is inscribed: "From his friends in the C. P. R. R. Baggage Department, November, 1881." On the outside is: "J. T. Caruthers, Oakland, Cal." Our worthy brother has had a fine harvest in gifts this year.

Bro. Walter S. Pierce who so often aids us in our social entertainments is in a position to sell pianos from the leading makers at the lowest rates. Special attention paid to repairing, renovating and tuning pianos and organs—advances made on second-hand pianos or cash paid for them at their value. Our genial Bro. can be found at his store, 30 New Montgomery, under Palace hotel.

The patent boot made by Bro. P. Kelly, 238 Kearny, near Bush, is the acme of perfection. They combine so many excellent qualities and are so favorably known that orders are received from all parts of the United States for them. We understand that Bro. Kelly is making preparations to manufacture for the trade, and at his store there is a chance now to get good bargains in all kinds of foot wear for ladies and gentlemen.

Bro. Terrance Sullivan has opened a new manufactory at 214 Sixteenth street, between Howard and Capp. He has the reputation of being a skilled workman as a cutter and fitter, and in this connection guarantees a satisfactory fit or no sale. He is prepared to make to order all kinds of goods, children's and misses' walking shoes, and men's boots and gaiters.

Bro. J. Wm. Frazer, professor of dancing, has opened his winter season at 105 Post street. He has had large experience in this city, and enjoys the reputation of being a master in his profession. No pupils are admitted to his classes unless their character is closely scrutinized and found to be good. His opening classes are much larger than usual.

Bro. Wm. Statham, manufacturer of the Statham upright piano, has opened up new and commodious facilities at 765 Mission, to meet the increasing demand for his pianos. He rents, repairs, tunes, and exchanges new pianos for old ones.

Bro. Henry Langrehr, of Sts. John Lodge was lately married to Miss Frances K. Simon, of this city. The Watchman extends congratulations to the young couple.

A Good Example.

San Lorenzo, Nov. 21, 1881.

To Keystone Lodge, No. 64, A. O. U. W., Oakland: Fraternal greeting from Eden Lodge, No. 204, Alameda county, A. O. U. W.

We would respectfully call your attention that a member of Eden Lodge, No. 204, is out of employment, he having sustained injuries which prevents him from performing hard labor, and having a wife and child to support earnestly desires work. Trusting to find a situation better suited to his capabilities in a town or city more readily, therefore we would leave it in your hands, hoping you will lend your assistance to secure the brother work.

The party referred to is capable of performing such work as salesman, shipping clerk, entry clerk, hotel clerk, watchman, night or day, single entry book-keeper.

Trusting to hear from you soon, we remain yours in C. H. and P. Geo. Grey,
H. Marlin,
Gerd Schafer,
Business Committee Eden Lodge, No. 204, A. O. U. W.

The above circular to Keystone Lodge is made out in printed form and is a concise and admirable way to get it before the Lodge to whom it is addressed. The brethren of Eden Lodge are to be commended for the earnest attention which they pay to the duties of their office, and their work is in marked contrast with the masterly inactivity of Business Committees generally. In many Lodges it would require a reference to the records on the part of nearly all officers and members to discover who their Business Committee is, so little attention is paid to this feature of the Order. In this connection we can say that the Watchman renews its offer to publish the employment wants of any brother without charge, who is recommended by the Business Committee of any Lodge.

Grand Master Workman's Appointments.

Wm. H. Barnes, G. M. W., will make official visits as follows:

Friday, Dec. 2d, Folsom.

Tuesday, Dec. 6th, Alvarado.

Wednesday, Dec. 7th, Mt. Hamilton Lodge, San Jose.

On the 15th, 16th and 17th of Dec., Lodges of Tulare county.

Wednesday, Dec. 21st, Napa.

Galt Lodge will be visited some time in December.

Resolutions of Respect.

[In Memoriam.]

Hanford Lodge, 189, A. O. U. W., November 21, 1881.

Whereas, God in His providence has removed from the walks of man our esteemed Bro. R. S. Dodge, to His home with Himself, therefore

Resolved, That we the members of this Lodge recognize the right of the Supreme Ruler to dispose of His creatures, and we bow before Him and say Thy will be done.

Resolved, That this Lodge in the death of Bro. R. S. Dodge has sustained a great loss, and the community in which he lived has given up one of its best and truest citizens.

Resolved, That we heartily tender to his orphaned children our sympathies and cheerfully promise the protection which our obligations enjoin upon us.

N. W. Motheral,
F. A Blakeley, Com.
J. W. Ramsey.

"How to Read Faces."—A new work entitled "Scientific Physiognomy or How to Read Faces," recently brought out in this city, by Sister M. O. Staunton, member of Silver Spray D. of H. and wife of Bro. A. P. Staunton, business manager and one of the proprietors of the *Argonaut*, has been pronounced by the press and literary critics as one of great research and merit. The progressive ideas advanced are sustained by recent investigation in the field of mental science, and the profound thinkers of the last two centuries. This book is written in a clear, concise and racy style, the convincing proofs that you can enjoy the novelty of reading correctly the character of persons as he carries it on his face, makes each chapter more and more interesting. Every mother, teacher and physician should have one. Sister Staunton has made this subject a life study, and we believe this treatise will be her enduring monument. This book is for sale at all bookstores and the S. F. News agency.

A Point Reyes butter stand and wholesale and retail depot for eggs, cheese, honey, fruits, vegetables, etc., at Center Market, corner of Dupont and Sutter, stalls 13, 14 and 15, has been opened by Messrs. Stinson & Davenport, in which they display an extensive and choice variety of goods in their line. Bro. Davenport has had a large experience as a dealer, and their customers can always find the best this market affords.

Every Lodge, and almost every family, can now afford to obtain first-class organs on easy installments at low prices, as will be seen by advertisement of Kohler & Chase. Their music house is the oldest in San Francisco, and ranks among the largest and most popular on the Pacific coast.

Dramatic Entertainments.

A series of dramatic entertainments will be given at Deitz's Opera House, Oakland, under the auspices of the Ladies' Social Circle, and for the benefit of the Peoples' Independent Church, under direction of Mr. D. K. Higgins, the well known elocutionist, assisted by local and professional artists. They will open on Tuesday evening, Dec. 13th, with the first grand production of Higgins' new drama, "The Vagabonds," written by D. K. and M. O. Higgins, of Oakland. Wednesday evening, Dec. 14th, will be rendered Tennyson's pastoral drama, "Dora." And on Friday evening, Dec. 16th, a popular drama, to be announced hereafter. Tickets, 50 cents. Open at 7½ o'clock. Commence at 8. No reserved seats. Each evening's programme will embrace further attractions to be announced hereafter. Mr. Higgins is very popular with the Workmen of Oakland, whom he has ably and liberally favored at many of their social entertainments, and we hope he will meet with the encouragement due him in producing his new play, which is pronounced to be very fine by competent critics.

New Patents.—Dewey & Co.'s Scientific Press Patent Agency has received official notice of the issue of the following patents to Pacific coast inventors, for the week ending Nov. 22, 1881.

249,869, Geo. Applegate, Yoncalla, Or., sulky plow; 249,890, L. Brown, Waitsburg, W. T., sulky plow; 249,901, A. H. Conkling, Vallejo, Cal., churn; 249,921, S. W. Gaines, Scio, Or., flax puller; 249,764, B. T. Herold, Stockton, Cal., window-screen attachment; 249,973, W. C. Nelson, Santa Rosa, Cal., dish washing machine; 249,791, C. W. Patten, S. F., amalgamator and concentrator; 249,995, J. Richards, S. F., machine for conveying and crushing ores; 249,996, J. Richards, S. F., pneumatic machinery; 250,015, Jas. M. Thompson, S. F., ore-roasting furnace; 249,814, E. Whitmore, S. F., running gear for vehicles; 250,027, E. A. Wible, Brighton, Cal., draw bridge.

The advertisement of Bro. T. Lundy, 7 and 9 Third street, corner of Market, headed "Extraordinary," is true. Parties wishing to purchase in his line of goods will find it to their advantage to examine his stock and prices.

The Workmen's Guarantee Fund Association, intended only for members of the A. O. U. W., and now paying $1,000 on the death of one of its policy holders, has only cost its members $6 during the year, as but six assessments have been made of $1 each. We are informed by the Secretary, Bro. E. M. Reading, that not a death has occurred since its organization, nearly two years ago, by a chronic disease. This certainly speaks well for its management.

Mansion House.—First-class in every respect, and reasonable prices.—When you visit Stockton stop at the Mansion House. Free Coach to the house.
J. H. Cross, Proprietor.

T. N. Dunphy & Co., General Advertising Agents This is the oldest established General Advertising House in California. Bill Posting a specialty. Mr. Dunphy has for more than ten years been the sole manager of the bill posting business known as "Keyt & Co," and succeeds to all the privileges of the late A. C. Keyt, at the old stand, No. 506 Commercial St., S. F. Three thousand bulletin boards in prominent places.

Booksellers, Stationers, Etc.—Messrs. Payot, Upham & Co., No. 204 Sansome Street, are one of the oldest, most enterprising and reliable firms in the book and stationery trade in San Francisco. Scientific, industrial and foreign publications are a specialty with them. They are also noted for their first quality of blank book and fine stationery line of goods.

Our Agents.

Our Friends can do much in aid of our paper and the cause of practical knowledge and science, by assisting Agents in their labors of canvassing, by lending their influence and encouraging favors. We intend to send none but worthy men.

G. W. McGrew—Santa Clara county.
M. P. Owen—Santa Cruz county.
J. W. A. Wright—Merced, Tulare and Kern counties.
Jared C. Hoag—California.
B. W. Crowell—Yuba and Sutter counties.
D. W. Kelleher—San Joaquin, Amador and Calaveras counties.
A. C. Knox—State of Nevada.
C. E. Wetmore—Alameda county.
E. A. Weed—California.

Attend to This.

Our subscribers will find the date they have paid to printed on the label of their paper. If it is not correct, or if the paper should ever come beyond the time desired, be sure to notify the publishers by letter or postal card. If we are not notified within a reasonable time we cannot be responsible for the errors or omission of agents.

Traveling Agents.

We want several canvassing agents who will make it their business to solicit subscriptions and advertising for our first-class progressive newspapers. Men of ability and experience can secure good pay and permanent employment. Send references and state your past occupation, etc., to the publishers of this paper.

A. O. U. W. Directory.

Cards inserted in this list at the rate of 25 cents per month payable semi-annually in advance. If errors or omissions are noticed, please write the office direct.

CALIFORNIA.

Do Not Delay.—Send us your subscriptions promptly Don't let any break occur in your subscriptions to the Watchman. Every live Workman needs every number of the paper, and we need his assistance to print as valuable a journal as we strive to for the special benefit of its patrons and the general good of the Fraternity. Send the cash direct, or, if more convenient, hand it in with your dues to the Financier and we will allow him for trouble and expense of remitting.

By Telephone.—Subscribers, advertisers and other patrons of this office can address orders, or make appointments with the proprietors or agents by telephone, as we are connected with the central system in San Francisco.

R. M. M PATTEN, Ontario, S. W.
J. D. VINCIL, Missouri, S. T.

Officers and members of the A. O. U. W. receiving a complimentary number of the Watchman with this notice marked are invited to examine its merits for their support, as we expect our agent to call and present personally further information concerning our enterprise for the future. Should our agent fail to call soon in some instances, we shall be glad to have our friends favor the office directly with their response. Persons receiving duplicate copies are requested to circulate them to the advantage of our cause and the publishers.

The advertisement of F. Mansell & Co. in another column shows that they have moved to 434 Pine street, opposite their old stand. For ornamental, sign, and glass work, gold block letters, etc., this firm bears an excellent reputation in San Francisco, where it has been long established. We ourselves have patronized Mr. Mansell for many years.

Remembered.

In every clime and under all circumstances a nameless, yet irresistible charm clusters round the word "remembered;" into every mind, however embittered by toil and strife, this sweet word ever brings a ray of comfort. When separated from those who hold within their keeping our affections, 'tis sweet to know that we are remembered. It cheers and encourages the man of business when difficulties and cares would fain bow his spirit in the dust, to feel that there are those at home, by whom, during every moment of his enforced absence, he is remembered with affection and gratitude. Many are the offices of love which the mother performs for her child, strengthened and comforted by the thought that at some time—it may be when the dust is over her brow—they will cause her to be lovingly remembered. We all know how it used to stir our hearts with joy and make every pulse bound with gladness, when far away at school, to receive even the least valuable packet with the simple, yet beautiful words, "Believe me, my child, this was a work of love; with every stitch has been interwoven a thought of you. You are constantly remembered by your mother." Though our minds were dull and weary, these words ever came fraught with sweetest comfort, and threw a radiant light upon the most difficult problem, or rendered quick and clear the lagging and clouded brain through the medium of a happy heart.

But the thought of being ever remembered after death is far dearer. That the desire to be remembered when the heart has ceased to throb with life, and the soul passed to other realms, has reigned supreme within the minds of men in all ages, is everywhere proclaimed. This is a laudable desire, implanted by Him who "doeth all things well," deep in the heart of man, for the purpose of promoting his happiness by inducing him to do good. But many, alas! pervert this blessing into a curse by seeking its gratification through wicked, selfish means, rather than by goodness and purity; forgetting that *oblivion* is, to the noble mind, preferable to fame gained by spreading ruin and sorrow throughout the earth. Scan closely the blood-stained pages of earth's history, and mark with careful eye the immense number which, but for the manner in which unprincipled men have striven to gratify this desire, would have been spotless as Sierra's snows. Take only one instance of earth's great men—Napoleon. The blood-stained fields of the principal countries of Europe, and the marks of flame still to be seen in the City of Moscow, tell us more plainly than the tongue of man or the historic pen can ever tell us of his insatiable desire to be remembered. Truly, he has his reward!

Happy would the world be if those whose names are ever chasing each other over the historic page, were the only ones who have spent their lives upon the field of battle merely to win a name. Many are the fathers and brothers who under pretense of love for their country, but really actuated by a restless desire to make for themselves a name which should live after they had passed beyond the bourne, sacrificed home and loved ones—even life itself—mid scenes of blood and carnage. And after all this, they lie upon the plains forgotten—unmentioned in their country's annals.

Everywhere—not only in the public field of action but in the more secluded walks of life do we see that sweet to the human heart is the thought of being remembered after death. All! All! from the king to the serf, from the aged man to the beardless youth, from the gray-haired grandmother to the laughing girls, have thought, "what shall I do to be remembered?" And truly, what shall we, on whose brow the brilliant stamp of genius is not—do to be remembered?

Shall it be by sacrificing our principles of right to gain the friendship of those whom we hope will remember us? Others have yielded to this desire, and even ere the end asked in bitterness of spirit, "what is friendship but a name?" Shall we build for ourselves monuments of granite, and think by these mighty buildings to be remembered? Egypt's ancient kings thus sacrificed the lives of thousands of their subjects; their ashes lie in some obscure spot, and the pyramids but serve to show the skill of the architects of past ages, and to make the heart of every noble reflecting person turn in disgust from ambition so debased as to require so great a sacrifice, merely for its gratification.

Seldom does the gaining of earthly fame render its possessor happy. Who will say that Napoleon's was a happy life? Never allowing himself a moment's rest, ever urged on and on to boundless cruelties by his insatiable desire to win fame, could his have been a happy life? And his death! On the rocky isle of St. Helena lies this man, whose genius has never acknowledged a superior, and who has probably never had an equal. He is dying now—a captive; he is going to meet the God whose goodness he has constantly abused, and to answer for the use which he has made of the brilliant talents which have been bestowed upon him. His many cares have wrinkled his fine brow, but they have been unable to dim the fire of his eagle eye; his mind is with the past; no remembrance of good done or others made better by his brilliant talents comes to cheer and soothe him in the hour of dissolution; even his last moment is spent midst dreams of conquest; as his eyes are closed, pictures of battle fields flash o'er his frenzied brain. Earnestly during life he strove to be remembered after death, and he is remembered—as an unprincipled tyrant.

* * * * * * * * *

'Tis a cosy room in a simple cottage, the last rays of the setting sun are gleaming through a half-open window, and lingering as if to shed a halo o'er the dying head of an aged woman, whose days have been spent in doing all the good those poor, wrinkled hands have ever found to do, or that pure heart suggested. As we smooth back her snowy hair, gaze, ay, gaze on that brow! She boasts no gigantic intellect; there is no mark of brilliant talent, but gaze on. There is something sweeter, nobler far than the mere trace of intellect; in every line on that pale, wrinkled brow is written goodness and purity; every glance of her soft eye speaks of love to all mankind. Though her face is wrinkled and her eye dim, round her are gathering many loved ones who will remember and teach others to remember her with unfailing devotion. Ah! sweetly does she realize that

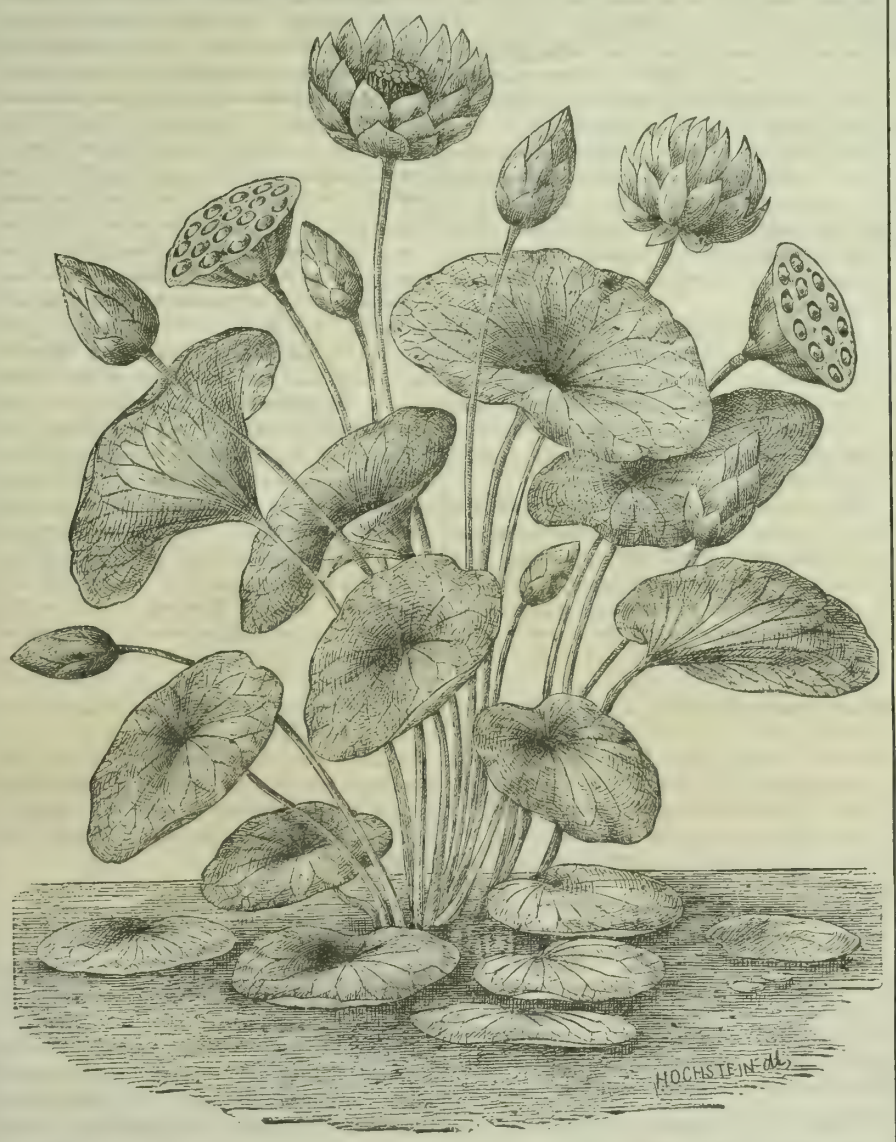
"To live in hearts we leave behind
Is not to die."

Is it not better than all earth's renown to be able at the close of a long life to say, as she trusts herself in the hands of her ever present Friend,

"Fading away like the stars of the morning,
Losing their light in the glorious sun,
So let me steal away, softly and gently,
Only remembered by the good I have done."

—*Julia M. Goodlett.*

The Lotus.



In connection with the handsome engraving of the lotus on this page, which we take from Mr. Sturtevant's catalogue, we propose to recite some interesting points in its history and add notes on its culture:

According to Thumberg, as quoted by Rhind, it is esteemed a sacred plant in Japan, and pleasing to their deities, the images of their idols being often represented as sitting on its large leaves. The long stalks are used by the natives as an article of diet. Loureiro mentions that it abounds in muddy marshes in India and China, and is cultivated in large, handsome pots in the gardens and houses of the mandarins; that there is a variety with the flower of a pure white, and another with a very beautiful luxuriant flower, having about 100 large petals, white or rose-colored. Both root and seeds are esculent, sapid and wholesome. The Chinese call it *lien wha*, and the seeds and slices of the hairy root, with the kernels of apricots and walnuts, and alternate layers of rice, were frequently presented to the British ambassador and his suite at breakfasts given by some of the principal mandarins. The Chinese have always held this plant in such high value, that at length they regarded it as sacred. That character, however, has not limited it to merely ornamental purposes, for the roots are not only served up in summer with rice, but they are also laid up in salt and vinegar for the winter. The seeds are somewhat of the size and form of an acorn, and of a taste more delicate than that of almonds. The ponds are generally covered with it, and exhibit a very beautiful appearance when it is in flower; and the flowers are no less fragrant than handsome. Sir George Staunton remarks that the leaf, besides its common uses, has, from its structure, growing entirely round the stalk, the advantage of defending the flower and fruit arising from its center from contact with the water, which might injure them. He also remarks, that the stem never fails to ascend in the water from whatever depth, unless in case of a sudden inundation, until it attains the surface, where its leaf expands, rests and swims upon it, and sometimes rises above it. This plant bears the rigorous cold of the Pekin winter.

In ancient Egypt the *Nelumbium speciosum* was endowed with mystic honors and won the admiration of the earliest writers. Herodotus calls it the "lily rose of the Nile," and Theophrastus speaks of it as the sacred bean of Egypt or the lotus of Antinous. It would be indeed a distinguished inhabitant for our ponds.

Concerning its culture Mr. Sturtevant says: It may be grown and flowered in a large tub, or, better, in a cement basin sunk in the ground, such as we have described. It sends out creeping stems, which run a long distance in the mud. This is our reason for recommending a separate compartment for it in the lily tank. It is only when planted in a large pond and allowed to spread, that it will produce the largest floating leaves. A good way to naturalize it is to start it first in a pan or shallow box placed in water at 60° to 75°, then when the water in the pond is well warmed, turn it out carefully into very rich soil or mud where the water is about one foot deep. It will then spread and take care of itself. No aquatic plants have a more tropical aspect than the lotuses; and a large patch of them, with hundreds of flowers and buds, is a sight never to be forgotten. They can be raised from seed, but it is a plan requiring a great deal of patience, as it takes three years to produce a blooming plant.

The lotus continues to bloom until cool weather in the fall. When just expanding, the flowers are especially beautiful, being of a rosy pink color. When open, they are creamy white and pink, and are very sweet. They open in the morning and close in the afternoon, like the common water lily.

THE LOTUS OR SACRED BEAN OF EGYPT AND INDIA—(Nelumbium speciosum.)

Doctored Milk.

The law against adulterated milk evidently needs enforcing now and then. The Sacramento *Bee* describes a case of adulteration as follows:

A few days ago a reputable dairyman in this city ran short of milk for his customers, and the lad who was driving the delivery wagon purchased a small quantity from another vender. This was furnished to three families, none of whom were able to use it, for the simple reason that it was not milk at all, but some vile adulteration composed of chalk and water, flour, or similar ingredients. After standing in a vessel for a few minutes a thick, whitish sediment settled at the bottom—enough to furnish the required coloring matter for the liquid. The stuff bore no resemblance to milk in taste, and even in appearance it was readily distinguishable from the genuine article.

This is evidently a case of the purest adulteration, or rather most impure adulteration, as the reader chooses. It is seldom we hear of a case of absolute manufacture like this. The addition of water is of course bad enough but harmless compared with the manufacture of a whitish liquid from indigestible imitations and dangerous materials. It is for the public interest that all cases like the above should be diligently sought out and the penalties inflicted unsparingly.

We read of a case the other day where it was shown that a milkman in a New England city had doubled his supply of milk by the use of a whitish emulsion of which he had made ten gallons for a few cents, and that he had sold the recipe to a milkman in another city for $25. Such things as this are bound to propagate themselves because of the cupidity of men, unless some check be placed upon them, and it is the duty of every one who finds the traces of adulteration to do what he can to bring the law to bear upon the offenders.

Pullman Cars in Europe.—There are now 47 Pullman cars in use on English and Continental railways, and 10 more in course of construction to be sent abroad. The first Pullman sleeper introduced in England commenced running on the Midland railway in 1874. The English railway officials and the people generally, predicted that the cars were too long to get around the sharp curves of that road, but after a trial had satisfied them that there was no ground for apprehension on this score, the English companies commenced to build larger carriages than they had ever built before.

Cotton and Straw Dwellings.—At the South, it has been demonstrated that fire and water-proof houses can be built out of straw. The cotton used is the refuse of the plantation and factories, and when ground up in about an equal amount of straw and asbestos, is converted into a paste, and subsequently into large slabs or bricks, which become as hard as stone. The article thus made is pronounced the best of architectural material, and will be much used.

Dog Meat.—Robert Bloakie, who has just died in Wabash, Ind., had for nine years lived chiefly on dog meat, which he declared to be wholesome and palatable. His family relish the same food, and propose to continue its use.

How to Grow Beautiful.—Persons may outgrow disease, and become healthy, by proper attention to the laws of their physical constitutions. By moderate and daily exercise, men may become active and strong in limb and muscle. But to grow beautiful, how? Age dims the luster of the eye and pales the roses on beauty's cheek; while crow-feet, and furrows, and wrinkles, and lost teeth, and gray hairs, and bald head, and tottering limbs, and limping feet, most sadly mar the human form divine. But dim as the eye is, as pallid and sunken as may be the face of beauty, and frail and feeble that once strong, erect and manly body, the immortal soul, just fledging its wings for its home in heaven, may look out through these faded windows as beautiful as the dewdrops of a summer's morning, as melting as the tear that glistens in affection's eye, by growing kindly, by cultivating sympathy with all humankind, by cherishing forbearance toward the foibles and follies of our race, and feeding day by day on that love to God and man, which lifts us up from the brute and makes us akin to angels.—*Ex.*

The Camera for Detecting Forgeries. The Bank of France is said to have almost wholly abandoned chemical tests in favor of the camera for detecting forgeries. The sensitive plate not only proclaims forthwith the doing of eraser or penknife, but frequently shows under the forger's figures the sum originally borne by the check. So ready is the camera to detect ink marks that a carte-de-visite enclosed in a letter may appear to the eye without blemish, while a copy of it in the camera will probably exhibit traces of writing across the face, where it has merely been in contact with the written page.

Ancient Antipathy to Tobacco—April 18, 1621.—Sir William Stroud moved that he would have tobacco banished wholly out of the kingdom, and that it may not be brought in from any part nor used amongst us; and Sir Grey Palmes said that if tobacco be not banished it will overthrow 100,000 men in England; for now it is so common that he hath seen ploughmen take it as they are at plough.

Extinction of Animals.—According to the Paris *La Nature*, all of the larger animals the world over, including the lion, tiger, gorilla, giraffe, elephant, hippopotamus, etc., are rapidly approaching extinction. Some are hunted down for profit, some for pleasure, and many because they threaten the existence of man.

The Postoffice Department revokes the order for the redemption of postal cards spoiled in the hands of private parties.

PACIFIC STATES WATCHMAN.

Issued on the 1st and 15th of each month.

At No. 252 Market Street, San Francisco, Cal.
☞ *Take Elevator No. 13 Front Street.* ☜

Subscription (in Advance), $2 a Year.

Favorable to Advertisers.

By consolidating the large subscription lists of the *Pacific Workman* with the Pacific States Watchman our advertisers gain an unusually great advantage. We doubt if any one weekly newspaper has ever been circulated to as many different readers on this coast, as have been served heretofore by the *Workman* and Watchman together. It is certain that no other periodical is now patronized by a better class of industrial, professional and business men. In fact, our subscription list embraces many of the foremost business and representative men throughout the towns cities of the coast.

We have pride in making our paper "clean and handsome," and first class in all respects—to the benefit of both our readers and advertisers.

OFFICIAL RECOMMENDATION.

[*Resolutions adopted by Grand Lodge of Cal., Feb. 3, 1881*]

Whereas, the Pacific States Watchman, the pioneer A. O. U W. advocate on this coast, without official aid, has long rendered able and valuable services for the good of our glorious organization, we earnestly recommend that our Lodges and the brethren individually patronize the Watchman as liberally as circumstances will justify.

ADVERTISING RATES.

One Square (¼ inch), per issue	$ .75
One Square per month	1,25
Two Squares, per issue	1.50
Two Squares per month	2.50
Obituary notices and resolutions (with 25 copies post-paid for friends of deceased) per sq. (¼ inch)	50

☞For reading notices, extraordinary display, special advertising and choice places permanently, extra rates will be charged. Reasonable reduction will be made for large and long-continued advertisements. No extra rates for the space occupied by engravings.

Entered at San Francisco P. O. as second-class matter.

San Francisco, - December 1, 1881

"Sound It Along the Line."

Ever onward and upward is the motto of the A. O. U. W., and with the success of the Order is the Watchman's progress. There are, however, some Workmen who are not subscribers, and we wish to draw *their* attention to the merits of our journal. Those of our readers who have been with us from the start, and also those who have come later, can do much to not only aid our enterprise, but also that of our organization. They have been with us, seen our work, and can best tell whether the Watchman has not been an earnest advocate of the Order's interests.

Members of the A. O. U. W. have a pecuniary interest, which renders an able exponent of their rights and privileges of paramount importance. Therefore, every member of the Order should take the paper, read it, and if he has some friend who is morally and physically qualified, lend him the paper for the purpose of hastening action.

Members of the Watchman family who have felt strength and received encouragement from a perusal of the Order's doings in its columns would do well, also, to pass it occasionally around to the lukewarm, that they may be partakers in the faith which moves them.

The privileges we now enjoy by reason of our membership will last while life is in us, and when we are gone others will be ready to fill our places. If the Order should ever perish, lukewarmness will be the rock upon which we will split, and one of the greatest preventives of this will be the enthusiasm that is kept alive by a careful reading of the Watchman.

We will send copies free for samples to those who are willing to assist in the circulation of our paper.

A compliment was paid to the Pacific States Watchman that we appreciate, by our efficient Deputy Grand Master, E. F. Loud. He said: "As I travel through our jurisdiction, I find those Lodges where the Watchman is taken in a healthy and flourishing condition; on the other hand, the members are indifferent, and there is hardly any increase in membership."

Colusa Lodge, No. 66, will have a public entertainment at the Colusa theater, on Friday evening, Dec. 1st. Singing, banner presentation, dancing, etc., will form the exercises. We acknowledge the receipt of an invitation, and hope the brethren will have a good time.

Fidelity, No. 136, christened a $550 Henry F. Miller piano on Wednesday evening, Nov. 16th. The large attendance seemed to give an inspiration to the occasion, as their opening ode was sung with marked vigor and harmony.

A Wise Law.

The Supreme Lodge at its last session passed the following resolution:

Resolved, That Grand Lodges be authorized to confer the degree of Past Master Workman upon such Recorders, Financiers and Receivers who, by reason of three years' service and meritorious conduct, may, in the judgment of said Grand Lodges, be justly entitled.

We believe the passage of this act will eventuate in great good to the Order. There is no class of our membership so thoroughly conversant with the laws and requirements of the Order as the clerical and financial officers of our Lodges. To master their duties is the work of time, and hence we have urged that where such officers filled their positions with efficiency and fidelity, they should be retained in their respective positions as long as they would consent to serve. But men capable of filling these offices usually have the common desire of mankind to advance to the highest honors the Order can confer, and the fact of remaining in their positions has debarred them heretofore from such honors. Now it is apparent that the schooling these officers receive eminently fits them as representatives in the Grand Lodge, and the act above quoted provides a way for them to be such while still occupying the positions to which they have been called in the subordinate Lodges. Thereby the officer will be profited, the subordinate Lodge will be profited, and the Grand Lodge will be profited. It's a good law.

As many of our brothers will be entitled to the P. W. W. degree under this regulation, it may be well for them on coming to the Grand Lodge to be armed with a recommendation from their respective Lodges, and also a certificate of three years' service, so there can be no question as to eligibility.

The question is mooted as to the eligibility of one of these officers (who has filled by service the requirements of the law) to election as a representative to our next Grand Lodge. The law does not seem to contemplate such eligibility, for the conferring of the degree in such cases is optional with the Grand Lodge; and it is a well settled principle of the Order that when a mere privilege of honor is given such privilege must be availed of before the honor attaches. For instance, a Lodge has not enough Past Masters to fill its quota of representatives. It is then privileged to elect any M. W. of the Lodge to supply the deficiency, but if the member elected fails to present himself to receive the P. M. W. degree, he does not acquire the honor it was his privilege to receive. The same principle applies in the case of representatives to the Supreme Lodge. We, therefore, conclude that it will be judicially held that a Recorder, Financier or Receiver, though eligible to the P. M. W. degree, is not thereby eligible to election as a representative until such degree shall have been conferred by his Grand Lodge.

Honor to Whom Honor is Due.—The fact that Dr. Richardson, Supreme Medical Examiner, in conforming to a resolution of the Supreme Lodge requesting that he prepare instructions to Medical Examiners, has copied in full what has been known in this State as the "California Manual of Instructions to Medical Examiners," is a graceful tribute to those physicians of our Order who prepared them. The committee to whom was intrusted the arduous labor of compiling, arranging and getting up these instructions was appointed by Wm. H. Jordan, when when he was G. M. W., and consisted of Drs. Jas. Simpson, A. W. Perry, L. J. Henry, W. N. Griswold, F. Hiller, Jr., and Chas. E. Blake. The committee held numerous meetings, and each statement was revised and re-revised, in order to secure a thorough course of instructions to the subordinate Medical Examiners of this State. The Supreme Medical Examiner shows his good judgment in adopting them, for, we suppose, without the painstaking care which our California Medical Examiners devoted to their compilation, he would have been compelled to give some original ideas on the subject.

As indicating the character and material of which our city Lodges are formed, we point with pride to our business advertisements in the Watchman, representing as they do all classes of business, a number of wholesale merchants, and all a selection of men that our brother Workmen in country and city can, with propriety and interest to themselves, patronize in their various lines of trade.

Are We Wrong?

Is not our usually accurate contemporary, the Pacific States Watchman, mistaken in saying that the "tables of expectancy are made up from mankind in general, including the halt, the lame, the blind, the good, the bad and the indifferent?" Our impression has been that the "American Experience Tables of Mortality" were compiled from the experience of life insurance companies operating in this country, and therefore refer to the ordinary run of risks taken by such companies.

We quote the above from the *Knights' Journal*, organ of the Knights of the Golden Rule. We may be in error in relation to the method by which the so-called table of American experience was compiled, but still think we are correct. The table is said to be based on 100,000 selected lives, beginning at the age of ten years. As these could not have been selected at so tender an age from actual policy holders, it seems clear that our statement must be correct, and the impression of our worthy contemporary erroneous. But, right or wrong in this, the table is a delusion and a snare when applied to the gradation of payments on life assurance. We speak with confidence, for the statistics bear out the statement. Facts are terribly stubborn things, and we long ago learned better than to quarrel with them. We do not say that a system of graded assessments could not be made that would be comparatively more just than "level" assessments, but we do say that no tables have ever been compiled that are at all reliable in pointing out how such gradation should be made. The A. O. U. W. is over 13 years old, and the per cent. of deaths in the Order to the present time has been greater in the middle than in the extreme ages respectively, in spite of the experience table. That is principally because we lose at least four members from other causes, to one by death, and all alike have contributed to pay the losses that have accrued to the Order by death. The kind of experience tables we want, are such as will show the liability of a person to die *in the Order*, and the risk thereby incurred of having to pay on him $2,000. This can only be done by instituting a system of statistics that shall show how many join at the various eligible ages—from 21 to 50—and how many die out of each class respectively from year to year. It will take at least 20 years to even approximate a correct conclusion, and yet men, in the face of facts, seem anxious to tear away the old, reliable landmarks, and plant instead a shabby fallacy to guide our footsteps.

The Situation.

As will be seen by the official notice of the Supreme Recorder, the guillotine has been at its work again in Iowa. The responsibility is at last on the shoulders of Bro. J. W. Willett, acting Past Grand Master Workman. We do not know how he stands in the present emergency, but cannot see how he can refuse to assume the responsibility which has fallen to his hands without stultification, for he is on record as a supporter of the laws and edicts of the Supreme Lodge, even to the enforcement of the Yellow Fever Law. For two sessions he has represented the State of Iowa in the Supreme Lodge, and been an active participant in the legislation of that body. We have every reason to hope that in him will be found the man for the occasion, but if the event should prove otherwise let his star set with the rest who have gone before. Then will come the suspension of the Grand Lodge, and after that its resurrection. Supreme Master Baxter is not the man to falter in his determination to bring Iowa down to a loyal basis, and in this he has the support of the entire brotherhood elsewhere, and, it is believed, a large portion of the members in the rebellious jurisdiction. We now want to see the work thoroughly done. A temporizing policy toward Iowa has been pursued too long already, as the result has shown. The policy of soft words and grass has been of no avail. Now let the stones be hurled thick and fast till the end is reached.

Twelve deaths to be paid for in the Supreme Lodge jurisdiction in November. They occurred in the following States: Kentucky, 4; Arkansas, 1; New Jersey, 1; Georgia, 1; Ohio, 3; Texas, 1; and Mississippi, 1.

We met Bro. A. Thurlow, P. M. W. of Industry, No. 8, Portland, Oregon. Industry is the largest Lodge in that jurisdiction, and is reported by Bro. Thurlow as in a flourishing condition.

Grand Recorder's Department.

Headquarters of Grand Lodge, A. O. U. W., Rooms 40 and 41, St. Ann's Building, corner of Eddy and Powell, San Francisco. H. G. Pratt, G. R.

Wm. C. Flint, Esq., 216 Sansome street, S. F., is Chairman of Committee on Laws and Supervision. All By-Laws, or amendments to same, should be sent directly to him.

The probabilities are that we shall start the new year with two assessments.

Three hundred new beneficiary certificates and about 50 re-issues were written last month. The Order was never more prosperous in this jurisdiction.

If Financiers and Receivers wish blanks on which to make their reports for the term ending with December, no time should be lost in ordering them from this office.

Blank Ritual receipts will be mailed to each Lodge in the jurisdiction. If by any means a Lodge has lost any of the rituals originally in its possession, a satisfactory explanation should be made to the installing officer at the time of installation of officers.

Recorders are earnestly enjoined to be prompt in sending in their monthly reports. Every month several are inexcusably slow in this regard, and I am compelled to estimate the number of their members in good standing in reporting to the Supreme Lodge, and besides the record of standing is in many cases inaccurate for the same reason.

The per capita tax for the term is 30 cents per member, and must be paid by all Lodges organized previous to January 1st, 1882. Junior Workmen must be counted as well as all Master Workmen not finally suspended from the Order for six months arrearage of assessments or dues, or by decree of the Lodge under the penal provisions of our laws.

The matter of providing for the creation of a State Medical Examiner or Examining Board, and making such regulations for the government of such officer or officers, will no doubt be the principal work of the next session of the Grand Lodge. It involves a question of vital importance to the future welfare of the Order in this jurisdiction which should receive much careful and wise deliberation. We should make it easy for good material to join our ranks and hard for the bad. The danger is that the reverse may be the result, as it seems to be in some other jurisdictions.

Traveling Brothers.

H. G. Pratt, G. R.:—There are times when traveling brothers wish to make sure that they will not be suspended for non-payment of beneficiary assessments during their absence from town. Has the Financier or the Receiver a right to take cash in advance from such a brother and enter credit for the same on the books? Must some third party be employed to pay the assessments as they become due, or can you state some simple method whereby the Lodge can consistently receive a deposit in advance from its members for assessments? Please tell us in the Watchman what you know about such matters. Traveler.

It is a common practice in our Lodges to receive any advance moneys a brother may desire to pay, and then apply to dues and assessments as he may direct, but a Lodge cannot be compelled to receive moneys in this manner. I never knew one to object, however.

The third anniversary of Burns Lodge, No. 68, will be held at B'nai B'rith hall on Monday evening, Dec. 5th. The exercises will consist of a select musical and literary programme, commencing at 8 o'clock and ending at 9:30. The balance of the evening will be devoted to Terpsichorean exercises. The following committee of arrangements have been appointed: Wm. C. Flint, P. M. W.; Wm. K. Doherty, P. M. W.; Gus. Pohlmann, Rdr.; L. G. Schord, P. M. W.; C. C. Butt, G. We may expect a real enjoyable affair.

We had the pleasure of an interview with Bro. H. W. Messenger, of Nevada City Lodge, No. 52. Although not increasing very fast, their Lodge is prosperous, and a general interest taken in our Order in Nevada City.

Steps are being taken to form a new Lodge at Lower Lake, Lake county.

Fraternal Societies—Their Virtues and Value.

The following address was delivered before Geo. H. Thomas' Post, G. A. R., on Tuesday evening, October 18th, and on Wednesday evening, November 16th, before Fidelity Lodge, No. 136, A. O. U. W., in Red Men's Hall, by F. A. Symmes, M. W. of Fidelity. At the meeting of Fidelity, an addition was made to the original address in behalf of the Veterans' Home, and the brethren of Fidelity contributed $50, from the General Fund, which was swelled to nearly $300 by individual donations of the members. The article will well bear reading, as it is considerably out of the beaten track of society addresses. Bro. Symmes spoke as fo lows:

I have chosen for my theme at this time, fraternal societies, their virtues and their value, the relation which our orginization bears toward the others, as well as the causes which produced it—our duties toward it and the benefits to be derived from it.

Man seeks society—even in the beginning our Lord declared "it was not good for man to be alone" and from that time forward we find in all phases and conditions of life, and under all circumstances and surroundings, the inevitable disposition to group together in greater or less numbers. Civilization and education each increase this tendency, by opening up new fields for inquiry, for study, and for enjoyment; and it is as natural for men of similar circumstances and feelings to unite their efforts for the attainment of their various ends, as it is for the chemical components of the material world to unite each with its chemical affinity to accomplish any material substance. Just as surely as the grapes cluster in the vineyard, so man is found united in companionship with those with whom are found congenial and sympathetic feelings. Like feelings call us toward each other in all conditions of society. Similar views of religion bring into existence the various religious denominations; like views upon the affairs of State bring political parties, and the less important studies of life band us together indiscriminately in Clubs, Lodges and kindred societies. Even the very outcasts of society—the cut-throats and the highwaymen—have their little coterie of sympathizers with whom they confer for their safety and protection, and for the advancement of their arts; and, as the botanist arranges his plants into their classes, their orders, their genus, and their species, so do we find society divided by its religion, by its language, by locality, by the varying conditions of politics and all similar feelings.

Looking back into the early history of England and France we find all the

Secret Societies Called "Guilds,"

Probably on account of their benevolent motives, the word being derived from the Saxon—gildan, to pay. The French had also their confrerie or confraternities, with objects both secular and religious. Secular societies were organized in Rome at a very early time and continued to increase in strength and importance, till finally with the infusion of Christian religion they were transformed from their early Pagan nature into the Christian charitable organization. Every trade had then its separate society and they were recognized by the old Emperors. Not only the members but their offspring were however confined to their own calling, but they obtained by this means the monopolies of their several trades.

In many of these ancient cities the progress from the

Guild to the Condition of Self-government

Is plainly marked. The church edifices of Holland and Belgium record in pictorial or sculptured commemorative many great events connected with these Guilds.

English history records the charters of many of the trade Guilds, as early as the 10th century, and under the reigns of kings Henry I. and II. they received much encouragement. As they were so much inclined to public parades with their liveries and banners, they frequently came into collision with one another and were then forbidden to parade with their liveries except at coronation. The term Livery Company then followed the Guild (14th century), and it applies to this day to many of the London companies. The Livery-men are even now intimately connected with the corporation and government of the city of London, and it is from their votes, come the Sheriff, the Aldermen and the Lord Mayor of London. The Guilds have now been followed by the Trades-unions.

In France the Guilds, (14th century), were under the direct control of the high officers of the crown, who disposed of the Masterships and collected heavy fees therefor. The crown officers conducted things with a high hand and riot and bloodshed were not an unfrequent result. The strict requirements of the Guilds and their officers, however, has been a matter of no small importance in the advancement of the mechanics' arts and morality, and concord were secured by stringent regulations. Like the story of the Irishman—they were bound to have peace in the family even if they had to fight for it. It was here that

St. Crispin Became the Patron Saint

Of the shoemakers and St. Joseph of the carpenters, and how far the world is indebted to these societies for the perfection of their labor will probably never be known. In France they were not limited to the mechanics and laborers, for as early as the 14th century existed the Order of Advocates, with some very remarkable regulations, and an order of 1344 prescribes that no lawyer should be heard in court whose name was not on the Roll of Advocates. This Order was suppressed in 1790 but re-established with many limitations in 1810. Connected with this Order was that of

"La Baroche," or the Lawyers' Apprentices,

Which was founded in 1303 and was even more remarkable than the Order of Advocates. Its chief was authorized, by royal edict, to assume the title of King, to wear the robes of royalty and to surround himself with officers named after those of the crown, and within the Brotherhood vested with supreme civil and criminal jurisdiction. They even coined their own money of gold and silver, which was legitimate currency between them, and had an army of its members mounted and equipped. They paraded 10,000 strong, and had a cavalry corps of 600 which they furnished to Henry II. in 1548. Alarmed by their strength, Henry III. suppressed their royal titles and their military parades, and their last military distinction was at the fall of the Bastile.

A well-known Guild was that of the Scottish Bar—and a "Guild of Literature and Art" was organized by Charles Dickens and Lord Lytton for the relief of indigent men of letters and artists.

It thus becomes a subject of deep interest and almost fathomless research to trace back the history of these organizations in the various countries. Their objects and intentions were much the same in the past as are those of our own societies to-day; but, of course, governed by circumstances and surroundings, the times and the people, they developed very striking peculiarities.

Among the existing organizations to-day we find at the head of the list the

Order of Free-masonry,

And an ardent member thereof will trace its history back among the dim and dusty ages of the past till it fairly loses itself in oblivion. The details and ceremonies of the Order are founded upon the building of Solomon's Temple when he was assisted by a band of Masons from Tyre, led by the Widow's Son. The system and method of this organization is so complete and perfect that it constitutes a world and a religion of its own. The building of churches was the great work of the Masons in those earlier times, and gave them the high rank they attained, and enjoying as they did the special favor and protection of the Pope, bulls were issued by which peculiar privileges were granted them, and from the exemption of burdens which were imposed upon other workmen they obtained the title Free-Masons. King Henry VI., of England, joined the Order and Henry VI. was Grand Master. As the membership thus increased beyond the practical builders it grew into what is called Speculative Masonry, as distinguished from Operative Masonry, in its early existence. It was transplanted into France in 1725 and very soon after into Holland, Russia, Germany, Italy, Spain and Scotland. The first Lodge in this country is supposed to have been opened in Boston in 1733, and since that time it has flourished with great vigor, and now there are Lodges or members of the Order in every city and country of the earth. I was once informed by an American ship captain that his Masonic signs had been answered by Chinese fishermen from their boats in the most obscure parts of China. For perfection of system, work and study, their organization challenges the highest admiration.

The Independent Order of Odd Fellows

At a more recent date sprung from similar societies of mechanics and laborers in London, in the latter part of the 18th century, and its first appearance in this country bears date of April, 1819, in the city of Baltimore. This Order pays sick benefits to its afflicted members and has spent in a single year more than a million and a half of dollars in relief to members and their families.

Standing at about the head of the Beneficiary Organizations we have the

Ancient Order of United Workmen.

With an existence of about 13 years, and with a membership of more than 105,000 in the United States, and 13,300 in California alone, it is rapidly growing into much favor and prominence. Adding to the charitable and fraternal features of the older Orders a prompt payment of $2,000 to the heirs of a deceased member, it comes to the bereaved family not alone with cold resolutions of condolence and regret, but with the kind hand and warm heart of a generous friend; and in this practical usefullness it has shown itself of exceeding value to what might otherwise be many a destitute family. Following in its wake come

The Knights of Honor,

The Legion of Honor, the Chosen Friends, and many similar and later organizations which attempt very much the same and many of them a great deal more. Their increase and growth, however, as the inducements for special gain is increased has a tendency to weaken in them the higher principles which the older Orders exist from alone, 'till they are drifting toward mere business organizations for cheap life insurance.

There are also very many other Orders with worthy objects, but one of the grandest and noblest of them all is that one which unites to the fidelity to its principles, and the charity to its members and their families, a noble loyalty to country and a united determination to protect that country and its flag from all injury, treason, or disgrace. Who is there, who better knows the principles of generosity, of kindness, of unselfishness, of true devotion to man and to beast, than the soldier of the Republic who has passed through a vigorous campaign in the service, whose entire worldly possessions are on his back, and who has shared his canteen and his haversack, not only with his fellow-friend, but, with christian forgiveness, with his suffering foe? If the Free Masons, the Odd Fellows and the United Workmen can constitute in themselves a practical religion, how much more so does the

Grand Army of the Republic

When she adds to their virtues, that devotion to country which caused her members to offer their lives at her shrine, and in every comrade of it the experience of those four years has developed so truly the most unselfish qualities of true manhood?

One hundred years ago this night (Oct. 18th), the American army was encamped around Yorktown—and for the first time during that long and fearful struggle—did Washington and his supporters feel that the American republic was an assured success. The preliminaries were arranged and waited but the morrow's sun to see the surrender and disgrace of England's proudest chieftain, and the deciding act of our American Independence. To-morrow, (Oct. 19th) the American people assemble there again to celebrate the anniversary of that event and to do honor to the friendly nation, but for whose assistance such an end might never have been accomplished. But for their aid we might never have had it and but for the G. A. R. we certainly never could have kept it, and to that man or body of men who would rob a star from our flag, or one inch from our land, the G. A. R. stands as a stern and solemn reminder that that same spirit lingers in the country yet. It stands as an

Emblem of Protection

To the land we love, and to the careful and honorable guarding of its every part. It says to our children and our children's children, "The land we bequeath to you, and that we have fought to preserve as a common country, must ever remain inviolate." And whilst our organization must be limited in its existence, its value and services can never be. Loyalty to country is one of the most ennobling sentiments which has ever entered the soul of man. It has called forth the finest strains from the poet and the purest and strongest eloquence from the statesman. Point out to me, in the history of the world, a character around whom there clings a halo of beauty and divinity more noble than that of the true patriot.

As in times of peace we should prepare for war, we should now keep alive those memories to the end that we may inspire in the generations which are to follow us, an affectionate love for our land, its institutions and its laws. The G. A. R. having been born for and passed its fresh young life in the country's cause, and now, after two decades, is passing down the gentle grade of its declining years—and that the good it may have done may not be "interred with its bones," should look about it and see if there is not one to whom we may transfer the mantle of that pride and say, "My child, be thou even a more worthy son of a worthy sire, that which we have guarded must you now protect—and as we may have done well in crushing out that rebellion, whose seed we had unwisely allowed to take root, let it be your duty to smother in their birth all future seeds of discord and treason."

If I am rightly informed the organization known as the

Patriotic Sons of America,

Is for this object, worthy our serious consideration. And as our numbers and influence shall be lessened by the grim messenger who, sooner or later, will call for us all, we should see that they pick up the sword that we lay down—and we should farther see that they are prepared to carry forward into the great future and transfer to succeeding generations all the earnestness of purpose, and true fidelity to country, which can be ours but for this lifetime. If I understand their objects they embody fully our principles, and if they have not proven their good works upon the battle field, they also escape some of our faults—that little tendency toward vanity and conceit with which we are tainted. If, also, they include the intention that America shall be governed by Americans, then are they all the more worthy our attention, and the G. A. R. should stand as god-father to the Patriotic Sons of America. It behooves us, whilst we assemble here to rehearse the pleasures and the trials of the past, that we become not too much occupied with self admiration, but that we prolong the benefits of our example by every encouragement to those who shall in future constitute the strength and trust of the Republic. Let us then, gathering strength of purpose and true patriotic determination from the worthy example of our martyr President—

From Garfield—the Great and the Good—

Let us, as we cherish *his* memory, and his noble manhood, remember that he who was great in war, may be great in peace, that the hero of the field may be like distinguished at the forum, and that the good men do here, may yet live after them. For

> "Lives of *such* men all remind us,
> We can make our *own* sublime,
> And, departing, leave behind us,
> Foot-prints on the sands of time."

We can leave to the truly Patriotic Sons of America, whether they be banded together in a secret association or not, an example as worthy and faithful in peace as it has been in war. If then in the past we may have shown to the world the record of a good soldier let us, as we treasure the great comrade who has left us, draw from his life a moral, and add to that record of the good soldier that of a good citizen, and would at the close of our earthly career we could like him step forth into the great unknown with that past supplemented by as honorable a career in peace, and with him equally faithful to our State, our family, and our God.

The Veterans' Home.

And now, relaxing your imagination as comrades, let me remind you as Brothers of Fidelity Lodge that we may here find many lessons worth remembering. Our association draws our thoughts from ourselves toward others. We are all prone to that great human weakness—selfishness—and but few are free from it. Life is a continual struggle for personal aggrandizement, for wealth, fame, or honor. With the most of us it is wealth, we go down into California and Pine streets, deposit a few dollars in the pool-box of stock speculation and worry and fret because we cannot draw out the dollars that our neighbor puts in—we go to our counting-rooms and other places of business and toil and scheme to see how we can buy for less and sell more than our neighbor—to increase our trade that his may be less. Now, a little association of this kind may be made a means for much good, it breaks in upon this o'er selfish tendency, it tends to smooth off the rough projections of an uneven disposition, it tones down our individual conceits and often reminds us of our faults—that we might otherwise forget. It keeps the most excellent principles of our Order before us and reminds us that we should live up to them, to help each other, to be just, and to be generous.

And now, let me return to the cause of the soldier, and ask you, my Brothers, if we shall not all of us apply the principles of justice and of our Order in their behalf? Whilst we now enjoy in peace and great prosperity the many blessings of our glorious country, is there not a debt unpaid on account of that Government restored to us from its threatened disruption? Is it right, is it just, that any individual who imperilled his life and has borne the trials of camp life, and the dangers of battle, and because he escaped with his life must now be found wandering about and knocking for

Admission at a Public Almshouse?

Is it not a stigma upon our ingratitude that there should be one such individual upon our coast? Yet the facts are there are a hundred! Will we not therefore rescue them at once and tell them the error is from thoughtlessness and not from intent?—for I trust there is no man who will not acknowledge that they deserve a home in the land they helped to save—and they should be the first to have it and not the last. Let us build them a home—build them one worthy of their efforts, their dangers and their sacrifices, so that when misfortunes crowd upon them in their efforts at self-support they may sit down in their declining years and enjoy with us some portion of the fruits of their labors. Let us do it willingly, do it cheerfully, and do it generously. And thus, my Brothers, do I appeal to you, when solicited in behalf of the Veteran Home Association to respond with generous hearts and the best efforts of your tongues, remembering that this is not charity which the friends of the soldier and the sailor ask, but pure and simple justice.

INNOCENT.—A man and his wife living up the coast above Fort Ross, recently made application to the Mutual Relief Association of Petaluma for membership. Among other requisites the application must show the size, hight, weight, measurement of chest, etc. In this instance the applications showed that the husband and wife were about the same hight, each weighed exactly 155 pounds, but the measurement around the chest gave the husband 22 inches while his wife had but 18. The Secretary at once wrote back to thehusband for an explanation as to the difference in the sizes of their chests. Last week the husband answered, stating that his wife had no chest, but kept her things in a little box, the measurement of which he had evidently sent in answer to the question.

THE CYCLE OF THE SEASONS.—Different men of science in England hold different opinions in regard to what is called "the cycle of the seasons." E. J. Lowe said, in 1879: "There can be no reasonable doubt that a cycle of seasons exists, though its precise period has yet to be ascertained. A lengthened investigation has, however, satisfied me that the cycle is about 11 years. Thus, every 11 years drouth and heat are experienced, usually of three years' duration—that is to say, the drouth recurring in three consecutive summers." And in the same year, Mr. Roe, F. R. A. S., broached a theory closely resembling Mr. Lowe's. G. T. Ryves, F. M. S., now calls attention to the fact that the last three summers, which, according to the theory, should have been hot and very dry, have, on the contrary, been cold and wet, and from this he draws the conclusion that at best such predictions are but scientific guesses, and when put forth as prophecies they are not only sure, in many cases, to disappoint those who put faith in them, but are apt to create a false impression in the public mind as to what is attainable in the present state of meteorological science. On the whole, it seems that any such predictions, no matter who makes them, are not a whit more likely to be verified than if Mr. Venner had made them.

WHAT IS LINOLEUM?—A cotemporary answers as follows: We have been informed by what we regard as good authority that it is made by covering strong jute cloth (burlap) with a mixture of linseed oil and cork powder, to which some mineral color has been added, to form a ground on which the pattern is subsequently printed. The general process of manufacture is doubtless identical with that of oil-cloth. With respect to the wearing qualities of linoleum, we can speak from personal knowledge in terms of the highest praise. The material is elastic, accommodating itself readily to the irregularities of the floor on which it is laid, and is not liable to crack when laid down on a rough or uneven floor. In this respect it is greatly superior to oil-cloth, which is notoriously troublesome in this particular. This same quality—due, no doubt, to the elastic nature of the cork it contains—gives it excellent wearing qualities, in which respect also it is decidedly superior to oil-cloth. It will bear the roughest usage, and almost completely deadens the noise of footsteps. The material is, without doubt, excellently adapted for its intended use, and has come to be very generally introduced as a substitute for oil-cloth.

DEWEY & CO.'S

Scientific Press  **Patent Agency.**

[ESTABLISHED 1860.]

Inventors on the Pacific Coast will find it greatly to their advantage to consult this old experienced, first-class Agency. We have able and trustworthy associates and Agents in Washington and the capital cities of the principal nations of the world. In connection with our editorial, scientific and Patent Law Library, and record of original cases in our office, we have other advantages far beyond those which can be offered home inventors by other Agencies. The information accumulated through long and careful practice before the Office, and the frequent examination of Patents already granted, for the purpose of determining the patentability of inventions brought before us, enables us often to give advice which will save inventors the expense of applying for Patents upon inventions which are not new. Circulars of advice sent free on receipt of postage. Address DEWEY & CO., Patent Agents, 252 Market St., S. F.

Painting of Cement and Plaster.

Much difference of opinion prevails respecting the question of painting Portland cement, and we have seen work painted a few weeks after the cement has set, which has stood well. There is one point which has a great deal to do with the question of successful painting, namely, the absorbency and dryness of the brickwork itself. Many new walls, saturated with moisture, are cemented, and in this condition no paint can possibly stand if laid on too soon. It is a good and safe rule to enforce that Portland cement work should not be painted within a year of its completion, to allow it to dry thoroughly; but we are safe in saying the majority of new fronts are painted before they have been finished three months. A very desirable precaution seems to be to coat the work with linseed oil first.

The painting of plaster work requires the same care, and the lime works out in small bubbles, destroying the paint. In painting plaster, white lead and linseed oil, with a little drier, is recommended by one authority. This coat should be of the consistence of thin cream, so that the oil is absorbed into the plaster in a few hours. In a day or two another thicker coat may be applied, and a third a few days after, rather thicker, followed by the finishing coat. Four coats are not too much for good work. By the absorption of the oil into the plaster the surface becomes hardened, and may be washed. Another method to facilitate this absorption is followed by painters, which is to give the plaster two or three coats of boiling linseed oil, and then to apply the other coats of paint. We are inclined to think the application of the oil before the paint a better plan, to insure a thorough saturation of the material. The color of Portland cement, and the uneven tint it sometimes assumes, is the main reason why painting is resorted to. For this reason we think it may be worth the attention of manufacturers to turn their consideration to the subject, and those using cement as a stucco might also prevent a blotchy and uneven tint by attending to the preparation of the wall and the sand they use with the cement.—*Building News.*

A GOOD-LOOKING old German with long hair sat in a barber's chair and was asked whether he would have his hair shingled. "Mein Gott, no! I vant some hair koot off. Vy, vot you put zum shingles on it because? You dink I vas leaking?"

Railroad Signals.

The strange and dangerous dissimilarity of railway signals in this country has often been referred to, and the subject is brought forcibly to mind again by an interesting diagram in the *Travelers' Official Guide*, showing the whistle signals now in use upon about 200 lines. This indicates that, with the exception of the signal for backing, consisting of three short whistles, there is no signal in use having the same meaning on all roads, while no less than 40 different meanings are conveyed by several signals. According to this table, about 90% of the roads use one whistle for applying the brakes and about the same proportion use two short whistles for releasing brakes, while on others these sounds have exactly the opposite meaning. The signals for road crossings, sending out flagmen, recalling flagmen, calling for switchmen, calling attention to flag on engine and to railroad crossing, denoting that train has parted, calling for fuel, etc., differ widely; in fact, the code is based solely on the arbitrary fancy of the officer of each road. It is unnecessary to repeat that not only inconvenience, but often actual danger results from this dissimilarity of signaling, especially from the fact that railway men in this country are nomadic in their tendencies and wander from one road to another, so that the force of habit may lead to serious errors. All railway officers will agree as to the desirability of securing greater uniformity, but the trouble has been how to arrive at it. We are glad to observe that the new association of American railroad superintendents has appointed a committee "on train rules and signals," to report at the next meeting in April, and it may be that this association will furnish the means of bringing about the desired reform.—*Railway Press.*

CANARY BIRD BREEDING.—A new and novel industry has been started in Bohemia, viz.: the breeding and rearing of canary birds. Herr Gener, a gentleman who had been actively engaged in furthering this object, has rendered a flourishing report. Four houses, which were started in the spring, have succeeded remarkably well; 20,000 male birds represent the sum of 50,000 to 60,000 florins. An instance of the profit to be obtained by canary breeding is given by the little town of Andrensburg, in the Hartz, of 3,000 inhabitants, where, during the past year, 100,000 gold florins, or £10,000 were brought in by this industry alone.

The Lumber Question.

The question of our future lumber supply was discussed from a scientific point of view at the late meeting of the American Association for the Advancement of Science. The discussion was introduced by the reading of an elaborate paper by William Hosea Ballou, of Evanston, Ill., on "The White Pine: Its Origin and Natural History; Statistics of Its Industry in Michigan; The Coming Substitute for Lumber." This paper possessed much general and commercial as well as scientific value, and if space permitted, would be given in full. We give its concluding portion on the Michigan lumber trade, which will be read with peculiar interest as relating to a region which has recently been devastated by such terrible forest fires.

There are 20,000 vessels engaged in the transportation of this lumber, employing 120,000 men, and valued at $100,000,000.

In the log woods in winter are 50,000 men at work, and 20,000 in the sawmills in summer.

There are 30,000 animals thus engaged, one-third of which are oxen and the remainder horses.

There is a total of 190,000 men, 30,000 animals, and a total capital invested in mills of $111,750,000. The lumber taken annually since 1835, has sold for $1,500,000,000.

The ancient lower limit of the white pine belt extended from Grand Haven to Port Huron, dipping on the west side of the State to Kalamazoo. The whole pine area now comprises 288 townships, in 18 counties, in the lower peninsula, embracing 10,268 square miles, or 6,571,520 acres; in the upper peninsula, 179 townships, or 4,134,160 acres.

It almost seems like a task of despair to hope to raise the forests for another such enormous production. Science will doubtless devise other materials as a substitute. Indeed, I have been shown a material manufactured in Chicago in the shape of a board one inch thick, made from wheat straw, which can be colored to represent any lumber now known, so accurately as to deceive the eye. The inventor manufactures 2,000 square ft. from a ton of straw. It is more durable and much cheaper than lumber. As a parallel to the use of paper wheels, Mr. Pullman is now finishing off palace cars in this material. The limit of its manufacture will depend only on the production of wheat straw.

Fidelity, 136.

Wednesday evening, Nov. 15th, was a meeting of unusual interest in this growing subordinate. As indicated in our last, a new "Henry F. Miller" piano was christened, and for the first time led in the exercises of a Workmen meeting. There was a large number in attendance, and the opening ode was sang with apparent satisfaction and gratification. Had we a prophetic vision to see the future of this musical instrument, as it shall for coming years ring out notes of gladness on the ears of our brother Workmen of Fidelity, which shall be caught up in the refrain by them, and in acts of charity, generosity and noble deeds make joyful music to the widow and orphan, "or the unfortunate victim of poverty and distress," we should write, "Faithful over a few things, you shall be ruler of many." This being "off night," the evening's entertainment consisted of the following impromptu programme: A carefully prepared essay, by Bro. Frank A. Symmes, M. W. (which we print elsewhere), which was received with hearty approval and applause; piano solo, Prof. H. C. Seib, Organist of Fidelity; recitation, Wm. D. Smith, D. D. G. M. W.; piano solo, Bro. Southwell, of Memorial, 174; recitation, E. M. Reading, P. M. W.; solo, J. G. Geisting.

Bernal, 19.

The meeting of Bernal, No. 19, on Nov. 22d, was not as large as usual, but what was lacking in numbers was made up in sociality, a portion of the time being spent in general conversation in recess. The work of the evening was the reception of two petitions and some amendments to the by-laws, among which was a provision that at the death of a Master Workman of this Lodge, or of his wife, the M. W. of the Lodge shall pay to the survivor immediately the sum of $75; also that the Lodge meetings commence at 8 o'clock all the year. Under the "Good of the Order," R. P. Sanchez, M. W.; Dr. Harris, Med. Ex.; Wm. Decker, M. W. of Harmony; R. T. Delano, O., made short speeches that were well received. This subordinate numbers over 100 members, and is in a very prosperous condition.

Franklin, 44.

The monotony that has characterized Franklin, 44, is changing materially. At their last meeting five applications were received, and from expressions of individual members, we may look for a marked increase in membership next month.

Harmony, 9.

The monthly social of Harmony, No. 9, was carried out by a short programme, which was opened by Prof. Eastman (organist) in a solo; recitation, L. Johnson; song, J. R. Locke; reading, G. Cohen; recitation, S. S Johnson, recitation, Leon Goldstein; comic reading, F Blight; comic reading from Spoopendyke, Wm. Decker, M. W. These monthly socials are an established institution in Harmony, and add greatly to the interest in their meetings.

On Saturday evening, November 19th, at a very full meeting, six candidates received the M. W. degree, and two applications were made for the degrees. Under the head "good of the Order," Bros. L. H. Henry, P. M. W., made a few felicitous and appropriate remarks, followed by E. M. Reading, P. M. W., in eloquent remarks on the fraternal features of our Order. Bros. Messinger, of Nevada Lodge, and R. T. Delano, of Bernal, made a few congratulatory remarks that were well received. Bro. Decker, M. W., took occasion to call the attention of the Lodge to the fact that one of its members had been found guilty of a grave offense by the Criminal Court. L. J. Henry, Med. Ex., in commenting thereon said that any member of Harmony, No. 9, who upon investigation should be found guilty of deeds unbecoming a Master Workman should be and would be expelled from the Order.

Hercules, 53.

The usual monthly entertainment of Hercules Lodge took place on Friday evening, Nov. 18th, before a large and select audience. The programme was opened with a violin solo by Prof. Bean, accompanied by Prof. Rhind on the piano, which was rendered in the usual good style of these artists. Miss Lena West then sang a vocal solo, accompanied by Prof. Rhind on the piano. The young lady was loudly encored and again favored the audience with a song. Bro. W. B. Powell was next with a song, which was very good, and was followed by Bro. G. Powell, P. M. W. of Bernal, in a recitation. Musical specialties, by Prof. Frank Bean, was then given, the usual encores following, as the Professor is a master in the instrumental line of music. Messrs. Walter Blair and Remier, in song and encore, were first-class. Musical organette, Master Arthur Carroll, son of Chas. E. Carroll, M. W., was then given and an encore rewarded the young gentleman's effort. Miss Nellie Hastings, daughter of Bro. Hastings, Rev, gave a very good recitation. Master Burt Hilton, son of P. E. Hilton, P. M. W., was next with a Thanksgiving recitation. Mr. S. Levi, in song and encore, done very well. The programme was closed with a song by Mr. Jullerah, entitled, "There's Nothing Like a Freshening Breeze," and for an encore was given "The Lazy Man," which finished an exceedingly well rendered and pleasant Lodge entertainment. E. F. Loud, D. G. M., was present at the regular meeting of the Lodge, and under good of the Order, delivered some very interesting remarks. Hercules stands with its strong right arm as a guard of the Order's interests in the Western Addition of our city, and its monthly socials are giving it fame and prestige. Long may it continue its prosperous career.

Noe Valley, No. 185.

On Tuesday evening, Nov. 29th, the meeting of this flourishing subordinate was a very entaining one. The Lodge was promptly called to order at 7½ o'clock for the transaction of business. We learned that Noe Valley, after due deliberation, had adopted sick benefits, agreeing to pay $8 per week to any sick or disabled member. As showing the prosperity of this young Lodge the sum of $100 was ordered to be deposited in bank. Their membership is now 45 with a prospect of a large increase. Bro. John D. Thompson, P. M. W., as master of ceremonies, in a happy but short speech, reviewed the past history of his Lodge, and opened the programme by announcing a quartette by the Misses Anna Madsen, Mamie Madsen, Maggie Rau and Nettie Casement, a very pleasing performance; piano solo, Miss Maggie Carman, which was heartily applauded; reading, comic, G. M. Lawton, P. M. W., who received a recall; piano solo, and encore, Miss Nettie Casement; address, A. A. Egleston, D. D. G. M. W., who in a few appropriate remarks reviewed the history of this Lodge, and predicted for her a glorious future. He also recited several instances of sudden death where the only support for the widow was the $2,000 paid on the beneficiary certificate she held. It was an able effort; piano solo, and encore, Mrs. McDermot, wife of Dr. H. P. McDermot, Med. Ex., of Noe Valley; recitation, from Shakespeare, W. M. Ormard, of Myrtle; piano solo, and encore, Miss Sadie Welbon; Irish song, solo, J. C. Scott, Rec. The hall was then put in order for terpsichorean exercises, which were indulged in with spirit and much pleasure to the very happy company until a late hour. It was a very enjoyable evening and general good feeling manifested by all present.

Olympic, 127.

The meeting of No. 127, on Tuesday evening, Nov. 15th, despite the stormy weather, was attended by many of its choice spirits. The report of the anniversary committee was received and acted upon. Spirited remarks were made by Bros. Dixon, P. M. W., Rossbach, sitting P. M. W., Holland, Rvr., and Cummins. Constitutional law was the subject wrestled with. The constitutional introducer ably argued his side of the proposition, but it seemed to be the opinion of a majority of the members that a short, simple code of rules was the best for the government of a body. However, the subject may come up again, the "enemy" charged, the weapon used being strictly constitutional—*i. e.*, the determination and energy of the introducer, who generally accomplishes what he sets out to perform.

The meeting held on the evening of Nov. 29th was quite interesting. Three applications, accompanied by favorable reports from the medical examiner, were received and read. It is now confidently expected that Olympic will pass the 100 mark this term. As the meeting above noted was devoted to constitutional law, parliamentary law held the floor on the evening of the 29th. The way points of order were raised, appeals from the chair, divisions, etc., were called for was perfectly stunning. Truly Olympic has in training some embryotic young statesmen. The beauty of it all, however, was the perfect good nature with which the debate was conducted. Wm. Decker, M. W. of Harmony was present, and delivered a few interesting remarks. Prof. H. C. Eastman added greatly to the interest of the meeting, entertaining the Lodge by a short address, and delivering two recitations, and presiding at the organ when the closing ode was sung.

Unity, No. 27.

A pleasant evening was spent in Unity, No. 27, on Tuesday evening, November 22d. There was one petition received and the M. W. degree conferred on five candidates, whose appearance as young and healthy men were the subject of several favorable comments among the visitors present. The work was very well done by the several officers, viz.: Bros. C. Nelson, O.; A. Montgomery, F.; S. Rosenfield, M. W. and S. I. Jacobs, Guide. We are now assured that this Lodge will pass the 250 mark by January 1st. It is conceded that this term of Unity has been one of unusual prosperity; a goodly portion of which has been due to the patient, conservative and able manner the Master Workman, S. Rosenfield, has presided over and governed his Lodge. This Lodge pays sick benefits, and to our knowledge this provision, together with frequent charities dispensed by Unity, has saved many a Bro. Workman of this Lodge from the severest trouble and suffering and also their families. Perhaps the noblest act of all is the unanimous consent of each member in adopting the deceased Bro. DeWolf's child, which they have under their control and maintain the support and full care of, their orphan, Master Chas. DeWolf. After the usual routine of business, kindly messages were ordered to be sent to several distressed brother Workmen in different portions of the State, Under head good of the Order, Caleb Brind, D. D. G. M. W., J. J. Cullen, the first P. M. W., of Unity Lodge, Jas. H. Baird, P. M. W., made remarks that were humorous and interesting.

Valley, No. 30.

The fifth meeting of the Valley, No. 30, was one of the off nights, and the time of meeting was taken up in legislation and other matters of personal interest to distressed members. Under "good of the Order," Bro. John Pattison, of Nevada, and B. J. Watson, made a few remarks, followed by W. H. Porter, who had just returned from the East. In observations he had made, he said: "I found the A. O. U. W. in the East very prosperous and popular. In Pennsylvania, the birthplace of the Order, it was leading all others, and a large portion of them who spoke on the subject were either Workmen, or hoped and expected to be." E. F. Loud, D. G. M.; Henry Hoeber, P. M. W.; J. G. Mysell; J. M. Camp, Fin.; H. S. Dearborn, F.; W. T. Galloway, Guide, made a few remarks, after which a very interesting letter from one of their members, Bro. J. M. Bohlken, of New Mexico, was read, describing the manners, customs and peculiarities of the people and country, extracts from which will be printed in the WATCHMAN.

Yerba Buena, 14.

The usual prosperity is attending this old pioneer. Four applications and two candidates received the M. W. degree at their last meeting, and it is quite probable that they will have 200 at the close of this term. Bro. J. E. Bigelow, of this Lodge, is reported to be at the point of death. The Master Workman has issued a circular requesting each member to bring in some friend to make the number that will entitle this Lodge to four representatives to the Grand Lodge. The several cases of sickness that came before the Lodge on this evening and the provisions made for their care, was a strong argument in favor of sick benefits which this Lodge adopts. To our Bro. Workmen who wish to have this protection thrown around them Yerba Buena, No. 14, with her ample store of cash and careful management, will give the desired provision as well as any organization of any kind in this State.

Visitation of Golden Dawn No. 10 to Silver Spray No. 8.

On Monday evening, Nov. 14th, the members of Silver Spray were out in goodly numbers. The business of the evening was quite interesting, consisting of receiving eight petitions and conferring the degree on two candidates. The members of Golden Dawn No. 10, some 12 or more called at an early hour, and by their presence aided to make the evening a very pleasant one. The literary feast was opened by a recitation by Bro. Stone, who at the close was heartily encored, which was kindly answered, after which Bros. Poland, Adams, Pierce, Jenness, and Sister Poland, W. S. of H. of Golden Dawn, made short speeches of a complimentary nature. The evening's exercises were closed by a recitation by Sister Holland, S. of H. of Aurora.

Oakland Lodge Locals.

Keystone, No. 64,

Was organized Nov. 14, 1878, and is the youngest Lodge in Oakland. A very pleasant anniversary entertainment was given Saturday evening, the 12th. Bro. H. M. Van Arnam, P. M. W., as Chairman of the Committee, made some appropriate introductory remarks. Bro. J. W. Watson, Assistant G. R., delivered an excellent address, as did also Bro. D. S. Hirschberg, P. M. W. of Oak Leaf. D. K. Higgins, the popular elocutionist, recited "Miles Standish's Indian Battle Scene" with most thrilling effect. This, with his recital of two humorous incidents, would alone have furnished ample reward for attendance. The vocal solos by Miss Eliza Brown were beautifully rendered and highly praised by many present. Mrs. J. W. Stevens' solos were enthusiastically received, and several rare floral gifts were presented the popular songstress. Miss Emily Blakeslee also pleased the audience with piano solos and accompaniments. The entertainment, given in Keystone's Lodge-room, in Medical hall, was worthy of a larger place and audience, and a consequently wider benefit to all concerned.

Keystone numbers 112 members in good standing, with more coming. She has had but one death in three years. Has few "talking members," with many "good workers."

Lodge Locals.

Biggs, 102.

On Friday evening, Nov. 4th, Biggs Lodge, No. 102, gave a ball, which is reported as the most successful one ever given in Biggs. The old hall had been decorated in fine style by the members of Biggs Lodge and their wives. On entering the hall the first thing that met the eye was the flag of the Order over which was the word "Welcome" fabricated out of evergreens. The words "Charity, Hope and Protection," the foundation of the Order, were also formed of evergreens on the sides of the hall. Near the door was the music stand, decked out with flags and evergreens, and around the walls were wreaths of the same material. A room was provided for ladies and children and another one where the men could put their hats and coats. Everybody was made welcome and everything done to make it comfortable and pleasant for those who were in attendance. The hall was not lit up until half-past eight, and soon those who attended began to pour in, filling the hall in a short time. The *Recorder* gives the following racy account of the festivities: At nine o'clock the grand march started with Dr. J. T. Harris, Master Workman of Gridley Lodge, A. O. U. W., and wife leading, followed by the officers and members of that Lodge, with their partners; next came the Master Workman of Nelson Lodge and the officers and members of that Lodge with partners, then members of other Orders and non-society men and partners. Bringing up the rear was Biggs Lodge, A. O. U. W. After the grand march the dance commenced in real earnest.

> "When music arose with it's voluptuous swell,
> Soft eyes looked love to eyes that spoke again;
> And all went merry as a marriage bell."

Everybody present went right in for a good time. The hall was crowded from center to circumference. The young and old, the short and tall, the fat and lean—everybody was present; Masons, Odd Fellows, Chosen Friends, Good Templars and Workmen. The Workmen were here, there and everywhere, doing all they could to make everyone feel at home, procuring partners for their guests, cracking jokes, saying soft nothings to their sweethearts, talking to their wives, holding their babies—in fact, Workmen predominated. There were

> Workmen to the right of them,
> Workmen to the left of them,
> Workmen at every coattail.
> Everyone laughed with them,
> Every one glanced at them.
> Workmen, gay Workmen, all hail.

The ladies were all radiant with pleasure, and a handsomer assemblage of the fair sex, we have never had the good fortune to see at any time. Beautiful bouquets of female loveliness congregated in different parts of the hall discussing different topics, and all seemed bright and happy Beauty reigned supreme, and the lovely eyes of the numerous belles seemed to vie with the stars which shone outside, in brightness and beauty. Billows of fleecy white, waves of tender blue and green, and dashes of crimson and gold and other shades and semi-shades charmed the delighted eye. Faint and delicate perfume saluted the senses as armsful of loveliness swept by in the mad pulses of the mazy waltz. At 12 o'clock supper was announced, and the dancers adjourned to the Planter's hotel, where a magnificent collation greeted the expectant vision. Five long tables elegantly decorated groaned under the good things of earth. Immense cakes that rivaled the summit of Mt. Blanc in their snowy whiteness; juicy hams that would make a dyspeptic laugh; quantities of chicken that would lead one to believe that the great influx of Chinese was but a myth; turkey that satisfied all, no matter what nationality. All these, and more, too, tickled the palates of the gay participants. There was no neutrality here. The warlike din of plate, knife and fork was heard above the stentorian commands of the steward, as he led his auxilliaries to the charge, again and again. But his desperate sorties availed him naught. They came, they saw, they conquered, and left him among the wreck, weeping like Cains Marias, weeping o'er the ruins of Carthage. So large a number was in attendance that the five tables were seated full three times. After all had satisfied the cravings of their appetites they returned to the hall, and the cry was

> "On with the dance—let joy be unconfined,
> No sleep till morn when youth and beauty meet
> To chase the glowing hours with flying feet."

The dance was kept up until near daylight, when the most recherche ball of the season terminated. All returned to their homes, bearing with them the most pleasant memories of the happy hours spent in tripping the light fantastic toe. The ball was the most successful, pleasant, and the largest attended that was ever held in Biggs. The members of the Biggs Workmen's Lodge did all in their power to please, and were always the last to get up, waiting to see that their guests were given places to dance before they got on the floor. They all seemed determined that their guests and visiting brethren should have a good time, and in this they were decidedly successful. The various committees are deserving of great credit for the excellent manner in which they carried out the affair of the ball, and it is due to them that the affair terminated so successfully.

Del Norte, 183.

EDITORS WATCHMAN:—Our Lodge celebrated its first anniversary by a dinner, an oration by D. D. G. M. W. Woodbury, and in the evening a grand ball. The Lodge is in a flourishing condition. It was organized with 28 charter members, and we now have 43 M. W. in good standing, 5 J. W., and one applicant elected. We have not had a single death during the year. There is another Lodge of the same Order about to be established in this county, some 15 miles distant.—G. C., Crescent City, Cal.

District Meeting at Stockton.

The Lodges comprising the District of San Joaquin county met in the hall of Stockton Lodge, No. 23, on Friday evening, Nov. 18th. There was a large attendance, every Lodge in the District having a good representation, and each officer of 23 was at his post at 7:30. The meeting was promptly opened, and the business and work of the Lodge done with dignity, quick dispatch and precision. The work on hand was one J. W. receiving the M. W. degree, Wm. H. Barnes, G. M. W., giving the secret work. A pleasing feature was the excellent music through all the exercises of the evening. One application

was received for the degrees. A proposition was received to have permission of Stockton Lodge to form another Lodge in that city, which after due consideration was refused. After the business of the Lodge, the Grand Master Workman exemplified the secret work, after which he delivered a speech that was very interesting, and received with much favor and marked demonstrations of approval. Bro. Rev. W. Steward, P. M. W. of Lodi, made a short and appropriate speech, followed by Bros. Boardman and Severin, of Linden, and Bros. John Thorp and A. A. Cudner, of Lockford, who, in the course of his remarks, said that 8 brethren of his Lodge had traveled 20 miles that day to visit Stockton, 23. J. R. Williams, P. M. W., Jas. H. Bell, P. M. W., J. M. Larue, P. M. W., Eugene Lehe, Rdr., Geo. Lissenden, P. M. W., and others, by good speeches, prolonged the meeting until 11 o'clock. An adjournment was made to the Mansion house, of which Bro. J. H. Cross is the proprietor, where six tables were set in the finest style. The bill of fare was elaborate, Eastern oysters, roast turkey and chicken, rich cakes, pies and fruits, etc., in abundance. An hour was spent at the banquet in feasting, social and convivial conversation, thus happily ending a well spent evening. Stockton, No. 23, will soon pass the 200 mark with a select class of her generous and refined citizens, representing all the professions and industries of this thriving city and the surrounding country. We join with them in feeling a just pride in the select membership of Stockton, No. 23, and here record a fact that we know, viz: For generous action, fraternal treatment and cordiality exhibited to brother Workmen, this old pioneer is not excelled by any subordinate.

Sacramento, 80.

EDITORS WATCHMAN:—Tuesday night, Nov. 15th, I visited Sacramento Lodge, No. 80, M. W., J. D. Kent. The attendance though small, much smaller than its large membership should allow, contains the vital spark in an eminent degree. The one thing uppermost in their minds seems to be to increase their attendance, and with the earnest and energetic officers now filling the chairs, they will no doubt succeed in their desires. But even this great desire does not detract from their efforts in other directions. I had the pleasure of witnessing the initiation of two members into the J. W. degree, the impressive rites being creditably rendered by all the officers participating. For the fulfillment of fraternal duties Sacramento Lodge cannot be excelled. Bro Joseph Menish, of Unity Lodge, No. 27, S. F., entirely helpless from inflammatory rheumatism, has fallen into the Samaritan-like care of Sacramento Lodge, and under the especial care of Foreman Blank. Bro. Menish was an engineer on the war steamer *Minnesota*, participating in and witnessing the renowned combat between the *Monitor* and *Merrimac* and may now thank his lucky stars for falling into such good hands, as he is well cared for and all his necessities attended to, where, but for the assistance of the Order, he would now probably be numbered with the great army that have marched to the unknown land. Hoping that the true spirits that are guiding the destinies of Sacramento Lodge may be successful in their endeavors to secure a better attendance, and that I may be permitted to be one of them, I am yours, in C. H. and P.

Union, 21.

I visited Union Lodge to-night, Nov. 19th, and received a hearty welcome from the members. In fact, I am beginning to feel quite at home; the friendly greeting and hearty grip tends to render the stranger glad, and makes his heart swell with satisfaction that he belongs to an Order which pays so little attention to form and so much to making one completly at ease on short acquaintance. Union is doing finely, having added eight names to its roll in the two last meetings. Bro. Burns, Financier, informs me that but two suspensions have occurred during the last three terms he has been financier—a very good showing for a Lodge of nearly 300 members. Elk Grove Lodge, of this county, but not of this city, finding themselves running behind, very wisely closed their books, requested admission for most of their members in Union, with an intimation of the Lodge following in a body as soon as they have surrendered their charter. They were cordially received, adding energy and numbers to Union's ranks, and if not adding to the number of the Order, at least not detracting from it by abandonment. The question of attendance is now agitating the minds of the comparatively faithful few who do the work and get no thanks, for Union has but little advantage over Sacramento in matters of attendance, and each is showing signs of rivalry in securing the best attendance in the future; and judging from the determined spirit evinced by some of the leading lights, to wit, Past Master Wolf, Recorder Cooley, District Deputy Gregory, and others, I shall be much disappointed if I am not able to note overflowing houses in the near future. Next Saturday night Bro. Cooley, Rdr., will break the ice with an exercise that promises to be extremely entertaining, and an assurance that the 40th verse will be as entertaining as the first. I hope to be there, and wish you could, too.—Yours in C. H. and P., B. MUDLED.

MR. ALVA D. MERRIL, who came to California in 1861, died at his residence in Oakland, Nov. 25th. He was partner in the San Francisco firm of Hemenway & Merrill, in former days. Long and intimately the writer has known Mr. M. as a good and upright neighbor. He leaves a devoted wife and a warm circle of friends.

COMPOUND OXYGEN NOT A DRUG

ADMINISTERED BY INHALATION.

A NEW TREATMENT for Consumption, Asthma, Bronchitis, Catarrh, Dyspepsia, Headache, Debility, Neuralgia, Rheumatism, *and all Chronic and Nervous Disorders.*

ACTS DIRECTLY upon the great nervous and organic centres, and *cures by a natural process of revitalization.*

HAS EFFECTED REMARKABLE CURES, which are attracting wide attention.

HAS BEEN USED BY Rt. Rev. John J. Keane, Bishop of Richmond, Va., Hon. Wm. D. Kelley, T. S. Arthur, and others, who have been largely benefited, and to whom we refer *by permission.*

IS STRONGLY ENDORSED: "We have the most unequivocal testimony to its curative power from many persons of high character and intelligence."—*Lutheran Observer.* "The cures which have been obtained by this new treatment seem more like miracles than cases of natural healing."—*Arthur's Home Magazine.* "There is no doubt as to the genuineness and positive results of this treatment."—*Boston Journal of Commerce.*

THE OXYGEN HOME TREATMENT contains two months' supply, with inhaling apparatus and full directions for use.

SENT FREE: a Treatise on Compound Oxygen, giving the history of this new discovery and a large record of most remarkable cures. Write for it. Address

Drs. STARKEY & PALEN, 1109 and 1111 Girard St., Philadelphia, Pa

Depository on Pacific Coast.

WE HAVE ESTABLISHED A DEPOSITORY OF OUR COMPOUND OXYGEN HOME TREATMENT at San Francisco, Cal. This will enable patients on the Pacific Coast to obtain it without the heavy express charges which accrue on packages sent from Eastern States.

All orders directed to H. E. MATHEWS, 606 Montgomery street, San Francisco, Cal., will be filled on the same terms on which we fill orders sent directly to our office in Philadelphia.

Patients ordering from our depository in San Francisco, should, at the same time, write to us, and give a statement of their case, in order than we may send such advice and direction in the use of the Treatment as their special disease may seem to require.

Benefits Derived from Washing in Cold Water.

As in most things, so in washing, there are two ways of doing it. Some people take a bath who have but a dim idea of washing themselves, and are vexed and annoyed when told the result is not happy.

It is a well-known fact, but rarely remembered, that the skin is one of the great safety-valves of the human machine—that the millions of little perspiratory tubes with which it is pierced throw out from the inner body an average amount of 33 ounces of greasy refuse and worn-out material in an hour, in the shape of invisible perspiration and in the same time often as much as two or three lbs. in visible perspiration. Should these tubes or pores be allowed to remain choked with their own secretions, the refuse matter is thrown back into the other great corporeal scavengers—the lungs, stomach, liver or kidneys. Thus it stands to reason that a careful and general cleansing of the skin is absolutely necessary to the life and well-being of the individual at least once in 24 hours, and few people who rejoice in the comfort of cleanliness will feel that it is secured under this amount of washing. And we should also here point out the mere passage of water, especially cold water (*e. g.*, what is ordinarily called a sponge bath), does not cleanse. In fact, it rather has a tendency to close the pores, which, like delicate flowers, shut up to a cold current of wind or water. We therefore recommend, as warm or tepid water tends to open the pores, to use that with the course of soap scrubbing (not an unreasonable friction) which should precede the universal sponging. This last may be done with cold water, which certainly invigorates and braces the system when followed by a reactionary glow of warmth. Should this not occur it is unwise to use it, and warm must be substituted, especially in the case of children, who by ignorant mothers are often forced into cold water (from which they have not a sufficiently active circulation to recover) as part of that much-abused system of "hardening," which, nine times out of ten, ends in "hardening" the child off the face of the earth, or checking its growth.

"Hardening," it must be understood, should be strengthening, not "roughing," and many people with the best intentions think, very erroneously, that to make a child strong consists in causing it to undergo more physical hardships than they, with their perfectly matured strength and age, would dream of doing.

As people, in conclusion, generally rush to extremes, it might be well here to remark that we do not at all recommend coddling; but no wise mother will put her young children into quite cold water in winter time, nor with a cold, and, above all, will never allow them to be washed and bathed in a draught, on the same principle of consistency that plenty of fresh air is good, when it is not damp or foggy, but drafts are most injurious.—*Journal of Health*.

New System of Glazing.

Rendle's patent system of glazing without putty or cement, which has been in practical use in England and the Eastern States for quite a while, promises to come into favor in Chicago and the West, whenever and wherever it is introduced. The conservatory curvilinear upon the premises of Mr. Wilbur F. Storey, on Grand boulevard, has been covered under the personal supervision of Mr. A. E. Rendle, the inventor, and the work is of a character that at once commends itself for excellence of finish and practical utility. In general terms, the special advantages the Rendle system claims over others may be summed up as follows:

The glass is placed in horizontal metallic grooves and fixed on wooden or iron purlins; the wood work and iron work completely covered and are not exposed to the influence of the atmosphere; if a pane of glass is broken, it can be replaced without trouble or expense, as it moves freely in the metal grooves; no putty or cement is used; it is economical, light, durable, and elegant; the patent grooves carry off the condensed steam on the inside as well as the water on the outside; the roof is very strong, yet as the panes are lapped one over the other and connected at the sides by only narrow strips of zinc, the entire surface has much the appearance of an unbroken sheet of glass; and last, and greatest of all, there is no breakage from expansion or contraction from heat or cold. Puttied roofs can never be free from damage by vibrations; yet roofs put on by this system are so elastic as to be almost entirely free from danger from that cause. The system has been quite generally adopted by English railroads for depots and stations, and is coming into use for the same purposes in America, as well as for conservatories, studios, exhibition halls, etc.

TELEPHONE connection has been completed between Stockton and Union island, a distance of 18 miles.

Climate and Altitude.

The Virginia City *Enterprise* (Nevada) furnishes the following: "The relations of climate to altitude are very intimate, but in most regions are not apparent—that is, not visible to the eye. Here, however, it is different. For instance, yesterday (November 15th) while all the hills and mountains round about were arrayed in robes of dazzling white there was in the center of the eastern landscape one big spot of brown. This was on the Carson river, down toward Fort Churchill. There not only the valley land, but also all the low bordering hills remained a deep and desolate brown. It was like a dirty spot left in the middle of a newly whitewashed wall. Although this spot is at no great distance from this city the people there walk about on bare ground, while here we wade in a foot of snow. With them it is only late autumn; with us it is genuine winter. However, they have not far to go to get a taste of winter. Half a mile from their homes would take most of them up into the snow belt.

Persons who have lived all their lives in prairie and other level regions have but an indistinct notion of the great influence altitude has upon climate. When their plains are bare, they do not know that winter is often but 100 ft. above their heads.

In this mountainous region we have an excellent opportunity of studying the effects of altitude. It is sometimes quite wonderful to observe the evenness of the snow line. It is drawn midway up the face of the whole line of hills as neatly as though marked with a chalk-line. Sometimes it is higher, sometimes it is lower, owing to the temperature. The evenness depends a great deal upon the air. When there is much wind the snow line is not well defined, but when it is calm the strata of the atmosphere are perfectly regular. The snow line is then as level as though it were the water line of a lake.

Frequently, when no snow lies on our streets, we can see on the slope of Mt. Davidson, only 200 or 300 ft. above us, the line separating us from the region of winter.

A Beautiful Sight.

The same paper, as above quoted, gives the following under the head of "Snow Streamers:" "The peak of Mt. Davidson last evening presented a most wild and wintry appearance. The snow streamers were abroad in all their glory. Last evening, however, they could hardly be called streamers. They were in reality an unending series of whirlwinds that chased each other along the crest of the mountain. The spiral columns of snow took a thousand shapes in forming and vanishing. Being strongly lighted by the setting sun, the great surging columns looked like whirls of flame and illuminated smoke rolling up from a great fire. This brilliancy was seen in places where the rays of the sun passed through the thin mist of a single snow whirl. In places where three of four columns happened for a moment to fall in line between the spectator and the sun, the whole was black as the smoke from the funnel of a steamboat. Frequently several of the colors of the rainbow would flash out around these dark columns, and a moment after all above the peak would be deep red, giving the top of the mountain the appearance of an active volcano. It would have been a fine opportunity for a scientist interested in the study of atmospheric currents. The motions of these snow whirls show us what is always taking place in the air at the top of the mountain, both winter and summer, and if on our mountain, doubtless on all mountains of like hight. The straight current of the atmosphere is broken up into thousands of little whirlwinds that rise from 50 to 200 ft. above the surface of the ground.

"I MUST say that I very much dislike this ostentatious furnishing," remarked the elderly Miss Pringle, as she looked about her in the new home of the Spankingtons. "Now look at that great elaborately framed mirror. I declare, I can see nothing beautiful in it." "You shouldn't expect impossibilities, Miss Pringle," remarked Fogg, the villain.

Our Schools.

Intelligence and good morals are primary essentials to the permanence of any Government, or the happiness of any people. Man is so constituted that little or nothing comes by intuition—everything must be learned. Again, the lessons of youth, whether in learning or morals, make the character of the man in after years. It is therefore of primary importance that our schools, whether common or otherwise, should be conducted with this two-fold object. But the question of what constitutes that particular kind or sort of intelligence most desirable, (for no man can become infinitely wise), admits of a variety of opinions. There seems to have grown up in our educational circles a preference for what may not inappropriately be called abstract knowledge in contradistinction to practical knowledge, and really it appears to us that in this our educators are sadly at fault. The greatest good for the greatest number should be the motto in educational as well as other matters, and that the present plan as applied to the education of our boys and girls does not accomplish this, we believe to be indisputable, but on the contrary operates especially for the benefit of the few who may wish to become finished scholars or to engage in some of the learned professions, so-called, and against tho many who must by brain and brawn fill the mouths, cover the backs and shelter all from the storms; and what they lack in brain they must make up in brawn, for all there is of wealth comes of the men who till the soil, toil as artisans, dig in the mines or go down to the sea in ships. For them should the streams of knowledge be made to gush forth their treasures most abundantly. It is not so now. The college graduate is often but the poorest sort of an excuse for a business man, or farmer, or mechanic, or miner, or navigator. He is but an intelligent machine if you please, that needs a directing hand to be of any practical use in the busy world, except to make just such other machines as he.

Holding to these views and besides believing most religiously in our free school system, it is with especial delight we notice a move in the right direction on the part of the schools of Oakland, where a class or department has been created to teach practical knowledge, comprehending those things most important for a young man to know when starting out in the race of life. We do not know how well this laudable effort is succeeding, but we do know it ought to succeed, and if by any mischance this should fail, the time will come when a like effort will not fail.

Men were made for husbands, and women for wives. Each pair should have a home of their own. The husband should provide for the household and stand ready to defend the hearthstone, and the wife should be a helpmeet, dispensing with the hand of judgment, economy and prudence the means for a livelihood furnished by the husband.

The young man graduate from our high schools should be fitted to go out into the world, either as a merchant, mechanic, farmer or professional man, so far as the main essentials for success are concerned. He should, in addition to the usual English branches, have something in the way of higher mathematics; but far more important, he should have a thorough knowledge of bookkeeping, and everything of a general nature connected with business. We believe it to be a fact that more than half the failures in business—all kinds considered—is owing to ignorance of bookkeeping on the part of principals. If the destiny of man is to earn bread, surely our schools should fit him as best they may for that purpose, and not as a mere ornament for the delectation of society.

But what of the woman? We answer, apply the same principle to her education. She should be taught, in addition to the ordinary English branches, the best way to keep house, and to make home happy. As the road to human happiness generally leads through the stomach, it follows that the most important accomplishment a woman can possess is to be a good cook. She should also be expert with the needle, as a collateral accomplishment, more to be desired than music or drawing. But we have no knowledge of a common school in which either of these two most important branches of a woman's higher education are taught; and yet they should be the finishing course in every grammar school, and taken up again and carried through the high school. No danger of becoming over expert in either of these branches! It really does seem that our schools are sadly in need of the leaven of common sense to make them of the quality they should possess.

MADONNA DELLA SEDIA—Raffaello.

A Christmas Symphony.

I.

Oh, Christmas stars! Your pregnant silentness
Mute syllabled in rythmic light,
Leads on to-night,
And beckons, as, three thousand years ago,
It beckoning led. We, simple shepherds, know
Little we can confess,
Beyond that we are poor, and creep
And wander with our sheep,
Who love and follow us. We hear,
If we attend, a singing in the sky,
But feel no fear,
Knowing that God is always nigh,
And none pass by
Except His Sons, who cannot bring
Tidings of evil, since they sing.

II.

Oh, not alone, because his name is Christ,
Oh, not alone because Judea waits
This man-child for her King, the Star stands still.
Its glory reinstates,
Beyond humiliation's utmost ill,
On peerless throne, which she alone can fill,
Each earthly woman. Motherhood is priced
Of God, at price no man may dare
To lessen, or misunderstand.
The motherhood which came
To virgin, sets in vestal flame,
Fed by each new-born infant's hand,
With Heaven's air,
With Heaven's food,
The crown of purest purity revealed,
Virginity eternal signed and sealed
Upon all motherhood!

III.

Oh, not alone because His name is Christ,
Oh, not alone because Judea waits
This man-child for her King the Star stands still.
The Babe has mates.
Childhood shall be forever on the earth;
And no man who was hurt or lightly priced
So much as one sweet hair
On one sweet infant's head,
But shall be cursed! Henceforth all things fulfill
Protection to each sacred birth.
No spot shall dare
Refuse a shelter. Beasts shall tread
More lightly; and distress,
And poverty, and loneliness,
Yea, and all darkness shall devise
To shield each place wherein an infant lies.
And wisdom shall come seeking it, with gift,
And worship it, with myrrh and frankincense;
And kings shall tremble if it lift
Its hand against a throne
But mighty in its own
Great feebleness, and safe in God's defense,
No harm can touch it, and no death can kill,
Without its Father's will!

IV.

Oh, not alone because His name is Christ,
Oh, not alone because Judea waits
This man child for her King, the Star stands still.
The universe must utter, and fulfill
The mighty voice which states—
The mighty destiny which holds,
Its key-note and its ultimate design.
Waste places and the deserts must perceive
That they are priced,
No less than gardens in the Heart Divine.
Sorrow her sorrowing must leave,
And learn one sign
With joy. And Loss and Gain
Must be no more.
And all things which have gone before,
And all things which remain,
And all of Life, and all of Death be slain
In mighty birth, whose name
Is called Redemption! Praise!
Praise to God! The same
To-day and yesterday, and in all days
Forever! Praise!

V.

Oh, Christmas stars! Your pregnant silentness,
Mute syllabled by rythmic light,
Fills all the night.
No doubt, on all your golden shores,
Full music rings
Of happiness
As sweet as ours
Midway in that great tideless stream which pours,
And builds its shining road through trackless space,
From you to us, and us to you, must be
Some mystic place,
Where all our voices meet, and melt
Into this solemn silence which is felt,
And sense of sound mysterious brings
Where sound is not. This is God's secret. He
Sits centered in his myriads of skies
Where seas of sound and seas of silence rise,
And break together in one note and key,
Divinely limitless in harmony!

NO NEWS FROM IOWA.—We have no further information from Iowa, but still hope to hear that Bro. J. W. Willett has taken the reins in his hands and put the jurisdiction into shipshape. A little prompt action just at the present time, we believe, would set matters al right.

BEER is usually accounted a healthy beverage. It may be, in small doses, far apart, but we are pained to notice that beer costs the A. O. U. W. a good deal more money in the way of death losses than drinks of a more ardent character. It has almost ruined the Order in one great State.

ALL our modern beneficial societies are organized primarily for the purpose of paying death losses. That society which is able to do this most promptly, cheaply and safely is beyond question the best. The A. O. U. W. yields to no other in these particulars.

WE had the pleasure of meeting Bro. S. T. Dodson, D. D. G. M. W., of Watsonville, in Valley, No. 30, on Wednesday evening. He says his own Lodge is growing, having increased 10 during the term, and the officers of his district are up in the work and all are very zealous in promoting the Order.

BRO. FRANK J. SYMMES, M. W. of Fidelity, whose children passed through a seige of diphtheria lately, by constant attention night and day contracted the dreadful disease and for a while it was feared would prove fatal. We are happy to say, however, that the crisis has passed and we may expect soon to see our genial brother at his post again.

Home Miscellany.

Io Victis.

I sing the hymn of the conquered, who fell in the battle of life
The hymn of the wounded, the beaten, who died overwhelmed in the strife;
Not the jubilant song of the victors, for whom the resounding acclaim
Of nations was lifted in chorus, whose brows wore the chaplet of fame—
But the hymn of the low and the humble, the weary, the broken in heart,
Who strove and who failed, acting bravely a silent and desperate part;
Whose youth bore no flower in its branches, whose hopes burned in ashes away,
From whose hands slipped the prize they had grasped at, who stood at the dying of day
With the work of their life all around them, unpitied, unheeded, alone,
With death sweeping down o'er their failure, and all but their faith overthrown.

While the voice of the world shouts its chorus, its pæan for those who have won—
While the trumpet is sounding triumphant, and high to the breeze and the sun
Gay banners are waving, hands clapping, and hurrying feet
Thronging after the laurel-crowned victors—I stand on the field of defeat
In the shadow, 'mongst those who are fallen, and wounded and dying—and there
Chant a requiem low, place my hand on their pain-knotted brows, breathe a prayer,
Hold the hand that is hapless, and whisper, "They only the victory win,
Who have fought the good fight, and have vanquished the demon that tempts us within;
Who have held to their faith unseduced by the prizes the world holds on high;
Who have dared for a high cause to suffer, resist, fight—if need be, to die."

Speak, history! Who are life's victors? Unroll thy long annals and say—
Are they those whom the world called the victors, who won the success of a day?
The Martyrs, or Nero? The Spartans who fell at Thermopylæ's tryst,
Or the Persians and Xerxes? His judges, or Socrates? Pilate or Christ?

W. W. Story.

Needle and Thread.

"An old bachelor?" said Honora Maywood.

"That's what he told me, just in so many words," said Mrs. Pennypacker, who stood on the threshold of her best room, with her head tied up in a pocket handkerchief, and a hair-broom in her hand, wherewith she gesticulated, after a tragic fashion, as she talked, while Miss Maywood, tall and slender as a wild lily, stood in the hall, with a roll of music under her arm, and her slight figure wrapped in a shabby black shawl. "And he's willing to pay my price, cash, every Sunday night. Never attempted to beat me down a penny, if you'll believe it, my dear."

"He drinks only English breakfast tea, and he wants his pie crust made with the best Alderney butter, instead of lard, as is good enough for the other people; and he must have ventilators to all the windows, and an open grate, instead of the base burning stove; and—I hope you'll not be offended, my dear—but he particularly dislikes a piano."

"Dislikes a piano?" said the little music teacher, reddening in spite of herself.

"And he says, says he: 'I hope, Mrs. Pennypacker, that there is no piano in the house. A piano,' says he, 'plays the deuce with my nervous system, with its everlasting tum, tum!' These were his words, my dear. So, my dear, I'll be grateful if you won't mind doing your practicin' until he's out for his daily walk—from 1 to 3, just as regular as the clock."

Miss Maywood looked piteously up in the landlady's face.

"I will do anything to oblige you, Mrs. Pennypacker," she said, earnestly. "I have not forgotten how much I am indebted to you, both in actual money, and in kindness, which money can never repay."

"My dear, don't say a word," said Mrs. Pennypacker, hastily. "You've been sick, and you've got a little behindhand, and it's quite natural you should be a little low spirited now and then. But you mustn't get discouraged. And you're quite welcome to stay on here until you are able to settle up your little account."

Honora Maywood sighed as she thought how often her little advertisement had been inserted in the daily newspapers without attracting the least notice from the world of patrons and pupils. There were so many "capable music teachers willing to give lessons at moderate prices' nowadays, and how was anyone to know how sorely she needed the money?

And, as the time crept on and no pupils came, Honora began to ask herself seriously whether she should go out to some menial capacity, or stay genteelly at home and starve.

"Clothes, ma'am."

Honora started from her reverie as the washerwoman's stumpy little girl banged herself, like a human battering-ram, up against the door, with a preposterously large basket on her arm.

"Yes," said Honora coloring. "Put them down, Sally. But I—I'm afraid it isn't convenient to pay your mother to-day."

"Mother didn't say nothin' 'bout the pay," said Sally, wiping her forehead with a whisk of her feet. "I was to leave the clothes with her 'umble duty, and she 'oped they'd suit; but it was that dump on Monday and Tuesday as starch wouldn't stick. And she 'opes you'll excuse all mistakes, as they'll be done better next time."

"I dare say they are quite right," said Honora, with a little sigh, as she marveled at this unexpected access of courtesy on the part of her Milesian laundress.

But when Sally had stumped off down stairs, her flapping slippers beating a sort of tattoo as she went, Miss Maywood took off the fringed towel that covered that basket of clothes, and gave a little start.

"Shirts," said Honora, "and socks, and turnover collars No. 16, and great big pocket handkerchiefs, like the sails of a ship, and white vests, and goodness me, what does it all mean? Mrs. Mulvey has sent me some gentleman's wardrobe by mistake. I must send these things back at once."

But then Miss Maywood looked down at the articles thoughtfully.

"I never had a brother," mused Miss Maywood, "and I can't remember my father; but of this I am quite certain—if I had either one or the other, I should thank any girl to mend their dilapidated wardrobes, if they looked like this. And Mrs. Mulvey can't send before night, and unfortunately I've nothing to do, so I'll just mend this poor young fellow's clothes, whoever he may be. A half-starved theological student, perhaps, training for the Polynesian islands; or perhaps a newspaper reporter, or a pale clerk, under the skylight of some dry goods house. At all events he is worse off than I am, for he cannot mend his own clothes, and I can."

And the smiles dimpled around Honora Maywood's little rosebud of a mouth as she sat down to darn holes, sew on tapes and insert patches.

"He'll never know who did it," said Honora to herself, "but I daresay he'll be thankful; and if one can't get a chance to do a little good in this world, he ought not to grudge one's time and trouble."

And as Honora stitched away, she mused sadly whether or not she ought to accept a position which had offered itself of assistant matron in an orphan asylum, where the work would be almost unendurable, and the pay next to nothing, with no Sundays nor holidays, and a ladies' committee, consisting of three starched old maids, to "sit" upon her the first Friday of every month.

"I almost think I'd rather starve," said Honora. "But dear me! starving is a serious business when one comes to consider it face to face."

Sally Mulvey came back, puffing and blowing like a human whale, in about two hours.

"Mother said she sent the wrong basket," said she breathlessly.

"I thought it very probable, Sally," said Miss Maywood.

"And mother's compliments," added Sally, "and she can't undertake your things no longer, Miss Maywood, 'cause she does a cash business, and there ain't nothing been paid on your account since last June."

Honora felt herself turning scarlet.

"I am very sorry, Sally," said she. "Tell your mother I will settle my bill as soon as I possibly can."

Sally flounced out of the room, red and indignant, like an overcharged thunder cloud, and poor little Honora, dropping her head on her hands, burst into tears.

* * * * * * * *

"Pretty girl that—very pretty," said Mr. Broderick, the old bachelor, to his landlady.

"Do you mean ——"

"I mean the young lady boarder of yours that I see on the stairs now and then," said Mr. Broderick. "Nice figure—big, soft eyes, like a gazelle. Didn't some one tell me she was a music teacher?"

"That's her profession," said Mrs. Pennypacker. "But there ain't many pupils as wants tuition, and poor little dear, as has had but a hard time of it."

"Humph," grunted Mr. Broderick, "What fools women are not to have a regular profession! If I had a daughter I'd bring her up a self-supporting institution."

And Mr. Broderick disappeared into his room. in the midst whereof stood a girl with flapping slippers, a pretentious shawl and a bonnet which had originally been manufactured for a woman twice her size.

"Who are you?" demanded Mr. Broderick.

"Please, sir, I'm Sally—the washerwoman's Sally!" was the response.

"And what do you want here?" said Mr. Broderick.

"Please, sir, I've come to bring your things," said Sally, chattering off her lesson like a parrot. "And, please, sir, her 'umble duty, and she 'opes they'll suit, but it was that damp and muggy Monday and Tuesday as starch wouldn't stick; and she 'opes you'll excuse all mistakes, as they shall be done better next time, sir—please, sir."

"Who mended 'em," demanded Mr. Broderick, whose hawk eyes had already caught sight of the dainty needlework upon his garments.

"Nobody mended 'em," said Sally "And mother she says it's easy to see as the new gent is a bachelor, on account of the holes in his heels and toes, and strings off his dickeys."

"I can tell you who mended 'em," said Mrs. Pennypacker, "for I see her at it, and pretty dear—Miss Maywood! And says she, 'I don't know whose they are, Mrs. Pennypacker; but,' says she, 'they need mending—and a kind action never comes amiss.' No more it does, sir, Lord bless her!"

"Humph!" said Mr. Broderick; "she's right—no more it does. And she's a regular scientist at the needle, is Miss Maywood. Just look at that patch, Mrs. Pennypacker! 'Euclid's Geometry' couldn't produce a straighter line or truer angles. See the toe of that stocking! Its like a piece of Goblin tapestry. That's the way I like to see things done!"

And Mr. Broderick never rested until he had been formally introduced to Honora Maywood, and thanked her with equal formality for the good offices she had unwittingly rendered him.

* * * * * *

It was a golden October evening that Honora came down into the kitchen where Mrs. Pennypacker was baking pies for her eccentric boarder, with the crusts made of the best Alderney butter instead of lard.

"Oh, dear! oh, dear!" said Mrs. Pennypacker; "what a thing it is to be an old bachelor."

"He won't be a bachelor much longer," said Honora, laughing and coloring as she laid her cheek on the good landlady's cushioning shoulder.

"What do you mean?" said Mrs. Pennypacker.

"He has asked me to marry him," said Honora, "after only two weeks' acquaintance. He says that a girl who can mend stockings as I do needs no other test. And he says he loves me; and —and—"

"Well?"

"I almost think I love him!" whispered Miss Maywood.

And so the problem of Honora's solitary life was solved, all through the magic influence of "Needle and Thread."—*Selected.*

Strong-Minded Women Among the Esquimaux.

A young woman, Dr. Dall tells us, really quite fine-looking, and of remarkably good physique and mental capacity, was observed to hold herself aloof from the young men of the tribe in an unusual manner. Inquiry, first of others, afterward of herself, brought out the following reasons for the eccentricity. In effect, she said she was as strong as any of the young men; not one of them had ever been able to conquer her in wrestling or other athletic exercises, though it had more than once been tried, sometimes by surprise and with odds against her. She could shoot and hunt deer as well as any of them, and make and set snares and nets. She had her own gun, bought from the proceeds of her trapping. She despised marriage, and did not desire to do the work of a wife, but preferred the work which custom among the Esquimaux allots to the men. In short, she was a "woman's rights" female of the most advanced type. When winter came, having made a convert of a smaller and less athletic damsel, the two set to work with walrus-tusk picks and dug the excavation in which they erected their own house, which was of the usual type of Esquimaux houses—walled and roofed with drift-wood covered with turf. It was, however, as an additional defence against unwished-for prowling males, divided into two rooms, with a very small and narrow door between them, next which lay some handy billets of wood, to crack the sconce of a possible intruder. Here our two Amazons lived, traded and carried on their affairs in defiance of communal bonds and public sentiment, The latter seemed to be composed half of disapprobation and half of envious admiration; while all the young fellows in the village busied themselves in concocting plans against the enterprising pair. These were too fully on the alert to be surprised, and all efforts against their peace were fruitless. When the deer-hunting season came the two set off to the mountains, and no sooner had they departed than disappointed lovers and "outraged public sentiment" exemplified in a mob, reduced their winter quarters to a shapeless ruin. So far as Dr. Dall's information goes, the following year the ladies returned to the ordinary ways of the world, and gave up the unequal contest against a tyrannical public opinion.—*Chamber's Journal.*

THE PRAYER OF FAITH.—There is nothing like the calming grace that follows the prayer of faith in hours of peril. It is always a serious moment at sea when, especially in the track of numerous vessels, a dense fog gathers around a steamship. Her foreboding whistle hardly penetrates the misty cloud, while it constantly startles the passengers on board the ship. To remain motionless does not insure security. In spite of the most vigilant precautions, in an instant a rapidly approaching vessel will leap out of the cloud so near as hardly to admit of defense against collision. At such a time there is only one satisfactory resource. Beyond the possibilities of human foresight there is only one arm that can insure positive security. The dread accident, indeed, may be permitted to occur; but He can keep the heart in such a state of calm repose that no event will move it. He hears prayer and holds the elements in his hands; but he does more; He holds his loving and trusting disciple also. In the midst of apparent perils he can lie down in the ship and rest as the Master did, whatever may be the perils without. "For He giveth his beloved sleep."

AN old lady who does not believe in the coeducation of the sexes, was rejoiced the other day to find that, although the girls and boys in a large seminary seemed to be playing some sort of a game together, the school authorities had wisely hung a long net between them.

"THE Lord loveth a cheerful giver," but there's no use chucking a copper cent into a contribution box loud enough to make the folks on the back seat think the communion service has tumbled off the altar.

From Girlhood to Womanhood.

There are two periods in the moral and intellectual development of a girl which cause the profoundest anxiety to a mother. At five years old, or thereabouts, the period of babyhood is past, while the period of girlhood is not yet reached, and between the two comes a time of anarchy and chaos. The little soul is now bursting its shackles, and trying to readjust itself to a new condition. The child is ceasing to be a mere pet and plaything, and is beginning to live an individual life. Nothing is more common than to see a docile, well-trained child suddenly develop, without any apparent reason, a willfulness and insubordination entirely at variance with its previous habits. The mother, who has been dreaming of a sweet daughter who is to walk beside her all her days, making life fragrant and beautiful to her by sharing with her all her youthful hopes and joys and trusts, turns heart-sick at the naughtiness of the half-fledged termagant. For it is the good, cherubic little girl who usually manifests the change; a spoiled child is so thoroughly disagreeable all the while that any accession of badness is not noticeable. A great deal of self-condemnation and unhappy foreboding would be spared the mother if she would only recognize that much of what is so very unlovely is not essentially wrong—that it is merley what is good in a state of unripeness. The fragrant blossom has withered and fallen away, leaving in its place the hard and acid embryo fruit. A wise mother will be very careful to distinguish between those qualities which promise evil in their developed form and those which are mere crudities, and her aim will be to foster all the unfolded possibilities in her child's nature, and help to bring them to a beautiful maturity.

Every one knows how tiresome and unattractive a little girl usually is when she has outgrown her infantile sweetness. The little impertinences, the saucy retorts and unflattering personalities which have won for her smiles and caresses, or at worst an admiring reproof, all at once become intolerable, and are rebuked with acerbity. The very ways which she has been taught to consider charming become subjects for displeasure when the baby roundness and dimples are gone. Her sense of justice is outraged, and the unwarped sense of justice in a child is often very strong. She becomes a little Ishmael, her hand against every man's, and every man's hand against hers. In a certain sense this can scarcely be avoided, but, if the mother's love be unfailing and her sympathy always ready, she can keep sweet the fountain of love and trust which, without that refuge, might become very bitter. Just when this new life is unfolded, a mother's wise care is most earnestly needed. The soul which has seemed to draw its life from hers is beginning to lead an individual existence. It is to the perfect development of this individuality that the mother should bend all her strength. Each human soul contains within itself the germ of its own life. To make of it all that may be made, the mother should only guide the growth, leaving it free within the limits of moral probity to grow into its fullest possibility. She cannot lop it off here and there, or suppress its growth yonder without maiming and stultifying the whole nature.

The dangerous quicksands of this period safely passed, the mother begins to breathe freely again. She again begins to see visions, and to dream dreams, till the second and more serious season of anarchy comes to try her faith. Childhood is over and womanhood is yet far away. The whole being, moral, intellectual and physical, is in a state of ferment. New motives, new principles, new emotions are battling for predominance, and, until these relative claims are adjusted, no peace can be hoped for. This second chaotic period—which comes at about 14 years of age—lasts longer, and brings a more hopeless and radical overturning of that which had seemed so firmly established. If a mother's care were needed in the earlier change, it is infinitely more needed now. New traits seem to be starting into life, new developments are manifested. Changes, not only in purposes and ideas are taking place, but changes in temperament, in disposition, in tone, are manifesting themselves. There is need of a wise hand which shall guide without galling, a tender heart which shall sustain without compromising with evil. To aid in the conflict and insure victory, nothing will help a mother more surely, nor direct her more easily in this difficult task, than the recognition that this also is merely a stage of growth necessary to a full and perfect development of her child's nature, and that to her is intrusted the privilege of fostering the growth while she shall be looking to the end with the prophetic eye of love.—*Century Magazine.*

ONCE, when somewhat under the influence of drink, a certain citizen of Windham, Conn., wandered off into the fields and went to sleep. On rising he forgot to put on his old cocked hat. Some boys found it and took it to him, thinking to cover him with confusion. "In which lot did you find it?" he inquired blandly. "In Mr. White's pasture, near the barn." "Well, boys, go take it right back, that is my place to keep it."

THE new style of fall bonnets may be photographed by slamming a ripe tomato against a board fence.

APHORISM by a perfectly reckless belle: "Be flirtuous and you will be happy."

For our Boys and Girls.

Our Puzzle Box.

Numerical Enigma.

I am composed of ten letters.
My 6, 9, 4, 7, is found in every forest.
My 8, 2, 5, 4, 7, is a river in Europe.
My 8, 9, 6, s a bird.
My 1, 5, 7, is a female animal.
My 1, 7, 3, 4, is part of a harness.
My 10, 2, 5, 7, is worn by ladies.
My whole is an animal found in Asia.

ROBERT B.

Syncopations.

1. Syncopate the name of one great poet and leave the name of another.
2. Syncopate a weapon and leave a mineral.
3. Syncopate a vegetable and leave a wager.
4. Syncopate a measure and leave a part of the head.
5. Syncopate an animal and leave an article of clothing.
6. Syncopate a proverb and leave to injure.

LEO. P.

Charade.

My whole when without a name abounded with my first. Strangers came, forming large numbers of my second, which frightened my first away.

HARRY.

Buried Mountains.

1. "Quit that rock!" yelled Tom.
2. I lost my hat last night,
3. He crossed the Great American Desert.
4. The Indians may scalp Sam before he can be rescued.
5. Ah! I agree not to disclose aught of this affair.

BRUTUS.

Decapitations.

1. Behead a kind of barrel and leave to question.
2. Behead a portion and leave skill.
3. Behead a fruit and leave a part of the head.
4. Behead a pointed instrument and leave a preposition.
5. Behead a small aperture in the skin and leave a mineral.
6. Behead to acquire knowledge and leave to deserve by labor.

JOSEPH.

Answers to Last Puzzles.

NUMERICAL ENIGMA.—Captain Mayne Reid.
DECAPITATIONS.—1. Will, ill. 2. Peat, eat. 3. Brain, rain. 4. Can't, ant. 5. Hour, our.

CROSS-WORD ENIGMA.—Australia.
CURTAILMENTS.—1. Tom, to. 2. Mart, mar. 3 Part, par. 4. Wine, win. 5. Warm, war.

The Red Chipmunk.

I don't believe that Minnie was a bit bigger than you are, although, of course, I don't know how big that is. Anyway, she was old enough to take a basket one day and go out to the woods back of the house for some nuts. There were lots of them on the ground already to be picked up, and in just about 14 minutes the basket was half full. What do you think of that? Was Minnie smart, or wasn't she? That's what I want to know.

But I can tell you one thing, and that is that she was a pretty tired little girl by this time, and thought she'd rest a little while down by the brook. When she came back to pick up more nuts she thought she saw the cover of the basket move, and the next minute, pop! came a little nose right out near the handle, and what do you suppose that nose belonged to? To tell the truth, Minnie didn't know any better than you do, so she ran home with the basket, holding down the cover with one hand and her hat on her head with the other.

"Why, it's a chipmunk!" said mamma, as she peeped into the basket, "a little red chipmunk, as sure as I'm alive. He's very fond of nuts, you know, and so he jumped into the basket to get a whole lot, and take them, one at a time, to his home in the tree."

Papa came home soon after this, and put some slats over a large box, after Minnie had made a nest of soft cotton for the chipmunk in one corner.

But the next morning the box was empty. Of course the nest was there, and some nuts, and a little mug of water, too, but nothing else. And don't you know what had happened during the night? Why, the chipmunk, with his sharp teeth, had gnawed a hole in between the slats large enough to let him squeeze through, and when they opened the back door to take in the milk, he scampered out and was off to the woods in a minute.

"I'm glad of it," said papa.

"Oh, dear me, I'm not," said Minnie, "and I don't see why you are."

"Why," said papa, "perhaps he's got lots of friends, just as you have, who want to see him back home again in his own nest."

"That's so," said Minnie, drying her eyes, "and I guess I'm glad of it too, now."

And that very afternoon, when she went out again to fill her basket, she saw that chipmunk sitting on a bough, with his tail way up over his head, eating a nut as fast as he could, and looking as happy as—as—as—anything.—*N. Y. Tribune Jr.*

A YOUNG lady who graduated from our High School last July is teaching school up in New Hampshire. A bashful young gentleman visited the school the other day, and was asked by the teacher to say a few words to the pupils. This was his speech: "Scholars, I hope you will always love your school and your teacher as much as I do." Tableau, giggling boys and girls and blushing schoolma'am.

VERY small boy (to stout aunt on cob): "I say, auntie, don't you try for a gate! Come along with me! I've found a capital little hole we can creep through, and be even with the beast of 'em!"

Humorous.

Chips.

THE most profitable thing a man can raise are fowls. For every grain they give a peck.

THERE are said to be 263 styles of corsets, and yet different young ladies' waists feel very much alike—the girls say.

WHEN a Chicago preacher wants a new church all his own, and a big congregation, he has himself convicted of heresy.

"THAT prisoner has a very smooth countenance," said the Judge to the Sheriff. "Yes," said the Sheriff, "he was ironed just before he was brought in."

THE experienced Philadelphia *News* man thinks the report that Louise is coming to Canada must be true, because Lorne is preparing to cross the ocean in the other direction.

INDUCTIVE.—Officer—"How's this, Murphy? The sergeant complains that you called him names?" Private Murphy—"Plaze, surr, I niver called him anny names at all. All I said was: 'Sergeant,' says I, 'some of us ought to be in a menagerie!'"

A TOPPER.—Small yet energetic snip: "Cheviot suit, sir? Yes, sir." (Measures him. Result: 6 ft. 2 inches, 40 inches round the chest). "Nothing quite your size, sir, 'mong the readies, but will you please to step up to our designing department and see our head architect?"

DISTINGUISHED AMATEURS—THE MIMIC.—Mary: "What are you thinking of, papa? You're making just the face you always make when you're imitating somebody!" Papa (who specially prides himself on the versatility of his facial expression): "Somebody? Whom, darling?" Mary: "Oh, Irving, or Toole, or—or anybody you know!"

BROWN was abusing Smith violently on the sidewalk one night. Jones, who heard it from an upper window, yelled to Smith, "Knock him down!" The next day Jones and Smith met. "Why didn't you knock that man down?" asked Jones; "I hollered to you to do it." "Yes," said Smith, "and I would have hollered the same thing if I had been up there."

A KENTUCKY paper recently stated that a prominent citizen was "greatly troubled with insomnia." After the editor had got out of the hospital he decided to never again use anything but plain language in writing of his fellow-townsmen. Kentuckians are not troubled with education, but they shoot straight and make explanations afterward.

Household Hints

SHREWSBERRY CAKE.—This is an old English cake, which was brought from that country by the earliest settlers in the New England States. The old form, with some improvements, is as follows: Take one lb. of fresh, sweet butter, and add one lb. of powdered white sugar; beat these thoroughly to a fine white cream; take four newly laid eggs, yolks and whites together, and whisk till very light; take a teaspoonful of powdered cinnamon, with a dash of mace and nutmeg; take one and a half lbs. of the best superfine flour; mix this with half a gill of water, flavored with the juice of two lemons and one orange. Now mix the above materials together into a dough, and roll out thin; cut into small, round cakes, place on greased baking tins and bake in a quick oven until the cakes are brown and the crust firm.

SNOW CUSTARD.—Use half a package of gelatine, three eggs, one pint of sweet milk, two cups of sugar and the juice of two good-sized lemons. Soak the gelatine in a teacup of cold water; it will need to soak for an hour, at least; when it is entirely dissolved add one pint of boiling water and two-thirds of the sugar and lemon juice; let all come to a boil; then take from the stove and pour in the dish in which it is to be carried to the table, or put it in a mold to cool. Make a custard of the milk, eggs and the rest of the sugar and lemon juice. When the gelatine in the mold is ready to serve, put the custard around the base, or cover it entirely with the custard.

POTATO CROQUETTES.—Season cold mashed potatoes with pepper, salt and nutmeg. Beat to a cream with a teaspoonful of melted butter to every cupful of potato; bind with two or three well beaten eggs, and some minced parsley (if you like). Roll into oval balls, dip in beaten egg, then in bread crumbs, and fry in hot lard or drippings. Pile in a pyramid upon a flat dish, and serve.

RUSK.—Two cups of dough, one teacup of sugar, half a cup of butter, two well beaten eggs, flour enough to make a stiff dough. Set to rise, and when light make into high and rather narrow biscuit. When again light sift sugar and cinnamon over the top and bake.

A CHEAP CAKE.—Here is a recipe for a cheap but good cake suitable for all kinds of layer cake: One cup of sugar, 2 eggs, 2 cups of flour, half a cup of milk, half a cup of butter, 2 teaspoonsful of baking powder; flavor with lemon or vanilla. If made with care, this will be as satisfactory as many more expensive recipes.

CITRON PUDDING.—One spoonful of flour, two ounces of sugar, two ounces of citron peel, a little nutmeg, half a pint of cream and the yolks of three eggs. Bake in teacups in a quick oven.

Health Column.

Eating Before Sleeping.

The Old Time Rule Reversed by an Advocate of Late Suppers.

Man is the only animal that can be taught to sleep quietly on an empty stomach. The brute creation resent all efforts to coax them to such a violation of the laws of nature. The lion roars in the forest until he has found his prey, and when he has devoured it he sleeps over until he needs another meal. The horse will paw all night in the stable and the pig will squeal in the pen, refusing all rest or sleep until they are fed. The animals which chew the cud have their own provision for a late meal just before dropping off to their nightly slumbers.

Man can train himself to the habit of sleeping without a preceding meal, but only after long years of practice. As he comes into the world nature is too strong for him, and he must be fed before he will sleep. A child's stomach is small, and when perfectly filled, if no sickness disturbs it, sleep follows naturally and inevitably. As digestion goes on the stomach begins to empty. A single fold in it will make the little sleeper restless; two will waken it; and if it is hushed again to repose the nap is short, and three folds put an end to the slumber. Paregoric or other narcotic may close its eyes again, but without food or some stupifying drug it will not sleep, no matter how healthy it may be. Not even an angel who learned the act of minstrelsy in a celestial choir can sing a babe to sleep upon an empty stomach.

We use the oft-quoted illustration, "sleeping as sweetly as an infant," because this slumber of a child follows immediately after its stomach is completely filled with wholesome food. The sleep which comes to adults long hours after partaking of food, and when the stomach is nearly or quite empty, is not after the type of infantile repose. There is all the difference in the world between the sleep of refreshment and the sleep of exhaustion.

To sleep well the blood that swells the veins in the head during our busy hours must flow back, leaving a greatly diminished volume behind the brow that lately throbbed with such vehemence. To digest well, this blood is needed at the stomach, and nearer the fountains of life. It is a fact established beyond the possibility of contradiction that sleep aids this digestion, and that the process of digestion is conductive to refreshing sleep. It needs no argument to convince us of this mutual relation. The drowsiness which always follows the well-ordered meal is itself a testimony of nature to this inter-dependence.—*New York Journal of Commerce.*

Effects of Smoking on the Heart.

We have often observed cases of intermittent pulse in which the cause was unquestionably the use of tobacco, the difficulty disappearing in almost every case where the habit was abandoned. The *Sanitary News*, under the head of "Danger Signals," presents the following interesting facts on this subject:

"Some years ago, M. Decaisne drew attention to the fact that tobacco smoking often causes an intermittent pulse. Out of 81 great smokers examined, 23 presented an intermittent pulse, independent of any cardiac lesion. This intermittency disappeared when the habit of smoking was abandoned. He also studied the effects of smoking on children from 9 to 15 years of age, and found that it undoubtedly caused palpitation, intermittent pulse and chloroanæmia. The children, furthermore, became dull, lazy and predisposed to the use of alcoholic drinks. Recently he reported to the *Societe d'hygiene* (*Gazette Obstetricale*) the results of his observations on the effects of smoking on women. Since 1865 he has met with and observed 43 female smokers. Most of them suffer from disturbances of menstruation and digestion, and eight presented very marked intermittency of the pulse without any lesion of the heart. He gave detailed accounts of these eight cases, in which all treatment directed against the intermittency proved utterly useless, while the suppression of tobacco was invariably followed by improvement, and very often by complete disappearance of the phenomenon."

SAND BAG FOR THE SICK-ROOM.—One of the most convenient articles to be used in a sick-room is a sand bag. Get some clean, find sand, dry it thoroughly in a kettle on the stove; make a bag, about eight inches square, of flannel, fill it with the dry sand, sew the opening carefully together, and cover the bag with cotton or linen. This will prevent the sand from sifting out, and will also enable you to heat the bag quickly by placing it in the oven, or even on top of the stove. After once using this you will never again attempt to warm the feet or hands of a sick person with a bottle of hot water or a brick. The sand holds the heat a long time, and the bag can be tucked up to the back without hurting the invalid. It is a good plan to make two or three of the bags and keep them on hand, ready for use at any time when needed. —*Herald of Health.*

HOW TO TAKE TINCTURE OF IRON.—To disguise the taste of tincture of iron: Dr. Haner recommends that tincture of the sesquichloride of iron be mixed with simple syrup and then with milk. This mixture will not affect the teeth, nor will the styptic taste be apparent.

Worth Knowing.

A NEW METHOD OF INLAYING WOOD.—A new method of inlaying wood has been contrived by a furniture manufacturing house in England. The process is as follows: A veneer of the same wood as that of which the design to be inlaid consists—say sycamore—is glued entirely over the surface of any hard wood, such as American walnut, and allowed to dry thoroughly. The design is then cut out of a zinc plate about 1-20th of an inch in thickness, and placed upon the veneer. The whole is now subjected to action of steam, and made to travel between two powerful cast-iron rollers of 8 inches in diameter by 2 ft. long, 2 above and 2 below, which may be brought within any distance of each other by screws. The enormous pressure to which the zinc plate is subjected forces it completely into the veneer, and the veneer into the solid wood beneath it, while the zinc curls up out of the matrix it has thus formed and comes away easily. All that now remains to be done is to plane down the veneer left untouched by the zinc, until a thin shaving is taken off the portion forced in the walnut, when the surface, being perfectly smooth, the operation will be completed. It might be supposed that the result of this forcible compression of the two woods would leave a ragged edge, but this is not the case, the joint being so singularly perfect as to be unappreciable to the touch; indeed, the inlaid wood fits more accurately than by the process of fitting, matching, and filling up with glue, as is practiced in the ordinary mode of inlaying.

HOW TO TELL GOOD FROM BAD GILDING.—It may be ascertained whether gilding is genuine or not by the fact that on the latter a weak solution of protochloride of copper produces a black precipitate, which it does not on the former. In the case of gilt paper, the simplest method consists in slowly burning the paper in a bright flame that gives out no smoke; in the incinerated remains of good gilt paper there are traces of the gold left behind, which are quite perceptible to the naked eye, in the shape of glittering spots, while base metal on paper oxidizes in burning, and leaves nothing but a lot of red spots behind. This method, however, is scarcely accurate enough; a very much safer test is to be found in the use of mercury, either in metallic shape or in solution of salts of mercury. The former test is performed by putting a few drops of pure quicksilver on the gilt article, and either rubbing it in or slightly heating it. If the gilding be genuine, though ever so thin, the mercury combines itself with it, producing white spots on the surface. This does not occur in the case of sham gilding, and in rubbing mercury no change of color whatever can be noticed. Another test consists in the application of a watery solution of nitrate of mercury. In this case the exact opposite takes place as in the former, for genuine gilding remains intact, while a "duffer" at once takes a white color when brought in contact with the precipitate of mercury.

PLASTER CASTS.—First of all, when purchasing, I am very particular to select perfect ones. I then make a sizing of white glue, rather thin, and wash the bust with it very thoroughly with a brush. When quite dry I take common white zinc paint and mix with turpentine, as thin as water, paint the bust or figure over with this, using a very fine camel's hair brush, then set away to dry; repeat this latter process until the figure is perfectly white and smooth. Not a trace of the brush mark should be seen. When soiled they can be cleansed by washing. I have busts of distinguished men treated in this way which would require the closest inspection to tell from Parian marble. The painting should be done with neatness and skill, or the bust will look coarse and cheap. I have some which have been painted at least eight years, and they look white and as smooth as when first done.

HOW TO MAKE SOLUBLE GLASS.—The following is the recipe generally employed by English manufacturers for producing that article by fusion in crucibles: Pure quartz, 45 parts; powdered alkaline carbonate, 23 parts; charcoal, 3 parts. Another recipe is: Quartz sand, 100 parts; caustic soda or potash, 48 parts; and charcoal powder, 5 parts. Or, washed quartz sand, 65 parts; anhydrous alkaline carbonate, 34 parts; and charcoal powder, 4 parts. The mixture is heated to redness, until entirely fused, and the contents are cast on tin plates for cooling, and finally crushed.

TO RESTORE BLACK MERINO.—Soak the goods in strong soft-soap suds two hours; then, having dissolved 1 ounce of extract logwood (which is the amount required for one dress) in a bowl of warm water, and warm (not hot) water to cover the goods, which are to be taken from the suds without ringing. Allow the goods to stand in the logwood water over night; in the morning rinse in several waters without wringing; in the last water add one pint of sweet milk, which stiffens the goods a little; iron while quite damp. They will not crack, and look like new.

ASHES AS A FERTILIZER.—Ashes are, for many soils, a standard fertilizer. Places where a tree or brush heap has been burned often show the effects of the manuring for years. It is an old saying that "The land never forgets ashes."

MASONIC.

Officers Grand Lodge. — CLAY W. TAYLOR, Shasta, G. M.; JOHN QUINCY ADAMS, Vallejo, D. G. M.; MOSES HELLER, G. Treas., S. F.; A. G. ABELL, G. Sec'y, S. F.

GRAND MASTER CLAY W. TAYLOR laid the corner stone of a new building to be occupied as a Masonic hall, at Wheatland, last Thursday. The Grand Master made the following appointments: L. Melton, Deputy Grand Master; J. E. Hollingshead, Senior Grand Warden; T. E. Bevan, Junior Grand Warden; J. M. C. Jasper, Grand Treasurer; J. F. Daun, Grand Secretary; W. F. Fleenor, Grand Chaplain and Grand Orator; James Brown, Grand Marshal; H. F. Deaner, Grand Standard-bearer; W. B. Swears, Grand Sword-bearer; D. P. Durst, Grand Bible-bearer; W. C. Wilson, Senior Grand Deacon; L. W. Justice, Junior Grand Deacon; B. G. Stanwood, Senior Grand Steward; G. W. Yarborough, Junior Grand Steward; Amos Fisher, Grand Organist; John Landis, Grand Pursuivant; Frank Kirshner, Grand Tyler. The Grand Lodge was opened in the hall of Nicholas Lodge, No. 129, and marched from thence through the principal streets of Wheatland to the new building being erected by the Odd Fellows' Building Association of Wheatland. After the ceremonies, they returned to the Lodge-room, closed the Grand Lodge, and then repaired to a banqueting-room, where a splendid feast was partaken of by members and their wives, members of Eastern Star, etc.

THE following are the names of the newly elected officers of Utah Commandery, No. 1, Knights Templar, of Salt Lake, for the ensuing year, who were duly installed by Sir Knight James Anderson, E. C., assisted by Sir Knight Jas. Lowe, P. E. C.; Sir Knights—John Cunnington, E. C.; J. S. Scott, G.; W. W. Chisholm, C. G.; Jas. Lowe, Prelate; A. S. Hill, S. W.; S. Paul, J. W.; A. H. Gebhardt, Treasurer; J. S. Stewart, Recorder; H. O. Stearns, S. B.; G. Cullens, St. B.; F. M. Bishop, W.; S. E. Underhill, C. G. After the installation, the members and visiting Sir Knights were invited by the newly installed Eminent Commander to participate with him and his officers in their banquet, which was most thoroughly enjoyed by all present.

THE Grand Lodge of New South Wales is fraternally recognized by the following Grand Lodges: District of Columbia, United States of America; Washington Territory, United States of America; British Columbia, Dominion of Canada; New Brunswick, Dominion of Canada; Nebraska, United States of America; New Mexico, United States of America; Iowa, United States of America; Kansas, United States of America.

THE various secret societies are represented in the N. H. Legislature, now in session, as follows: Masons, 83; Odd Fellows, 55; Knights of Honor, 11; Knights of Pythias, 9.

The following table, prepared by and contained in the last Annual Report of the Grand Lodge of Ohio, will be read with interest, as showing the proportion of Free Masons with population of the United States—that proportion being a little over 1 to every 100:

	Census 1880.	Masons 1880.
Alabama	1,262,344	8,667
Arkansas	802,564	2 295
California	864,686	12,214

THE Lodges of this jurisdiction will begin their installations within a few days. Presentations of Past Masters jewels will soon be the order of the day.

DURING the past three months 25 new Lodges have been chartered by the Grand Lodge of England, the highest numbered one being Star of Agra Lodge, No. 1936, of Agra, Bengal.

GRAND MASTER, Philip H. Emerson, Past Grand Master, John S. Scott, and Christopher Diehl, Grand Secretary, visited Frisco, Utah, early in December, and there opened a new Masonic Lodge. The name of the Lodge will be St. John's, and the Master of it, Major Harry C. Hill, superintendent of the Horn Silver mine.

THE Fourth annual reception of Palestine Commandery, New York, will take place at the Academy of Music, in that city, on Wednesday, February 15, 1882. An efficient committee of arrangements is already at work, and a most attractive occasion may be anticipated.

Order Eastern Star.

Officers Grand Chapter.—EDWARD S. WEST, Gr. Patron, Santa Cruz; FRANCES E. RYDER, Gr. Matron, Oakland; MRS. ABBIE E. WOOD, Grand Secretary, San Francisco.

NAOMI CHAPTER, No. 36, of Sacramento, installed the following officers on Tuesday evening, Nov. 29th: Mrs. Mary J. Young, W. Matron; R. O. Cravens, W. Patron; Mrs. Alvira C. Stanton, A. Matron; Mrs. Ann N. Snell, Treasurer; Miss Hetty A. Dunn, Sec'y; Miss Mary A. Stanton, Con.; Mrs. Mollie A. Crum, A. Con.; Rev. S. H. B. Anderson, Chaplain; Mrs. Florence Miller, Adah; Mrs. Hattie E. Lynn, Ruth; Mrs. Hannah Wright, Esther; Mrs. Jennie H. Dowingas, Martha; Mrs. Hannah E. Harper, Electa; Mrs. Kate Boyd, Warder; Robert Collar, Sentinel; J. T. Griffitts, Organist. After the installation ceremonies were concluded, all present were invited to partake of a banquet prepared by the ladies of the Chapter. S. C. Denson presided at the table, and speeches were made by F. E. Baker, of Woodland; Rev. T. H. B. Anderson and J. N. Young. Mrs. R. O. Cravens, the retiring Worthy Matron, was made the recipient of a handsome silver card receiver and bouquet holder, Bro. E. C. Atkinson making the presentation speech. Dancing was indulged in, and the affair was one of the most enjoyable events of the season. About 150 persons were present, among whom were several of the officers and members of Woodland Chapter. As will be seen, Mrs. R. O. Cravens has been remembered in a pleasant way. She has made a most excellent Worthy Matron. Bro. E. C. Atkinson's speech was in every way equal to the occasion.

Knights of Pythias.

Grand Officers.—S. L. TERRY, P. G. C., Stockton. JOHN H. HARNEY, G. C., S. F.; GEORGE CANTUS, G. Treas. S. F.; A. G. BOOTH, Grand K. of R. & S., San Francisco.

THE Knights of Baltimore, Md., have now their own castle building. It presents a very attractive appearance, and is a decided ornament to the neighborhood and a credit to the Order. The building is somewhat on the Rennaisance style, surmounted with a tower at each end and adorned with a handsome crest in an appropriate triangle, in the center of which is the coat-of-arms of the Order in colors. On the ground floor are two stores. In the rear is the library and office of the Grand Keeper of Records and Seal. The room is 40x33 ft. The janitor's room is also located on the ground floor. The second room is a large and handsome saloon 43x64, fitted up entirely new, with a stage suitable for theatrical, concert and lecture purposes. On each side of the stage is a reception room, making a very desirable and beautiful room. On the third floor there is a committee room 19x23, and three Lodge rooms 37x20, splendidly arranged for the purpose, and on the fourth floor four Lodge-rooms 37x20, making sufficient accommodation for 35 Lodges. Unlike most of other Orders, the building was purchased for cash, and the remodeling and refurnishing have been paid for as the work was completed, and the Order will occupy it with the proud satisfaction that they have no debt to shoulder. The hall was formally dedicated to the services of the Order on Thursday, Nov. 24th. There was a parade of all the Lodges in the city, all the Uniform Divisions, together with Lodges from all parts of the State and Uniformed Divisions from other States. The entire cost of the improvements, including refurnishing of all the rooms, purchasing of building, is about $20,000, and now ranks with the best halls of the Order in the country. The library has been fitted up with special arrangements for the convenience of members and their ladies. Large numbers of the latter will avail themselves of its privilege. The floor is covered with a rich Brussels carpet, bordered with matting; the furniture is grained oak. The ceiling is handsomely papered in four panels, and the room is lighted with four chandeliers.

A New Lodge.

John H. Harney, Grand Chancellor, assisted by C. E. Baker, P. G. C., F. H. Norman, N. G. C., D. W. Alverson, G. P., A. G. Booth, G. K. of R. & S., C. C. Gilmore, G. M. of E., W. J. Doyle, G. I. G., and Geo. E. Gerlach, G. O. G., last Saturday evening at Hamilton hall, corner Geary and Steiner streets, instituted Ivy Lodge, No. 65, K. of P., and installed the following officers for the residue of the term: Martin S. Meyer, P. C.; L. D. Allen, C. C.; Chas. S. Putnam, V. C.; G. A. Hurcade, P.; John Martens, M. of E.; Geo. Ward, M. of F.; T. H. Malach, K. of R. & S.; F. H. Coburn, M. at A.; T. C. Ganey, I. G.; S. Macumber, O. G. Among the vast number of Knights were Past Chancellors C. C. Gilmore, C. E. Baker, C. W. Nevin, W. E. Lucas, W. J. Rodgers, Geo. E. Gerlach, R. Meiners, D. Aaron, S. B. Carleton, Sam. Seymour, and H. Schaffner, and several presiding Chancellor Commanders. This new Lodge is located in a position to justify the most sanguine of its future. The material to build from is of the highest order of society, and we bespeak for it a successful future. When the installation ceremony was concluded the members of the new Lodge invited the Grand Officers and visiting brethren to repair to the banquet room and partake of a magnificent collation, after which speeches were in order, when the eloquent and loquacious Grand Chancellor responded in his usual happy style. *Vive la* Ivy, No. 65!

THE Pythian movement was inaugurated on Feb. 19, 1864, and to-day the membership is nearly 100,000. Holding weekly conclaves in 2,000 Castle halls, with an annual revenue of $1,000,000, this fraternal organization is the miracle of the 19th century. Besides its wonderful growth, it has provided mutual insurance for Knights, entitled the "Endowment Rank," that has paid to the widows and orphans of Knights since Oct., 1877, the enormous sum of $800,000. All this has been accomplished in a little over 17½ years, in the name of the blessed trinity, Friendship, Charity, Benevolence.

Indp't Order of Odd Fellows.

Grand Officers.—DAVIS LOUDERBACK, G. M., San Francisco; LEON D. FREER, D. G. M., Oroville; D. M. BURNS, G. W., Sacramento; W. B. LYON, G. Sec'y, San Francisco; H. B. BROOKS, G. Treasurer, San Francisco.

THE Order in New Hampshire rejoices in a surplus fund of nearly $200,000. In the hands of so faithful and conservative men as our Granite State brothers, what a power of good it must prove in the future!

DURING the past year, Massachusetts made a gain of 996 members. The increase for the past six months was 594.

GRAND SECRETARY, Chas. D. Cole, of Massachusetts, has just completed a quarter of a century's service in that office, to which he has been very properly re-elected. During all this period he has enjoyed the confidence and hearty respect of the entire brotherhood. Few of those who saw him installed now remain, many of the departed being personal friends of the Grand Secretary, and with him, the most active workers in the jurisdiction. Long may Bro. Cole live to set a good example and point the way to the rising generation of Odd Fellows.

HERE is a nice nut for some of the "old 'uns" and those who claim to be posted to crack: The Recording Secretary being present, but officiating in another capacity, a Secretary pro tem. was appointed. When an order for benefits was drawn it was signed by the N. G. and Secretary pro tem., the brothers refusing to allow the regular Secretary to sign the order. Was it legal for the Treasurer to recognize it?

THE Wildey Association of Illinois has settled satisfactorily to all concerned that the centennial birthday of Father Wildey will occur on Jan. 15, 1882. On that date a grand demonstration is to be given in Chicago by members of the Order. It is quite probable that Past Grand Sire Nicholson, of Pennsylvania, will be the orator of the day. As Chicago never does anything by the halves, this will undoubtedly be a "red letter day" for the fraternity in the northwest.

THE Legislative committee reported against the adoption of an endowment plan under the immediate jurisdiction of the Sovereign Grand Lodge.

THE Albany *Guide*, says: It is stated that Past Grand Sire, J. P. Sanders, will compose a ritual for the "degree of the faded sun-flower," or Past Grand Master's degree.

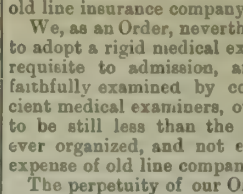
PAST GRAND MASTER, Anthony Buchly, of Washington, D. C., died recently. He left an estate valued at $150,000. He made a will, and in it he gave $10,000 to his Lodge of Odd Fellows, Columbia, No. 10, of that city, and all his money due as a member of the Odd Fellows' Mutual Relief Association. This is to be set aside as the "Buchly Fund," and the interest forever appropriated for the relief of the widows and orphans of his Odd Fellows Lodge.

A NEW Lodge has been instituted at Eastport, Me., being the easternmost Lodge in the country.

THE Odd Fellows of Port Hope, Ont., annually decorate the graves of deceased members after the fashion of the Grand Army. The exercises for the day this year were on a grand scale, the music being rendered by a choir of 100 voices with instrumental accompaniment. The ritualistic portion of the ceremony is simple, and consisted of prayer, singing of hymns, and an address by Grand Secretary J. B. King, of Toronto. The graves were then visited and upon each flowers were deposited with appropriate words, and at the conclusion the choir sang "The Sweet Bye and Bye."

Ridgely's Successor.

The Grand Sire has issued the following, which is self-explanatory: Whereas, Our beloved brother, James L. Ridgely, Grand Secretary of the Sovereign Grand Lodge of the Independent Order of Odd Fellows, died on the 16th day of Nov., 1881; in accordance with the provisions of Sec. 9, Art. 15, of the By-laws of the Sovereign Grand Lodge, it devolves upon me to fill the vacancy. Therefore, I, Luther J. Glenn, Grand Sire, do hereby appoint Theodore Ross, of the jurisdiction of New Jersey, now and for several years past a resident of Baltimore, Maryland, as Grand Secretary of the Sovereign Grand Lodge of the I. O. O. F., to fill the vacancy caused by the death of Bro. James L. Ridgely.



THE Odd Fellows of Santa Cruz have rejected the proposition to consolidate their library with that of the Santa Cruz Library Association.

American Legion of Honor.

Officers of Grand Council.—OSGOOD C. WHEELER, Grand Commander, Oakland; MRS. ABBIE E. WOOD, G. Sec'y., office room 1, Shiels' building, 32 O'Farrell St.; J. N. BESSE, G. Treas., Watsonville.

Official Circular, No. 2.

SUPREME COUNCIL A. L. H.
OFFICE OF SUPREME COMMANDER,
PHILADELPHIA, Nov. 22, 1881.

To all Grand and Subordinate Councils American Legion of Honor—COMPANIONS: A large, popular, beneficial organization, during a half century of its existence, finds that its death rate (without a medical examination as a prerequisite to admission) has been but one per cent. per annum.

According to this rate, the cost in the American Legion of Honor will not exceed the above; therefore, the expense of carrying an insurance in our Order will be but one-third of that in any old line insurance company.

We, as an Order, nevertheless have attempted to adopt a rigid medical examination as a prerequisite to admission, and if applicants are faithfully examined by conscientious and efficient medical examiners, our death rate ought to be still less than the best beneficial Order ever organized, and not exceed *one-fourth* the expense of old line companies.

The perpetuity of our Order in fact depends more upon a proper medical examination than any one thing else. If we, as an Order, can effect it, we would be willing to guarantee less than eight assessments per annum, an insurance cheaper than any other plan that has been or can be offered.

But in forming new Councils, the Deputy is often compelled to select physicians—men probably of ability and high professional standing, yet inexperienced in our medical instructions, and probably at the same time personal friends of the charter applicants, and they neglect to examine them as carefully as they might, and thus unwittingly recommend unworthy applicants for membership.

In Councils already organized, where the medical examiner depending upon an *annual* election, he is as well encouraged to be lenient, fearing lest he incur the enmity of some applicant, or some friend already a member of the Council, and as a consequence be defeated at the annual election. To avoid the humiliation of an annual election, or any excuse for laxity in examining, and to encourage all medical examiners to do their duty faithfully and fearlessly, the Supreme Council at the last session abolished the system of annual election of medical examiners.

It is the duty of each subordinate Council to select at once a medical examiner who has been duly commissioned by the Supreme Commander, or else take the necessary steps thereto.

The proper blanks for this purpose have been previously forwarded.

Councils will see that their medical examiner has been commissioned, or else instruct them to at once fill up and forward an application to the Supreme Commander. The Supreme Medical Examiner will decline to review or approve applications from other than "commissioned medical examiners of the A. L. H." after Jan. 1, 1881.

Any Deputy instituting a new Council where there is no physician thus duly commissioned, or one living near, will apply to some reputable physician, graduate of a legal medical school, and secure his services. If he consents to join the Order, let him be examined and obligated, and send his application immediately forward to the Supreme Medical Examiner for approval. In the meantime let

him fill out application for appointment and forward to the Supreme Commander for a commission. Within one week he is thus empowered with proper authority and proceeds to examine all charter applicants, *secundem artem*, with proper instructions, etc.

Each Examiner will hereafter write number of commission after their name on examination blank.

While the plan adopted is imperfect, probably not the best, it has done much good, and we are constantly receiving letters from all sections of the country, commending it as a step in the right direction, and we are encouraged in pursuing a course towards perfection.

We will then use our best endeavors to secure only proper Medical Examiners for the American Legion of Honor, and who will do their duty fearlessly and faithfully. For the perpetuity of our Order, we must have them and none others. The Supreme Commander will commission only those whom he believes come up to the proper standard, and will revoke the commission of those who are derelict in their duty to the Supreme Council, from whom they receive their commission, whose officers they virtually are, and to whom our moral support is hereby guaranteed.

We are profoundly thankful for our continued growth.

We have earnest prayers for the success, popularity and perpetuity of our institution.

We solicit the hearty co-operation of each companion of the Legion of Honor in every effort we may make in the future towards the more complete success of our noble Order.

Given under our hand and seal of the Supreme Council, date and year written.

JACOB ROBERTS, Supreme Commander.
Attest: NETTIE F. MOSHER, Supreme Secy.

Washington Council

Washington Council, No. 480, gave a choice musical and literary entertainment in Fraternity Hall, at Shiels' building, on Friday evening, Dec. 9th, 1881. An appropriate address of welcome was given by C. O. Burton, Chief Commander, to a very select audience which occupied the full seating capacity of the hall: Piano solo, Miss Roxa Macfarland; vocal duett, "Two Merry Girls," Miss Cochell and Mrs. J. H. Norris, a very pleasing effort; comic reading, C. G. Bockius, Past Chief Commander; violin solo, Senor Ortorio, "The Bird on the Tree." This was a masterly and artistic effort, that was heartily applauded at each pause, and at the close recalled which was kindly answered; vocal solo, W. E. Lutz, a sentimental song that was well rendered and received a hearty recall; scene from "School of Scandal," Mrs. Abbie E. Wood, Grand Secretary, and Mr. J. C. Gray. Each one acted their part in an admirable manner and were cordially received; overture, "Steward's Band," which means Mr. Frank Steward and six instruments, accompanying which he sang a sweet, sentimental song, that was received with rapturous applause and at the close was recalled; solo, Mr. W. E. Reick; "Rocked in the Cradle of the Deep," Mr. Hugh Talbo, accompanying on piano. This was a cultivated and extremely meritorious effort in basso voice which was appreciated, as he was encored at the end of each verse and at the close recalled; solo, Hugh Talbo, whose compass of voice was handled with consummate skill and secured the most hearty recall; recitation, Mr. H. Benhayon, who acquitted himself as usual with much credit; solo, Miss Kittie Mackey; this young lady has a very sweet and cultivated voice, and her effort was received with much favor and hearty applause; model sermon, Deacon Snooks, personated by Mr. E. H. Black, text, "Old Mother Hubbard went to the Cupboard," etc.; Mr. Black is a natural humorist, and on this occasion he made the hit of the evening, and fairly convulsed his audience with uproarious laughter; a peculiar feature of the sermon (which was discovered at the close) being that Mr. W. Lutz done all the coughing and sneezing for the Deacon. C. O. Burton, Com., then announced that the guests of the evening would form in line and march to the banquet room and the members of Washington Council remain in the hall. A magnificent spread was in readiness, consisting of roast chicken and turkey, pyramidal cakes, etc. It was a recherche affair, well managed, and the evening was a very enjoyable one. O. C. Wheeler, G. Com., and a number of the officers were in attendance. After the banquet a short time was spent in the Lodge room in social conversation and congratulations. In every respect this was one of the best and most *companionable* celebrations of the season, and did honor to the following Companions as Committee of Arrangements: J. M. Camp, Helen Hollingsworth, Leslia M. A. Chessman, Belle M. Hinchman, R. V. Watt, Edward Payne, C. O. Burton, Com.

Grand Officers.—CHAS. W. BRYANT, G. C., San Francisco; JAMES M. BAIRD, G. A. C., San Francisco; JOHN W. SHAFFER, G. Treasurer, S. F.; S. DANIELEWICZ, G. Recorder, office 601 California street, San Francisco.

A CONVENTION of the Chosen Friends was held in this city on Thursday, Dec. 8th, the object being to form an independent Order for California. On the first rollcall there were 29 Councils, representing an aggregate membership of 2,800. It was resolved that all Councils of the Order of Chosen Friends on the Pacific coast be admitted to full membership and equal rights and privileges in the Independent Order of Chosen Friends of the Pacific coast upon making formal application to the Grand Secretary, paying one assessment for each member on their roll and paying the per capita tax due at the time. The following officers were elected: Grand Councillor, Thos. M. Cook of Redwood; Grand Vice-Councillor, H. Griffin of Oakland; Past Grand Councillor, M. W. Fish of Oakland; Grand Secretary, Geo. J. Vincent of San Francisco; Grand Treasurer, John W. Shaeffer of San Francisco; Grand Marshal, D. E. Hamblen of Yuba City; Grand Warden, J. C. Palmer of San Francisco; Grand Guard, Geo. T. Vickery of Willows; Grand Sentry, W. T. Triplett of Mountain View; Grand Trustees—C. O. Burton, J. M. Davies, Louis Getz and Martin S. Meyer of San Francisco and W. A. Knowles of Oakland.

Native Sons Golden West.

Grand Officers—FRANK J. HIGGINS, P. G. Pres.; San Francisco; H. CLAY CHIPMAN, G. P., Sacramento, GEORGE B. BALDWIN, D. G. P., Marysville; HENRY LUNSTEDT, G. Sec'y, San Francisco.

GRAND PRESIDENT Chipman, has filed an adverse opinion with the Grand Secretary in answer to the petition of Pacific Parlor, No. 14, in regard to granting them the privilege of holding their charter open until the first day of January, 1882, deeming it inexpedient and establishing a precedent not in keeping with the laws of the Order. In answer to a query concerning regalia, he desires to state "that there is no specified time in which subordinate Parlors are required to procure them, the matter being optional with the Parlor, although tacitly understood that they shall be procured as soon as finance and convenience will permit."

PACIFIC PARLOR is making extraordinary progress, having increased about 50% in membership last month. Last week 13 candidates were initiated. Many visiting brethren were present. After the routine business was transacted speeches were, as usual, the order. The following brothers made short and enthusiastic addresses: McDougald, Lunstedt, Higgins and Lutgens of California Parlor; Naegle, Trevor and McWilliams of Oakland; Lane of Stockton; G. B. Baldwin of Marysville; J. W. McCarthy of Modesto; E. R. Hundley of Oroville, and C. L. Weller, J. W. Shaver, Wm. Metzner and J. A. Steinbach of Pacific Parlor.

Oakland Parlor.

A number of the members of California Parlor visited Oakland Parlor last Tuesday evening. An initiation was the occasion of the visit, many of the brothers being desirous of seeing the officers of Oakland exemplify the work. All were loud in their praises of the admirable manner in which it was conducted, pronouncing well worthy a visit from any part of the State. We have heard and admired the delivery of the President's charge when delivered by the eloquent Major Jones and the silver-tongued orator of Sacramento Parlor, Frank L. Ryan, but the deep strength and volume of President Becht's thrilling voice resounding and echoing through Oakland Parlor's beautiful hall excited a fresh admiration for the charge of the President, and led us to reflect upon how much the beauty of an initiatory depended upon the force and earnestness of delivery. After the initiation the visiting brothers were called upon. Theo. G. Eilers, Secretary of Sacramento Parlor, who has been down on a visit for several weeks, said he was much pleased with the cordiality the members had everywhere received him, demonstrating that the boys possessed the elements of a true fraternal spirit. E. R. Hundly, formerly of Oroville Parlor, sang a pleasing melody; Louis Schroeder, Oakland's "hail fellow well met," recited an inimitable Italian mule story; President Lutgens, of Cal. Parlor, said he was much gratified to see Oakland Parlor enjoying so much and such well deserved prosperity; they had contended with more obstacles and with more genuine pluck than any society he knew of. He hoped that the clouds that had so long obscured the light of prosperity were now forever dissipated and that that light would never again be withheld from an organization the members of which were universally respected in the community in which they lived. J. W. Shaver, "the little Demosthenes" of Pacific Parlor, being called upon gave some extended remarks, the following of which is a synopsis: I had hoped that there would be some of the officers of the Parlor which I have the honor of being a member present to extend to your Parlor a cordial invitation to pay us a fraternal visit to-morrow evening, as we intend to initiate not less than 15 applicants. In the absence of the dignitaries of my Parlor, I extend to each and every one of you a cordial invitation on the behalf of Pacific Parlor. I am glad to see that your Parlor continues the good work of adding new members to your roll. As descendants of the dauntless pioneers, we should not lay down our banner until we have enrolled every Californian from the north where Mt. Shasta rears her lofty peaks, to the south where the orange tree perpetually blooms; from the east where the Sierra Nevadas clad in priestly robes stands sentinel to guard our homes, to the west where the amber waters of the Pacific lave their golden sands. The way at first may seem dark, and there may be obstacles to overcome, but we should remember that we are descendants of the men who traveled thousands of miles across an unsettled wild; who encountered danger, and gathered up all they possessed, even their wives and children, and risked everything on the venture. The way was perilous; the arid, inhospitable and apparently boundless plain, strewn with the bleaching bones of their countrymen who had attempted to go before. Wild beasts went howling on their track, and hostile savages warned them of danger, and sometimes encompassed their death. The perils of the desert, wild beasts and hostile savages, could not daunt them; they pressed bravely on to the end. Their destination saw them begin life anew. They began again upon the bedrock of human existence; their means were either spent or lost, and they had no resort except to labor. In their new homes, the laws of the U. S. did not protect them, and they were compelled to protect themselves. Yet, amid all these adverse circumstances, they neither murmured nor complained, but worked cheerfully and happily, and made a home for themselves and posterity. They are not only the founders, but the builders of this magnificent State. From anarchy and confusion they have wrought out an orderly and examplary society. Their industry, patience, wisdom and virtue entitles them to the highest ranks of honor.

J. E. McDougald was then introduced, and spoke in glowing terms of the California State University, and of the Honorable Bishop—Berkeley—from whom our highest State educational institution takes its name, and also the author of the memorable lines "Westward the Star of Empire takes its way."

Pres't Joseph Becht thanked the visiting brethren for the kindly disposition toward Oakland Parlor, and said that he hoped that they would all attend the grand carnival of Oakland Parlor on the evening of the 23d inst. The meeting then adjourned.

Sabbath Evening Thoughts.

Sabbath evening: The very name exhumes from memory scenes and incidents from the long forgotten past. Sabbath evening has held a place in our affections for 60 years. The church bell still tolls in the chambers of memory. The same faces greet us as we enter the sacred temple of worship. The holy man pours forth his message of "Love and good will to mankind." The last blessing is given, and the spiritually fed retire with a warmth and glow of soul which the truly good can only enjoy.

Anon we retire to the solitudes of nature, whose voice attunes the soul to meditation. The clear purling brooks reflect images of weird and spiritual beauty. The mingled sounds of insect life and feathered throng adding to the spirit worship of the beautiful and grand in nature, and the infinite wisdom displayed by nature's architect.

What a charm Sabbath eve throws around these scenes from contact and reflection. The setting sun illumines the mountain tops with a golden spray of light, as a departing signal of its early return. As the gloom approaches to darkness, we gather around the old fireplace to converse upon the sacred things belonging to the day of rest. No one dared question the reality of God and revealed religion. The patriarch read and expounded the scriptures, sang the simple melodies of a religious cast, then all bowed in prayer, and such simple, earnest prayer, so very rarely ascend to heaven's altar in this day of progressive wisdom. After such Sabbath evenings, spent in earnest religious converse and prayer, can you doubt about the sweetness of a Sabbath night's rest in the olden time, or the refreshed spirit renewed in mental and physical energies to cope with life's problems for the balance of the week. Surely, such a life, grand in its purity and simplicity, was enough to inspire the immortal Burns to pen his "Cotter's Saturday night," all of which is true to life and experience.

This was in the morn of life. We, too, have changed. Who can experience all the changes from morning's springtime of life to the twilight of its setting without experiencing many changes, physically, morally and spiritually? But as the rays of the morning sun are the most genial, so are the memories of life's morn to the weary traveler as he approaches the Sabbath morn of eternal rest. Sabbath eve is a holy hour. The heart is filled with good thoughts and charitable deeds, which should find expression, so that the law of compensation may return a hundred fold. The rural population enjoys nature and communion with nature's God, more than those living in cities; but the refining influences of cities cannot be ignored. God and goodness are not confined to locality or condition. The eternity of space is God's throne. Every soul born to "eternal life" is an expression of that divine presence. "Our Father" is spoken by all His children, and I accept "the brotherhood of man and Fatherhood of God."

I would that the whole family of God could enjoy the true happiness of a holy Sabbath evening. The morn of life may be calm and serene; the noon full of darkness and thunder mutterings, the evening clad in despair and sadness. We would banish such a picture from the record of passing events. But is it not true that the sun may shine with a noonday splendor in vain? The spirit of man is capable of eclipse. Violation of divine law leads to sorrow and suffering, premature death and retribution; for is it not written, "To sin is to suffer?" Would that every human and immortal soul could live so as to enjoy the splendors of life's setting sun; for set it will, sooner or later. It is by littles Nature rears her dome of myriad gems to attract us heavenward. It is by littles we light up the temple of the undying spirit. It is also by littles we create shadows which may lead us to a worse than Egyptian darkness. Light creates life, warmth and true happiness. Darkness produces death, despair and a prison of gloom for the soul. The ending of our short day is measured by the light begotten of good deeds performed in the name of Him who reigneth supreme, for-ever. Amen! JOHN TAYLOR.

The Prince of Planets.

We are indebted to the Providence *Journal* for the following description of Jupiter, which planet now nightly shines with unwonted brilliancy in close proximity to the glittering Pleiades: "This lordly leader of the starry throng now dominates the sky, and his four moons are plainly visible through a good field-glass. The dry climate and clear atmosphere of Arizona are peculiarly favorable to the observation of celestial phenomena, and if one of the observatories now located near the humid sea-shore, or in close proximity to smoking cities, were removed to one of our mountain peaks, the best results in astronomical discovery might be expected. Jupiter is morning star till the 13th of November, when, passing to the eastern side of the sun, he becomes evening star. If Mercury deserves the palm on the planetary annals of November as the hero of the transit, Jupiter will win equal renown for the most brilliant epoch in his course, his opposition with the sun. This grand event occurs at four o'clock on the morning of November 13th, when Jupiter will be nearer to us than he will again before more than a year to come. He will then rise at sunset, being opposite the sun, and no one who looks at the eastern sky, almost as soon as the sun has disappeared below the western horizon, can fail to recognize the prince of planets as with majestic steps he treads his sparkling pathway toward the zenith. In brilliancy and size he exceeds every star then visible in the heavens, and wins from every star-gazer tributes of wonder and admiration at his magnificent appearance. He will be a superb object in the heavens during the frosty nights of November, when the moon is out of the way, and for three months to come he will outrival every member of the starry host in the nightly pageant. He is only 13 days behind Saturn in reaching the same goal, and passes the meridian when in opposition at 42 minutes past 11 o'clock, 40 minutes behind Saturn. Jupiter is now about 408,000,000 miles from the earth, instead of 591,000,000 miles, as when farthest away—183,000,000 miles, the difference in distance, is something our finite powers can form little conception of, but it is of significant dimensions in celestial distances. For the distance of the earth from the sun, more than 90,000,0000 miles, is the unit of measure for computing the distances of the fixed stars. Alpha Centauri, the nearest star in the myriad host, is estimated to be more than 200,000 times as far from us as the sun. In comparison with these distant shining orbs, Jupiter is our near neighbor, and his mean distance from the sun is not much more than five times greater than our own.

HOW PRINTING AFFECTS THE HEALTH.—Years ago there was a notion prevalent among those who were but partially informed upon the question that the printing business was especially detrimental to health. There was a tradition about the absorption of poison from the constituents of which type metal was composed. This was and is true so far as it asserts the poisonous nature of some of the constituent parts of type metal; but that these poisons should necessarily be absorbed into the system of the one who handles type is simply absurd. Printers who have such habits of cleanliness and sobriety as a decent respect for one's self and the opinion of others might be expectad to dictate may follow their calling for years without experiencing any further damaging effects upon their health than what will result from close application to any sort of hard work. More "poison" is absorbed by the printer when taking observations of his little finger through the bottom of a glass than in any other way.—*The Chicago Specimen.*

"WELL, what do you want here?" remarked Mr. Smith, as he sat up in bed and addressed a professional burglar, who stood in front of the bureau. "I want money and bonds," hissed the burglar between his clenched teeth, "and quick about it, too." "My friend," retorted Smith, "I've been looking for those things for the last 20 years without success; but go on with your burglary, I'm sleepy."

THERE are 300 postoffices to be filled by the President, and there are already five applicants for each vacancy.

A. O. U. W. Directory.

Cards inserted in this list at the rate of 25 cents per month payable semi annually in advance. If errors or omissions are noticed, please write the office direct.

CALIFORNIA.

OFFICERS OF GRAND LODGE.

CLAY W. TAYLOR, Past Grand Master Workman ..Shasta
W. H. BARNES, Grand Master Workman....San Francisco
FRANK G. BEATTY, Grand Foreman.....Grass Valley
J. T. ROGERS, Grand Overseer.....Ukiah
H. C. PRATT, Grand Recorder.....Oakland
C. H. HAILE, Grand Receiver.....Alameda
EUGENE J. GRIDLEY, Grand Guide.....Sacramento
W. WILTSE, Jr., Grand Watchman.....Placerville
E. F. LOUD, Deputy Grand Master.....San Francisco

TRUSTEES—Chas. F. Gompertz, Berkeley; I. A. Dunsmoor, Los Angeles; M. S. Levy, Oakland.
CORPORATE DIRECTORS.—Wm. H. Barnes, H. G. Pratt, D. S. Hirshberg, Geo. R. Sanderson, E. Lewis, J. M. La Rue, W. W. Hauscom, A. P. Murgotten, J. H. Flint, T. A. Lewis, H. S. Ball

Standing Committees for Current Year.

Finance—Terrill, Peck and Morgan.
Laws and Supervision—Flint, Brown and L. A. Jordan.
Appeals—Vrooman, Severance and Schord.

District Deputies Appointed.

San Francisco—District No. 1, Caleb Brind; No. 2, Geo. T. Shaw; No. 3, H. H. Mayhew; No. 4, A. A. Egleston; No. 5, Wm. B. Smith.
Alameda—District No. 1, Wm. H. Fiske; No. 2, L. J. Rector; No. 3, Wm. Sanderson; No. 4, Arthur Fleming; No. 5, Israel Horton.
Amador—J. Steinmetz. Butte—Frank F. Carnduff. Contra Costa—J. M. Wilson. Calaveras—J. B. Reddick Colusa—Oscar Robinson. Del Norte—W. H. Woodbury. El Dorado—Seneca Davis. Fresno—A. J. Pedlar. Humboldt—F. W. Bell. Kern—A. Brown and G. H. Taylor. Lake—H. A. Oliver. Lassen—W. H. Crane. Los Angeles—I. A. Dunsmoor. Marin—T. P. Powers. Mendocino—Geo. H. Bowman. Merced—Dr. H. N. Rucker. Mono—J. J. Falkenhim. Monterey—W. J. Hill. Napa—J. W. Hostetler. Nevada—C. E. Mulloy. Placer—Chas. Campbell, A. H. Lee, Geo. D. Kellogg. Plumas—Dr. Munson. Sacramento—E. J. Gregory. San Bernardino, N. L. Valentine. San Diego—Bryant Howard. San Joaquin—J. M. La Rue. San Mateo—D. F. Hawks. Santa Barbara—Thomas R. Dawe. Santa Clara—L. Finigan. San Benito—F. W. Blake. Santa Cruz—S. T. Dodson. Shasta—A. DO NOT DELAY.—Send us your subscriptions promptly Don't let any break occur in your subscriptions to the WATCHMAN. Every live Workman needs every number of the paper, and we need his assistance to print as valuable a journal as we strive to for the special benefit of its patrons and the general good of the Fraternity. Send the cash direct, or, if more convenient, hand it in with your dues to the Financier and we will allow him for trouble and expense of remitting.

SUBSCRIBERS, if they prefer, can have the FRATERNAL RECORD instead of the WATCHMAN, by simply notifying us by postal card or otherwise.

Water Lily—Nymphæa Devoniensis.

The *Npmphæa Devoniensis*, shown in the engraving, is pronounced by Mr. Sturtevant, of Bordentown, N. J., as the choicest water lily in cultivation. Under liberal treatment it produces flowers from 10 to 12 inches in diameter, and leaves two ft. across—the plant having a spread of 20. If confined in pans, tubs, or boxes, the flowers are smaller, but otherwise just as fine. The color is a brilliant red, glowing by lamplight with indescribable color. One of the flowers would make a sensation wherever it has not been seen. The cut flowers sell at $1 each. As they open at night, they are serviceable for evening parties. They can be sent by mail several hundred miles with success.

Although water lilies may be cultivated in tubs, they may be grown to much greater perfection if allowed plenty of room, especially the larger-growing tropical species. Those who wish to cultivate a number of kinds and have complete success, should build a tank about 20 by 30 ft. and 2 ft. deep. If sunk entirely in the ground, it would be more easily protected from frost in cold climates. But it may be partially sunken, and the soil which is taken out used as an embankment around the outside, sloping it up to the top. I prefer that it should be sunken to the level of the surrounding surface. It may be built of either brick or stone. The bottom may be laid with rough stone, cobblestone or old brickbats, and grouted with cement. The walls should be nine inches thick, and laid in cement. If it is desired to grow *Nymphæa dentata* or *N. Devoniensis* to full size of leaf and flower, then it will be necessary to sink a pit in the center, one ft. deep and four ft. square, to hold soil for them. Provide means for emptying the tank of water when desired; also, a waste pipe near the top for overflow. After the walls have been built and the bottom laid and grouted, the whole must receive an additional coat of cement. About four ft. from each end of the tank build a partition wall about 10 inches high. Bricks laid on edge will do, if laid in cement. These spaces can be cut in two by another partition. The compartments thus formed are for the purpose of confining roots of the different kinds of *Lotus* within proper limits, and for planting out those kinds of *Nymphæa* which do better in such a position. The remaining portion of the tank can be taken up with pots and large shallow boxes, which will be movable at will. After the cement has properly hardened, fill the compartments and boxes with soil, and cover with an inch or two of clean sand. Fill the tank with water, and let it get well warmed before planting anything tender. As warm weather approaches, run a stream of fresh water in, for an hour or two each day, to prevent stagnation. When the surface of the water is covered with leaves, there is less tendency in this direction; and all that seems to be necessary to replace what is lost by evaporation.

The lily tank must be placed in a warm and sunny position, for these plants will not do their best unless the water is thoroughly warmed. My own is on the south side of a large vinery. At the back is a border, in which are planted tall cannas, bamboos, grasses, caladiums, etc., which form a fine background for the lilies, and give the whole a tropical appearance.

A GORGEOUS WATER LILY.

Proverbial Philosophy.

Worry is the mildew of life.

There is no dignity in idleness.

Impudence is not independence.

Do not be impatient for notoriety.

There is no calamity like ignorance.

This world belongs to the energetic.

Do not despise another because of poverty.

You can be decided without being offensive.

A beautiful thought is a mental sun-beam.

Do not hold the opinion of others in contempt.

It is not so hard to earn money as to spend it well.

Do not occupy time or room that belongs to another.

The wish of our parents should be lovingly regarded.

Idleness is the refuge of weak minds, and the holiday of fools.

Do not sow wild oats unless you wish to reap that kind of harvest.

In these days we fight for ideas, and newspapers are our fortresses.

It is a good rule to find out whether it is bread or stone before you bite it.

Getting married is like buying kid gloves, time and wear prove the bargain.

Train yourself to observation, and make all men and circumstances your teacher.

To copy the weakness of a great man will not prove that you possess his excellence.

Mrs. Carlyle as a Housekeeper.

Mr. Carlyle's bleak moorland homestead, "16 miles from anywhere," offered his bride no facilities for queening it in society. The young wife queened it in another way—conquered her woman's kingdom there down to its last inch of territory. Like the daughter of many an excellent manager, she had not been trained by her mother to any practical acquaintance with the domestic arts. The whole field of housewifery was a term incognita to her, and on good housewifery her husband's comfort and health and power to work depended. That was motive enough for her; that dignified the meanest details, and made her find a charm in all she did. Just as she had set herself when a child to learn Latin, so she set herself now to learn and to practice all that belonged to the many-sided ministery of a wife, its material as well as its spiritual part. Cervantes or Tasso might be a pleasant diversion to the tired thinker who had all the day long been earning his bread in the sweat of his brain and of his heart; but for a dyspeptic workman the bread itself must be of perfect quality, and bakers and servants did not make it so. Good brain work—so curiously is thinking man compounded—depends so much on good digestion, and this again on wholesome fare, of which one prime requisite is honest, well-made bread, such as it is the part of a true housewife to provide. The young lady who could master "Don Quixote" in the original was likely, in default of other sources of supply, to be able to make good bread herself if she gave her mind to it, and Mrs. Carlyle did give her mind to it. There is a world of meaning in the story told us of the making of her first brown loaf, of her doubts as to the result, and how she sat down by the oven door, "like Cellini with his Perseus," after she had put it in to bake. The essence of true womanhood—of true ladyhood was there, homely as the incident to unpurged eyes may seem. She had her reward, too. The loaf came out all that a loaf ought to be—crusty, and light, and sweet; "and from that hour," says the chronicler, "we never wanted excellent bread." One corner of her domain, and that no unimportant one either, was conquered, and she had earned the right to bear in her household the good old Saxon title, far gone now from its original meaning, "Lady;" the laaf-dig, loaf-giver.

CURE FOR SNAKE BITES.—A discovery of great value to all parts of the world where venomous reptiles are common, and especially in the tropics, where they abound, has been made by Dr. J. B. Lacerda, sub-Director of the Laboratory of Experimental Physiology in the National Museum of Rio Janeiro, which will lead to their more general application. This ingenious scientist has proved that a solution of permanganate of potassium injected into the blood is an infallible cure for snake bites. The remedy may be used as a simple and available antidote not only for the bites of snakes, but for those of scorpions and tarantulas. The experiments which led to the discovery were made upon dogs. An injection of a solution of one part of permanganate of potash in 100 parts of water into the veins of the animals entirely removed the effects of strong doses of poison previously injected.

"Is patriotism dying out?" asks the Chicago *Inter-Ocean*. No, sir; not much it isn't. In places where there are no saloons it is sold at the drugstores.

Advice to Those Using Glasses.

Men engaged in literary pursuits should read most by day and write most by night. It is worthy of note that reading causes more strain to the eye than writing, and that copying work in writing makes a greater demand upon the organ of vision than offhand composition. Twilight and a mixture of twilight and artificial illumination should be avoided for any kind of work. The pale cobalt-blue tint is the best that can be employed when protection for the eye from intense glare is sought, as in the case of traveling upon snowfields in bright sunshine. The green glass that is often adopted for the purpose, is not by any means so worthy of confidence. Reading in railway traveling is objectionable in the highest degree, for a very obvious reason. The oscillation of the carriage continually alters the distance of the page from the eye, and so calls for unceasing strain in the effort to keep the organ in due accommodation for the ever-varying distance of the dancing image. The exact fitting of the framework of spectacles to the face and eyes is of more importance than is generally conceived. If the centers of the lenses of the spectacles do not accurately coincide with the centers of the pupils of the eyes, the consequence is, that the images in the separate eyes are a little displaced from the positions which they ought to hold, and that a somewhat painful and injurious effort has to be made by the eye to bring those images back into due correspondence for accurate vision. An incipient squint is apt to be in this way produced. Mr. Carter recommends that people should look to the centering of their spectacles for themselves. This may be easily done by standing before a looking-glass with the spectacles in their place. If the fit is a good one, the center of the pupil should then appear in the center of the rim. Fully-formed spectacles are always to be preferred to folding frames, because they permit of more satisfactory adjustment in this particular, and because they are more easily kept in the right position with regard to the eyes. The only advantage which the pebble enjoys over glass for the construction of spectacles, is the immunity which it possesses against scratching and fracture on account of its greater hardness.—*Edinburgh Review.*

A BARBAROUS ENTERTAINMENT.—The municipal authorities of Brussels ought to be ashamed of themselves; a great fair is held in Brussels every year, at which, amongst other things, a silken dress is given by the city "to the woman who imbibes the largest quantity of hot coffee in the shortest time, and at the highest temperature." No one objects to the authorities of Brussels providing amusement for their citizens. But surely some sort of entertainment could have been thought of which would not be positively injurious to those who take part in making the fun. To drink a large quantity of coffee at one time is sure to harm one's health more or less. How much more hurtful must it be to drink it at "the highest degree of temperature" possible. Surely, our Old World friends have not yet lost the barbarity of feeling which causes one man to delight in seeing another hurt—which is never happier than when gloating over another's pain.

THE books, machinery, statuary and other movable property of the University, valued at $300,000, are being inventoried.

Time.

Siderial time is measured by some fixed star, and thus measured, gives 366 days to the year. The nearest fixed star is billions of miles away, while the sun is within the earth's orbit.

Solar time is measured by the daily and yearly motion of the earth, which gains a day on siderial time by turning once on its axis while going round the sun, without causing the distinction between light and darkness. If the earth's orbit were a perfect circle, then sun time and true clock time would always agree.

The elliptical form of the earth's orbit is one cause of the sun being sometimes fast and sometimes slow. The sun being in one *foci* is another cause, while the rapid motion of the earth in or near its perihelion, and its slower motion in or nearer its aphelion, is the third cause.

From September to Christmas the sun is fast, sometimes as much as 16 minutes, because it is passing along one side of an ellipse, and will present the same meridian to the sun sooner each day—that is, it makes a revolution in less than 24 hours. From Christmas until the middle of April the sun is slow because, in its perihelion, or near it, it is passing the sharp curve of its orbit, and also moving farther in said orbit, in a given time. It may be slow 14 minutes.

From the middle of April until the middle of June it is fast, sometimes four minutes, and from the middle of June until September it is slow again, the maximum being about six minutes, both for the reasons above stated.

Clock time is that which divides the year into 365 equal parts, the same that the sun would do, if the earth's orbit were a perfect circle. A clock may keep exact time from Jan. 1st, 1881, until Jan. 1st, 1882, and yet be with the sun only four times in the entire year. Noon will not be when the sun is on the meridian, and hence, this time does not suit the farmer.

Railroad time is equated time; if the road runs north and south, there is no need of equating the time; if it runs east and west the time must be equated about every 1,000 miles, or 1,040 miles makes one hour of difference in the time, consequently if railroad men wish to carry the same time, the Eastern man would have to set his watch 30 minutes slow, and the Western man would have to set his watch 30 minutes fast, so when they would meet their timepieces would agree. But this equated time does not suit the farmer, unless he lives on or near the meridian by which the time is equated.

What does suit the farmer? Time regulated by a noon mark. This divides the day, and every day into two equal parts, measured from sun-up to sun-down. Set two posts up on a clear night, to range with the north star, or get a compass, and make a noon mark. The north star has an azimuth, but the variation does not amount to much, and a noon mark made by posts will be as accurate as one made by a compass, unless one knows the exact variation of the needle for his meridian.

To be strictly accurate, get a work on surveying, or navigation, and from the tables get the true variation of the needle, and the true azimuth of the north star, and make a noon mark which can been seen in our California skies at least 300 days during each year. Regulate the clocks, fast or slow, to agree with the noon-mark. This will give the granger the kind of time he really needs. It brings daylight, sunrise, noon, sunset, and twilight, all, to suit his business. People who travel or who live in cities may need other time, but the farmer needs the division of time that the natural motion of sun and earth make.—*S. B. McCormick.*

IS A RABBIT BITE POISONOUS?—The Castle Rock (Col.) *Journal* is responsible for the following: "A man by the name of Otis, living on Horse creek, was lately bitten by a rabbit, from the effects of which he almost lost his life. He was trying to catch the rabbit for his little boy when the animal bit him on the thumb; but he took little notice of it at the time. About an hour afterward his thumb began to pain him severely and swelled rapidly, so that he sent for a physician, who thought he had been bitten by a rattlesnake. The doctor at first could not believe it was the bite of a rabbit that caused the trouble; so, to fully satisfy himself, he had several rabbits caught, with which he experimented. He found that the upper jaw contained a hollow tooth, from which he extracted a very poisonous fluid. He ascertained that two drops of this fluid administered to a lamb would kill it in less than an hour."

THE Immigration Bureau, recently organized by the San Francisco Board of Trade, has opened an office at rooms 20 and 21 in the building corner of California and Drumm streets, directly over the office of the Harbor Commissioners.

PACIFIC STATES WATCHMAN.

Issued on the 1st and 15th of each month.

At No. 252 Market Street, San Francisco, Cal.
☞ *Take Elevator No. 12 Front Street.* ☜

Subscription (in Advance), $2 a Year.

Favorable to Advertisers.

By consolidating the large subscription lists of the *Pacific Workman* with the Pacific States Watchman our advertisers gain an unusually great advantage. We doubt if any one weekly newspaper has ever been circulated to as many different readers on this coast, as have been served heretofore by the *Workman* and Watchman together. It is certain that no other periodical is now patronized by a better class of industrial, professional and business men. In fact, our subscription list embraces many of the foremost business and representative men throughout the towns cities of the coast.

We have pride in making our paper "clean and handsome," and first class in all respects—to the benefit of both our readers and advertisers.

OFFICIAL RECOMMENDATION.

[*Resolutions adopted by Grand Lodge of Cal., Feb. 3, 1881*]

Whereas, the Pacific States Watchman, the pioneer A. O. U. W. advocate on this coast, without official aid, has long rendered able and valuable services for the good of our glorious organization, we earnestly recommend that our Lodges and the brethren individually patronize the Watchman as liberally as circumstances will justify.

ADVERTISING RATES.

One Square (½ inch), per issue	$ .75
One Square per month	1.25
Two Squares, per issue	1.50
Two Squares per month	2.50
Obituary notices and resolutions (with 25 copies post-paid for friends of deceased) per sq. (½ inch)	50

☞ For reading notices, extraordinary display, special advertising and choice places permanently, extra rates will be charged. Reasonable reduction will be made for large and long-continued advertisements. No extra rates for the space occupied by engravings.

Entered at San Francisco P. O. as second-class matter.

San Francisco, - December 15, 1881

District Deputies.

The office of District Deputy is one of great importance in our Order, and as such should be filled by men of experience, executive ability, and can afford to give a large amount of time in visiting and instructing the Lodges. During this term we have been singularly fortunate in the officers selected to this position throughout the State. Of the several Deputies who have by faithful service, untiring zeal and unselfish devotion to our Order, who have come under our particular notice, we shall take occasion to notice them in the columns of the Watchman.

Bro. Caleb Brind, D. D. G. M. W. of District No. 1, has been a very efficient and zealous officer, and will retire with the hearty good wishes of every Lodge in his district.

Bro. Geo. T. Shaw, D. D. G. M. W. of District No. 2, although holding prominent positions in other of the older societies, has found time to attend to his duties, and made for himself a good record, and his genial greeting is always received with pleasure by every Lodge in his district.

Bro. H. H. Mayhew, D. D. G. M. W of District No. 3, although accepting his position with reluctance, has proved himself an efficient officer, and the brethren of his district have become warmly attached to him.

A. A. Egleston, D. D. G. M. W. of District No. 4, has encouraged by his repeated presence the Lodges of his district, has proven himself efficient in the work, and well merits the honor which has been conferred upon him.

Wm. B. Smith, D. D. G. M. W. of No. 5, has proven an earnest worker, correct in the performance of his duties, and will retire with the respect of the Lodges of his district.

We hope our friends in the country will send in reports of the efficiency of the different deputies, and thus make the record complete.

Myrtle, No. 42, will give a literary and musical entertainment on Dec. 31st. Recognizing the future by the past we may expect a choice programme.

Silver Star Lodge, No. 2, D. of H., Temescal, has changed its night of meeting from Friday to Thursday.

Death rate statistics have developed the following facts: A man married at 25 lives to 65, while a man not married at 25 lives only to 60.

That Hypocritical Abomination.

The *Royal Arcanum Journal* takes us to task because of our "broadside," as it is pleased to term our article against graded assessments, or rather against assessments graded according to the tables of expectancy of life. We trust we are not dogmatic. Once we thought as does our contemporary. It looked to us reasonable. It was the theory of life insurance companies, and accepted as correct by the general public; but when, on investigation, we found that young men were costing the A. O. U. W. just about the same amount of money as the old ones, and that year after year there appeared to be little change in this regard, the question came home: If young men cost the organization as much as old ones, ought they not in equity to pay as much? Another question came home: How could it be possible that the percent of deaths was as great in one class as in the other? Before us were facts on the one side and theory on the opposite. To us facts were always convincing, and we have no stomach to fight against them. Our theory must needs give way, and it did. Straightway a theory was sought to account for the facts. We believe we have the correct one which, according to the *Journal*, is "ingenious." It says:

"We will not undertake any reply to this ingenious theory for several reasons, chief among which is that we do not believe the future records of fraternal societies like the R. A. will make any such showing."

But having already made such showing from the past, may we not reasonably conclude that the future will not materially change it, and the more so when we consider that those societies from which our facts are taken have already been in existence beyond the average expectancy of membership in any of them.

The paper goes on to say:

"If the average duration of a membership is but seven years in the A. O. U. W., we do not wonder that that Order is not in favor of graded assessments."

Aye, here's the gist of the whole business. We venture the assertion that the average duration of membership in the Royal Arcanum is not far different from seven years.

We ask that the *Journal* gather statistics from the R. A., and see if we are not correct.

ut as an indication of what the result may be,

e desire to call attention to the fact that statistics of life insurance companies, both in this country and Europe, give the average expectancy of the life of a policy at a little less than seven years; also to these other facts which we can easily verify: The Odd Fellows, Workmen and Knights of Honor, severally lose about four members from other causes to one by death.

If every member who joins a beneficiary Order should remain in it till he died the aggregated payments of each at death would average the amount guaranteed by the society, so if the amount guaranteed were $2,000, the aggregate payments of each would be $2,000. That those who have died have not paid any such amount we know. Who then did pay it? Why, those who have not died. But each has not paid what would make up the yearly pro rata that would make $2,000 at the end of his expectancy of life. Why? Because for every loss by death there have been about four from other causes, and the money they have paid, inures to the benefit of those that remain, just the same as those who insure their houses and goods and suffer no loss must help pay for those who do suffer loss.

We do not know what the average expectancy of life of the membership of the R. A. may be, but we do know that if it were 166 years it would require an average payment of $12 each per year to pay in $2,000 at the end of that time, and if the expectancy is less than 166 years, then the assessments must be greater, or else money must come from somebody for whom the organization will not have to pay anything at death. A yearly payment of $12 shows an expectancy, as before indicated, of 166 years, but if we reduce the expectancy to 33 years—what it probably is—$60 is required in place of $12. Will our good brother show why it is that $60 is not now required as the average payment of the members of the R. A. at the present time? Is there any way to account for it, except by the fact that only one-fifth of the losses in the Order occur by reason of death? If this be the true reason, then it follows that one-fifth of the expectancy of life is the expectancy of membership, and one-fifth of 33 years is six and three-fifths years—just about the same as the expectancy of life of an insurance policy.

Now in all candor we ask the *Journal* to dive down into the statistics of his Order and see if the R. A. does not stand side by side in respect to duration of membership with the Workmen and Knights of Honor, and if so we expect to see an expression of wonder that he was ever in favor of graded assessments.

The claim of equity for either the level assessment, or graded assessment plan, is all bosh. Both are unjust and differ only in degree of injustice. Equity requires that each member should pay the same amount for the same prospective benefit, but A who joined one of these associations last week and died the next day, gets as much benefit as will those old veterans who have been paying their assessments for the last decade. Where's the equity in that? If the loss is four by other causes, to one by death, each member should pay one-fifth part of $2,000 or $400, to be entitled to $2,000, and in like proportion for any other amount that might be pledged by a society. A scheme that would make all assessments alike, and pay at death, say $2,000, deducting whatever less than $400 the member paid in, or adding whatever he paid over that amount, would be almost exactly just. If ever any change be made in the simple system of the A. O. U. W. we hope this idea will be adopted, and then it will have a system at once equitable and simple, and yet we doubt if even this would be desirable for reasons we have not now time to point out, but which seem to us of much importance.

Assessment Notice.

The following are the deaths occurring in the Order in this State, for which assessment No. 14 is levied. Two deaths will be paid from surplus of assessment No. 13, and seven from No. 14 now in process of collection:

Bro. Martin Winterfield, of Unity Lodge, No. 27, S. F., died Sept. 17, 1881, of chronic inflammation of the bowels, aged 37 years. Joined the Order Aug. 20, 1878.

Bro. A. H. Lutz, of Oakland Lodge, No. 2, died Oct. 10, 1881, of consumption, aged 38 years. Joined the Order July 8, 1876.

Bro. John N. Watkins, of Camptonville Lodge, No. 122, died Oct. 15, 1881, of paralysis, aged 50 years. Joined the Order Aug. 13, 1879.

Bro. Robert D. Enright, of Yosemite Lodge, No. 171, Fresno, died Oct. 22, 1881, of typhoid pneumonia, aged 24 years. Joined the Order March 10, 1881.

Bro. Isaiah Legro, of California Lodge, No. 1, Oakland, died Oct. 23, 1881, of pneumonia, aged 44 years. Joined the Order May 14, 1878.

Bro. S. Maroodus, of Sts. John Lodge, No. 73, S. F., died Oct. 28, 1881, of consumption, aged 34 years. Joined the Order Jan. 25, 1879.

Bro. Walter S. Smith, of Valley Lodge, No. 30, S. F., died Oct. 30, 1881, of spasms, the result of injuries to his head, aged 38 years. Joined the Order Feb. 5, 1879.

Bro. Geo. W. Green, of Redwood Lodge, No. 25, died Nov. 6, 1881, accidental drowning, aged 43 years. Joined the Order April 5, 1878.

Bro. Chas. H. Jones, of Georgetown, No. 121, died Nov. 11, 1881, of apoplexy, aged 48 years. Joined the Order Nov. 1, 1881.

A Close Call.—Bro. Oliver L. Southwick, P. M. W. of Reliance, 93, in the discharge of his duties as special Deputy Sheriff, in running down a highbinder in Alvarado in the nighttime, was shot at five times, and was only saved from immediate death by a large metal sleeve button which was hit by a ball from the desperado's pistol turning its course so that the ball entered the fleshy portion of the arm, coming out at the elbow. Our determined brother returned three shots and brought his robber-Chinaman into camp. Bro. Southwick wears his battered sleeve-button with quite as much pride and satisfaction as he does his P. M. W. badge. He, however, modestly suggests that it is good protection to belong to our Order, especially if you are a peace officer and undertake to arrest highbinders. We congratulate our worthy brother on his narrow escape.

Sts. John, 73, celebrates its anniversary on the 22d inst., by a literary and musical entertainment and banquet in Laurel Hall, Shiels' Building. Judging from their past celebrations it will be a fine affair.

Grand Recorder's Statement for November

We condense from Grand Recorder Pratt's Financial Statement for November the following leading figures:

WARRANTS ISSUED.

No. 319, Salary, H. G. Pratt, G. Rdr		$291.66
320, Expense, David Farquharson		50.00
321, Supplies, A. L. Bancroft & Co		99.15
321, Expense, A. L. Bancroft & Co		112.55
322, Supplies, Supreme Lodge		39.50
323, Supplies, Wm. B. Hardy		9.00
324, Supplies, R. Schaezlein		136.20
325, Postage, H. G. Pratt, G. R.		21.90
325, Expense, H. G. Pratt, G. R.		32.05
325, Supplies, H. G. Pratt, G. Rdr		6.65
326, Supplies, Norcross & Co		9.00
Total amount warrants issued, G. F		$ 807.66

DISBURSEMENTS.

Sick Benefits.—We believe there are only about half a dozen Lodges in this State paying sick benefits. The great majority of the brethren seem to think that it is sufficient tax on the subordinates, to pay their assessments for the death benefits. The *Overseer* (Missouri) thinks there are many Lodges that would flourish were it not for the drag upon them by the existence of chronic sickness among the members, which make drafts upon the treasury which cannot be endured. It would be worth while to discuss this subject most thoroughly, so that when Lodges are to act upon their by-laws such action can be taken intelligently. It further says, we doubt very much whether it is policy for any Lodge of an Order which provides for a death benefit, to attempt to pay a stipulated amount weekly to its sick members. The sum which comes to the beneficiaries of a deceased brother is so large, that to secure it he will willingly become a member of our Order, and cheerfully pay his assessments. But if sick benefits are to be paid, the dues must be larger than they otherwise would be, and so the burden becomes too onerous.

In the recent convention held in this city by the Order of Chosen Friends, frequent allusion was made to the commendable manner in which the system of separate jurisdiction had worked. After calm deliberation for two days it was decided to separate from the Supreme Council and form themselves into an order to be known as the Independent Order of Chosen Friends. A full set of officers were elected, who appear elsewhere. A very merited compliment was paid to our system of medical examination by adopting it; which as we noticed in our last issue was the result of long and arduous labor by a committee of our examining physicians.

We repeat what has been often reiterated in the columns of the Watchman, in the selection of officers prevail on the best men in your Lodge to accept the principal chairs. The genius of our grand Order contemplates individual sacrifice for the general good of others. The officer who will sacrifice his time and talents for the good of this Order will reap his reward.

Grand Recorder's Department.

Headquarters of Grand Lodge, A. O. U. W., Rooms 40 and 41, St. Ann's Building, corner of Eddy and Powell, San Francisco. H. G. Pratt, G. R.

Wm. C. Flint, Esq., 216 Sansome street, S. F., is Chairman of Committee on Laws and Supervision. All By-Laws, or amendments to same, should be sent directly to him.

Re-elect your old Recorders and Financiers and Receivers, if they have proven good officers. The clerical and financial officers of a Lodge should never be changed except for good cause.

In the statistical blanks sent out to the Lodges, a typographical error may lead to misapprehension on the part of the Recorders. The phrase as printed "classified by ages *and* date of admission," should read *at* date, etc. Will Recorders correct blanks accordingly?

Two hundred beneficiary certificates have been issued from this office since the first of the month, and the month is only half gone. Count us at least 300 for December. Instead of abatement of interest, there seems to be an incipient boom in the jurisdiction.

J. G. W.—It has been the general practice of the Order to require the Recorder of the Lodge to hold the application fee till the applicant should be elected or rejected. If elected, he at once hands the money to the Financier; if rejected, he gives it to one of the members proposing the applicant that it may be returned whence it came. But it would be more in accordance with correct business that all moneys received by any officer for the Lodge should go into the hands of the Financier and from him to the Receiver that a record of all financial transactions could be found on the books. I know of no positive law governing this matter.

We have more trouble and complication of accounts arising from transfers of membership by card than from all other causes combined, and all because the law is not understood, or if understood, is not obeyed. We have but two kinds of cards. One, a final card, is granted a member wishing to sever his connection with the Order altogether, and like a man pays all claims against him and goes out honorably. He can re-unite with the Order on the same conditions as a new member, except that the fees are different, as will seen by reference to the beneficiary laws. Of course, the degrees do not have to be re-conferred on him. He can join any Lodge that will accept him. The granting of a final card should always be reported to this office.

A clearance card is an entirely different affair. It is simply a privilege to join some other Lodge, and bears on its face the evidence that the member's dues are paid to the date, when the card will expire. The member holding a clearance card is still a member of the Lodge granting the card till elected to membership in another Lodge, from which moment he becomes a member of the Lodge electing him, if in the same beneficiary jurisdiction, but if in another jurisdiction, from the moment he cancels and surrenders his beneficiary certificate after election. The reason for the difference is apparent, for in the latter case there is a change of pecuniary responsibility from one jurisdiction to another, and that of one jurisdiction must be cancelled before it can be assumed in the other. A member cannot be legally balloted for on application by card till the Lodge is in possession of official information that the applicant's beneficiary assessments have all been paid to the Lodge granting the card. Immediately upon the election of the member, the Lodge granting the card should be notified of such fact, and if in this jurisdiction, the beneficiary fund to his credit should at once be forwarded to the Lodge receiving the member. He may have paid in for two or more assessments for the month. If so, forward it all, so as to close his account, and give the Lodge he joins the funds with which to pay the call and leave one dollar over for the next month. Too much promptness in these matters cannot be exercised. If a member comes from another jurisdiction, no beneficiary money comes after him. He is required to deposit a dollar for the next call after he is elected; but notice of his election should at once be transmitted to his former Lodge, together with his canceled certificate. A re-examination is required of such applicants, and also an application for beneficiary certificate, the same as for a new member.

Is There a Weak Point in the A. O. U. W.?

Editors Watchman:—The Grand Lodge has invited the members of the Order to furnish suggestions for additional legislation, for the purpose of increasing the usefulness and safety of the Order.

The A. O. U. W. is a strong Order, founded on correct principles, and comprising a substantial and solid membership, but there is a weak point which should be provided for.

When an application for membership is received by any Lodge, in a city where more than one Lodge exists, the other Lodges should be notified of such application, that members may have an opportunity to object to the admission of improper persons, who could not be admitted where well known.

In visiting other Lodges, I have noticed members who, by reason of intemperate habits, or other good and sufficient reason, could not have been admitted to a Lodge in their own vicinity. There are also cases of candidates who are known to their acquaintances as having some chronic disease, who could be "*fixed up*," temporarily, and by concealing their record and family history, could pass the medical examination where they were unknown.

I know of several cases in point. I will mention a couple: A young man, who inherited a consumptive tendency, requested a friend to take his application into a Lodge of a beneficiary Order, of which I am a member. His friend said to him "that, knowing his weakness and his family history, he could not conscientiously do it, and if he did, he could not truthfully pass the medical examination." Several months passed without meeting him, when his friend was startled by hearing of his death. After his death, he found that the young man had gained admittance to the A. O. U. W. shortly after the conversation alluded to, and the Order was out and injured $2,000, besides the *moral* injury.

Another instance: A year or more ago I was applied to by an acquaintance for information in regard to gaining admission to a beneficiary Order to which I belong. In the course of conversation I ascertained that the prospective applicant was of consumptive family. His father, two brothers and a sister had died of that disease, and he told me frankly that he thought he would go the same way. He was then about 28 years of age. I told him positively that he could not possibly pass, and that it would be useless for me to take in his application. I met him a short time since, and he informed me, gleefully, that he was a member of ——— Lodge, A. O. U. W.

It will be a little additional labor to the Recorder to issue these notices, but the safety of the Order demands a provision of this kind, and unless the A. O. U. W. takes the same care to guard her portals that other Orders do, it will prove to be an element of weakness that will in a very short time do us great injury.

"Financier."

Resolutions of Respect.

Hall of Fortuna Lodge, No. 13, A. O. U. W., Napa, Cal., Dec. 5, 1881.

Whereas, It has pleased the Supreme Master Workman of the Universe to remove from our midst our late Brother Edward Grogan; and

Whereas, It is but just that a fitting recognition of his many virtues should be had; therefore be it

Resolved, By Fortuna Lodge, No. 13, A. O. U. W., that while we bow with humble submission to the will of the Most High, we do not the less mourn for our brother who has been taken from us.

Resolved, That, in the death of Brother Edward Grogan, this Lodge laments the loss of a brother who was ever ready to proffer the hand of aid and the voice of sympathy to the needy and distressed of the fraternity; an active member of this Lodge whose utmost endeavors were exerted for its welfare and prosperity; a friend and companion who was dear to us all; a citizen whose noble life was a standard of emulation to his fellows.

Resolved, That the heartfelt sympathy of this Lodge be extended to the family of our deceased brother, in this their greatest affliction.

Resolved, That these resolutions be spread upon the records of the Lodge, and a copy thereof be transmitted to the family of our deceased brother.

J. W. Hostetler, W. West, C. R. Gritman, } Committee.

Napa, Nov. 23, 1881.

Hall of Yerba Buena Lodge, No. 14, A. O. U. W., San Francisco, Cal., Dec. 9, 1881.

To the Master Workman, Officers and Members of Yerba Buena Lodge, No. 14, A. O. U. W.—Sirs and Brothers: Your committee appointed to draft resolutions of respect to the memory of our deceased brother, J. E. Bigelow, respectfully submit the following:

Whereas, Almighty God, the Supreme Master and Ruler of the Universe, has been pleased in his infinite wisdom, to remove from our midst after a long and painful illness, by the hand of death, our beloved Brother, J. E. Bigelow, therefore be it

Resolved, That while we bow in submission to the will of our Supreme Master, the Ruler of the Universe, we none the less mourn the loss of our deceased Brother, J. E. Bigelow, a charter member.

Resolved, That the heartfelt sympathy of this Lodge be extended to his family and bereaved friends in their sore affliction, believing that an all-wise and gracious Providence will now give them strength to bear this great trial and guidance and protection in the future.

Resolved, That as a mark of respect and esteem for our deceased Brother, that the charter of this Lodge be draped in mourning for 30 days.

Resolved, That these resolutions be spread upon the records of this Lodge; that the Recorder be instructed to transmit a copy thereof to the family of our deceased brother, and the Pacific States Watchman for publication.

Fraternally submitted, in C. H. and P.

A. A. Egleston, C. H. M. Curry, John Henderson, Jr., } Committee.

A Birth Insurance Company.

The latest new-fangled idea in the insurance line that has come to our notice is an association formed in Laurelton, Pa., for the purpose of paying to the parents of new-born children a stipulated sum. It is called the "Mutual Assessment Birth Association." From the K. of H. *Reporter* we learn that this association extends its helping hands to all married folks, who are the only class that can become members. Certificates are written for amounts from $500 to $3,000, a certificate for the former costing $4.50 and the latter $24. Members do do not become beneficiaries until a year after obtaining certificates, and in that time they are not subjected to assessment. The assessment will not exceed $1.25 on a $1,000 certificate, $2.30 on a $2,000 certificate, and $3.40 on a $3,000 certificate. Neglect to pay an assessment within 30 days after notice forfeits the membership. When a member becomes a beneficiary he is entitled to the face of his certificate, or so much thereof as one assessment, less costs of collection, shall amount to. Claims against the association are those arising from births only, and are payable 60 days from receipt of proof, by a physician's certificate, or the certificate of two reliable persons. Births within a year of the date of the certificate will not be recognized; no distinction is made as to sex or health of child, and the association must be notified within 10 days of its birth by the beneficiary. Unlike most speculative insurance companies, this one has a system of annual dues, out of which the officers expect to make their living. A member holding a certificate of $1,000 must pay $4 a year to keep it in force, half of this amount being due in January and the other half in June. This plan permits of one being insured from his birth to his death. His parents take out a policy before his entrance upon this vale of tears, another immediately succeeding that interesting event, and until he leaves the parental roof secures him against accident. He insures himself before his marriage, takes a policy on his prospective offspring, insures the little property and live stock he may have accumulated, insures his stock, and finally insures his life for the benefit of those who remain after he is gone.

It will be seen from the above that the projectors of this association have been very careful in their ground work, and have reared an edifice that cannot be easily overthrown, and which is at the same time symmetrical in its entirety and beautiful in every part. It is a strictly moral organization, in the first place, in that it gives no encouragement to multiplying and replenishing the earth to people outside of the sacred bonds of wedlock. Then, again, no member can become a beneficiary until he or she has belonged to it a year. Therefore, no initiate can possess an undue advantage over another. All must join untrammelled by the shadow of coming events. It is a fair start with all, and no favors. Still another beautiful feature; it makes no distinction as to the sex of the children born. This one feature alone should commend it to popular acceptance, especially to the upholders of the theory of sexual equality. We believe the society has a long and prolific future before it. We believe that it will be an immense factor in the augmentation of our population. There's millions in it!

Fraternal, Benevolent and Beneficiary Societies.—It is generally conceded that the growth, interest and general prosperity in these societies in our State, is largely greater now than ever before. As showing the interest locally that is shown in these organizations, in the popular halls in Shiels' building, O'Farrell St., near Market, 41 of these societies meet in the seven different halls of this building weekly. In this connection we may say that this building is one of the great resorts for this purpose. It is centrally located, richly furnished and upholstered, and under the able management of Mr. E. Pettersen as agent, there is seldom or never any cause for complaint. Bro. Geo. Dickson has had charge of Shiels' building since it was built (something over a year ago) whose close attention and scrupulous care and accommodating ways has made him a great favorite.

Prof. Barnard's Business College, 120 Sutter St., is one of the best in this State for acquiring a commercial and business education. Bro. Barnard gives his personal attention to the business department, and does not entrust it to assistants. His terms are reasonable, and he enjoys the reputation of being a good teacher. Young men, and even middle aged men, of whom he has a number as scholars now, will add to their efficiency and profit in the battle of life by taking a course of study at Barnard's Business College.

Salt for Poison.—A solution of common salt given immediately is said to be a successful remedy for strychnia poisoning.

An Oakland Dramatic Success.

A new and meritorious play is rarer than a new and meritorious book, for skill in the playwright circle is scarcer than in other literary fields. The play of "The Vagabonds," written by D. K. and M. O. Higgins, and produced for the first time during the past week, at Dietz Opera House, is one which it may be predicted will create a sensation in dramatic circles. If Mr. Higgins had presented the play in one of the large theaters of the East with all the advantages of experienced management, abundant properties, suitable stage effects, well chosen costumes and a thoroughly drilled cast of professionals it would have created a furore, and a popular run in the best theater-going country in the world

It must be evident to the most criticising mind who saw the play, that it is far above the average of good ones, while many intelligent and experienced witnesses declare it is the best in its rank of anything they have ever seen. We do not remember that Oakland boards have ever seen a comedy drama so really and justly popular, especially with all classes of attendants. We should do injustice not to remark that our well-known local performers in this cast have shown genuine talent, surprising many of their most ardent admirers. The other California artists supporting Mr. Higgins are subject only to praise for acting in their various situations.

The character of Jester Judkins is one that will even bear widening, and no doubt the simple character of the vagabond will be amplified to fit the specialties of more than one star. The villain, Eben Hartstone, is a villain, and will make the fortune of a professional. Agnes and Hilda Hocum are both characters, with a great deal in them—one gay, one grave—setting each other off, as the vagabond and cashier do.

The play is remarkable for abounding in striking situations, and in the excitement and constant interest it maintains. Pathos and humor are wisely mingled, the transition "from lively to severe" being, though rapid, brought about in such a way as to show skill in fathoming the feelings of human nature. The plot is excellent throughout, and the "unities" are well preserved. The moral of the play is plain without being obtrusive, and while it cannot be called a temperance drama, it must call attention to the evil results of dissipation and excess.

The young gentlemen who have succeeded in arranging so exceedingly presentable a play, are to be congratulated that so few crudities were to be observed. Possibly more mature thought and consideration may lead them to prune in some places, graft in others; yet, as a whole, "The Vagabonds" will, without doubt, please multitudes in other cities by its humor and its pathos, its amusing situations and sensational incidents, as one of its young authors and the leading acting spirit in its rendition, D. K. Higgins has stamped himself a rising genius in the dramatic world. It is appropriate to say that Oaklanders may well take pride in his signally successful efforts to please them. No doubt numerous other Americans will in future participate in like feelings.

Old Style Marketing.—The Chico *Record* tells of a farmer who came down from Goose lake, Lake county, Oregon, with a wagonload of butter, consisting of 1,600 lbs. For this he found a ready market in Chico. He laid in a supply of provisions and clothing and dry goods for the winter, and will return by way of Millville to his home in Oregon. It took him some 12 days to come from Goose lake by the way of Redding, Shasta and Red Bluff to Chico, but he calculates that the increased price realized for his butter, and the low figures paid for supplies, will amply compensate him for the time. Goose lake is on the line between Oregon and California, lying partly in each State.

PALMER'S,

726, 728 and 730 Market Street, S. F.

New Department added, with a full line of Gents' Furnishing Goods. Our usual variety of Novelties in Millinery and Fancy Goods and Ladies' Furnishing Goods.

Kid Gloves a Specialty.

FURNITURE.

H. Schellhaas' auction and commission house, Eleventh street, Odd Fellows' building, Oakland, Cal.

SEA-WEED SEA-SERPENTS.—In a letter to the *Madras Mail*, on the use of gigantic sea-weed as a protective agent for shores, Capt. J. H. Taylor, the Master-Superintendent of Madras, gives the following interesting "sea-serpent" story: "A notable incident connected with this sea-weed is recalled to my recollection by Dr. Furnell's letter. About 15 years ago, while I was in my ship at anchor in Table bay, an enormous monster, as it appeared, was seen drifting or advancing itself round Green point into the harbor. It was more than 100 ft. in length, and moved with an undulating snake-like motion. Its head was crowned with what appeared to be long hair, and the keensighted among the affrighted observers declared they could see its eyes and distinguish its features. The military was called out, and a brisk fire poured into it at a distance of about 500 yards. It was hit several times, and portions of it knocked off. So serious were its evident injuries that on its rounding the point it became quite still, and boats went off to examine it and complete its destruction. It was found to be a specimen of the sea-weed above mentioned, and its stillness after the grievous injuries inflicted was due to its having left the ground swell and entered the quiet waters of the bay."

UNDERGROUND TELEGRAPH IN PHILADELPHIA. The work of laying the conduit for the underground telegraph system on Market street has now proceeded as far as Eleventh, east from the public buildings, and work is progressing at the rate of half a square a night. The conduits have 20 separate chambers. Each chamber has capacity for 50 wires, and connection is made by means of manholes, which are located at each square.

Cigars.

A Great Piece of Masonry.

Among the many splendid specimens of masonry which have from time to time been erected in various countries, and are pointed at as monuments to the honor of their designers, the largest and most splendid masonry arch in the world is probably the least known. Erected, along with many other engineering works in connection with the Washington aqueduct, of which it forms a part, during the decade immediately prior to 1863, very little public attention was directed to this wonderful work, either in America or England, consequent, doubtless, in great part, upon the discordant condition of the United States during the progress of the civil war; and in quarters where one would expect to find its proportions delineated, the barest mention occurs. The Union arch carries the Washington aqueduct over the Cabin John creek, the entire span being 220 ft., or 20 ft. in excess of the span of the famous Chester arch across the Dee in England, 68 ft. longer than the central arch of London bridge, 92 ft. longer than the noted bridge over the Seine at Neuilly, and 100 ft. longer than the arches of the Waterloo bridge over the Thames. The width of the structure in question is 20 ft., and the hight of the arch is 101 ft. The dimensions of this arch, therefore, eclipse those of any of the celebrated structures which are most commonly pointed to as wonderful achievements.

HOW TO DETECT ADULTERATED COFFEE.—*Food and Health* gives the following method of detecting adulterated coffee: Take a little of the coffee and press it between the fingers, or give it a squeeze in the paper in which it is bought; if genuine, it will not form a coherent mass, as coffee grains are hard and do not readily adhere to each other; but if the grains stick to each other and form a sort of "cake," we may be pretty sure of adulteration in the shape of chiccory, for the grains of chiccory are softer and more open, and adhere without difficulty when squeezed. Again, if we place a few grains in a saucer and moisten them with a little cold water, chiccory will very quickly become soft like breadcrumbs, while coffee will take a long time to soften. A third test: Take a wineglass or a tumbler of water, and gently drop a pinch of the ground coffee on the surface of the water without stirring or agitating; genuine coffee will float for some time, while chiccory or any other soft root will soon sink; and chiccory or caramel will cause a yellowish or browning color to diffuse rapidly through the water, while pure coffee will give no sensible tint under such circumstances for a considerable length of time.

ANGULAR DISTANCE OF COLORS.—The projection of a table of colors upon the sides of an equilateral triangle, renders it possible to determine the exact angular distance of the colors, a result which has not yet been obtained, and which suffices to connect together the facts at present known. The author gives a diagram representing the law of the mixture of colors, and which will be advantageously substituted for Newton's rule—*A. Rosenstiehl.*

DOGS in a state of nature never bark; they whine or growl. The explosive noise is only found among those which have been domesticated.

TIN IN PRESERVED FOOD.—With reference to this question, the following information will be of interest: Last year, an English analyst, Mr. C. J. Wishart, detected tin in the juice of different fruits which had been preserved in tin vessels. A quantitative estimation of the amount of tin present in the syrups of various fruits sold in tin cans gave the following results: A 2-lb. tin of pineapples contained an amount of tin equal to 0.21 grain of stannic oxide (SnO_2); a similar-sized tin of green gages, 0.36 grain, SnO_2; of apples, 0.34 grain SnO_2. In addition to this quantity of tin, the first sample contained 0.39, the second 7.22, and the third 15.28 grains of ferric oxide. The two latter samples had a distinctly metallic taste. From examination of the inner surface of the tin can, it was obvious that the syrup of the fruit had acted upon the metal.

A SAFETY ENVELOPE.—It is well known that an ordinary envelope may readily be opened by moistening the paper over the gum, after which operation, if done neatly, the contents may be noted, and the missive again sealed and sent on its errand. But a perfect "safety envelope" may be made by heating that part of the paper covered by the flap with a solution of chromic acid, ammonia, sulphuric acid, sulphate of copper and fine white paper. The flap itself is coated with a solution of isinglass in acetic acid, and, when this is moistened and pressed down on the under side of the envelope, a solid cement is formed, entirely insoluble in acids, alkalies, hot or cold water, steam, etc.

ASHAMED TO BE SICK.—"I have long ceased to doubt," says Dr. Schrodt, "that, apart from the effects of wounds, the chances of health or disease are in our own hands, and if the people knew only half the facts pointing that way, they would feel ashamed to be sick, or to have sick children."

Burns, 68—Anniversary.

The third anniversary of Burns, 68, was celebrated by a short literary entertainment and grand ball at Covenant hall, B'nai B'rth building, on Monday evening, Dec. 5th. The hall was in its gayest dress. evergreens were arranged in an artistic manner throughout the hall and to the sidewalk; cages of sweet singing canaries were hanging, while across the platform in golden letters were these words: "Third Anniversary Burns Lodge, No. 68, A. O. U. W." The literary programme was opened by an overture by Ballenberg's band; Bro. Robt. Wilson, M. W., made a short and appropriate address that was well received; song and encore, Mr. John J. Campbell; recitation, "The Sheriff's Prisoner," H. Seawright, whose effort was masterly, and at the close received a hearty recall, which was answered by a comic piece entitled "Courtship;" comic song, Bro. Gus Pohlman, who as usual proved a great favorite, as he was encored at the close of each verse and received a recall which was kindly answered; instrumental duett on the piano and violin, Profs. Yanke and Poppenburg—an artistic performance; address, A. Craig, P. M. W., one of the members of the first Grand Lodge, who in a few well chosen words, carried his audience to the highest pitch of enthusiasm; solo (Prof. Yanke accompanist), "When the Leaves Begin to Fall," Miss Linda Hoag, and for an encore sang "Keep the A. O. U. W. O'er the Door;" eccentric personalities, Mr. Rinaldo Livingston, who so pleased his audience that he was recalled. The master of ceremonies, Bro. Wm. C. Flint, chairman of Laws and Supervision, then invited all to join in the grand march and dance, which was accepted with right good will, as a large proportion of the audience participated. The programme of dances was a gem of art, good taste and beauty, printed on fine paper in book form of large size, on the front of which was a fine picture of our badge in variegated colors, the plate being made specially for this occasion. There was a cordiality and real fraternal greeting exhibited throughout the whole evening that made the time pass pleasantly and the party a very enjoyable one. The audience was not very large, but select; a large number of the ladies wore elegant dresses and the gentlemen were in dress suits. The several committees labored hard to make this, the third celebration of Burns, 68, one of our best subordinates, worthy of the occasion, in which they happily succeeded, and are herewith given: Committee of Arrangements—Wm. C. Flint, Wm. K. Doherty, L. G. Schord, Gus. Pohlman, C. C. Butt. Reception Committee—Rob't Wilson, John O. Doane, Andrew Craig, Thos. C. Maher, Lee O. Rodgers, Wm. Harney, C. H. Vollmer, Chas. Hubert, J. W. Curtis, Alex. G. Hawes, Chas. H. Wilson, Peter B. Qainlan. Floor Director—J. W. Fichthaler. Floor Committee—Walter Jackson, Wm. Cronan, Ed. N. Herrin, Emanuel Claresy, Theo. Fulton, M. J. MacGrath.

Golden Gate, 8.

Golden Gate "the mother of Lodges," as she is frequently termed, has recovered from a stagnancy that has prevailed for some little time, and has started out with renewed prosperity. The meeting on Thursday evening, 15th inst., was largely attended. Seven applications received and the J. W. degree conferred on two candidates. From the outlook at present we may expect lively times in this old pioneer.

Unity, 27.

This Lodge has closed a very successful term, as much so perhaps as anyone, since the organization. The increase has been 22. Addition to the general fund $500, and not one member has been suspended during the year. As they pay sick benefits of $10 per week, and extend frequent charities, in one case that has been frequently mentioned—viz., taking charge and protecting a deceased brother's boy—are things that will pass into history, and should fill every brother Workman, especially of Unity, with pride and satisfaction. The meeting of Dec. 13th was a large one, and general rejoicing, congratulations and speech making were indulged in until a late hour, to the general gratification of all present.

Valley, No. 30.

Six candidates received the J. W. degree on Dec. 6th. During the evening a telegram was received from Steilacoom, Washington Territory, that one of their members had just died. The sum of $25 was sent to Los Angeles to assist the wife of a brother who had met a severe misfortune. Under head good of the Order, Bro. Wm. Decker, M. W. of Harmony, spoke a few words in a complimentary manner, followed by S. T. Dodson, D. D. G. M. W., who gave a glowing account of his district and encouraged closer and more fraternal relations among Lodges and members. Bro. Dodson recited an instance where he thought that the care and attention bestowed on a brother from Union Lodge, in Sacramento, had saved his life; the expenses of which had all been disbursed by his Lodge. His speech was able, eloquent, and well received.

Washington, No. 60.

On the 15th inst., Washington, No. 60, gave the J. W. degree to one candidate, and the M. W. degree to two. The members of Washington have a commendable pride in their membership representing a large number of our intelligent and solid men. Under head "Good of the Order," several members and visitors made interesting speeches that were well received.

Yerba Buena, 14.

As indicated in our last the old Lodge was making rapid strides in membership. On Friday evening, Dec. 9th, eight applications were received and the M. W. degree given to four. This will give them 200 members and four representatives. The efficient Master Workman, Bro. F. B. May, officers and members who have done so well and accomplished so much in one term will be held by our growing Order and marked in the archives of the Grand Lodge, as one of the brightest pages in the history of the old pioneer Yerba Buena, No. 14.

Lodge Locals.

Eden, 204.

EDITORS WATCHMAN:—On Saturday, Dec. 3d, D. D. G. M. W. Bro. Wm. Sanderson and Grand Receiver Bro. Chas. Haile honored our young Lodge by extending to us a fraternal visit, which was much appreciated by all brothers present. On the same evening two new candidates were introduced and initiated J. W. degree members, and on five Junior Workmen, the M. W. degree was conferred. Our instructing officers were complimented by the visiting officers above named for the able performance of their respective parts in conferring the degrees. While we are but just fairly started on our obligatory mission, on comes grim old Father Time and calls from our midst our Medical Examiner, Dr. E. S. Coleman. Although not a brother of our Order, he was nevertheless a true friend to mankind. Eden Lodge expressed its respect for the departed and its sympathy for the bereaved wife and children in the following resolutions:

In Memoriam.

WHEREAS, It has pleased the Supreme Master Workman of the Universe, in His infinite wisdom, to call from our midst our beloved friend and Medical Examiner, Chas C. Coleman, and while we bow in humble submission to Him who is the giver of every good and perfect gift, yet we, Eden Lodge, No. 204, A. O. U. W., desire to express our keen sense of the loss sustained by the death of such a worthy and useful member of society. Therefore be it

Resolved, That we remember with pleasure our amiable association with the deceased; that we will ever cherish the highest regard for his example, and for his honor and integrity, which caused him to be honored by all who knew him.

Resolved, That we mourn the loss of the departed, so taken by the hand of death, while in the fullness of his life's experience and usefulness, and that we hereby tender to his esteemed wife and family, in their great loss of husband and father, our sincere and heartfelt sympathy.

Resolved, That these resolutions be spread in full upon the minutes of the Lodge, and that the Recorder be instructed to transmit a copy thereof to the family of the deceased. Respectfully submitted,

EDW. O. WEBB,
EDW. HATHAWAY,
A. PRESTON CRANE.

Reported by H. DORMAN, Rdr.

Reliance, 93.

A grand meeting of Reliance, 93, was held at Odd Fellows' hall, Alvarado, on Tuesday evening, Dec. 6th. There was a goodly number in attendance of their own membership, besides several members from the Lodges adjacent thereto, and Wm. H. Barnes, G. M. W., H. G. Pratt, G. Rdr. and E. M. Reading, P. M. W. The Lodge was opened promptly at 7:30 and the usual routine of business transacted, when the work of the evening was commenced by giving the J. W. degree to two candidates; by request, Bros. Barnes and Reading acting as M. W. and F., after which the M. W. degree was given to one candidate. One application was received for the degrees. An adjournment was had to the town hall, where a good audience of ladies and gentlemen were in waiting. Bro. W. B. Ralph, M. W., as master of ceremonies, introduced a choir of ladies and gentlemen, consisting of Misses Tillie Barron, Mary Barron, Mrs. E. Farley, Mrs. F. R. Stokes, Mr. W. T. Emmery and Mr. A. P. Lowell; pianist, Mrs. A. P. Lowell—a very entertaining effort; solo, Miss Mary Barron, whose effort secured hearty applause; address, Bro. H. G. Pratt, G. Rdr., who was very happily introduced by Bro. Ralph as the father of the Ancient Order of United Workmen on this coast. Bro. Pratt received from his attentive audience marked approbation for his very appropriate remarks. During his interesting address he took occasion to say that we had the best membership in California of any organization; the grandest and best Grand Master of any jurisdiction in the United States, and the PACIFIC STATES WATCHMAN was the best fraternal journal in the world. Duett, Mrs. E. Farley and Bro. T. N. Thornton, whose artistic effort and harmonious blending of voices called for a hearty encore, which was kindly answered. The Grand Master was then introduced as the pilot who was guiding this great ship. He gave one of his racy and logical speeches, with a spice of humor thrown in, which held the closest attention, and received round after round of vociferous applause, and entertained his intelligent audience for 40 minutes. Solo, Mrs. F. R. Stokes, "When the Leaves Begin to Fall," Mrs. A. P. Lowell, pianist; a rare and pleasing effort that was loudly applauded. By request, E. M. Reading, P. M. W., made some practical remarks that were well received. In the course of his speech he said that our Grand Recorder was with us to-night, and he drew the first check 13 years ago that was ever paid to the widow of a Workman. Bro. Ralph then said that this part of the evening's entertainment would close with some selections by the Grand Master. The ball was now put in order for dancing, which was carried on with manifest zeal until 12 o'clock, when the whole company sat down to a banquet that was recherche in every respect. After the feast terpischorean exercises were resumed and continued until four o'clock A. M. This was a very enjoyable and successful entertainment, one of the best of the season, every person seeming to have made up his mind to have a good time, and was not disappointed. Old historic Alvarado with her noble band of Workmen demonstrated on this evening how well she could act her part.

Sacramento Lodges.

EDS. WATCHMAN:—I have the pleasure this time of reporting a rosy glow of health pervading both Lodges here. Brother Recorder Cooley, of Union, well deserves the appellation of Doctor. According to his promise to break the ice in the matter of entertainment, he did so to some purpose. Not only was Union better attended than usual by anticipating members, but also members of Sacramento, who, after listening to Bro. Cooley's recitation, were apparently seized with the spirit of reformation and at their next meeting it was voted to give a series of monthly entertainments. A committee of three, consisting of Bros. Blank, Hopkins and Dustman, was appointed with full power to act. At their next meeting Union zealously entered into the spirit of the hour and seeing Sacramento leading off in the right direction appointed a committee of three, consisting of E. J. Gregory, D. D. G. M. W., Judge Henry and P. M. Wolf, to confer with Sacramento's committee relating to a joint entertainment. The committees met and in a most commendably fraternal spirit agreed upon a programme, the entertainment to be given in Turner Hall, Dec. 30th, 1881. Governor Perkins' name is amongst the list of volunteers, and Grand Master Barnes will not be surprised to know that his name is there also. The list comprises orations, recitations, songs and instrumental exercises, closing with a grand ball, to furnish music for which a full orchestra has been engaged. That's the way they do things here when they get waked up, and in my next I expect to give a report of one of the grandest affairs of the season. Notwithstanding the general excitement Union does not forget to keep the ice broken at home, and last Saturday night we were most agreeably entertained by Judge Henry and Bro. Cady, with a poem each, which put the Lodge in such good humor that the hall was not deserted for half an hour after the gavel fell. Visitors are rare, Bro. A. D. Jordan, the irrepressible of Noe Valley, has been representing San Francisco for the past few weeks and I am pleased to say behaves himself very well—that is for him—being seen and heard in about equal proportions.

Last night Sacramento took up the question of annexing a weekly benefit system. The hall was well filled and the opposing clans were marshaled on either side by legal lights of no mean luster, one the honored representative of the Senate chamber, the other the no less honored representative of the press. The best of feeling prevailed, notwithstanding the showers of hot shot, as it were, that flew promiscuously around. A thorough investigation of the subject has been determined on without regard to party feeling. So may it ever be, wishes yours in C. H. and P. B. MUDLED.

Vallejo No. 75—Social.

EDITORS WATCHMAN:—A very large social gathering of the members of Vallejo Lodge and their families, was held at the Lodge room after the session of the Lodge Friday evening the 2d instant. The entertainment consisted of the following programme, viz: Opening chorus, "There were three Crows," by the quartette Bros. W. R. Lambert, John Keene, Frank Winchell and J. G. Smith; W. A. Brace, musical director; address of welcome, Bro. G. J. Campbell; piano solo, L'Argentine, Miss Lizzie F. Cox; vocal solo, "When the Leaves Begin to Turn," Miss Nettie Purrington; piano solo, Battle of Buena Vista, Miss Aggie Bennett; vocal solo, "Who Treads the Path of Duty," Bro. Frank E. Brown; piano solo, "German's Triumphant March," Miss Minnie Damuth; original poem, "Our Western Hills," Bro. C. B. Towle; piano solo, "Old Folks at Home," with variations, (original), Mrs. L. A. Aubrey; vocal solo, "Waiting," Miss Flora Winchell; instrumental duett, "Shepherd's Evening Song," Misses Jennie McWilliams and Nettie Purrington; closing ode by the audience. At the conclusion of the ode the hall was cleared and dancing commenced in which all who desired indulged until about 11 o'clock P. M., when the audience dispersed, well pleased with the evening's entertainment. The pieces, both vocal and instrumental, were finely rendered, eliciting unanimous applause. Bro. F. E. Brown repeated the last verse of his solo as an encore. Mrs. Aubrey gave "Lilly Dale," with variations, as an encore; and Miss Winchell gave as an encore, "Scotch Lassie Jean." The opening chorus, however, "took the cake," which was divided and eaten by the quartette in the anteroom, with water. It was a matter of some regret that there were not "five" instead of "three" crows, so that each of the participants could have had one. It could not but be observed that the audience were more than pleased with the rendition of the piece. Unfortunately, Bro. Brace had left the "keynote" at his room, and had it not been for the piano accompaniment, no one would ever have suspected what *tune* they were trying to *sing*. Great credit is due the committee, consisting of Bros. Brace, Towle and Ball for the really enjoyable entertainment, the first, it is to be hoped, of a series to be given this winter. The Lodge is in a flourishing condition. We have now 100 members in good standing, and have had but one death (and that by an accident) in our three years' existence, which we think is doing very well. We intend to give a grand ball on our third anniversary night, Jan. 6, 1882, of which you may probably hear more from "DOMINO."

Los Gatos, 76.

The Grand Master visited Los Gatos on Monday evening, Nov. 27th. There was a large attendance, every seat being filled. The work was exemplified, after which an adjournment was had to the public hall, where an audience of ladies and gentlemen had assembled to hear an address from Wm. H. Barnes, G. M. W. There was much enthusiasm manifested, and speaking and singing indulged in, that whiled away a very pleasant evening. The brethren of this Lodge are preparing to build a new hall.

New Mexico Workmen.

The Workmen of Silver City, New Mexico, according to the *New Southwest*, gave a ball on Thursday, Nov. 24th, which was very successful. Howlett's hall was thronged with happy couples, who seemed bent not merely upon enjoying themselves, but upon making the occasion an enjoyable one for all those about them. The hall was very tastefully ornamented. Upon either side were three large pictures surrounded by wreaths of evergreen, and upon the west wall was arched the word "welcome," in large block letters, covered with delicate sprigs of green. Above the stage, in front, hung the finest ornament of the hall, centered between the letters A. O. U. W. It consisted of a wreath enclosing a gracefully cut and brilliantly ornamented joint shield and anchor, and the effect under the bright light was such as to call forth frequent expressions of admiration. The letters and shield, with anchor, referred to, were cut by Judge C. Bennett, and John Wood is entitled to the credit of having so handsomely embellished the latter. The supper, prepared by Mrs. Lottie Thurman, was an elegant affair, and gave general satisfaction. In fact it is well known that she never fails upon such occasions to secure an abundance of the best the market affords, and to prepare it in the best of style. The following gentlemen composed the several committees: Arrangements—E. Stine, O. L. Scott, A. S. Addis. Invitation—J. G. Gordon, A. M. Connor, G. M. Huffaker. Reception—P. Burnham, J. M. Smith, E. P. LeDoux. Floor Managers—A. Abraham, E. Marriage, G. Grabe.

PURCHASING AGENT.—This is an occupation requiring tact, taste and judgment, and persons living at a distance from San Francisco can profitably avail themselves of the services of such agent. Mrs. M. E. Hoag, wife of J. C. Hoag, of the WATCHMAN, will hereafter give her attention to this branch of business, and parties can rely on being fairly and honorably dealt with. Lady readers who contemplate visiting the city would do well to secure the services of Mrs. Hoag to chaperone them in their shopping excursions. Tricks of the trade can be guarded against, and many a dollar saved. Address 204 McAllister St.

BRO. WM. PIERRIE, P. M. W. of Occidental, has associated himself in business with Mr. John McHugh, this season, and rented the Beale street warehouse, at the foot of Beale street. This favorite and popular brick warehouse, together with care and attention to their patrons, has given them a very successful season. The patronage has been so large that it has induced them to take another warehouse near the depot. They are reliable men to do business with, and any matters entrusted to their care in the way of insurance, advances, shipping, etc., will be be done promptly, safely, and at the lowest rates.

BRO. JOHN R. WILLIAMS, P. M. W., manufactures what is known as the Little Gem, which is recommended in the highest terms as an anti-bilious medicine. In Stockton, where he is located, the sale of the Little Gem is quite extensive. What is quite unusual, Bro. Williams authorizes his agents, leading druggists in all parts of this State, to refund the price if it does not prove a satisfactory remedy for chills, fever, intermittent fever, fever and ague, night sweats, sallow skin, and diseases resulting from a disordered stomach or liver.

A CO-OPERATIVE Watch Repairing Co. has been opened at 331 Kearny St., up stairs. This association of experienced and practical mechanics with improved machinery, have facilities to do all kinds of manufacturing and repairing in the most skillful manner. Bro. T. H. Lord, organist of Valley, is the Secretary and general manager. He is familiarly known as an honest and reliable workman in his profession.

BRO. WM. H. PORTER, as successor of the firm of Lockhart & Porter, will continue for the present at the old stand, 16 O'Farrell street. Bro. Porter has lately had shipped from the East a fine stock of undertaker's goods, and as an embalmer and funeral director, with his able corps of assistants he meets the wants and desires of his patrons. He has no connection with any undertaking establishment other than at 16 O'Farrell, where he has been for the past six years.

BRO. A. J. BORDENAVE, the popular restaurateur, 24 Geary street, will give you a French dinner for 25 cents. Give him a call.

List of U. S. Patents for Pacific Coast Inventors.

From the official list of U. S. Patents in DEWEY & Co.'s SCIENTIFIC PRESS PATENT AGENCY, No. 252 Market St., S. F.

FOR THE WEEK ENDING NOVEMBER 22, 1881.

249,869.—SULKY PLOW—Geo. Applegate, Yoncalla, Ogn.
249,890.—SULKY PLOW—L. Brown, Waitsburg, W. T.
249,901.—CHURN—A. H. Cookling, Vallejo, Cal.
249,921.—FLAX-PULLER—S. W. Gaines, Scio, Ogn.
249,764.—WINDOW SCREEN ATTACHMENT—B. T. Herold, Stockton, Cal.
249,973.—DISH-WASHING MACHINE—W. C. Nelson, Santa Rosa, Cal.
249,791.—AMALGAMATOR AND CONCENTRATOR—C. W. Patten, S. F.
249,995.—MACHINERY FOR CONVEYING AND CRUSHING ORE—J. Richards, S. F.
249,996.—PNEUMATIC MACHINERY—J. Richards, S. F.
250,015.—ORE-ROASTING FURNACE—Jas. M. Thompson, San Francisco.
249,814.—RUNNING GEAR FOR VEHICLES—E. Whitmore, San Francisco.
250,027.—DRAW BRIDGE—E. A. Wible, Brighton, Cal.

NOTE.—Copies of U. S. and Foreign Patents furnished by DEWEY & Co., in the shortest time possible (by telegraph or otherwise) at the lowest rates. All patent business for Pacific coast Inventors transacted with perfect security and in the shortest possible time.

Treatment of Infants.

From the moment a child is born, he is treated on the principle that his instincts are essentially wrong, that nature must be thwarted and counteracted in every possible way. He is strapped up in a contrivance that he would be glad to exchange for a strait-jacket, kept for hours in a position that prevents him from moving any limb of his body. His first attempts at locomotion are checked; he is put in leading-strings, he is carefully guarded from the out-door world, from the air that would invigorate his lungs, from the sports that would develop his muscles. Hence, the peevishness, awkwardness and sickliness of our young aristocrats. Poor people have no time to imitate the absurdities of their wealthy neighbors, and their children profit by what the model nurse would undoubtedly call neglect. Indian babies are still better off. They are feed on bull-beef, and kicked around like young dogs; but they are not swaddled, they are not cradled, and are not dosed with paragoric; they crawl around naked, and soon learn to keep out of the way; they are happy, they never cry. If we would treat our youngsters in the same way, only substituting kisses and bread for kicks and beef, they would be as happy as kids in a cloverfield, and moreover they would afterward be hardier and stronger. Every week the newspapers tell us about ladies tumbling down-stairs and breaking both arms; boys falling from a fence and fracturing their collar-bones. From what hight would a young Comanche have to fall to break such bones—not to mention South-Sea Island children and young monkeys? The bones of an infant are plastic: letting it tumble and roll about would harden the bony tissue; guarding it like a piece of brittle crockery makes its limbs as fragile as glass. Christian mothers reproach themselves with neglecting their duty to their children if they do not constantly interfere with their movements, but they forget that in points of physical education nature herself is such an excellent teacher that the apparent neglect is really a transfer of the pupil to a more efficient school.—*Dr. Felix L. Oswald, in Popular Science Monthly.*

The Difference Between a Cyclone and a Tornado.

The difference between a cyclone and a tornado is defined by Mr. William Ferris, of the United States Coast Survey, to be this: A cyclone is usually a broad, flat, gyrating disc of atmosphere, very much greater in width than altitude; a tornado is a column of gyrating air, the altitude of which is several times greater than its diameter. Cyclones are born of conditions extending over large areas; tornadoes depend rather upon the vertical relations of the atmosphere, and occur when, owing to local changes of temperature, the under strata of air burst up through the overlaying strata. The enormous velocities of the ascending currents of tornadoes are supposed to be caused by the difference between the gyrating velocities above and those on the surface. It is these ascending currents which carry up the vast bodies of water afterward precipitated in the form of a deluge of rain. The water is sometimes kept from falling by the ascending currents, and is often projected outside the area of the tornado, when it falls in a gentle shower over a larger area. When the weight of the water overbears the force of the ascending currents, there occurs the tremendous fall of rain known as a cloud-burst. When the area of a tornado is very small, a land-spout or a water-spout may be formed, according as it is over land or water. The width of these spouts ranges between 2 ft. and 200, and their hight from 30 to 1,500 ft. A white squall is an invisible spout, formed when the dew point is low. The accompanying cloud is invisible because of its hight, but below there is a raging and boiling sea, with a gyrating current of air above it. Land-spouts and water-spouts are hollow.

"WHAT can I do for you to induce you to go to bed now?" asked a Lowell mamma of her five-year-old boy Monday evening. "You can let me sit up a little longer," was the youngster's reply.

"Sound It Along the Line."

Ever onward and upward is the motto of the A. O. U. W., and with the success of the Order is the WATCHMAN'S progress. There are, however, some Workmen who are not subscribers, and we wish to draw *their* attention to the merits of our journal. Those of our readers who have been with us from the start, and also those who have come later, can do much to not only aid our enterprise, but also that of our organization. They have been with us, seen our work, and can best tell whether the WATCHMAN has not been an earnest advocate of the Order's interests.

Members of the A. O. U. W. have a pecuniary interest, which renders an able exponent of their rights and privileges of paramount importance. Therefore, every member of the Order should take the paper, read it, and if he has some friend who is morally and physically qualified, lend him the paper for the purpose of hastening action.

Members of the WATCHMAN family who have felt strength and received encouragement from a perusal of the Order's doings in its columns would do well, also, to pass it occasionally around to the lukewarm, that they may be partakers in the faith which moves them.

The privileges we now enjoy by reason of our membership will last while life is in us, and when we are gone others will be ready to fill our places. If the Order should ever perish, lukewarmness will be the rock upon which we will split, and one of the greatest preventives of this will be the enthusiasm that is kept alive by a careful reading of the WATCHMAN.

We will send copies free for samples to those who are willing to assist in the circulation of our paper.

Business Offices and Sunny Rooms to Let.

We have some desirable rooms to let adjoining th offices of this paper which will be rented on favorable terms. Stair entrance, No. 252 Market St. Elevator, No. 12 Front St. Parties wishing offices, etc., will do well to call and see them. DEWEY & CO.

BRO. W. J. HORNE'S electro-magnetic belt is gaining in popularity as one of the great remedial agencies for the cure of disease and restoring vitality to the system. Having had a personal experience, and the testimony of a number of prominent citizens in this city as to the benefits from using this improved electro-magnetic belt in chronic disease and imparting vitality and vigor to the body and mind, we cordially recommend it. He also manufactures the elastic truss, that is superior to those made with steel bands. His office is 702 Market street.

DESTROYING BUGS IN MILLS.—Alum water is recommended for preventing bugs and worms from infesting flouring mills. Take two pounds of alum and place it in three quarts of warm water (or in that proportion), and let it stand on the stove until the alum disappears. Apply while hot, with a brush, to the crevices of the bolting machine and other places that conceal the insects. Alcohol or turpentine should not be used in sponging off bolting cloth, as they dissolve the sizing.

MESSRS. Cadien & Bagley, leading clothiers of Stockton, have manufactured for them what is known as Anti-Rheumatic flannel, which they make into underwear in stock or to order. These goods are especially adapted to invalids and persons of reduced vitality. Our genial brothers are reliable men, and any orders will be promptly filled and goods sent by Wells, Fargo & Co., C. O. D.

BRO. ALEX. MACKEY, since his removal to his new store, 715 Market street, has opened a very large and well selected stock of carpets, etc., which he is selling at bottom prices. His experience is the history of what square dealing and attention to business will do for that class of merchants in this city.

BRO. MARKE E. LEWIS, a charter member of Golden Gate, and son of E Lewis, P. M. W. of the same Lodge, has opened a boot and shoe store in Sacramento, on J street, between 4th and 5th.
